The complaint charges that the effect of NBC's behavior has been to suppress competition in the production of television programming (Complaint, ¶ 19(b)). But even assuming that NBC has inexplicably chosen to suppress competition among its suppliers (and, hence, to drive up the price it must pay for programs), the CIS fails to explain how the decree will enhance such competition and ignores the possibility that it will actually suppress it by limiting NBC's status as a potential competitor in the production of programming and by increasing the financial risks borne by small or potential producers.

The complaint alleges that NBC has "control[led] the prices paid by NBC for television exhibition rights to motion picture feature films" (Complaint, ¶ 17(d)). Even assuming that it is wrong for NBC to stop buying feature films when the price for them is too high, nothing in the decree requires NBC to buy feature films at prices it deems too dear; this is again a point on which the CIS is silent.

The Government alleges that the networks are forcing program suppliers to "deficit finance" the programs they produce.† The decree will not only not remedy the "problem", but will, as the Fisher Affidavit states, actually "reduce the flow of funds from the network at

*But *see* Fisher Affidavit at 2a, n. 1, *infra*; Posner Affidavit at 73a-75a, *infra*.

†Memorandum of the United States in Opposition to Defendants' Motions for Summary Judgment on the Sherman Act Claims, dated January 19, 1976, at 10, 20.

the early stages of production and broadcast" and thus exacerbate the alleged evil of "deficit financing".*

As noted above, the Government apparently attaches importance to the decline in advertiser-supplied programming, but there would appear to be nothing in the decree, and the CIS does not claim that there is, which will encourage advertisers to reenter the program supply business or increase their chances of success should they try. The factors which the FCC has cited as explaining the decline in advertiser-supplied programming are certainly not affected by the decree; the costs of producing programming as well as the costs of network advertising time will not be reduced by the decree. Indeed, they may be increased since the suppression of competition among program suppliers that will result from the decree will presumably lead to even higher program costs and prices which will in turn lead to higher costs and prices of network advertising time.

Finally, the Government has charged that NBC insists on a high rate of program clearance by its affiliates,** but there is not a single provision in the decree even mentioning much less affecting NBC's relationship with its affiliates, and the CIS understandably does not claim any such effect.

In sum, the decree is a mass of highly complex relief in search of a logical relationship to the harm it is intended to remedy. The CIS does not aid in that search. Indeed, it repeatedly suggests that the "harm" to be remedied is illusory.

*Fisher Affidavit at 15a, *infra*. As Professor Fisher explains (*id.* at n. 14), "to some extent the proposed decree tracks the FCC financial interest rule. 47 C.F.R. § 73.658(j)(ii). There is good reason to believe that that rule has had precisely the effect that I suggest [*i.e.*, increasing deficit financing]. Thus, Edward A. Montanus, Vice President of MGM-TV, is quoted in Exhibit 4(a) (p. 52) of the affidavit of Bernard M. Hollander, sworn to January 19, 1976, as follows:

> 'When the networks were allowed to invest in shows for a minority interest, they assumed much of the burden that represents our deficit financing today.'

See also Crandall, *FCC Regulation, Monopsony, and Network Television Program Costs*, 3 BELL JOURNAL OF ECONOMICS AND MANAGEMENT SCIENCE 483 (1972)." (This article is annexed as Ex. 2 to the Fisher Affidavit at 33a-58a, *infra*.)

**Plaintiff's Supplemental Statement of Genuine Issues, served May 21, 1976, at 5.

Conclusion

For the foregoing reasons, CBS urges that the proposed decree should not be entered.

APPENDIX A

AFFIDAVIT OF FRANKLIN M. FISHER

STATE OF NEW YORK,)
) ss.:
COUNTY OF NEW YORK,)

FRANKLIN M. FISHER, being duly sworn, deposes and says:

I am a Professor of Economics at the Massachusetts Institute of Technology. My curriculum vitae, including a list of the books and articles I have written, is set forth in Exhibit 1.

I have been asked by counsel for CBS Inc. to analyze the probable economic impact of the proposed consent decree submitted to the Court in United States v. National Broadcasting Company, Inc. on November 17, 1976. I have also been asked to assess the Competitive Impact Statement ("CIS") filed by the Government with the proposed decree. In carrying out that analysis and assessment, I have taken into consideration numerous studies, articles, reports and other materials relating to the production, procurement and distribution of television entertainment programming, including reports of the Federal Communications Commission ("FCC"), industry and trade publications, interviews with executives in the broadcasting, program production and advertising industries, testimony of program suppliers and others engaged in those industries, and the pleadings, affidavits and other

materials filed in United States v. NBC and the companion actions against ABC and CBS.

I have reached the conclusion that the proposed decree would tend to diminish competition. I have also concluded that the CIS fails to describe the competitive impact of the proposed decree.

Introduction

As in any market, there are two aspects of competition to consider: competition among sellers and competition among buyers. If NBC has any power in the market for television entertainment programs purchased by networks, it is surely power that it has as a buyer.[1] Indeed, it is that power which is stressed by both the Complaint (¶¶ 7, 10) and the CIS (at 3, 4-5). NBC is indisputably a

1. For purposes of this affidavit I shall generally assume that the market definition of the Government complaint makes sense and that it is appropriate to define the relevant market as consisting of "the trade and commerce in television entertainment programs exhibited on the NBC Television Network during prime evening hours" (Complaint ¶¶ 16, 17).

It should be noted, however, that such a narrowly drawn market--excluding as it does programs sold to ABC and CBS--makes no sense whatever for purposes of economic analysis since it is clear that ABC, CBS and NBC are in competition with each other not only for audiences and advertising revenues, but also for programs which attract audiences and thus earn advertising revenues. Indeed, the decree (Paragraphs VII and IX) and the CIS (at 14) proceed on the supposition that NBC is in competition with ABC and CBS and should not be "placed at a competitive disadvantage with respect to CBS or ABC".

major buyer. It acquires rights to approximately one-third of the entertainment programs carried by the three television networks and, obviously, rights to all of the programs carried by NBC.

On the other hand, NBC's share of any market as a producer of such programs is quite small and has steadily declined over the past twenty years. In 1974-75 NBC-produced programs amounted to approximately 4.2% of the prime time entertainment programs carried by NBC and approximately 1.4% of the total carried by all three networks.[2] With either of those market shares, it is impossible to believe that NBC has monopolized or poses a credible threat of monopolizing the production of television entertainment programs. Indeed, if the Government is correct in asserting that NBC as a buyer of programming has been able to drive suppliers to the wall and leave them "hanging on by a slender thread"[3]--in other words, if NBC can drive the price it pays down to the barest minimum needed to keep suppliers in business--it is hard to

2. See Affidavit of J. Marshall Wellborn, sworn to November 25, 1975, submitted in support of NBC's Motion for Summary Judgment on the Sherman Act Claims.

3. According to the Government, NBC has inflicted "undue hardship" on program suppliers by not giving them "payment commensurate with the success" of their programs. Memorandum of the United States in Opposition to Defendants' Motion for Summary Judgment on the Sherman Act Claims, dated January 19, 1976, at 10, 20.

see how NBC could obtain any additional advantage by monopolizing the production of programming for NBC. That is, if, as the Government asserts, NBC can force "deficit financing" on its suppliers, there cannot be any advantage to NBC in making those deficits its own. Nor is it credible that NBC would monopolize the production of television programs for NBC in order to be able to drive up the price it must pay as a buyer of television programming.

It must be recognized that, notwithstanding the allegation of the complaint that NBC has sought to suppress competition among the suppliers of television programming to NBC, it cannot possibly be in NBC's interest to suppress competition among its suppliers either by monopolizing the production of programming or by any other means. Doubtless NBC, like any other buyer, seeks to pay the lowest possible price to its suppliers; but, like any other buyer, NBC can achieve that end by stimulating competition among its suppliers and not by suppressing such competition.

Given NBC's insubstantial position as a producer of programming and its interest in maximizing competition among its sources of supply, and in light of the focus of the complaint and CIS, one would have expected the proposed consent decree to focus on NBC's alleged power as a buyer. Strangely, the proposed consent decree is not designed to augment the competitive constraints to which NBC is subject as a buyer;

if, as the complaint alleges, NBC were a monopsonist (i.e., a monopolist buyer) before the decree, it would be a monopsonist after the decree. Instead of dealing with NBC's alleged monopsony power, the decree seems calculated to diminish competition among program suppliers, as I show more fully below. Although such a restriction of competition among suppliers might tend ultimately to increase their bargaining power and thus might result in a transfer of income from NBC to certain of its suppliers, shifts of that sort do not increase competition at any level and do not serve the public interest in economic efficiency that a procompetitive policy is designed to foster.

To bo sure, at one time or another restrictions on competition among suppliers have been fostered by a variety of Government programs including, for example, the National Industrial Recovery Act, the Agricultural Adjustment Act, and the National Labor Relations Act. But the Sherman Act is not of that sort. The policy of preserving and promoting competition as the governing mechanism of the market place simply cannot be served by suppressing competition among sellers to counterbalance a real or supposed absence of competition on the buying side. Stating the matter differently, the bargaining between buyer and seller, however intense, is not a species of competition.

To put it simply, one can either seek to stimulate

competition among sellers (and thereby drive down price) or one can seek to increase the remuneration that sellers receive (by driving up price), but one cannot increase sellers' remuneration by stimulating the competition among them. In so far as the Government's goal is to increase the remuneration of program suppliers, the decree may well achieve that goal, but it will do so only to the extent that it suppresses competition among them.

For the reasons set forth below, I believe that the decree would, in fact, tend to reduce competition among program suppliers. Inasmuch as the Government's complaint charges that NBC has, inexplicably, pursued the self-defeating course of restricting competition among its suppliers, it is particularly strange to submit a decree which would itself operate to restrict such competition.

1. The Proposed Decree Would Restrict Supply.

Paragraphs V(A) and (B) of the decree severely restrict the extent to which NBC may produce its own programs. This restriction reduces the number of sources of supply of programs competing to be purchased by television networks. If an existing independent supplier (such as MCA or Warner Bros.) or a potential supplier were so restricted, the adverse effect on competition would be perfectly obvious. But there is no practical difference between restricting NBC

as a supplier and restricting any other supplier. NBC's ability to produce simply provides another source of supply to which it can turn, and it thereby contributes to competition among program suppliers by providing an incentive for them to sell to NBC at as low a price as possible lest NBC increase its internal production. The case would be precisely the same if there were a wholly new, independent source of programming with NBC's production capacity. The existence of such a source would contribute to competition among existing program suppliers by providing an incentive for them to sell to NBC at as low a price as possible lest NBC expand its purchases from the new company. In either case, removal of such an incentive is anticompetitive. Furthermore, the elimination of NBC as a competitor cannot be viewed as forestalling predation since not only is NBC now producing a miniscule part of its own requirements but also, as I have indicated above (pp. 3-4), it is impossible to suppose that NBC would seek to drive its suppliers out of business in order to monopolize the business of producing for itself.

Restricting NBC's production not only restricts the supply of television programs carried by NBC but also restricts supply in the market for network television programs generally (or, in terms of the markets alleged by the Government, in the markets for network television programs shown on CBS or on ABC). This is so because all three networks face a common supply of programs.[4] The aggregate demand of the three networks is undiminished by the decree (i.e., they will each remain free to schedule approximately 3 hours of programming per night and 21 hours per week), but the potential supply to meet that demand is decreased. This necessarily causes an effective reduction in the supply of programs available to CBS and ABC as well as NBC.[5]

The impact of the decree's restriction on NBC's production is economically significant even though NBC has not recently been a substantial producer of television programs. Indeed, even if NBC produced nothing, its status as a potential producer standing in the wings, with the capacity to produce and a vital interest in the adequacy of supply, would have a significant procompetitive impact.

4. Exhibit 7 to the Affidavit of Robert S. Rifkind, sworn to November 18, 1975, submitted in support of CBS's Motion for Summary Judgment on the Sherman Act Claims. That exhibit, which has not been challenged by the Government, shows for the 1970-71 through 1974-75 television seasons that 67 firms supplying approximately 63% of the three networks' prime time entertainment programming supplied at least two of the three networks and that 24 firms supplying approximately 57% of the total supplied all three networks.

5. The fact that the decree does not prevent NBC from selling to CBS or ABC is not of any practical consequence. No network could afford to depend on its close rival for any part of its regularly scheduled programming. It is easy to imagine the dilemmas that would arise if NBC were the supplier to CBS of a highly successful series such as "All In The Family".

The proposed decree would eliminate NBC as a potential entrant. It must be noted, moreover, that the Government seeks the elimination not only of NBC but also of CBS and ABC as program suppliers.[6] Thus the reduction in supply or potential supply contemplated by the proposed decree would appear to be significant.

In view of the inherent anticompetitiveness of eliminating a supplier or potential supplier, I would have expected a statement assessing the "competitive impact" of the proposed decree to consider the obvious anticompetitive effects of the decree's production limitation. The CIS does not begin to analyze this important subject, however.

2. The Decree Will Not Affect NBC's Alleged Status as a Monopsonist But Will Tend to Increase Concentration in the Supply Industry.

I have shown above that the effect of Paragraph V of the proposed decree will be to diminish competition among program suppliers by removing NBC as a supplier and that the decree is thus inconsistent with a procompetitive public policy. Also inconsistent with such a policy are the provisions of the decree that seek to alter the terms on which NBC may deal with program suppliers. For example, under the decree a producer may not, when selling to NBC the network broadcast right to the initial episodes of a series, also sell to NBC the right to repeat network showings in subsequent seasons of more than three of those episodes[7] or the right to carry a program for more than four years[8] or the right to the exclusive broadcast use of a program throughout its network run.[9] Such an alteration by fiat of the terms of trade between networks and program suppliers will not alter NBC's alleged status as a monopsonist and indeed may well have the effect of further increasing concentration and restricting competition in the supply industry.

I find nothing in the proposed decree that would enhance the competitive constraints to which NBC is subject as a buyer. Such competitive constraints can only be imposed by NBC's actual or potential competitors in the purchase of programming--i.e., other buyers, including, particularly, CBS and ABC. But there is nothing in the decree that affects NBC's relationships with CBS and ABC. Indeed, the Government specifically states that the decree is designed "to prevent [NBC] from being placed at a competitive disadvantage with respect to CBS or ABC" (CIS at 14). The Government's proposed alteration and regulation of the terms on which NBC may

6. See Paragraph VII of the proposed decree.

7. Paragraph VI(H).

8. Paragraph VI(E)(i).

9. Paragraph VI(E)(ii)(a)-(c).

deal with its suppliers does not increase competition among the buyers of network programming.

Indeed, since the decree does not increase such buyer's competition, it cannot affect any power NBC might have over the price it pays its suppliers, except to the extent that it suppresses competition among them. So long as NBC's suppliers compete with one another, they will bid the price of the rights they sell down to a competitive level, and NBC will pay a competitive price for those rights. When told that it can no longer buy all the rights it used to buy, NBC will pay less for the rights it continues to buy because it will be getting less. The suppliers, competing for NBC's favor, will accept less from NBC because they are getting more elsewhere. Indeed, the reduction in what NBC pays will be equivalent to the value to the supplier of the rights the supplier may no longer sell to NBC. The value to the supplier of those rights will be no greater than the value it received when it sold these rights to NBC since, by hypothesis, NBC bought the rights at a competitive price.

In sum, the effect of limiting the rights that NBC can buy from those suppliers will be to reduce, by the value of those rights, what NBC will pay to the suppliers, irrespective of whether NBC is a monopsonist or not. The decree's alteration of the terms of trade will enhance the aggregate remuneration of the suppliers only to the extent that it reduces competition among them. I show later that it is likely to do precisely that.

To say that the alteration of the terms of trade will not increase the competitive constraints to which NBC is subject as a buyer is by no means to say that the provisions of the decree that effect this alteration are economically irrelevant. Indeed, a decree which restricts the rights that may be bought and sold might in itself be though a restraint of trade. Obviously certain restraints of trade--such as an agreement to buy a barber shop only if the seller agrees not to open a new barber shop across the street--may be needed for the functioning of the market. But I foresee no such effects from this decree's restrictions; on the contrary, there may well be further harmful effects.

For example, to preclude program suppliers, when selling to NBC network broadcast rights to the initial episodes of a series, from also selling NBC the right to repeat network showings in subsequent seasons of all such episodes would not seem to serve any procompetitive purpose where NBC perceives a popular demand for additional broadcasts. If a network wants to pay for such repeats because it believes it will have an audience for them, and if the supplier is willing to sell the right to such repeats, how will competition be promoted by forbidding such a transaction?

Moreover, such a restriction could be affirmatively harmful in at least two respects. First, if a network, at the time it contracts to buy original episodes, cannot also contract to buy repeats, it will pay less for what it is getting in the original transaction.[10] Since it will be paying less at a time when the program supplier is incurring production costs, the result will be artificially to force back on to the program supplier the risk that the value of the repeats will prove to be little or nothing because the show has had little or no success. If the show is successful, the supplier will win, if unsuccessful he will lose, but he will in any case be forced to accept the gamble and deeper "deficit financing". Second, the prohibition on the purchase of repeat rights will, as a practical matter, preclude a network from abandoning the current practice of running original and repeat episodes in the same year in favor of running, for example, only originals in the first year and only repeats in the second. Since such a pattern would be extremely expensive in the first year, it would be commercially feasible only if the network knew at the outset that the second year would be correspondingly inexpensive so that the aggregate cost would be approximately the same. The decree, however, would preclude such a new pattern for running repeats and would essentially lock the networks into the present pattern. Thus, they would be prevented from trying to compete with one another by organizing their program formats in novel ways.

One might as well tell an author that he cannot sell the right to the publication of more than 5,000 hard cover copies of a book, even though he has a publisher who wants to pay for the right to print 10,000 copies. Even if such a restriction would accelerate reissue in paperback, it hardly helps the author to realize the maximum value from his work in his dealings with the publisher or the publisher to employ his resources in the manner he deems most efficient.

Similarly, it is hard to see the economic utility of the provision in the decree proscribing the sale of an option for more than four years.[11] By forcing program suppliers to sell fewer years "up front" and thus to be paid less "up front",[12] this provision would force them to take

10. An option to run repeats of a series in future years obviously has a present value and that value necessarily affects the level of "up front" network payments for outline, script, pilot and the initial episodes of a series.

11. Paragraph VI(E)(i).

12. The option to run a series in future years, just like the option to run repeats discussed above, has a present value that affects the level of "up front" payments for outline, script, pilot and the initial episodes of a series. Thus, to limit the number of options for future years of a program that may be sold will have the effect of reducing these "up front" payments.

the risk that the rights to the fifth and later years, which they can no longer sell at the outset, will be worth little or nothing because the program has had little or no success in the earlier years. In short, they would be substantially restrained in seeking to lay off their risks. By comparison, authors selling books to publishers are not forbidden from selling at the outset the right to keep the book in print after four years. Such a prohibition might ultimately enrich the authors of books that turned out to be long-lived best sellers, but it would surely reduce the incomes of the rest.

In general, it may be said of the decree's proposals concerning the terms of trade that they will tend to reduce the initial funding that program suppliers will receive from the networks. In light of the Government's assertion that so-called "deficit financing" by producers is an evil to be eliminated,[13] the decree's alteration of the terms of trade in a fashion that must reduce the flow of funds from the network at the early stages of production and broadcast is particularly odd since it will exacerbate the alleged evil.[14]

13. Memorandum of the United States in Opposition to Defendants' Motions for Summary Judgment on the Sherman Act Claims, dated January 19, 1976, at 10, 20.

14. I recognize that to some extent the proposed decree

The most important result of the alteration of the terms of trade by the proposed decree may be a substantial increase of concentration and restriction of competition among program suppliers. Under the proposed decree, program suppliers will have to find alternative means of realizing the value of the rights they are prohibited from selling to the networks. In principle, the suppliers will have to decide whether to sell those rights at the outset or to hold them for later exploitation. The latter course necessarily involves assuming the risk that the rights will prove to be of little or no value because the program has enjoyed little or no popularity. It also necessarily involves deferring for some appreciable period of time cashing in on whatever value those rights may have.

Some suppliers may be happy to assume those risks

tracks the FCC's financial interest rule. 47 C.F.R. § 73.658(j)(ii). There is good reason to believe that that rule has had precisely the effect that I suggest. Thus, Edward A. Montanus, Vice President of MGM-TV, is quoted in Exhibit 4(a) (p. 52) of the affidavit of Bernard M. Hollander, sworn to January 19, 1976, as follows:

> "When the networks were allowed to invest in shows for a minority interest, they assumed much of the burden that represents our deficit financing today."

See also Crandall, "FCC Regulation, Monopsony, and Network Television Program Costs", 3 Bell Journal of Economics and Management Science 483 (1972). This article is appended to this affidavit as Exhibit 2.

and be financially capable of deferring the receipt of cash. Others may be either unwilling or unable to do so. This group is likely to include suppliers "yet unborn" who will be deterred from entry by the necessity of bearing increased risks. It would also include those already in the industry who are financially weak or risk averse, such as new, independent producers struggling to establish themselves. Such producers will presumably seek new buyers for the rights they can no longer sell to the networks. If they fail to find buyers, they may go out of business, either because they are unwilling to gamble on the success of their programs or because they will lack the financial resources needed to produce programs of a quality that will compete successfully. In either case, the result will be to concentrate production in the large, well-established firms, notably the major motion picture studios (some of which are subsidiaries of large conglomerates) which already enjoy the lion's share of the production business (as explained more fully below).

If producers do find buyers for these rights, who are the buyers likely to be? Three principal buyers--the three networks--will have been forced out of the market by the NBC decree and its counterparts. The most likely alternative buyers are the firms that are already in the business of acquiring such rights--again, the major studios. It is

extremely doubtful that any procompetitive purpose would be served by forcing the financially weaker producers to seek financing from their competitors by forbidding them from obtaining financing from their customers.

It must be noted that the major studios (Universal, MGM, 20th Century-Fox, Warner Brothers, Paramount, Columbia Pictures) already occupy a large share of that market, with Universal in particular supplying a very high share of the programs carried by NBC.[15] Whatever the relationship between concentration and competition, it is odd that the Government should propose a decree in an antitrust suit that promotes concentration among program suppliers, particularly where the Government contends that competition among those suppliers has been restrained. Concentration resulting from the superior skill, foresight and industry of some competitors is one thing; concentration procured by fiat is quite another; and concentration resulting directly from a decree ostensibly

15. Appended to this affidavit as Exhibit 3 is a chart that appeared in Variety on September 15, 1976, which identifies the suppliers of regularly scheduled, network prime time programs for the current 1976-77 season. (While this chart does not also identify the suppliers of the eleven and one-half hours per week of movies carried by the networks, it is commonly known that such programming, which this season constitutes over 18% of the networks' prime time entertainment schedule, is supplied mainly by the major Hollywood studios.)

intended to enforce the antitrust law is simply absurd.

I have carefully reviewed the CIS to see whether it deals with the prospect that the shifting of risks resulting from the decree's restrictions on the terms of trade will increase concentration and restrict competition among program suppliers. As stated, the CIS is completely silent on this question as on most questions having to do with competition rather than with protection of suppliers.

Conclusion

The focus of the decree and the CIS suggests that the Government's principal concern is in assuring producers a "reasonable" price for their goods. That can only be achieved by substituting a regulatory regime for a competitive market because under competition goods change hands at the market price--and not at a price that can be said by the Government to be abstractly "fair" or "reasonable". The decree serves the Government's apparent purposes to the extent that it substitutes regulation for competition. But regulation seldom succeeds in achieving the same desirable allocation of resources that results under competition. Indeed, there are usually inherent economic inefficiencies in regulation, not the least of which are the costs, burdens and delays of administering the regulatory regime.

The provisions in the proposed consent decree which are supposed to affect competition will be likely to decrease the very competition which the complaint claims NBC has, inexplicably, restrained, namely the competition among program suppliers. The decree will reduce the number of actual or potential suppliers of programs and the total supply of programs. Further, by restricting what producers may sell and networks may buy, the decree will not alter NBC's alleged status as a monopsonist but will probably lead to greater concentration in the production of programming and impair the ability of new, weak or risk-averse program suppliers to compete with the large, established studios.

FCC regulation, monopsony, and network television program costs

Robert W. Crandall
Associate Professor of Economics
Massachusetts Institute of Technology

In this paper, a television program cost function is derived from a simple model of network rivalry based upon the Cournot postulate. This cost function is then fitted to data from a cross section of new network entertainment series for 1960–1965. The resulting estimates are quite unfavorable to two different aspects of FCC policy towards television broadcasting.

First, the Commission's implicit attempt to create monopoly profits for networks and their affiliates in entertainment programming for the purpose of subsidizing nonremunerative "public interest" programming is shown to be extremely inefficient. As much as two-thirds of entertainment program costs are simply rents paid to star performers and other inputs to the program production process—rents which derive from the Commission's allocations policy.

Second, the Commission's recent decision to bar network investment in non-network rights to programs first exhibited on their interconnected stations is demonstrated to be unnecessary. The Commission has enunciated this policy in its recent Prime Time Rule in order to protect program suppliers from monopsonistic exploitation by the networks. But the cost-function estimates show that the networks have paid their suppliers the economic value of the non-network rights obtained in the initial bargaining process. The only effect of prohibiting network investment in these ancillary rights is to limit the ability of suppliers to sell risky assets.

1. Introduction

The Federal Communications Commission's recent admission that it is unable to regulate interstate common carriers of communications services may strike the casual observer as shocking, but it is no more than a candid admission of the problems facing this commission and others as they attempt to render precise judgments about market relationships which they cannot measure. Whether it is the Federal Power Commission regulating the supply of natural gas,[1] the Interstate Commerce Commission regulating surface transportation,[2] or the FCC regulating television broadcasting, a common problem looms. Without precise empirical knowledge of price-cost relationships, these regulatory bodies must sit as puzzled arbiters of conflicting claims made by various private and public interest groups.

One might think that the FCC requires little precise knowledge about television markets, since it does not regulate the networks' or stations' profits directly by limiting the prices charged to advertisers or by prescribing a minimum output level. Rather, the Commission focuses upon performance in "the public interest," which is variously defined as providing the maximum diversity or quality of television programming. But price-cost relationships are no less important in this pursuit than in the attempt to regulate common carriers, for the Commission has followed a policy of subsidizing nonremunerative "public-service" programming by protecting local stations and networks from new sources of competition. Severe restrictions upon "pay" television,[3] limitation on the growth of cable television activity,[4] and even quantitative restrictions upon network broadcasting during prime time are enacted principally to protect local television stations from an erosion in their profits—profits which the Commission wishes to see devoted in part to public-service programming. But most restrictions upon competition at the local level result in the limitation of the number of national networks as well, for it is the paucity of local affiliates which has prevented entry into network broadcasting for two decades.

Unfortunately, what has not occurred to the Commission is the possibility that its attempt at cross-subsidization has largely failed and that it has simply conferred large rents upon performers and other persons involved in producing network entertainment programming. Nonprice rivalry among networks and local stations is likely to result in dissipation of the monopoly rents which the Commission wishes to allocate to public service programming, with the result that viewers are forced to contribute to the high salaries of television celebrities by sacrificing popular programming choices.

The most recent indication of the Commission's failure to grasp the nature of competition and nonprice rivalry in network broadcasting and program supply is to be found in its 1970 Prime Time Rule.[5] This decision limits network broadcasting in "prime time" (7:00 P.M. to 11:00 P.M., Eastern time) to three hours per day in the nation's largest 50 markets and prohibits network investment in subsequent non-network distribution of programs first exhibited on national television. The latter prohibition is designed to protect program suppliers from network monopsony power, but the FCC

Robert W. Crandall received the B.A. degree in economics from the University of Cincinnati (1962) and the M.S. and Ph.D. degrees in economics from Northwestern University (1965 and 1968, respectively). Dr. Crandall is currently Associate Professor of Economics at M.I.T. and serves as a consultant to the Urban Institute in Washington, D.C. In addition to his continued research in cable television broadcasting, he is developing an econometric model of labor markets.

Research support for the empirical research reported in this paper was provided by a Post-Doctoral Fellowship in Public Utility Economics granted by the American Telephone and Telegraph Company. Additional support was provided by the Department of Economics at M.I.T. The data utilized in this paper were made available by the three network companies, but the conclusions reported herein are those of the author and do not necessarily reflect the opinions of the networks. Generous advice on matters of econometric estimation was provided by Professor Franklin M. Fisher, but responsibility for all errors remains with the author.

[1] See Macavoy [4] for a rather gloomy appraisal of the FPC's performance.

[2] Among the almost universally critical studies of the ICC, the most recent to criticize it has been that of Levin [2].

[3] The Commission's attitude toward pay television is chronicled in the many documents generated under F.C.C. Docket 11279.

[4] See final Cable Television Decision [6].

[5] See *Report and Order* [9].

has no evidence that such power actually exists.[6] Even more troubling is the Commission's discussion of program "costs" in defending its rule-making, for there appears to be little recognition that these expenditures are not exogenously determined social opportunity costs.

Clearly, if the FCC is to pursue its policy of cross-subsidization, it could benefit considerably from careful research into the nature of network and local station rivalry and the determinants of programming expenditures. This paper represents a modest start in that direction, for in it we seek to provide an econometric estimate of a network program cost function by utilizing actual cost data from the three national commercial networks for 1960-1965.[7] Included in the program cost function are variables which measure the extent of network investment in non-network exhibition rights of programs first shown on the networks. The regression coefficients for these variables may be compared with financial returns from program distribution in order to determine the extent to which networks exercise monopsony power over their suppliers. In addition, we are able to derive from these regressions estimates of the magnitude of the economic rents which are siphoned off by performers and other inputs to the production of programs. Finally, we utilize the program cost regressions to draw some inferences about the price elasticity of advertising demand facing the networks.

2. Network markets

■ **The product market.** A network is in large part a broker of its affiliates' time. It contracts with these affiliates to sell time to national advertisers who may conceivably bring their own programming to the network for exhibition. In practice, the networks have also become program brokers, selling not only time but viewers.[8] Each network schedules its programs and offers commercial announcements at regular intervals during these program hours.

Since there are three or fewer competitive commercial stations in most local markets, there are only three national brokers. At present, a fourth broker would be able to offer advertisers fewer viewers at each hour for programs similar to those broadcast by its three rivals. Given the current profit margins (per unit sales), it is doubtful that a fourth network could survive with this disadvantage.

Despite the entry barriers provided by regulation of the spectrum and fewness of rival firms, network companies do not necessarily enjoy monopoly power in the national advertising market. Given the numerous substitute media—newspapers, radio, magazines, and local television advertising time—it is distinctly possible

[6] The informal, oral evidence heard by the Commission's staff is reproduced in two Interim Reports on television network program procurement [7]. The second of these reports will be referred to hereafter as the Second Interim Report.

[7] The years 1960-1965 were chosen because data for this period were most accessible when the author began to collect data for this study. Moreover, older data would be less valuable simply because network advertising sales were undertaken in a different fashion before the 1960s.

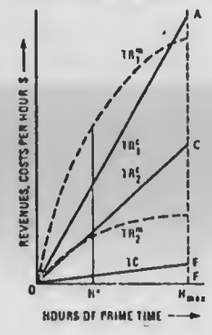
[8] For a detailed description of this development, see Crandall [1].

that variations in a network's output of viewer hours have no effect upon the price of viewer hours in the market. But even with a network television market demand curve, which is infinitely elastic at a per viewer exposure price set by competition from other media, the revenues per period for each network are a function of the number of rivals in network broadcasting. Unless the total number of viewers per hour increases in proportion to the number of rival networks—an unlikely possibility—any increase in the number of networks must decrease revenues per hour and, therefore, total revenues per year.[9]

If we assume that the number of viewers per hour of prime viewing time is constant, that they divide equally among the networks' offerings, and that the number of prime-time hours per year is fixed at H_{max}, the network's revenue function may be depicted quite simply as in Figure 1. If there is but one national network facing a competitive advertising market, its total revenue function, TR_1^c, will be linear with a slope AF/OF which is equal to revenues per hour; but the appropriate measure of a network's output is the number of viewer exposures to commercial messages of a given length. If the number of these messages is fixed per hour of broadcasting, output can be expressed in viewer hours of programming. The price of these viewer hours in a competitive advertising market is determined by the price of equivalent advertising messages in alternative media. Therefore, in this competitive setting, the network's revenues per hour are exogenously determined by the number of viewers watching television during each time period and the cost of advertising in the other media. The entry of a second network with access to equivalent affiliates and similar program fare will simply reduce each network's total revenue by one-half and shift its revenue function down to TR_2^c, where revenues per hour are equal to CF/OF. If program costs are invariant against changes in average audience size, each network incurs programming costs combined with brokerage, interconnection, and affiliation costs, which sum to a total cost per hour of TC. In this hypothetical world, entry could continue until the TR schedule of each network fell to a slope of EF/OF.

FIGURE 1

GROSS ADVERTISING REVENUES FOR A SINGLE NETWORK DURING PRIME TIME



Under these restrictive assumptions about viewer and cost behavior, network monopoly power in advertising markets simply alters each network's total revenue function. For instance, a single network's schedule becomes TR_1^m under the assumption that it faces the same price per viewer exposure as a competitive firm at an output corresponding to H^* hours of programming. Entry of a second network shifts the total revenue schedule down to TR_2^m, under the assumption that each firm chooses to broadcast the full H_{max} hours per year. The limit to entry occurs when the appropriate TR schedule is just tangent to the TC schedule. Obviously, this entry limit is reached sooner if networks enjoy monopoly in their advertising market than if they are perfect competitors in this market.

[9] At present, over 60 percent of the nation's homes have their receivers switched on during prime time. Clearly, this audience could not swell appreciably with the development of new viewing options.

We see then that the effect of "monopoly" power is somewhat different in network television from that in most normal markets. For instance, if entry is so effectively impeded by allocations policy as to allow only, say, two national networks, profits may be earned by each network even though its demand curve has infinite elasticity. Given the assumption of fixed audience sizes during prime time, monopoly power could only be exercised by limiting the number of hours broadcast. Thus, in this model, the existence of network monopoly power in advertising markets is quite unimportant except as it provides a limit to the number of networks which could compete successfully. Once we relax the assumption of fixed program costs, however, this conclusion is modified but not completely negated.

□ **The input markets.** The preceding discussion abstracts rather heroically from reality. A television network does not face a fixed audience, but rather it may be assumed that its audience will vary with its choice of programming. Indeed, one might argue that the most important management decision in network broadcasting is the choice of programs and the scheduling of these programs against rivals' offerings. In addition, the network's affiliation costs—the prices it must pay for access to its affiliates—cannot be assumed to be given exogenously. We may dispose of the affiliation costs first, since the principal focus of this paper is upon program choice and program supply.

An important source of network rents is the limitation upon local station spectrum allocations. The FCC has allocated the spectrum to television in such a manner that no more than three competitive commercial stations may operate in a great number of markets. In those markets in which a fourth station may obtain a license, it is frequently limited to the UHF band. But a number of markets have four or more competitive local stations, and this inconsistent allocation provides the best of all possible worlds for the three existing networks. Without a fourth station in virtually every large market, a fourth network cannot hope to enter profitably, but the presence of four stations in many of the largest markets allows the networks to appropriate a large share of the rents from network broadcasting. With more stations than potential affiliations, cartel-like agreements among stations are not likely to develop in bargaining with networks, simply because there is no simple method for the winners to compensate the losers in the affiliation competition. Were there only three stations in every market, the local stations would certainly appropriate a larger share of the net revenues from the sale of network advertising.[10]

More important for this paper's analysis is the nature of program supply and the networks' position as purchasers of programming, especially entertainment programming. With the trend

[10] For an econometric estimate of the effect of local station competition for affiliation agreements, see Hubbard [5]. Robbins' study reveals that the networks pay significantly more per home reached by affiliates in markets with three or fewer stations than they do in markets with four or more stations. Of course, a limit to the difference in compensation rates is provided by the threat of entry of a fourth network.

toward direct network negotiation with program suppliers came the possibility that networks might obtain monopsony power in program supply. In earlier years, a number of advertisers licensed their own programs and brought them to the networks in return for payment for an entire time period. In the past decade, however, this procedure has practically vanished for prime-time entertainment programming. For all intents and purposes, it is the networks who choose the programs in which advertisers intersperse their messages; but this is hardly sufficient proof that they possess monopsony power over the price of programs.

Entertainment programs are simply filmed or taped products which are exhibited on television rather than in alternative media. They require virtually the same inputs as motion pictures or other films and may be produced by any of scores of production companies throughout the world. Thus, television networks must bid resources away from alternative media in order to obtain their required program inputs. Given the increasing number of buyers of filmed products, it is quite clear that the networks' monopsony power must be limited.

Even if the three networks were the only buyers of filmed entertainment output, it would be necessary for program supply to be increasing cost for them to exert monopsony power. And if this monopsony power were exerted, it would become evident in the networks' failure to offer programming during some periods of considerable viewing frequency. Clearly, this last condition is not satisfied and has not been in the past few years. Before FCC restrictions on the length of the network program day, there were only occasional half hours during prime time which were not filled, and most of these periods were on A.B.C., which continues to have a comparative disadvantage in affiliations. Certainly, A.B.C. was not exerting monopsony power while N.B.C. and C.B.S. struggled along as competitors for programs!

But a more fundamental objection to the standard monopsony question obtains: it is impossible to draw a supply curve for homogeneous programs because programs are far from homogeneous. Networks are not buying standardized items from the supplying companies; rather, they are selecting the appropriate program input mix and contracting with suppliers to supervise their combination into programs. Given the number of such "packagers" of programs, the networks need only promise them a return sufficient to cover their costs, including the costs of invested capital. They may pay no less; they need pay no more.

The quantity and value of resources employed by the networks in their entertainment programming depends upon the degree of competition for audience and the price per viewer which advertisers are willing to spend. The greater are program revenues, the greater will be network expenditures upon programming. Networks will choose to employ more reproducible resources per program, and nonreproducible inputs, such as star performers, directors, and writers, will obtain higher rents when program revenues are high. While increasing the number of networks may increase the percentage of revenues diverted to programming expenses, total expenditures per program must certainly fall and with them rents to talent inputs.

But even if program costs vary directly with revenues, it is still possible that the condition of blockaded entry in network broadcasting finds each network with a total revenue function which is above the total cost function in Figure 1. All we have argued thus far is that the TC schedule will shift downward with the TR schedule as the number of networks increases, but TC will fall less rapidly than TR if nonprice rivalry increases with the number of competing networks. This is neither new nor profound, but it serves to emphasize two points: (1) neither monopoly power in advertising markets nor monopsony power in programming markets is required to yield the networks a substantial scarcity rent; and (2) the attempt by the FCC to create large excess profits in network entertainment programs in order to finance local and network "public service" programs may be frustrated by the nonprice competition which results. The latter point is especially important if program rivalry results in large increases in program costs which are not valued highly by viewers. To the extent that this rivalry simply bids up performers' rents, the profits are clearly wasted. If the rivalry takes the form of attracting scarce resources from other markets, an additional social cost results which must be weighed against the increase in viewer satisfaction. But, in any case, unless the FCC acts to curb this type of nonprice rivalry, its implicit attempt to create monopoly profits for the purpose of subsidizing other services is surely weakened.

☐ **Residual rights.** Few network programs are fully exploited during their network run. In practice, each network licenses the right to exhibit a program for one or more exhibitions, and if this program is recorded on videotape or film it may be shown subsequently in other markets. This further exploitation of the program is referred to as "syndication," and it assumes two forms. First, the program may be licensed to foreign markets almost simultaneously with its United States network exhibition. Such foreign syndication accounted for $57 million in revenues in 1967.[11] In addition, after the network program series has concluded its run, the program may be licensed to United States television stations for additional local exhibitions. These domestic "off network" syndication sales accounted for $43.1 million in total revenues in 1967.[12]

The success of a program in syndication sales to local stations and to foreign markets is a direct function of its success during the initial network run. If it has a long run on the network, it will probably be quite successful for two reasons: (1) it has a demonstrated audience appeal; and (2) there are a number of episodes available for distribution. This latter factor is extremely important, because it is uneconomical to produce additional episodes once a series has ended its network run. In addition, a television station is much less interested in procuring a series for which there are only 20 or 30 episodes than it is in one which has hundreds of episodes.

In recent years, the three domestic networks have purchased approximately 90 percent of their prime-time entertainment series

[11] See Little [3], p. 109, hereafter referred to as the Little Report.
[12] *Ibid.*

from independent "packagers" of programs.[13] As networks turned to direct licensing of programs from independent suppliers, they obtained in the initial bargaining process rights to a share of the programs' future syndication revenues as well as interests in the revenues which might be generated by any exploitation of copyrighted matter from these programs in the sale of merchandise. Our primary interest lies only in syndication revenues, however, since merchandising revenues are less than 5 percent of the syndication yield.

It is crucial to understand that network syndication interests have always been obtained during the initial bargaining process between the program supplier and the network. Before the program series reaches the network, an agreement is reached between the network company and the supplier as to the price which the network will pay for each episode in the series, the price to be paid for repeat episodes on the network, and the shares of syndication rights and profit shares to be retained by the network, as well as a myriad of other matters such as allowances for unexpected cost increases in producing the programs, escalator clauses for subsequent seasons, the division of merchandising interests, penalties to be paid in case of network cancellation of the series, and technical details concerning delivery of episodes to the network. In most cases, the network obtains the rights to the network exhibition of the program series for five years.

The rights to distribute program episodes to domestic television stations after the initial network run and to foreign stations during and after network exhibition are referred to as domestic and foreign syndication rights. The right to share in the net revenues from syndication- equal to total revenues less distribution costs, entertainment guild royalties, and other costs--is referred to as a profit share, and this share is usually identical for domestic and foreign revenues. Prior to the 1970 Prime Time Rule, the initial contract between network and packager not only allocated the above interests, but it also specified the precise distribution fee to be charged by the distributor. These fees ranged from 10 percent to 45 percent, the larger fees being exacted for the smaller sales. In addition, networks often agreed to allow packagers to recoup excess production costs from the networks' profit shares.

While the syndication market is not highly concentrated, one may not assume that syndication rights and profit shares are not valuable. The fee stipulated in the original network-packager contract may be sufficiently large to compensate the distributor more than amply for his costs of distribution. Moreover, the actual costs incurred in distribution are very small since the episodes have already been produced. Only shipping, print, and other miscellaneous costs such as royalty payments to members of entertainment guilds are deducted from the revenues which remain after imposition of the distributor's fee. Thus, syndication revenues are an important contributor to net profits even if they are small in comparison with the original network payments for the programs.

According to available data,[14] networks obtained the syndica-

[13] *Ibid.*, p. 5.
[14] *Ibid.*, p. 46. The FCC Office of Network Study also collects these data.

tion rights in one-fourth to slightly more than one-third of their prime-time programs from 1957 through 1968. This proportion reached its maximum in 1964—35 percent for domestic distribution rights and 35.7 percent for foreign rights—but it declined steadily to 25.9 percent for both in 1968.[15] The networks' share of actual syndication sales was estimated at 22 percent of the domestic market and 29 percent of the foreign market for 1967, the most recent year for which data are available.[16] Although neither datum is likely to indicate substantial market power, the FCC's Prime Time Rule has imposed a total prohibition upon network distribution in domestic syndication markets. As we shall see, this decision was motivated as much by the FCC's fear of network monopsony power as by its concern about undue concentration in syndication.

3. The FCC rule

☐ In 1965, the FCC issued a *Notice of Proposed Rule-Making*[17] which sought to prohibit: (1) all domestic syndication (distribution) by network companies; (2) network ownership of syndication profit shares in programs produced wholly or in part by others; and (3) foreign syndication by the networks of programs produced wholly or in part by others. In 1970, these provisions formally adopted by the Commission in it's Prime Time Rule, whose principal thrust is to limit the number of hours of prime-time network broadcasting in the nation's largest 50 markets.[18]

Why should the FCC act to prohibit network purchase of these rights from packagers? Even if it fears monopoly control over domestic syndication, is it necessary to prohibit networks from buying even a minority interest in the profits from syndication? Prohibition of network distribution might be warranted, but it is surprising that the Commission has chosen to limit suppliers' right to sell profit shares in their productions.

A reading of both the Proposed Rule and the Prime Time Rule reveals that the Commission believes that it is not restricting suppliers' prerogatives but rather protecting these packagers from the monopsony power of the networks. By prohibiting the networks from bargaining for syndication profit shares and distribution rights, the Commission is reserving these lucrative privileges for the suppliers. The Commission reasons that the networks have been utilizing their monopsony power to bid these profits away from suppliers at little or no compensation. As a result, program producers were courting bankruptcy, and causing a threat to the continuance of many sources of program supply. The Commission's implicit theory of network-producer bargaining may be inferred from various statements appearing in the *Notice of Proposed Rule-Making*. For instance, it is claimed that:[19]

> . . . network corporations - usually as a *quid pro quo* for initial financing but sometimes as compensation for assumption of the risk of sale to advertisers . . . seek and frequently obtain . . . the right to distribute the programs or series in domestic syndication and foreign markets; the right to share . . . in the profits from domestic and foreign syndication sales . . . .

[15] *Ibid.*
[16] [Percentages of off-network sales only.] *Ibid.*, pp. 108-9.
[17] [8].
[18] See [9].
[19] [8], p. 8.

But these rights were being ceded unwillingly by producers, since in earlier years:[20]

> [t]hese rights usually were retained by independent producers and constituted valuable commercial assets which contributed to their economic stability and viability. The importance of the retention of these rights to the financial stability of independent producers is supported by testimony of producers that in many, if not most, instances they do not recover their initial production costs from the network run . . . but must look to syndication and foreign sales to 'make them whole' and to show a profit.

There can be little doubt that the Commission believed that its Proposed Rule would save independent producers from network exploitation, for the Commission stated:[21]

> . . . [I]t is our hope that the proposed rule would reduce the possibility that independent producers may be *forced* to give up rights in their programs in order to obtain access to network time. . . .

What did not occur to the Commission is the possibility that independent producers "gave up" rights in their programs because networks offered to buy them. The Prime Time Rule allows networks to sell the rights in the programs which they produce for themselves, but ignores the possibility that transfers of rights in the other direction are equally compensated. This is not an unusual posture for a regulatory agency which finds itself enmeshed in transactions between very large and very small firms. It is a common regulatory notion that large firms exploit the smaller firms simply because they are larger, but more often than not this theory does not stand up to careful scrutiny.

The alternative theory which is tested below is very simple. It is merely that networks purchase ancillary rights in programs exhibited originally on their networks at prices which reflect ex *ante* expectations of their discounted present value. If a network wishes to invest in either syndication rights or profit shares, it must compensate the supplying company through correspondingly higher initial prices for episodes of the program which are shown on the network. Therefore, program prices to the networks should vary directly with the magnitude of their syndication interests in each.

4. A model of network programming

☐ It is impossible to posit program-supply function without also addressing the problem of network rivalry and network-supplier negotiations for residual rights. The value of a program is directly related to its ability to attract audiences, but actual audience is inversely related to the strength of competing programs at the same hour. Moreover, the number of viewers attracted to a program will vary systematically throughout the day and even during prime time. Finally, we shall argue that the network is more likely to invest in residual rights of less valuable programs than in the rights for more expensive programs, and this investment decision must be incorporated into the empirical model of the next section.

In this paper, we address ourselves to the determinants of the

[20] *Ibid.*, p. 7.
[21] *Ibid.*, p. 19. Emphasis supplied.

cost of regularly scheduled new prime-time entertainment series. These series appear sporadically throughout the year as each network discards shows which fail to attract a substantial share of the prime-time audience, but most changes are made at regular intervals of approximately 13 weeks. The largest number of changes occur in the fall and winter, and our sample mainly includes programs which appeared for the first time in the fall of the years 1960 through 1965.

Negotiations for a new series may begin as much as one or two years before a program appears on a network, and it is rare for the lag to be less than six months. At this time, a formal contract or a memorandum of agreement will be drawn up between the supplier and the network. In fact, some of these important details may be omitted until a later date as both parties abide by an informal understanding. Therefore, in most cases, the prices to be paid by the network are stipulated considerably in advance of the network's decision to schedule the program or even order a single episode, and the value of the program series must be determined *a priori* without any definite notion of the nature of the competition which the program will face when it is finally exhibited.

Once the program series is actually ordered, the network begins to search for the appropriate prime-time hour for its exhibition. Approximately 60 to 70 percent of the shows in the rival two networks' schedules will be continuations of last season's series, and these rivals will be reluctant to move continuing series regardless of the new series chosen by the network to appear opposite them. Thus, for the most part, each network will choose to replace its series failures under the assumption that rivals will not move most of their more successful shows in response. We have, therefore, the basis for a "Cournot" theory of programming, where each network takes its rivals' choices as given in attempting to maximize its profits.

Our Cournot model of network triopoly is exposited in terms of a single time period within prime time. The inputs for the ith network's program will be denoted t_{ij}, referring to the number of units of the jth input into the ith network's program. For the first network, for example, there exists a "production function" of the form

$$A_1 = A_1(t_{11}, \ldots, t_{1M}; t_{21}, \ldots, t_{2M}; t_{31}, \ldots, t_{3M}), \; j = 1, \ldots, M, \quad (1)$$

where A_1 represents the audience potential of the first network's program. The inputs to this production function include the services of cameras, settings, film, or tape, and a number of other goods as well as the services of all technical and creative persons involved in "producing" an audience through the creation of a given program. The precise relationship between each of these productive services and the audience yield of the program is extremely difficult to specify empirically; therefore, the analysis is delineated in terms of heterogeneous inputs only for pedagogical purposes in this section. A more detailed elaboration of the Cournot model is undertaken in Section 7 below.

The network sells viewers to advertisers at a price, P_A, and therefore faces a net profit (Π) function:

$$\Pi = P_A A_1 - \sum_{j=1}^{M} p_j t_{1j}, \quad (2)$$

where p_j is the market price of the jth input. Its problem is to choose the t_{1j}'s which maximize (2). This requires that for each t_{1j}:

$$\left[P_A + \frac{dP_A}{dA_1} A_1\right]\left[\frac{\partial A_1}{\partial t_{1j}} + \sum_{j=1}^{M}\left(\frac{\partial A_1}{\partial t_{2j}} \cdot \frac{dt_{2j}}{dt_{1j}}\right) + \sum_{j=1}^{M}\left(\frac{\partial A_1}{\partial t_{3j}} \cdot \frac{dt_{3j}}{dt_{1j}}\right)\right] = \left[p_j + \frac{\partial p_j}{\partial t_{1j}} t_{1j}\right]. \quad (3)$$

The first bracket on the left-hand side of (3) is simply marginal revenue (of audience) facing the network. The second bracket has three terms: the first is the marginal product of the t_{1j} and the next two terms are conjectural response terms for the other two networks. In our Cournot model, the conjectural response terms are equal to zero, thus simplifying the algebra and the analysis considerably. The term on the right-hand side is simply the marginal cost of the jth input.

Under Cournot assumptions, the conjectural response terms in (3) disappear, and we are left with

$$\left[\frac{\eta - 1}{\eta}\right] P_A \frac{\partial A_1}{\partial t_{1j}} \cdot \left[\frac{\delta_{j+1}}{\delta_j}\right] = p_j, \quad j = 1, \ldots, M, \quad (4)$$

where η represents the price elasticity of advertising demand facing the network and δ_j is the elasticity of supply of the jth factor to the network. We shall simply denote $(\delta_j + 1)/\delta_j$ by k_j hereafter.

Equation (4) is the first-order condition for the employment of each of the M inputs. Solved for each t_{ij}, it represents a variety of a Cournot reaction curve since it is obvious that $\partial A_1/\partial t_{1j}$ varies with the strength of rival networks' fare. Specifically, it is likely that $\partial^2 A_1/\partial t_{1j}\partial t_{2j}$ and $\partial^2 A_1/\partial t_{1j}\partial t_{3j}$ are negative, implying that networks will "counter-program," placing their more expensive programs opposite the rivals' weakest fare and vice versa.

While (4) holds for any type of input, the mechanism by which it is achieved varies across different varieties of program inputs. For nonreproducible talent or "stars", $\partial A_1/\partial t_{1j}$ should be replaced by a discrete term reflecting the increment to audience attributable to the performer. Moreover, given that the network may only choose whether to employ the performer or not, t_j may not assume values other than zero or unity. It is p_j which varies to satisfy (4) in this case, and as long as this price is above the performer's opportunity cost in other media, he will offer his services to program packagers.

For the other inputs, the network varies t_j according to the magnitude of the marginal productivity term, the price of network advertising, and its monopoly and monopsony power in the respective markets. In practice, however, many nontalent inputs to the production process are used in fixed proportions either because of the nature of the production function or union agreements. For instance, the amount of lighting, the number of technicians,

the number of feet of film or videotape, the amount of stage space required, the editing of the film or tape, and numerous other production services are not utilized in significantly variable proportions. Nevertheless, the prices of these services are likely to contain considerable economic rent, since bargaining agents may press for higher wages for the suppliers of the services as their marginal revenue products [according to (4)] rise. But these prices should vary with the average profitability of all entertainment fare in a given year. Thus we expect some nontalent costs to be fixed while others vary with the strength of demand for network advertising.

A simple manipulation of (4) allows us to summarize our model by distinguishing between the rents paid to talent and the prices earned by nontalent inputs. If we assume that the first K of the M inputs are talent, total payments to talent for the first network run (C_t) may be written

$$C_t = \frac{\eta - 1}{\eta}\left[\sum_{j=1}^{K} k_j \frac{\partial A_1^e}{\partial t_{1j}} \cdot \frac{1}{A_1^e}\right] P_A A_1^e, \quad (5)$$

where A_1^e is the expected audience of the given program and $(\partial A_1^e/\partial t_{1j})(1/A_1^e)$ is the elasticity of expected audience with respect to the jth talent input. Similarly, nontalent costs (C_{nt}) may be written

$$C_{nt} = C_0 + \frac{\eta - 1}{\eta}\left[\sum_{j=K+1}^{M} k_j \frac{\partial A_1}{\partial t_{1j}} \cdot \frac{t_{1j}}{A_1}\right] P_A \bar{A}_1, \quad (6)$$

where $\bar{A}$ is the average audience for network programs in the current year and C_0 represents fixed costs which do not vary with the net revenues from the sale of entertainment programming.

5. The empirical estimation of program costs

The previous two sections have led us to hypothesize that the cost of any program to a network will vary with the anticipated audience of that program, the average revenue yield of programs in network exploitation, and the residual rights obtained by the network. The basic equation to be estimated from available data is of the form

$$C_i = a_0 + a_1(P_A \bar{A}_i) + a_2(P_A A_i^e) + a_3 n_i D_i + a_4 n_i S_i + u_i. \quad (7)$$

where C_i is the cost per exhibition of the ith program, A_i^e is its expected audience, D_i is a dummy variable which is equal to unity if the network obtains the distribution right for syndication of the program and zero otherwise, and S_i is the profit share from syndication obtained by the network. Both S_i and D_i are multiplied by n_i, the proportion of exhibitions represented by first runs, since the value of syndication interests is directly proportional to the number of episodes filmed. A randomly distributed error term with zero mean and constant variance is denoted u_i.

The magnitude of the coefficients of a_1 and a_2 in (7) will depend upon the relative importance of nontalent and talent expenditures in total program costs and the degree of monopoly or monopsony power exercised by the networks in their output and input markets [see equations (5) and (6)]. If either $(\eta - 1)/\eta$ or the k_j differ substantially from unity, the networks will be paying inputs to the production process less than the value of their marginal product, and a_1 and a_2 will be correspondingly smaller than they would be if the networks were perfect competitors in all markets. Similarly, if a_3 and a_4 are found to be smaller than the discounted present value of accounting returns from syndication, we may infer that the networks possess monopsony power in dealing with their suppliers.

□ **The data.** Data for new regularly scheduled entertainment series on the three networks in the fall seasons of 1960 through 1965 were obtained from the contracts signed by the networks. In all, contracts for 148 program series were available, and of these 148, complete data were available for 121 series.[21]

The cost datum, C_i, is an estimate of the average cost of one half hour of a single episode in its first exposure on the network. In order to obtain this estimate, it is assumed that the network would schedule 52 episodes during a year by purchasing the maximum number of new episodes possible and filling out the year with repeats. Since repeats generally bring audiences of only 70 percent of new episodes, the total cost of 52 weeks of the series is divided by the sum of the number of new episodes plus 0.7 times the number of repeats required.[22]

As an estimate of $P_A \bar{A}_i$, the total estimated network night-time sales to advertisers for each year is utilized. Since the number of networks and the number of prime-time hours per week did not vary from 1960 through 1965, these industry sales serve well as a proxy for the average revenues per hour during each of the six years studied.

The estimate of *expected* revenues per program, $P_A A_i^e$, was obtained by asking each network to provide its initial price for a single commercial minute of advertising in each series during its fall season. An attempt was made to obtain the prices offered by the networks before advertisers began placing their orders. This set of prices provides the earliest recorded estimates of the networks' own expectations concerning the revenue potential of their programs.

Measures of D_i and S_i are taken directly from the contracts with suppliers. D_i is a set equal to unity if the network owns either the domestic distribution right or the foreign right or both. S_i is equal to the proportion of net profits from foreign and domestic syndication granted to the network company by the contract.

[21] For 19 of these programs, there was no record in the network files of the initial asking price for commercial minutes. For 8 others, it was impossible to obtain a precise cost estimate.

[22] In addition, an adjustment in C_i is made for network investment in a pilot and for "overage" agreements. It is assumed that any pilot program is utilized as an episode in the series, and the cost of this pilot is included in the cost of a year's run of the series. Overage payments are network rebates of cost overruns which are remitted from the network's syndication profit share. Approximately one third of network programs earn profits from syndication, therefore, the net value of the overage agreement to the supplier is assumed to equal one third times the host to overruns specified in the contract, which, in turn, is usually 5 or 10 percent of stipulated program costs.

In the empirical analysis below, two additional series are used. A variable indicating the average strength of programs scheduled by the two rival companies at the same hour, A'_i, is constructed by averaging the percentage of total television homes watching each rival program in the preceding year.[24] If the rival program is new during the current season, its strength is measured by multiplying the average performance of that network's programs by 0.9, an arbitrary weight designed to reflect a lower probability of audience acceptance. Another variable, H_i, measures the total homes normally watching television during the specific hour of the week during which the program is scheduled.

Regression results. Equation (7) was fitted to data for the entire 121-program sample and for a 108-program subsample which excludes all music variety programs. The exclusion of these programs is based upon an *a priori* judgment that the values of a_3 and a_4 are likely to be much smaller for such fare given the rapid obsolescence of popular music, and that relative production costs for this type of programming are quite different from the costs of other series. Both samples were also utilized to fit a variant of (7) in which the time trend, T_i, was substituted for $P_A\bar{A}_i$ in order to determine if the latter was merely capturing the trend of general cost inflation during 1960–1965. The results demonstrate that $P_A\bar{A}_i$ serves as a better regressor in the program cost equation, but the difference is not statistically significant.

The ordinary least-squares estimate of (7) for both samples is satisfactory, with one glaring exception. The coefficient of the syndication profit share variable is negative and significant, suggesting that networks pay less for programs in which they obtain profit shares. See Table 1. This counterintuitive result derives from

TABLE 1

ORDINARY LEAST-SQUARES ESTIMATES OF PROGRAM COSTS (EQUATION 7)

REGRESSION	SAMPLE SIZE	ESTIMATED COEFFICIENTS FOR THE INDEPENDENT VARIABLES*						
		CONSTANT	$P_A\bar{A}$	P_AA'	U	S	T	R^2
(i)	121	12,304 (2.42)	0.21664 (3.82)	0.18467 (5.52)	664 (0.48)	−7474 (2.03)		0.410
(ii)	108	16,898 (4.30)	0.25948 (5.81)	0.09271 (3.55)	2433.1 (2.30)	−6868.3 (2.31)		0.448
(iii)	121	27,590 (8.33)		0.18569 (5.54)	662.44 (0.48)	−7384.5 (2.00)	1126.5 (3.75)	0.408

*t STATISTICS IN PARENTHESES.

MEAN $P_A\bar{A}$ = $90,000.

MEAN P_AA' = $98,611 FOR 121-PROGRAM SAMPLE, $97,965 FOR 108-PROGRAM SAMPLE (BASED UPON 0.85 TIMES THE ASKING PRICE FOR THREE COMMERCIAL MINUTES IN EACH PROGRAM).

SOURCE OF MEAN $P_A\bar{A}$: LITTLE REPORT [3], P. 85.

[24] This series is simply last year's Nielsen rating for continuing shows.

the networks' tendency to purchase larger shares in the less expensive programs with lower audience appeal. It is not perfectly clear why this pattern should exist, but an explanation may be attempted. The networks tend to place the weakest of their new programs opposite their rivals' strongest returning series; therefore, program suppliers are less interested in retaining profit shares in these shows, since they are aware that low-cost series are less likely to survive on the networks than more expensive shows. Given that a program series must have a fairly long network run to accumulate sufficient episodes to make syndication profitable, program suppliers may be less interested in retaining syndication interests in any series with relatively low probability success on the network.

It thus becomes necessary to estimate (7) as part of a simultaneous equation system which includes a profit-share investment function. Unfortunately, not many exogenous variables recommend themselves for such an equation, since there is no obvious *a priori* theory which predicts the outcome of negotiations for these subsidiary rights. The following simple linear form is utilized for the purposes of this investigation:

$$S_i = b_0N_i^a + b_1N_i^r + b_2N_i^a + b_3R_i + b_4C_i + b_5T_i + v_i. \quad (8)$$

The N_i variables are dummies for each of the three networks, A.B.C., N.B.C., and C.B.S., respectively. R_i is a dummy variable equal to unity if the program is an hour series and zero if it is a half-hour series. This variable is included simply because the networks tended to procure profit shares in hour series more than in half-hour series during our sample period. A time trend, T_i, is included to capture the response of the networks to increasing FCC concern about network ownership of profit shares during the period.

When (7) is estimated by two-stage least squares utilizing all exogenous variables in (7) and (8) in the first stage, a very large value for a_4, the coefficient of S_i results. An examination of the residuals reveals that the relationship is misspecified. The expected value of a program is measured by its anticipated revenues for a given competitive situation, but if networks systematically place their weaker fare against the rivals' strongest programs and vice versa, P_AA' does not measure the value of each program for a given competitive situation. Put another way, this variable does not reflect the value of specialized inputs in attracting audience under invariant conditions. It cannot be expected that a star performer will accept a lower rent in performing in a program which is to be sacrificed before another network's most popular series.

In order to adjust P_AA' for the effect of network rivalry, this variable is multiplied by the square root of A',[25] the average

[25] Expected revenues are multiplied by the *square root* of the average of rivals' program ratings for the past year because a log-linear regression of *ex post* audience upon program cost, rivals' program ratings from last year, A', and television homes watching at the given hour, H, yielded a coefficient for A' of approximately 0.5. Equation (7') was also estimated with $R_i^a = (P_AA_i')(A_i')^{0.5}$, but the results were little different from those in Table 2. The proportion of explained variance fell very slightly, and the value of $u_i + a_4$ was reduced by approximately 20 percent.

audience appeal of other network programs appearing during the same time period. But including A' in equation (7) introduces a further complication, since we expect the cost of a program to vary *directly* with the value of $P_AA^a(A')^{0.5}$ but we also expect each network to schedule its most expensive programs opposite its rivals' least successful series. Thus we expect the scheduling decision to find C varying *inversely* with A'. In order to avoid biased estimates of (7), we must introduce equation (9) to reflect the scheduling decision for each program. This scheduling relationship includes each of the network dummy variables as well as H_i, a measure of the number of households normally watching television during the time period in which the ith program is scheduled.

Our complete model may now be written as follows:

$$C_i = a_0 + a_1(P_A\bar{A})_i + a_2R_i^a + a_3n_iD_i + a_4n_iS_i + u_i \quad (7')$$

$$S_i = b_0N_i^a + b_1N_i^r + b_2N_i^a + b_3R_i + b_4C_i + b_5T_i + v_i \quad (8)$$

$$C_i = c_0N_i^a + c_1N_i^r + c_2N_i^a + c_3H_i + c_4A_i' + w_i, \quad (9)$$

where R_i^a is equal to $(P_AA_i^a)(A_i')^{0.5}$ and u_i, v_i, and w_i are random disturbance terms with zero mean and constant variance. There are three endogenous variables, C_i, A_i^a, and S_i, in a simultaneous system of three equations.

Estimates of the parameters of (7') are obtained by the method of two-stage least squares. Reduced-form estimates of A_i^a and S_i are first obtained by ordinary least-squares regressions of each variable upon all exogenous variables. The reduced form estimates of R_i^a and n_iS_i are then obtained by regressing each on all exogenous variables and the corresponding transformation of each variable's reduced form. The second-stage estimates of (7') are presented in Table 2, along with approximate t statistics and coefficients of multiple determination.

TABLE 2

TWO-STAGE LEAST-SQUARES ESTIMATE OF PROGRAM COSTS (EQUATION 7')

REGRESSION	SAMPLE SIZE	ESTIMATED COEFFICIENTS FOR THE INDEPENDENT VARIABLES*					
		CONSTANT	$P_A\bar{A}$	R^a	D	S	R^2
(v)	121	15,923 (2.799)	0.18224 (3.068)	0.16172 (5.710)	1750.8 (0.7627)	241.6 (0.05240)	0.418
(vi)	108	15,900 (3.601)	0.21328 (3.820)	0.10270 (3.797)	1893.8 (1.493)	12,285 (1.412)	0.295

*t STATISTICS IN PARENTHESES.

As expected, the regression for the smaller sample is quite different from the one which includes observations on music-variety programs, and the large differences in the values of the coefficients of $P_A\bar{A}$ and R^a support our assertion that the ratio of talent to other production costs varies substantially between music-variety and all other program types. Regression (vi) provides an estimate of the combined value of the distribution right and a 100-percent share of profits from syndication of $1,891 plus $12,285 times the mean value of u(0.788), or $11,031 per new half-hour episode of entertainment programming. The sum of the

coefficients of these variables is equal to 1.7 times the standard error of the sum. Expressed as a percentage of mean program costs for the period, these syndication interests amount to 23 percent of network program costs or 19 percent of the total value of network exhibition and syndication interests. These results are compared with published estimates of syndication profits in Section 6.

Of equal interest is the low value of the constant term in regressions (v) and (vi), suggesting that only $16,000 of the costs of an average half-hour program were not price determined during the period. The relative importance of the other two terms can best be explained by evaluating them at the point of means of the regression. The mean value of program costs is $48,725 per half-hour for the larger sample and $48,328 for the smaller sample. The mean value of D and S is approximately 0.22 in each sample. For the smaller sample, therefore, the net cost of the network exhibition alone is $48,328 − 0.22(14,179) = $45,209.

For the entire 108-program sample, the mean value of the networks' expected revenue per half hour (P_AA') is $97,965. Therefore, a_1R^a may be estimated at $10,045 at the point of means, or 22 percent of total program costs. Our theory leads us to assign all of these costs to talent expenses, but we have only informal evidence that such an allocation is justified. The Little Report found that by 1964 above-the-line costs had risen to approximately 48 percent of total costs. These expenditures include payments for actors, directors, producers, and other personnel. We have no further data on the division of program costs in commercial broadcasting in the United States, but it is interesting to compare the Little datum with data for a foreign noncommercial network operating in competition with a single commercial network.[26] For 1964–1965, above-the-line costs for this foreign network represented 44 percent of total program costs for entertainment programming. Expenditures for performing artists were 22 percent of total costs, or precisely the same as the value of a_1R^a in regression (vi) above.

At the midpoint of the sample period, average network revenues per half hour ($P_A\bar{A}$) were approximately $90,000. Thus, at the point of means, $a_1P_A\bar{A}$ is equal to $19,200 in regression (vi) or 42.5 percent of network program costs. This component of costs represents the price-determined payments to program inputs which do not vary across programs within a single year. Our theory leads us to assign these payments to the price-determined elements of nontalent costs, but we cannot identify with precision the recipients of such payments.

6. The value of syndication interests

The regression results presented in Table 2 provide an estimate of the value of distribution rights and profit-share income from syndication of 19 percent of network program outlays in 1960–1965. Can this estimate be reconciled with published data on the actual returns from syndication? A comparison with the Little

[26] This network has kindly provided detailed data on its program costs which are utilized in Section 7. At the request of the network, its identity is not revealed in this paper.

Report data provides the only available answer to this problem.

In a 1967 prospectus,[27] Twentieth Century-Fox reported that:

> [c]ommencing with the television series produced in 1964, . . . [production costs] are being amortized in the proportion that any year's actual net revenue bears to the estimate of total net revenue expected to be realized from networks and syndication distribution. This change . . . has resulted in the amortization of approximately 80 per cent of production cost of films released each year against television network revenue.

Fox is among the largest suppliers of prime-time series, and there is no reason to believe that its experience is not representative of the entire industry. As a check on this estimate, it is useful to compare the data in the Little Report on network program payments and total program payments to suppliers and their own production subsidiaries of $290.3 million for prime-time series in 1964, and total "off network" syndication sales of $78 million in the same year.[28] Sales were 27 percent of prime-time program costs in 1964. This may be a misleading comparison, however, since syndication revenues follow network program payments by the networks in the same series with a mean lag of perhaps one or two years. In 1965–1966, the average flow of syndication sales from old network series was $89.4 million, or 31 percent of 1964 program payments by networks.[29] Some of these sales may have come from series not originally shown on the networks during prime time, but it is unlikely that there was a large contribution from this source. It seems reasonable, therefore, to assume that the ratio of syndication sales to networks' prime-time program costs was 0.30 in 1964.

The network data appearing in the Little Report show that new series cost the networks about $125,000 per hour episode in 1964, an average which was rising at an annual rate of approximately 7 percent at the time.[30] Since at least one-third of network prime-time series are new to the network in a typical year, it seems reasonable to assume that the average cost per new episode shown on the networks during prime time in 1964 was $110,000 per hour. But the networks license programs for more than one exhibition. Therefore, we require data on the payments for repeats as well as new exhibitions.

Once more the Little Report provides the necessary data. In 1964, the networks paid $290.3 million for prime-time entertainment series. Given 71½ hours of such programming per week,[31] the average cost per hour may be estimated at $78,000. During 1964–1965, the networks exhibited original episodes for most series from mid-September until mid-April, filling out the remainder of the season with repeat episodes. Thus, original episodes formed 7/12 of the season's offering for an average program, and the ratio of the cost of new episodes to total program payments may be estimated at 7/12 ($110,000/$78,000), or 0.82. Given that syndication revenues are 30 percent of total network program payments, they are 0.30 divided by 0.82 of new program costs (C) for the first run of the programs. The ratio of syndication revenues to program costs is thus 0.366. See Figure 2.

FIGURE 2

CALCULATION OF THE VALUE OF SYNDICATION INTERESTS FROM 1964 COST-REVENUE DATA FOR PRIME-TIME ENTERTAINMENT SERIES

$$\frac{\text{SYNDICATION PROFIT}}{\text{NEW EPISODE COST PER HOUR}} = \left[\frac{\text{PROFIT FROM DISTRIBUTION}}{\text{SYNDICATION SALES}} + \frac{\text{PROFITS FROM PROFIT SHARES}}{\text{SYNDICATION SALES}}\right]\left[\frac{\text{SYNDICATION SALES}}{\text{TOTAL NETWORK PROGRAM PAYMENTS}}\right]\left[\frac{\text{TOTAL NETWORK PROGRAM PAYMENTS}}{\text{TOTAL PROGRAM HOURS}}\right]\left[\frac{\text{TOTAL PROGRAM HOURS}}{\text{TOTAL HOURS OF NEW EPISODES}}\right]\left[\frac{1}{\text{COST PER HOUR OF NEW EPISODE}}\right]$$

$$= \left[0.11 + 0.35\right] \cdot \left[\frac{\$87.1 \text{ MILLION}}{\$290.3 \text{ MILLION}}\right]\left[\frac{\$290.3 \text{ MILLION}}{71\tfrac{1}{2} \times 52}\right]\left[\frac{71\tfrac{1}{2} \times 52}{7/12 \times 71\tfrac{1}{2} \times 52}\right]\left[\frac{1}{\$110{,}000}\right]$$

$$= 0.168$$

$$\frac{\text{EXPECTED SYNDICATION PROFIT}}{\text{NEW EPISODE COST PER HOUR}} = \left[1 + \text{EXPECTED RATE OF GROWTH}\right]\left[0.168\right]$$

$$= 1.15 \times 0.168 = 0.193$$

The profitability of syndication may also be inferred from the Little Report's interpretation of network data, but only after some adjustment. The networks report a "net gain" from syndication distribution fees of $2,319,000 and net gains from profit-share income of $5,419,000 in 1964.[32] Estimates of producers' (and presumably other participants') shares in the profits from syndication are estimated in a rather simple fashion in the Little Report. The networks' average profit share in the current year's network series is divided into profit-share net gains for 1964 in order to obtain an estimate of the total profits accruing to all participants. Similarly, the calculation of industry profits from distribution fees is effected by simply dividing the network datum by the share of programs in which networks have obtained the rights for currently exhibited network series. Both estimates must be considered to be biased downward.

In the calculation of industry profit-share net gains, the bias occurs in utilizing the net profit figure for the networks. Our data for new program series in the 1960–1965 period reveal that the network profit shares are inversely correlated with program success and, therefore, syndication profitability. As a result, the Little Report technique of dividing network profit share into network imputations of profits from syndication must lead to an underestimate of industry profits from syndication. We cannot know the magnitude of this downward bias, but the Little Report estimate of $19.5 million of industry profits from this source in 1964—35.8 percent of net revenues after deducting distribution fees[33]—

[32] *Ibid.*, p. 132.

[33] *Ibid.*, p. 130. It is assumed that the average distribution fee is 0.30 and that producers' profit-share income from syndication represents the same share of total profit-share income as for the network companies.

must be adjusted upward. Given that only shipping costs, print costs, production overages, and a few miscellaneous expenses are deducted from net syndication revenues before computing profit shares, it would be surprising if total profit shares did not amount to at least 50 percent of net revenues.

The estimate of industry distribution fees is also too low, as a simple assumption will demonstrate. There is no reason to believe that other distributors are less efficient than the network subsidiaries which realized profit margins of 11.0 percent of sales in 1964. Since industry sales were $78 million, industry profits from distribution fees should approximate $8.58 million, not $6.5 million as estimated by the Little Report.[34]

The network company which was bidding for syndication interests at the midpoint of our sample—the beginning of the 1963 season—could hardly be unaware that syndication profits were growing at a very rapid rate in 1960–1963, a rate of more than 30 percent according to the Little estimates. This company would expect syndication profits to be realized from its successful programs far past 1964; therefore, the simple estimates for 1964 calculated in the above paragraphs are probably considerably below the profits expected by interested parties in 1963. There is no way of knowing what growth rate might have been applied by these bidders, but given an annual rate of growth of syndication sales of 15 to 20 percent[35] and a more rapid rate of growth of profits, it would not seem unreasonable to apply a 15-percent rate to the above profit data.

The final estimate of syndication profitability is derived as follows. Syndication fees contribute 11.0 percent of total sales in net profits while profit-share income adds 0.50 of 70 percent of sales (obtained by deducting 30 percent for average distribution fees). Therefore, 1964 profits from syndication were 0.46 of total sales. Given a growth rate of 0.15 percent, *expected* profits may be assumed to be 0.529 of 1964 *actual* syndication sales. Since syndication sales represent 0.366 of new program costs (C), syndication profits from the distribution fee and a 100 percent profit-share are estimated at 0.529 times 0.366 times new program costs, or 0.193 C for the average program during the midpoint of our sample period. This procedure is depicted schematically in Figure 2.

The final estimate is admittedly rough, relying upon network data in which important cost imputations cannot be known. There is a considerable increase in the estimated profitability of profit shares from that appearing in the Little Report, but all other estimates are quite conservative.

It remains to estimate the *present value* of 0.193 C since syndication revenues are not realized immediately upon payment of program costs, but only after a considerable lag. Since foreign sales may begin immediately and account for nearly 60 percent of all revenues, it seems reasonable to assume that the bulk of syndication revenues may be realized in four years. Again using a conservative estimate, assuming that these revenues are realized evenly over the four-year period and that the opportunity cost of capital in 1963

[34] *Ibid.*

[35] *Ibid.*, p. 141.

1964 was 0.10, the present value of 0.193 C may be calculated as follows:

$$[(0.193\,C)/4]\int_0^4 e^{-rt}dt = 0.04825C[(1 - e^{-0.4})/0.10] = 0.159\,C.$$

A long, tortuous route has brought us to an estimate of the value of syndication profits, which is nearly 16 percent of the price of a new episode of a program series to the networks.

How sensitive are these estimates to the assumptions made along the way? For instance, if the Little data were taken literally, the estimate of the present value of syndication profits would fall to 11.6 percent of new program costs. If all other assumptions were to be retained, an increase in the assumed cost of capital to 15 percent would lower present value from 0.159 to 0.145 C. An assumed growth rate of syndication profits of 20 percent would raise the estimate to 16.6 percent. Only the denial of the assumptions in the Little Report's calculations of industry profits seems of great importance, but this denial seems warranted even though our adjustment is certainly a rough one.

The final accounting estimate of the value of all syndication interests—16 percent of new program costs to the networks—is well within the confidence interval of our econometric estimate of 19 percent (Table 2). It would therefore appear that networks have paid an amount equal to the discounted present value of the distribution rights and profit shares which they have obtained. The Prime Time Rule has not saved the program suppliers from the rapacious tendencies of network buyers, it has simply required the suppliers to assume more risk or to sell these syndication interests to other buyers.

7. An extension of the results

If we extend the theoretical model developed earlier in this paper, we may utilize the regression results along with further empirical analysis to make a rough estimate of the degree of monopoly-monopsony power possessed by the networks.

For instance, suppose that (1) is appropriately represented by (1′):

$$A_1 = \frac{f\left(\sum_{j=1}^{M} t_{1j}\right)}{F\left(\sum_{n=1}^{3}\sum_{j=1}^{M} t_{nj}\right)} \qquad \begin{matrix} \partial A_1/\partial t_{1j} > 0 \\ \partial A_1/\partial t_{nj} < 0 \\ n \neq 1. \end{matrix} \qquad (1')$$

If we assume further that $f'(\ ) = F'(\ )$, then:

$$\frac{\partial A_1}{\partial t_{1j}} \cdot \frac{t_{1j}}{A_1} = \frac{f_j'(\ )t_{1j}}{f(\ )}\left[1 - \frac{f(\ )}{F(\ )}\right], \qquad (10)$$

where $f_j'(\ )t_{1j}/f(\ )$ is the elasticity of the network's own audience with respect to its own investment in the jth input. If we call this elasticity μ_j, we may insert (10) into (4) to obtain

$$\left|\frac{\eta - 1}{\eta}\right| \cdot P_M A_1 \sum_{j=1}^{M} k_j \cdot \mu_j\left[1 - \frac{f(\ )}{F(\ )}\right] = \sum_{j=1}^{M} \mu_j t_{1j}. \qquad (11)$$

At Cournot equilibrium, $1 - f(\ )/F(\ )$ becomes $1 - 1/N$, where N is the number of rival networks. If we assume further that all $k_j = k$, we may write the expression for Cournot equilibrium as

$$k\left[\frac{\eta - 1}{\eta}\right]\left[\frac{N-1}{N}\right]\left[\sum_{j=1}^{M}\mu_j\right][P_A A_1] = \sum_{j=1}^{M} p_j t_{1j}. \qquad (12)$$

For talent inputs alone, this relationship simply states that above-the-line expenditures are equal to the product of the audience expected from the program and the sum of the elasticities of audience with respect to each input multiplied by three terms which reflect the intensity of competition among networks for audience, advertising revenue, and performers. In our regression results of the previous section, the estimate of a_2 is

$$a_2 = k\left[\frac{\eta - 1}{\eta}\right]\left[\frac{N-1}{N}\right]\left[\sum_{j=1}^{K}\mu_j\right] \approx 0.10.$$

If we could determine the value of the sum of the elasticities, $\sum_{j=1}^{K}\mu_j$, we would be able to estimate the value of $k[\eta - 1/\eta]$ for $N = 3$, the number of networks throughout our sample period.

Unfortunately, we do not have precise data on the distribution of above-the-line and below-the-line costs for our U. S. sample, but the foreign noncommercial data do permit us to attempt to estimate $\sum_{j=1}^{K}\mu_j$. These foreign data contain observations on above-the-line costs, payments to performing artists, and audience for 54 light entertainment and drama series. The light entertainment series--mostly filmed comedy or light drama and music-variety programs--are likely to be chosen to provide the maximum audience per unit cost, but the drama series may well be chosen to satisfy the tastes of a sizeable minority despite the costs involved in their production. For this reason, empirical investigation into cost-audience relationships are likely to be useful only for the light-entertainment series

In order to obtain a measure of $\sum_{j=1}^{K}\mu_j$ from the noncommercial program experience, we estimate two forms of simple regressions of audience upon costs—one which is linear and one which is log-linear.[36] The independent variables are either artists' costs or

[36] The regression of audience upon either component of costs provides us with a direct estimate of the effect of talent inputs upon audience. The linear regression gives us a slope coefficient equal to $\sum_{j=1}^{K}(\partial A/\partial t_j)$ and the loglinear regression yields slope coefficients equal to $\sum_{j=1}^{K}\mu_j$. This result may be proved quite simply. If audience is denoted A and total factor payments of the appropriate category are denoted $\sum_{j=1}^{K} p_j t_j$ and if we assume that $A = \sigma\left[\sum_{j=1}^{K} p_j t_j\right]^{\beta}$, $\partial A/\partial t_j = [\beta A/p_j]\left(\sum_{j=1}^{K} p_j t_j\right)$ and $(\partial A/\partial t_j)(t_j/A) = \beta(p_j t_j)\left(\sum_{j=1}^{K} p_j t_j\right)$. Summing over all K inputs gives $\sum_{j=1}^{K}(\partial A/\partial t_j)(t_j/A) = \beta$. But $\sum_{j=1}^{K}\mu_j = \sum_{j=1}^{K}(\partial A/\partial t_j)(t_j/A)$; therefore, $\sum_{j=1}^{K}\mu_j = \beta$.

all above-the-line costs and the dependent variable is average audience per program. The results are presented in Table 3 for filmed comedy or light drama series and for music-variety series as well for a combination of the two. The final column in Table 3

TABLE 3

ELASTICITY OF AUDIENCE WITH RESPECT TO EXPENDITURES UPON TALENT, FOREIGN NONCOMMERCIAL NETWORK, 1964–1965*

*t STATISTICS IN PARENTHESES.

contains the estimated elasticity of audience with respect to the independent variable at the point of means. These elasticity measures for all above-line costs range from 0.5 to more than 0.7, and we may take 0.6 as an approximation to the mean estimate.

If networks had no monopoly nor monopsony power, $k(\eta - 1)/\eta$ would equal unity. Therefore, if $\sum_{j=1}^{M}\mu_j$ is equal to 0.6, we would expect $[(N - 1)/N]\sum_{j=1}^{M}\mu_j$ to equal 0.4 for a three-network oligopoly. Our econometric estimate of this expression (a_2) is only 0.1; therefore, application of the Cournot model leads us to reject the hypothesis of competition in both markets. While we cannot dismiss the possibility of network monopsony in some input markets, our results in Sections 5 and 6 provide some evidence that k is not likely to differ much from unity. These results suggest that $\eta - 1/\eta$ is approximately equal to 0.25 and that η is equal to 1.33 for each network.

8. Summary

■ If there is a single theme to this paper it is that offhand attempts to connect the fewness in television network broadcasting to theories of monopoly or monopsony behavior are likely to be unsuccessful. Network broadcasting is far from a typical economic activity since its principal output is donated to viewers while advertisers purchase rights to address these viewers with commercial messages. Networks may have monopoly power in national advertising markets, but this market power is not easily identified in output markets since it may only be implemented through a restriction in the number of viewer hours offered to advertisers in any period. It is obvious that this restriction of output is not serious among the current network triopoly, for each firm broadcasts during every hour possible and more than 60 percent of the nation's homes watch this output during prime viewing hours. It is only the FCC—through its imposition of the Prime Time Rule—which has sought to restrict network output to advertisers and viewers alike by limiting prime-time network broadcasting to three hours per day.

Suppose that each of the three networks faces a market demand curve which is much less than infinitely price elastic. Our rather crude estimate of this price elasticity is −1.33 for each firm, an estimate which is certainly inconsistent with the hypothesis of perfect competition in national advertising markets. But what power does this confer upon the networks? Surprisingly, virtually the only effect of this imperfectly competitive situation is to allocate the rents from television broadcasting to the networks and their stations rather than to television celebrities. The size of the total prime-time audience is likely to be rather insensitive to small changes in program quality, and performers are available to the networks in inelastic supply; therefore, the effect of monopoly power in advertising markets is to lower the derived demand for talent used in programs without much change in the nature of those programs. Star performers available at $20,000 per week are also available at a mere $10,000 per week. In our Cournot (competitive) model of program expenditure, monopoly power in advertising markets is simply translated into lower rents for performers.

Obviously, the impact of network monopoly in advertising markets upon program quality depends upon the relative importance of the various types of resources used in producing programs. Our econometric estimates of program costs suggest that as much as two-thirds of all program outlays are directly dependent upon the revenue potential of network programs in their advertising market. We cannot be sure how much of this two-thirds share represents economic rents paid to participants in program production, but fragmentary evidence on the division of program expenditures suggests that a very large share of these price-determined outlays is appropriated by performers and other talent. If there were greater competition in national advertising markets, the derived demand for these services would rise and be reflected in larger economic rents. Profits would be diverted from television networks and their stations to television celebrities.

The FCC has not connected the networks' position in their output markets with their programming behavior, but rather it has focused upon the networks' possession of *monopsony* power. Its restrictions upon network investment in syndication interests is based upon the assumption that the networks do not pay their suppliers the full value of these syndication rights, an assumption which is not confirmed by the econometric estimates presented in Section 5, above. Comparison of these estimates with accounting returns from syndication markets demonstrates that the networks purchase syndication interests at prices which reflect the present value of net revenues generated in syndication markets. This conclusion should surprise no one outside of the Commission, for it is inconceivable that the networks could force suppliers to accept a rate of return on program investments which is below the opportunity cost of capital. If monopsony power were present, it would be reflected in a reduced quantity of programs ordered for network exhibition, not in exploitation and eventual bankruptcy of program suppliers. Most firms supplying network entertainment series during the past decade are alive and well and still competing for network business.

The results of this paper should not be a discouragement to the FCC. That the Commission is not required to protect the small suppliers of entertainment programs—to a large extent, the major motion picture companies--from the rapacious tendencies of the television networks should be a source of considerable relief. Moreover, the identification of the relationship between network profits and market power in national advertising markets should cause the Commission no concern. The major change which would emanate from the development of greater competition in advertising markets would be a redistribution of profits toward television performers. Clearly, the FCC prefers to see these profits in the hands of the networks and stations where they may be devoted to "public service" programming. Of course, the Commission could consider the possibility of taking the necessary steps to permit an increase in the number of national networks, but this would require a reduction in the subsidies paid to local programs which attract few viewers and a major increase in the popular fare so deprecated by the Commission and its staff.

APPENDIX B

AFFIDAVIT OF RICHARD A. POSNER

STATE OF ILLINOIS,)
) ss.:
COUNTY OF COOK,)

RICHARD A. POSNER, being duly sworn, deposes and says:

I am a Professor of Law at the University of Chicago Law School, specializing in antitrust law. My curriculum vitae, including a list of the books and articles I have written, is annexed hereto as Exhibit 1. Counsel for CBS Inc. has asked me to examine the proposed consent decree in United States v. National Broadcasting Company, Inc. (Civil Action No. 74-3601-RJK, C.D. Cal.), together with the other documents filed in the case, including the Justice Department's Competitive Impact Statement ("CIS"), with a view to advising whether the decree is consistent with the "public interest", the standard governing entry of antitrust consent decrees under the Antitrust Penalties and Procedure Act ("APPA"), 15 U.S.C. § 16. My conclusion is that the proposed decree is inconsistent with the public interest as expressed by the Sherman Act.

The legislative history of the APPA makes clear that the purpose of the Act is to bar the entry of antitrust

consent decrees that do not advance the policy of the antitrust laws, which is to promote competition. "The primary focus of the Department's enforcement policy should be to obtain a judgment--whether litigated or consensual--which protects the public by insuring healthy competition in the future". S. Rep. No. 93-298, 93d Cong., 1st Ses. 6 (1973). The proposed consent decree in NBC will not insure "healthy competition"; on the contrary, it is an anticompetitive decree.

I.

The main thrust of the decree is to limit the rights (e.g., to a later syndication of the program) that NBC may acquire from a producer of programs. The value of such rights tends to be highly uncertain; hence the effect of contracts that transfer these rights to the network is to have the network assume the risk that the program will not be successful enough to make the various secondary or residual rights in it commercially valuable. This shifting of risk from producer to network is a boon for the small producer, who may be in no position financially to assume the risks of failure involved in retaining all of the rights to subsequent exploitation of the program. The effect of the proposed consent decree, if adopted, would be to force this risk back on to the producer. That can only weaken the position of the small

producer in a market where the major sellers are large producers. Such a result would be antithetical to the policy of the antitrust laws.

The proposed decree is further anticompetitive in limiting the program production by NBC itself. NBC is a small factor in the program production market (certainly small relative to its principal supplier, MCA), but its competitive potential is significant and presumably helps keep the independent producers "on their toes". They know that if they try to cartelize the market NBC can step in and satisfy a major part of its programming needs internally. The Supreme Court has repeatedly emphasized the importance of preserving potential competition in concentrated markets. See, e.g., United States v. Penn-Olin Chem. Co., 378 U.S. 158 (1964). And the Ninth Circuit in a recent case specifically indicated its disfavor for provisions in antitrust decrecs limiting production by a potential competitor. See Calnetics Corp. v. Volkswagen of America, 532 F.2d 674, 693-94 (1976).

The entry of an antitrust decree having such serious anticompetitive features as I have outlined, without any effort at responsible justification by the government in its CIS, would flout the purposes of the APPA. And there is

still another consideration that suggests to me that the decree is not in the public interest: its "regulatory" character, which the government acknowledges in its CIS (p. 9). The entry of a regulatory decree is almost a sure sign that the case should never have been brought. The purpose of the antitrust laws is to promote free competition by dissolving restraints of trade and not, as in the proposed decree in this case, to supervise the details of bargaining between buyers and sellers. See Posner, Antitrust: Cases, Economic Notes, and Other Materials 563-65 (1974); Posner, "A Statistical Study of Antitrust Enforcement", 13 J. Law & Econ. 365, 386, 388 (1970). "Apart from the unsuitableness of regulatory decrees in the implementation of a statute designed to promote competition as an alternative to regulation, such decrees impose unreasonable burdens on the time and expertise of the federal district courts, which become charged--as will be true in this case if the proposed decree is entered--with the detailed supervision of ongoing commercial relationships.

II.

The proposed decree in its present form is I think manifestly contrary to the statutory standard. But its deficiencies are not mere matters of wording or the inclusion of this rather than that provision. The decree seems based on a legal theory that has no basis in the antitrust laws.

The government needs to rethink the whole case.

The basic premise of the decree is that NBC has combined with the television stations comprising the NBC television network to suppress competition in the production of prime time television programs carried on the network, or alternatively that NBC has monopolized this programming. The government's CIS states that NBC has "used and continues to use its dominance and control over access to the broadcasting time of the NBC Television Network, to condition independent program suppliers' access to said network upon the suppliers' relinquishing valuable rights and interests in their programs", and that NBC "has favored programs in which it obtained such rights and interests over other programs" (p. 6). While recognizing that NBC itself produces only a minute fraction of the prime time entertainment programs broadcast over its network, the government also expresses concern "that NBC's unrestricted ability to produce prime time television entertainment programming" has unlawfully restricted "independent program suppliers' ability to produce and negotiate for distribution and exhibition of their programming". Id.

It seems plain from the language quoted above, the terms of the decree, and the government's earlier filings in

the network cases that the government's theory of how NBC and the other two major networks have reduced competition in the production of television programs is simply that they have driven an unconscionably hard bargain with the producers--or, as the government put it in its memorandum in opposition to CBS's motion for summary judgment, that the networks failed to give the producer "payment commensurate with the success of his program" (p. 20), thereby inflicting "undue hardship" on the producers (p. 10). This theory of the violation that the proposed consent decree is designed to rectify lacks a basis in either common sense or antitrust law. Why would the networks wish to eliminate competition among their program suppliers? A rational network would take every step possible to maximize such competition in order to keep down the prices of programs it buys. Of course the networks want to pay as little for programs as possible--that is why they want to promote rather than to stifle competition among the producers.

Firms may want to reduce competition in the markets in which they sell, but they have absolutely no interest in reducing competition among their suppliers, thereby possibly placing themselves at the mercy of a cartel of suppliers or a monopoly supplier. The proposed decree is thus premised on

a completely unrealistic conception of network self-interest. Further, in seeking to rectify an alleged inequality of bargaining power between producers and networks that has allegedly enabled the networks to drive an unconscionably hard bargain with the producers, the decree strays outside the recognized boundaries of the antitrust laws. No antitrust cause of action is stated by an allegation that a buyer has refused to pay a fair price to a seller. The antitrust laws--unlike the Uniform Commercial Code or the Automobile Dealers Day in Court Act--have never before been thought to provide a remedy for a seller to whom a buyer pays an unconscionably low price. A one-sided sales contract is simply not a restraint of trade.

It should be emphasized that the contractual provisions between NBC and the producers about which the government complains are simply provisions allocating the various profit opportunities created by the contract between the parties to it in a way that may be less favorable to the supplier than alternative provisions would be. For example, the government complains about the practice, prohibited by the FCC since 1971, whereby NBC received not only the right to show the program on its network but also shared in the revenues from subsequent broadcasts of the program by independent television stations. In effect, that practice simply reduced the price that NBC paid the producer for network exhibition--and as I have said there is nothing in the antitrust laws that gives a seller the right to complain about the price in his contract with the buyer. To treat a contract of sale as an unreasonable restraint of trade because the advantages of the contract appear to inure primarily to the benefit of the seller rather than the buyer, or of the buyer rather rather than the seller, would be to alter fundamentally the character of the antitrust laws and cast a cloud of suspicion over virtually all sales contracts.

I have said this is a case, utterly unprecedented in antitrust jurisprudence, in which the gravamen of the complaint is that the buyer has driven a hard bargain with his sellers. The character of the case as I have described it would not be altered by the allegations that NBC has monopoly power even if those allegations had any possible basis in fact. The offense of monopolization is defined in the Supreme Court's most recent formulation (see United States v. Grinnell Corp., 384 U.S. 563, 570-71 (1966)) as monopoly power plus exclusionary practices, i.e., practices designed to punish, destroy, or intimidate a competitor or potential competitor of the

monopolist. I know of no case where charging customers high prices, or paying suppliers low prices, has itself been deemed an act of monopolization.

In any event, it is plain as a matter of law that NBC does not have monopoly power. The government concedes that the programs broadcast on the NBC network compete for viewers' and therefore advertisers' patronage with the programs shown on the other two networks (not to mention the programs shown on the many independent television stations). Since each of the television networks carries approximately the same amount of prime time programming as the others, it follows that NBC purchases at most one-third of the programming at issue in this case. A firm that purchases only one-third of a product can under no accepted judicial doctrine be deemed a monopolist.

The government appears to concede this, but argues that the NBC television network is itself a relevant market somehow separable from the broader market for prime time network television. This approach is untenable. To fragment a market into the individual outputs of each of the sellers, or the purchases of each of the buyers, in the market is to make every firm a monopolist and to expand enormously the

reach of Section 2 of the Sherman Act. Hence the courts have consistently held that the "natural monopoly" that the producer has over his own output is not the kind of monopoly with which Section 2 is concerned. See, e.g., United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 392-94 (1956); Telex Corp. v. International Business Machines Corp., 510 F.2d 894, 917-19 (10th Cir. 1975); ALW, Inc. v. United Airlines, Inc., 510 F.2d 52, 55-57 (9th Cir. 1975); Bushie v. Stenocord Corp., 460 F.2d 116, 120-21 (9th Cir. 1972). That principle applies a fortiori to a case where the firms in question, CBS, NBC, and ABC, are purchasing from a common pool of program suppliers who can sell to any one of the networks. The differences among the programming carried by the three networks seem to be even smaller than those which distinguish, say, Chevrolet and Ford automobiles--different brands recognized to be in the same product market, even though General Motors and Ford have sought to differentiate their products in minor but significant ways. See, e.g., Mogul v. General Motors Corp., 391 F. Supp. 1305, 1313 (E.D. Pa. 1975), aff'd, 527 F.2d 645 (3d Cir. 1976); Merit Motors, Inc. v. Chrysler Corp., 417 F. Supp. 263, 269 (D.D.C. 1976). In contrast, very few viewers, simply by looking at a television program, could tell whether it was a CBS, an NBC

or an ABC program.

It is true that once the network has signed a contract with the producer for a particular program idea, the contract will usually obligate the producer to offer the completed program to the network. But this is to say that the relevant competition among the networks for programming occurs at the point at which the producer has come up with an idea for a program that he thinks is marketable. He can peddle his program idea to any of the three networks. Their competition for promising program ideas assures that none of the networks has a monopoly in the purchase of programming.

The facts I have recited to show that this case and the proposed decree have no relation to the objectives of antitrust policy, which are to prevent monopoly and foster competition, are not in dispute. The government claims it can also prove the allegedly improper purpose of each defendant in using its control over access to its network to force the program suppliers to give up certain interests in their programs. But the only improper purpose suggested is that each defendant deliberately uses whatever bargaining power it may have to drive a hard bargain, one that involves annexing to itself as many of the profit opportunities created by the

program in question as it can. And, as I have emphasized, the use of individual bargaining power to minimize the cost of program acquisition, while conceivably objectionable on other social grounds, raises no question of illegality under the antitrust laws.

Nor is anything significant added to the case by the fact that the programs offered by the networks are carried by a large number of affiliated stations or that the networks produce some television entertainment programs themselves. The existence of station affiliations and of some internal production by the networks does not change the antitrust issues. That NBC owns some stations and has affiliation agreements with others adds nothing to a complaint that NBC is not paying enough to the independent television producers. Ford Motor Company sells its automobiles to the public through a system of franchised dealers, most of whom purchase exclusively from Ford. But a supplier of steel to Ford could not on that account complain under the antitrust laws that Ford was not paying him a high enough price to keep him in business. There is simply no right under the antitrust laws to demand a "reasonable" price from a supplier; the buyer's distribution system is irrelevant. This case involving the market for programs would be no

different if NBC owned all of its affiliated stations. NBC might be stronger as a buyer of television programs, but it would still not have a monopoly position in the relevant market--the market in which it competes with ABC and CBS in the purchase of programs--and its contracts with its suppliers would still not be reviewable by an antitrust court for adequacy of consideration.

Equally irrelevant is the fact that NBC produces some of the entertainment programming shown on its network (though less than 5 percent of it). One can imagine an antitrust case whose gravamen was that NBC had a monoply in one market (program distribution) which it was using to take over a related market (program production). But that is not this case. Not only is the premise (monopoly in one market) false, but NBC's small market share as a producer refutes any suggestion that it has been seeking to take over the production of all of its own programs. Moreover, even if NBC produced all of its own programming, its market share as a producer would be no higher than its current market share as a buyer. Since it is not claimed that ABC and CBS could be compelled to buy their programs from NBC, its market share as a producer cannot be more than approximately one-third. But, if NBC cannot produce more than one-third of the total

programs, it cannot be deemed a monopolist of production any more than it can be deemed a monopoly buyer. Presumably the complaint is that NBC is trying to depress the profitability of the independent producer industry in order to increase its own network profits, and not in order to increase its own market share in the production of network programming.

NBC's affiliation agreements and its internal production are red herrings in this case. The Government here is challenging the terms on which NBC buys television programs. The Government claims these terms are too hard, impose undue hardships on the independent producers and have impaired the vigor of competition among them. These allegations are irrelevant to the antitrust claims. NBC has very good commercial reasons for wanting to have a large number of suppliers vigorously competing for NBC's business, but NBC has no duty under the antitrust laws to pay a supplier a price that will keep him in business. Relatively inefficient suppliers when faced with competition from other producers offering similar products at lower prices may indeed be driven out of business. But that is the result of competition and not the suppression of competition. The antitrust laws were enacted for "the protection of competition, not competitors". Brown Shoe Co. v. United States, 370

U.S. 294, 320 (1962).

My point is not that the government's case against NBC has legal infirmities; that would not be decisive on the question whether this Court should enter a consent decree. My point is rather that the case is so devoid of even a colorable claim of an antitrust violation that a decree based on the theory of the complaint cannot be deemed "in the public interest", even if the defendant, for whatever private reasons it may have, is inclined to accept the decree rather than litigate. The Antitrust Penalties and Procedure Act requires this Court to make an independent judgment whether the proposed decree is in the public interest. To be in the public interest under the Act a decree must be, at the very least, reasonably related to the policy of the antitrust laws. The proposed decree, even if it could somehow be purged of the anticompetitive features discussed at the outset, would not be reasonably related to the policy of those laws.

In the Matter of	)	
	)	
Commercial Television Network Practices and the Ability of Station Licensees to Serve the Public Interest	)	DOCKET NO. 21049 (RM-2749)

NOTICE OF INQUIRY

Adopted: January 14, 1977 Released: January 14, 1977

By the Commission: Commissioners Lee and Hooks concurring in the result; Commissioner Fogarty issuing a separate statement.

1. Notice is hereby given of the institution of an inquiry into commercial television network practices and policies regarding the acquisition and distribution of television programming. Almost two decades have elapsed since the Commission completed its last overall study of network practices.1/ Developments in recent years suggest that a new inquiry is warranted.

2. This inquiry will encompass a number of subjects surrounding the matter of alleged dominance of the nation's commercial television industry by the three major commercial networks, but will focus most specifically on the relationship between these networks and their affiliated stations. In this regard, the Commission has consistently emphasized that it is the individual licensee who has the right and the responsibility to program his station:

> ...the Commission in administering the Act and the Courts in interpreting it, have consistently maintained that responsibility for the selection and presentation of broadcast material

1/ Between 1955 and 1957, a special network study staff conducted a broad-ranging inquiry into network practices. This study resulted in the release of the "Barrow Report." Network Broadcasting, H. Rep. No. 1297, 85th Cong., 2nd Sess. (1958). (Hereinafter cited as the "Barrow Report.")

ultimately devolves upon the individual station licensee and that fulfillment of such responsibility requires the free exercise of his independent judgment.

En Banc Programming Policy Report, 20 R.R. 1901, 1911 (1960). It is clear, furthermore, that this responsibility for the independent exercise of programming judgment cannot be delegated to a network or to any other entity or individual.2/ Accordingly, we propose to carefully examine whether particular network practices may improperly compromise or restrict the programming discretion of the broadcast station licensee.

3. In giving proper consideration to this question, it is not possible to limit our inquiry simply to an examination of the contractual relations which exist directly between a network and its affiliated stations. The networks play a central role in our commercial television industry and their activities have a direct bearing on the entire market relating to the production and distribution of television entertainment programming. Station discretion can be meaningfully and effectively exercised only in circumstances where this market is in a healthy, competitive state and is in a position to offer alternative sources of programming. For this reason, our inquiry will encompass the question of whether the networks have maintained anti-competitive policies which unduly restrict the development of other programming sources.

Preliminary Observations

4. This study is prompted, in part, by a rule-making petition brought before us by Westinghouse Broadcasting Company, Inc. (RM-2749) and by allegations contained in antitrust complaints which the Department of Justice filed

2/ As also stated in the Programming Policy Report (20 R.R. 1901, 1914), the broadcaster is obligated to provide programming to meet the needs and interests of his local community and this "is a duty personal to the licensee and may not be avoided by delegation of responsibility to others." See also Broadcast Licensees and Public Agreement, 57 FCC 2d 42, 49-51 (1975).

against the networks in the Central District of California.3/ The Westinghouse petition called for a "comprehensive inquiry and rulemaking proceeding to review the changing role and function of the three national television networks." Westinghouse Petition in RM-2749, September 3, 1976, p. 1. The Justice Department filed comments in support of this petition but, in a supplemental letter, emphasized that its comments "should not be construed as suggesting that the inquiry encompass those issues now being litigated in the Federal District Court in California," and that neither this letter nor the Department's formal comments were intended "to preclude either the Commission or the Department of Justice from taking any action consistent with its respective responsibilities." Letter from the Honorable Donald I. Baker, Assistant Attorney General, Antitrust Division, December 3, 1976, pp. 1 and 2.

5. We would like to make it clear that, in instituting the present inquiry, we have neither the power nor the desire to foreclose the Department in its antitrust action. While it is inevitable that thorough inquiry into network practices will encompass many of the questions raised in the antitrust suit, we do not believe that our inquiry should in any way preclude the Department from prosecuting its case or from arranging an appropriate settlement. See United States v. Radio Corporation of America, 358 U.S. 334 (1958). In concurrently examining similar issues, the Department of Justice has a direct responsibility for the enforcement of the Sherman Act, whereas the Commission's inquiry will focus on public interest questions affecting communications policy pursuant to our responsibilities under the Communications Act of 1934. In this connection, we note that in mid-November 1976 a proposed consent decree was agreed to by the Department and by NBC in one of the three antitrust actions mentioned (Case No. 74-3601 - RJK), and is now pending before the Federal District Judge handling the case. See 41 Fed. Reg. 51991 (November 24, 1976). This is discussed below, in connection with the general subject of network-producer relationships.

3/ United States v. American Broadcasting Companies, Inc., Civil Action No. 74-3600 - RJK (C.D. Cal.); United States v. CBS Inc., Civil Action No. 74-3599 - RJK (C.D. Cal.); United States v. National Broadcasting Company, Inc., Civil Action No. 74-3601 - RJK (C.D. Cal.).

6. In the discussion of specific topics below, there is extensive reference to allegations raised in the Westinghouse petition, statements in response to that petition filed by public interest groups and other parties, the Department of Justice antitrust complaints, and the proposed NBC consent decree. The networks vigorously oppose most of these allegations, as to their relevance and materiality and in some cases their accuracy. They also advance counter-arguments, both in respects mentioned below and otherwise. We have carefully considered the networks' positions, just as we have carefully noted assertions made by Westinghouse, the Department of Justice, and public interest groups. Given the networks' highly important role in the commercial television industry, allegations regarding abuses of power, and the lapse of 20 years since the last overall network study and investigation, we believe that this Inquiry is appropriate at the present time. This is true not only in connection with consideration of possible Commission regulation by rule or adjudication, but also in connection with possible legislative recommendations to Congress. The Commission hastens to point out, however, that we have not reached any conclusions, even of a tentative nature, regarding those issues discussed below. What we contemplate at this time is solely a fact gathering inquiry designed to provide the Commission with information necessary to a thorough understanding of television networking.

7. The Commission is, of course, cognizant of the vital contributions which the networks have made to the development of the television medium. As pointed out in the 1960 Program Policy Statement, supra, (20 R.R. 1914):

> The programs provided first by "chains" of stations and then by networks has always been recognized by this Commission as of great value to the station licensee in providing a well-rounded community service. The importance of network programs need not be reemphasized as they have constituted an integral part of the well-rounded program service provided by the broadcast business in most communities.

While it is certainly not our intention to adopt any regulatory measures which would impair the ability of the networks to serve the public interest, we must assure ourselves that the networks are not engaging in practices which might unduly encroach on the discretion of our licensees, or unnecessarily restrict the development of new sources of television programming.

8. As a matter of convenience, this Notice has been divided into three sections: (1) background on the role of the networks; (2) questions concerning the relationship between networks and their affiliated stations; and (3) questions concerning the relationships between the networks and program producers and suppliers. It is obvious, of course, that the categories of questions concerning network-affiliate relations and network-program supplier relations are far from being mutually exclusive. Developments in one area can and generally do impact on the other. Nevertheless, we believe that this division of questions will be useful for the purposes of discussion and inquiry. Commenting parties should be careful, however, to keep in mind the fact that to a very large extent these categories are inextricably intertwined. The fact that we are studying various particular aspects of commercial television broadcasting does not mean that these are viewed as problem areas. It simply means that information pertaining to these activities is indispensable to a thorough understanding of network practices. In this regard, our inquiry addresses the identification of problems, not the consideration of possible remedies for any abuses that may be identified.

Background: The Role of the Networks

9. Ever since the demise of the Dumont Network in the mid-1950's, there have been only three "national" television networks: the American Broadcasting Companies, Inc. (ABC), Columbia Broadcasting System, Inc. (CBS) and National Broadcasting Company, Inc. (NBC). Recent years have witnessed the development of a number of specialized networks offering sports or movies, but the pre-eminent position of the three national networks remains unchallenged. Their affiliates number well over 75% of all U.S. commercial television stations (approximately 600 out of slightly more than 700) and, outside the major markets, network affiliation is virtually indispensable to successful station operations.4/ As discussed below, it appears that about sixty percent of the broadcast programs currently presented by affiliates are supplied directly by their network. In addition to their ability to reach nearly all American households through their affiliated stations, all three networks own VHF stations in each of the nation's three largest television markets (New York, Los Angeles and Chicago), and two in other major markets (ABC, Detroit and San Francisco, the 6th and 7th markets; CBS, Philadelphia and St. Louis, the 4th and 12th markets; and NBC, Cleveland and Washington, the 8th and 9th markets). Each of these 5-station "owned and operated" (O and O) groups reaches about 22 percent of the

4/ There are only ten commercial independent stations (in the conterminous U.S.) outside the top 50 markets.

U.S. audience.5/ The networks are actively involved as brokers or middlemen connecting the program producers and national advertisers with local stations and their viewers. It is, therefore, not surprising that the networks play a very important role in the development, selection, and distribution of television programming.

10. This role, with respect to program development and selection, has not remained unchanged. Twenty years ago, more than half of the programs carried by the networks were either produced or purchased by major advertisers who acquired the necessary amount of network time to broadcast their programs. Today, for a variety of economic reasons, virtually all regularly scheduled network programs are either obtained by the networks directly from an independent producer or produced by themselves. With this development, the ability to determine what types of television programming will be made available to the American public has largely shifted from the advertising community to the networks.

11. This change is largely attributable to increases in the costs of producing programming as well as the costs of network advertising time. Between 1960 and 1976, the average cost of a single half-hour episode of a new prime-time program increased by about 237 percent from nearly $49,000 to approximately $165,000.6/ Network program expenditures reflected this trend, rising from $376,948,000 in 1960 to $1,273,241,000 in 1975, an increase of 238 percent. The average cost of a thirty-second network tv advertising spot rose by 153 percent during the same period. Cost increases have also been accompanied by a general recognition that shorter commercial messages are, for the most part, more cost effective than longer tv advertisements. That is, a 20 or 30-second spot, in many instances, is thought to be as nearly effective as a 60-second spot besides being less expensive. Given these developments, it is not

5/ In terms of "ADI households" (households located in the market stations' "area of dominant influence") the figure was 22.82% for ABC, 22.76% for CBS and 21.91% for NBC. See Broadcasting Yearbook 1976, p. B-80, American Research Bureau (ARB) estimates for 1975-76.
6/ The average cost of a prime time network episode was obtained from Arthur D. Little, Television Program Production, Procurement, Distribution and Scheduling, (April 21, 1969) p. 41. Production costs are based on individual program production fees published in Variety, September 15, 1976, pp. 50-54.

surprising that advertisers have become increasingly inclined to spread their commercials over a larger number of programs. Consequently, they no longer produce their own regularly scheduled programming but, rather, purchase a number of commercial spots which are usually placed in a variety of programs. While this development has shifted almost exclusive control over the development and selection of programs to the networks, it has also permitted more businesses, particularly smaller ones, to use television as an advertising medium.

12. Network control over access to the medium has also coincided with rather extraordinary increases in profits. Between 1960 and 1975, total combined network expenditures rose from $461 million to $1,465 million, for an average annual increase of 13.6 percent. Total net broadcast revenues, on the other hand, increased more rapidly; from $495 million in 1960 to $1,673 million in 1975, which was equivalent to an average annual increase of 15 percent. Net income (total combined profits before taxes) earned by the networks has risen at an annual rate of 32 percent; increasing from $33.6 million in 1960 to $203 million in 1975. According to the Internal Revenue Service, pre-tax profits accruing to all businesses in the United States increased at an average annual rate of approximately 12 percent between 1960 and 1974.7/

13. Westinghouse alleges that increases in network profits have partially resulted from expanded program schedules and relative reductions in station compensation payments. It is stated that between 1960 and 1976 the networks increased the length of their program schedules from 434 to 516 half-hours, or by 19 percent.8/ It is further argued that these

7/ According to the Statistics Division of the Internal Revenue Service, net income earned by proprietorships, partnerships and corporations increased from $79,009 million in 1960 to $225,120 million in 1974. Statistics are not available for 1975.
8/ "Clearance" of network programs by affiliate stations is usually very high; ABC shows it as 95% or more for prime time and Monday-Friday daytime programming (though less in other parts of the week).

increases occurred at the expense of local station time which has declined by 25 percent since 1960. Additionally, Westinghouse maintains that network programming currently occupies up to two-thirds of the available time on affiliated stations. The networks, it is claimed, have also reduced the proportion of their total revenues devoted to station compensation which, of course, has also enhanced their profits. Westinghouse further maintains that between 1964 and 1975, station payments as a percent of network revenues declined from 23.1 to 13.4 percent. Similarly, it is contended that station compensation payments as a percent of station receipts decreased from 19.8 to 10.7 percent during the same period. It is suggested that these and related developments have adversely affected the ability of affiliated stations to meet their public service responsibilities.

14. When the allegations of Westinghouse and other parties are considered against this background of significant change in the commercial television industry, it appears that an inquiry is warranted. In order to protect the interest of the public in receiving the best possible programming service, the Commission must take a careful look at the question of whether the networks may have engaged in conduct which hampers the independent judgment of the affiliated station, and which restricts effective competition in the programming market.

Network-Affiliate Relations

15. In the paragraphs which follow, we will briefly discuss three areas of network-affiliate relationships which appear to be particularly pertinent in connection with this inquiry, and as to which comments are specifically invited, although, of course, parties may wish to discuss others. These are: (1) clearance of network programming and the expansion of network program schedules, (2) previewing of network programming by affiliated stations, and (3) the relationship between station compensation plans and the independence of affiliate stations. While we are confident that larger licensees will supply comments, we particularly urge affiliates in smaller markets and independent stations to provide us with their views. With respect to each of these matters, we would hope that commenting parties will support their arguments, as completely as is possible, with relevant statistics and other factual information. This will facilitate our assessment of the merits of these arguments as well as assist the staff in its fact-finding efforts.

16. Clearance of Network Programs and the Expansion of Network Schedules. Westinghouse has estimated that, in 1960, network schedules filled only about one-half of the total hours broadcast by affiliate stations, but that today network programs occupy approximately two thirds of these hours. It is argued that this increase has caused a corresponding decrease in the opportunities for independent programming decisions by station licensees. Implicit in this argument is an assumption that affiliated stations really do not wish to clear additional network programming, but that circumstances compel them to accept these programs anyway. In response to these claims, the networks argue that the overall figures on network program expansion are misleading and that regardless of the amount of increase, affiliates have supported and benefited from the additional programs.9/ We specifically invite comments on the extent to which such clearances are other than voluntary and the nature of any contractual provisions or other economic relationships which might serve to undermine the independent judgment of the station licensee.10/

17. In addition, we seek comments on the likelihood of further expansion of network schedules and whether this would impact on the financial performance of local stations as well as their ability to serve the interests

9/ It is further argued that these increases are largely attributable to ABC which accounted for more than half of the overall expansion of combined network schedules since 1960. Moreover, the networks maintain that the expansion was part of a "long process of building ABC into a fully competitive network." CBS and NBC, on the other hand, only expanded their schedules by 9 and 5 percent, respectively. Furthermore, the new network material has largely been late night, early morning (cleared, ABC and CBS note, by only about 80 percent of their affiliates) and weekend sports programming which has meant increased station compensation and/or made possible station broadcasts at times when the affiliates were previously off the air.
10/ Westinghouse has also suggested that the lack of joint efforts by affiliates in dealing with their network with respect to program clearances and other matters may have impeded their ability to serve the public. Some parties may wish to comment on the need for, legality, and propriety of such joint efforts.

of the local community.11/ We invite additional comments regarding any relationships between the length of network schedules, and the supply and demand for syndicated programming, particularly first-run material, available to affiliated and independent stations. With regard to the latter questions, we have noted various reports indicating that the networks, at some time in the near future, may increase the total amount of available commercial minutes per hour in prime time. We ask for comments on whether this would significantly impede the development of additional networks, specialized networks, and other syndicated program offerings in competition with network programming.

18. Previewing of Network Programs by Affiliate Stations. Westinghouse has also alleged that the networks do not afford affiliated stations a reasonable opportunity to review network programming before it is shown to local audiences, thereby making it difficult for station licensees to exercise independent judgment concerning the suitability of particular episodes for their communities. With regard to this issue, it is suggested that audiences will become confused or angered if a program is cancelled after it has been promoted over-the-air or has been published as part of an announced program listing. Westinghouse contends that prescreening opportunities are commonly delayed until after this promotional material has been provided to the public. Network comments in response to the Westinghouse petition contain extensive descriptions of present (in the case of NBC, recently amended) procedures for informing affiliates in advance of network program content, procedures which the networks claim are "adequate."12/ We invite comments on

11/ With regard to this specific question, Westinghouse has estimated that an expansion of network news to one hour would cost affiliate stations a total of $75 million annually and would increase total network income (including O and O's) to 50 percent of all industry income.

12/ All three networks provide affiliates with written materials summarizing future programs. Policies on allowing actual previews of programs are: ABC - up to 15 hours per week (9 on the average), including all programs which carry a parental guidance advisory; CBS - no hour per week figures, but provides programs of particular interest "virtually on a daily basis" and theatrical movies approximately 4 weeks in advance where practical; NBC - up to 20 hours per week (series episodes, theatrical and made-for-television movies, specials), programs with parental guidance advisories and any available program requested by an affiliate. (Continued.)

the nature and adequacy of the information which is presently provided to affiliates concerning up-coming programs, and the extent to which improvements may be needed so as to allow the effective exercise of licensee discretion. We also invite comments on the cost and inconvenience which may be associated with the provision of additional, or more timely, program information. Finally, we encourage comments regarding the extent to which affiliates currently prescreen network programs as well as their willingness to make use of additional prescreening opportunities if made available.

19. Station Compensation Plans. Traditionally, the networks have paid their affiliated stations for clearing network programming, or more precisely, for clearing the network commericals which are associated with that programming. While the methods used to determine these payments are rather complicated, they are directly related to the size of a station's audience and constitute an important ingredient contributing to the financial health of affiliated stations. While the Commission is not concerned with the earnings of stations per se, we do become interested when financial arrangements detract from the ability of these stations to live up to their responsibilities as public trustees. In 1963, for example, we found that a proposed CBS compensation plan would discourage affiliates from rejecting network programs which they believed to be unsatisfactory or contrary to the public interest. CBS Network Compensation Plan, 24 R.R. 520a; 1 RR 2d 696 (1963). In this instance, the Commission stated that:

> Any graduated payment plan wherein the average hourly rate of compensation varies greatly with or is heavily influenced by the number of hours

11/ (Continued.) ABC and NBC both refer to their program standards departments as one way of insuring that programs are "acceptable" to affiliates (although Westinghouse points out that licensees must determine acceptability based on local, not national standards). Other network policies in this area include showing pilot programs to affiliates at annual meetings and during the preceding season and permitting affiliates to invite newspaper television critics to previews. Finally, it is said that there are practical problems in providing affiliates with programs 4 weeks in advance, as Westinghouse requests - production schedules and editing, MPAA classifications and dealing with the creative community.

> taken and which as a practical matter, requires an affiliate to take the majority of its programs from the same network without regard to the merits of the programming offered, is barred by our rules.

Id. at 698.13/ We invite comments on the extent to which the networks' present compensation plans are consistent with this principle. These contracts variously call for affiliates to carry up to an equivalent of 24 hours of prime time programming per month without compensation or for dollar discounts which amount in substance to roughly the same thing. We are specifically interested in the effect these provisions have on the independent discretion of our licensees and on the ability of syndicators and other program suppliers to compete with the networks by dealing directly with affiliated stations.14/ We are further interested in (1) whether and to what extent uncompensated prime time represents a justifiable means of sharing the overhead expenses associated with network program procurement and (2) the extent to which the average amount of compensation for each half hour of network programming cleared by a station varies depending on the total amount of network programming cleared by that station.

20. In its petition, Westinghouse states that between 1964 and 1975 the net income of the networks increased by 246%, whereas compensation payments to stations increased only 20%. It is argued that, by virtue of their powerful economic position, the networks have been able to limit compensation payments and thus realize a rather dramatic increase in their profits. This argument suggests that the advantages of networking, as opposed to syndication, are very substantial. That is, in the absence of anti-competitive practices, artificially depressed levels of station compensation would be expected to provide a fertile opportunity for entry by non-network program sources. We are most interested in comments on the question of whether the

13/ Aside from this concept, network control over a station's network rate has the potential for use by the network to influence the station's clearance decisions and also the level of its national spot advertising rates. See American Broadcasting Company, 17 R.R. 450, 462-463; Columbia Broadcasting System, Inc., 17 R.R. 447, 449; National Broadcasting Company, Inc., 17 R.R. 449, 452-453 (all 1958).

14/ A brief discussion of this issue may be found in the "Barrow Report," supra. pp. 463-66.

economic picture painted by Westinghouse is complete and accurate and, if so, what factors exist which discourage vigorous competitive activities by syndicators or the creation of a "fourth network." Comments are also invited on the effects which various changes in compensation plans might have on the health and viability of networking and the ability of the networks to contribute to programming in the public interest. We would encourage comments, particularly from our licensees, regarding relationships between compensation payments and expenditures to serve local programming needs (including locally produced material) as well as their ability to compete effectivaly with networks for national spot advertising. With regard to the latter two questions, it is alleged that relative decreases in compensation have forced stations to increase prices for national spots, while at the same time, permitting the networks to reduce commercial rates charged to national advertisers. This, according to Westinghouse, has afforded the networks a substantial competitive advantage which has adversely impacted on station revenues and on the quantity and quality of local service. Finally, parties are free to comment on any other aspect of network compensation plans or contractual relations which may be inconsistent with legitimate public interest objectives. We stress again, however, our unwillingness to become involved in the amount of station compensation per se (i.e., without reference to practices which are anti-competitive or contrary to the public interest).

Network-Program Supplier Relations

21. Our discussion of the relationships between the networks and program producers and suppliers is divided into the following six categories: (1) network interests in syndicated programs produced by independent suppliers, (2) network produced entertainment programming, (3) contractual tying agreements relating to production facilities and program options, (4) exclusive exhibition rights to new programs, (5) exhibition rights to network reruns, and (6) relations between network owned and operated stations and program suppliers. Once again, parties are free to comment on other matters which may be relevant to this Inquiry. All parties are urged, however, to make every effort to support their arguments with factual information.

22. Network Interests in Syndicated Programs Produced by Independent Suppliers. The proposed NBC consent decree contains terms prohibiting NBC from acquiring distribution rights or profit shares in programs produced by outside producers, and from engaging in syndication of such programs anywhere, and from all syndication in the U.S. These

particular terms appear virtually identical to rules adopted by the Commission in 1970 (§73.658(j)), prohibiting such activities, including the acquisition of any interest in a program produced by an outside party beyond the right to network exhibition. We invite interested parties to comment on the adquacy of our present rules and to propose alternatives if that appears to be warranted. Parties may wish to comment, particularly, on programs such as the current Dinah program--created originally by CBS, produced for its 5 owned and operated stations by an outside entity, and syndicated nationally by a different company but often, according to Westinghouse, carried by CBS-affiliated stations. Westinghouse and NAITPD claim that this violates the spirit if not the letter of the 1970 rules, particularly in light of Dinah Shore's other contractual relations with CBS.15/

23. Network "In-House" Production of Entertainment Programs. Although most network entertainment programs are acquired from outside producers, a small number have been and are produced entirely by the networks themselves. This was one subject of the Department of Justice's antitrust action. The Department's position (as set forth in its competitive impact statement filed with the NBC consent decree) is that, just as with programs produced by others but in which the network acquires subsidiary rights, there arises a network predisposition to use such material regardless of its merit, and independent producers are thus unduly excluded from the network program market. Other parties have alleged that the unlimited network potential for producing their own entertainment programs can be used to obtain first-run programming at unreasonably low prices. While we are not concerned with the profits of program producers as such, we are interested in the question of whether this factor gives the networks an anti-competitive advantage over potential competitors, and whether the advantage works to limit the supply of independently produced programs. Parties addressing the possibility of Commission regulation in this area should attempt to assess the possible effects of such restrictions on: (1) network programming

15/ Westinghouse also mentions the fact that the program is produced by CBS facilities (see para. 25, below). While not mentioned by Westinghouse, other pertinent factors in this connection could be: (1) the proportion of guests on the show which are CBS "talent"; and (2) whether or not CBS advanced financing for the program.

schedules, as to quality and type of programming; (2) prices paid for network exhibition rights; and (3) the cost and supply of syndicated programming available to local stations.

24. Contractual Tying Agreements Relating to Production Facilities and Program Options. Independent production companies have periodically maintained that the networks agree to purchase a particular program on the condition that the producer grant the networks other rights or interests which are not incidental to network exhibition of that program. These interests, it is said, sometimes include a commitment to use network-owned production facilities to produce the program. We suggest that commenting parties address themselves to the question of whether such arrangements to the extent that they exist, may affect competition in the offering of program production facilities. We are further interested in obtaining information regarding the following questions: (1) what proportion of all network programs are produced using network owned facilities or that of other networks, (2) how does the cost of leasing these facilities compare with the cost of leasing facilities owned by others, (3) what percentage of total production costs is attributable to the cost of leasing facilities, and (4) does that percentage vary by type of program?

25. It is also alleged that the networks commonly demand options on exhibition rights for as much as five to seven years following the development of a script or program pilot, thereby precluding competition in bidding for the rights to a program which develops into a highly successful series. We invite comments on the effects which such practices could have on competition, and, more specifically, on the supply of programs available to local stations through the syndication market, and also on the extent to which these clauses may limit the life expectancy of a first-run series. Comment is also invited on (1) the extent to which extended options may be necessary to cover a network's heavy expenses in developing and promoting program series, (2) whether the terms and conditions of options differ for various types of programs, (3) their impact on the profitability of an investment by a producer in independently produced entertainment series, (4) the relationship between program options and the life expectancy of a new series and the subsequent availability of that series in the syndication

markets and (5) the extent to which changes in program options would or could affect station compensation payments.

26. Exclusive Exhibition Rights for Program Pilots. In a given year, the networks typically purchase exhibition rights to a far greater number of new programs than they can possibly use. In large measure, such purchases are necessary to enable the network to select an attractive line-up of programs and to replace those which generate relatively small audiences. Nevertheless, we believe that it is appropriate to seek comments on whether some present practices unduly restrict the release of a significant number of pilots for further development and thereby limit the amount of first-run material available for syndication, and whether this programming might, in some instances, provide viable competition to network offerings. More specifically we invite comments regarding (1) the extent to which networks have eventually used programs which were initially rejected for regularly scheduled distribution; (2) the amount of elapsed time between initial rejection and eventual acceptance of these programs during the past 10 television seasons; and (3) any differences in the duration of exclusive rights to new series which depend on the type of program (e.g. prime-time series as opposed to day-time, situation comedy as opposed to drama etc.). Finally, parties are invited to comment on whether these rights influence the diversity of network schedules or the availability of first-run syndicated programs.

27. Exhibition Rights to Network Reruns. The Department of Justice has raised a question as to whether limitations should be placed on the ability of networks to secure exclusive rights to rebroadcast episodes originally shown in a previous television season. Specifically, the consent decree contains a provision that negotiations for exhibition rights to repeats, originally broadcast in a preceeding season, must be separated from negotiations for rights to first-run exhibition. We invite comments regarding the need for such restrictions and their effect on (1) the cost of repeats to the network and local stations, (2) network use of repeats in day-time, prime-time and fringe hours, (3) investment opportunities in new first-run network and syndicated programming and (4) the demand for new as well as repeated syndicated material available to local stations. Parties are invited to comment on any other aspect of this issue which warrants our attention. It is not our wish to reopen here the issues regarding same-year repeat episodes which were dealt with in the Commission's inquiry concerning the networks' use of reruns in prime-time entertainment programming (Docket No. 20203, 37 FR 2d 1435).

28. The Relations Between Network Owned and Operated Stations and Program Suppliers. The networks also participate in the programming market as station owners. It has been alleged by Westinghouse that certain practices used by the networks in acquisition of programming for the owned and operated stations have adversely influenced the quantity and quality of syndication offerings. It would be helpful to the Commission to know the extent of block buying of programming for each network owned station group (i.e., the purchase of the same programs for exhibition on all of the stations in that group.) The Commission is also interested in whether any relationship exists between the purchase of first-run programs for O and O exhibition and the leasing of network owned facilities for the production of those programs. Comments are invited on whether a "network deal" in the form of a contract for exhibition on an O and O group is a prerequisite for the success of a first-run program sold in the syndication market. Parties are also free to address other issues concerning the impact which network practices with respect to owned and operated stations may have on the programming market and, in particular, the impact which such practices might have on the successful syndication of programming in direct competition with network offerings. While this inquiry concerns the business practices of the networks as they may impact on industry competition, and while attention, thus, must be paid to network practices with respect to the O and O's, we wish to make it clear that this is not a multiple or "group" ownership proceeding.

29. The Nature of this Proceeding. Comments and other information filed in connection with this inquiry will be evaluated by a special staff composed of economists, attorneys, and others with relevant experience and expertise. This staff will be under the direct supervision of the full Commission.16/ The staff's analysis of the comments and reply comments may be followed by the issuance of questionnaires or inquiries designed to provide a complete factual record. If at any point it appears that these procedures are inadequate, the special staff will be authorized to initiate compulsory processes under Section 403 of the Act. It is hoped that a report concluding this inquiry can be completed within one year following receipt of the comments.

16/ The special staff which conducted the 1955-57 inquiry was under the supervision of a committee of four Commissioners. In the present instance, however, we see no need for the establishment of such a committee.

30. IT IS ORDERED, that the petition for inquiry, rule making and immediate temporary relief, filed September 3, 1976, by Westinghouse Broadcasting Company, Inc. IS GRANTED to the extent indicated herein and IS DENIED in all other respects.

31. Authority for the institution of this proceeding is contained in Sections 4(i), 303(g), (i) and (r) and 403 of the Communications Act of 1934, as amended. Pursuant to applicable procedures set out in Section 1.430 of the Commission's Rules, interested persons may file comments on or before May 2, 1977 and reply comments on or before June 1, 1977. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken herewith. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice. We recognize that some parties may wish to file comments which include confidential financial information or other material which they may be reluctant to make public. In a manner consistent with the Freedom of Information Act (5 U.S.C. §552) we will consider requests for confidential treatment made under §0.459 of our Rules. As set forth in that section such requests may be made in advance.

32. In accordance with the provisions of §1.419 of the Rules, an original and 5 copies of all comments, replies pleadings, briefs, and other documents shall be furnished the Commission. Material filed will be available for public inspection during regular business hours in the Commission's Broadcast and Docket Reference Room at its headquarters in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION*.

Vincent J. Mullins
Secretary

*See attached Separate Statement of Commissioner Joseph R. Fogarty.

SEPARATE STATEMENT OF COMMISSIONER JOSEPH R. FOGARTY

In Re: Commercial Television Network Practices and the Ability of Station Licensees to Serve the Public Interest

While I agree fully with the Commission's decision to undertake this Inquiry into network programming practices and policies, I wish to state my understanding of one particularly important aspect of the Notice we announce today.

At paragraph 28 of this Notice, we request comment on the relations between network owned and operated stations (O&O's) and program suppliers, noting certain allegations which have been raised regarding possible adverse effects of these relations on the quantity and quality of syndicated programming. The Commission also notes, however, that "this is not a multiple or 'group' ownership proceeding." While I agree that this aspect of our Inquiry should not be considered a "multiple ownership" proceeding per se, I do not read this advisement as precluding the examination of any issues as to multiple ownership as it may affect the programming market. Nor do I view this statement as precluding future Commission consideration of appropriate action to remedy any abuses which this Inquiry may disclose.

APPENDIX D

DEPARTMENT OF JUSTICE
WASHINGTON, D.C. 20530

December 3, 1976

HONORABLE RICHARD E. WILEY
Chairman
Federal Communications Commission
1919 M Street, N.W.
Washington, D.C.

Re: Westinghouse Broadcasting Company, Inc.
Petition for Inquiry, Rule Making and Immediate Temporary Relief. FCC File No. RM-2749.

DEAR CHAIRMAN WILEY:

It appears that the Comments we filed in the above-captioned proceeding may have raised questions concerning the relationship between the Comments and currently pending litigation between the United States and the three major television networks. (*United States* v. *CBS Inc., United States* v. *American Broadcasting Companies, Inc., United States* v. *National Broadcasting Company, Inc.*, Civil Action Nos. 74-3599, 74-3600, and 74-3601-RJK).

While we continue to believe that a general inquiry by the Commission into network practices is appropriate and fully warranted at this time, we wish to emphasize that the Department's Comments should not be construed as suggesting that the inquiry encompass those issues now being litigated in the Federal District Court in California.

Further, this letter and the Comments are, of course, in no way intended to preclude either the Commission or the Department of Justice from taking any action consistent with its respective responsibilities. *United States* v. *Radio Corp. of America*, 358 U.S. 334 (1959). We ask that a copy of this letter be associated with and made a part of the public record in this proceeding.

Sincerely yours,

DONALD I. BAKER
Assistant Attorney General
Antitrust Division

All Commissioners
American Broadcasting Companies, Inc.
CBS Inc.
National Broadcasting Co., Inc.
Citizens Communications Center
Westinghouse Broadcasting Co., Inc.

APPENDIX E

Overlap Between FCC Actions and Provisions of the Proposed Decree

Proposed Decree Provisions	FCC			
	Adopted Similar Relief	Adopted Different Relief	Currently Under Consideration	Note
Syndication (IV)	X		X	1
Financial interest (IV)	X		X	1
Production (V, VI(D))		X	X	2
Production facilities (VI(B), (C))			X	3
Contract options (VI(E)(i))			X	4
Exclusivity-program series (VI(E)(ii))		X	X	5
Exclusivity-feature films (VI(E)(iii))		X	X	6
Pilots (VI(F))	X		X	7
Spin-offs (VI(G))			X	8
Reruns (VI(H))			X	9

Notes

1. Network syndication and network acquisition of financial interests were considered in the FCC's Report and Order, Docket No. 12782, 23 F.C.C.2d 382 (1970) ("Program Practices Rulemaking"), and regulations were adopted that are similar to Section IV of the proposed decree. Those matters are being considered again in the FCC's recent Notice of Inquiry, Docket No. 21049 (Jan. 14, 1977) ("Network Practices Inquiry").

2. Network program production was considered in the FCC's Program Practices Rulemaking. However, the FCC declined to adopt a 50% limitation when it adopted instead the prime-time access rule. Report and Order, Docket No. 12782, 23 F.C.C.2d 382, 384 (1970). Network production is being considered again in the Network Practices Inquiry.

3. The terms on which network facilities for program production are made available to third parties are being considered in the Network Practices Inquiry.

4. Option provisions in contracts between networks and independent program suppliers are being considered in the Network Practices Inquiry.

5. The extent to which a network may obtain the exclusive use of program series was considered in the FCC's Second Report and Order, Docket No. 19554, 35 R. R. 2d 767 (1975) ("Pay Cable Rulemaking (II)"), and regulations were adopted, governing the use by cable and subscription television of program series, that are different from Section V(E)(ii) of the proposed decree. The matter is under consideration again in the Network Practices Inquiry and in the FCC's Notice of Inquiry, Docket No. 20402, 52 F. C. C. 2d 87 (1975) ("Broadcasting—Cable Inquiry").

6. The length of time which a network may obtain the exclusive use of a feature film was considered in the FCC's First Report and Order, Docket Nos. 18893 and 19554, 52 F.C.C.2d 1 (1975) ("Pay Cable Rulemaking (I)"), and regulations were adopted that are different from Section V(E)(iii) of the proposed decree. The matter is under consideration again in the Network Practices Inquiry and in the Broadcasting—Cable Inquiry.

7. The length of time during which a network may have the exclusive right to order a series based on a pilot produced for that network pursuant to a step-deal was considered in the FCC's Program Practices Rulemaking, and regulations were adopted that are similar to Section VI(F) of the proposed decree. 49 C. F. R. § 73.658(j) (ii). The matter is again under consideration in the Network Practices Inquiry.

8. Spin-offs from series exhibited on networks were considered in the Pay Cable Rulemaking (II). 35 R. R. 2d 767, 770 (1975). That matter is again under consideration in the Network Practices Inquiry.

9. The rerun rights a network may acquire with respect to original network series programming are under consideration in the Network Practices Inquiry.

Movie Blues

Film Exhibitors Face a Financial Crisis As Hollywood Studios Slash Production

By Earl C. Gottschalk Jr.
Staff Reporter of The Wall Street Journal

HOLLYWOOD—To the growing list of shortages, add another: a dearth of movies.

The studio dream factories have slashed their output to a comparative trickle because mounting costs and competition from television continue to make movie production less lucrative. But theater owners, citing economic considerations of their own, have been expanding the number of movie screens.

And so the exhibitors are reeling. Faced with fewer films when they need more, they are in the midst of a financial crisis. Some marquees have already gone dark, and many more theaters are struggling to stay open.

"The shortage is driving me right out of business," says Tom Patterson, owner of the Jonesboro (Ga.) Twin Theaters near Atlanta, which since last summer have been playing mainly reruns and some relatively obscure nature and horror films during the Christmas season, normally the biggest moviegoing period all year. All Mr. Patterson could offer were a nature film and a terror flick almost nobody had heard of. After a week of tiny audiences, his theaters reverted to showing "Jaws" and "Bad News Bears," both for a third run.

At least Mr. Patterson is still operating. The Walter Reade Organization, a national theater chain, has been forced to close seven of its 24 movie houses, and it also has been forced into federal bankruptcy court. Sheldon Gottsberg, the Walter Reade president, says, "We had other financial problems, but if we had had a good flow of movies, we could have avoided bankruptcy."

Production Is Falling

But "a good flow of movies" is impossible with Hollywood's tight fist on the faucet. During 1976, the latest year for which the National Association of Theater Owners has figures, 228 movies (including 30 revivals) were released in the U.S., a record low and down from 368 five years earlier. During Hollywood's heyday, the so-called Golden Age of the Forties, the studios produced some 450 movies a year. (The figures don't include readily available pornographic films, to which more theaters are turning.)

Figures on 1976 releases aren't available yet, but theater owners say the figures are certain to show a further decline. And still fewer movies are being projected for this year. Daily Variety, an entertainment industry newspaper, reports that only 10 marketable movies have been set for first-quarter production this year, down from 19 in the same period last year. (And some of these productions may be imperiled by a Writers Guild strike expected March 1 upon expiration of a contract.)

The producers, of course, say they haven't any choice but to make fewer movies. Costs are soaring, increasing the producers' risks, and movie audiences aren't growing very much. The Motion Picture Association, an industry group, says that the average cost of making a movie has risen more than 60% during the last four years to $3.7 million, and advertising and distribution costs can run $6 million on a $3 million movie. The number of tickets sold, while well above the depressed levels of the Sixties, is still only a fraction of the sales level before the television era. An estimated 1.01 billion movie tickets were sold in 1976, compared with more than four billion a year in the forties.

On top of all that, movie production is beginning to be hurt further by a recent federal tax change that will close a key tax shelter used by individuals who finance movies. The change will mean reduced investments and thus fewer movies, industry officials say.

Hollywood's production slump is compounded by the theater owners' expansion. The number of movie locations has risen in recent years to about 16,000 from a low of 12,652 in 1963. That's still below the 1948 level of about 19,000, but the addition of multiple screens at many theaters means there are perhaps 21,000 screens today.

The theater owners say that they're adding screens (and making each theater smaller) to reduce the risks in booking a flop. "If you have one theater with two screens and have a film that's not doing well, you're in trouble," says Marvin Goldman, president of the National Association of Theater Owners. "If you have six hot-seat theaters, you might have three or four winners and two or three losers. You're better off ..." This assumes, of course, you have more movies to show.

But Samuel Z. Arkoff, chairman of American International Pictures Inc., a production company, says: "The theater owners are their own worst enemies. We can't possibly produce enough movies to cover all those new screens."

Limited Copies

Indeed, the producers claim it wouldn't be profitable even to increase the number of copies of each movie. Although a record 2,321 prints of the label version of "King Kong" were produced, movie makers usually hold their production to fewer than 150 prints. The producers say they limit the number of prints mainly to hold down costs.

Such cutbacks are hitting the theaters hard. They are facing the toughest rental terms in history from film distributors. Robert Selig, an executive of Pacific Theaters, a Los Angeles West Coast chain, says that distributors a decade ago typically got 40% of the box office on a major picture; now they often demand—and get—90%, plus a whopping guaranteed minimum gross.

Pacific Theaters says it was offered Paramount Pictures' "King Kong" on such tough terms that it had to turn it down. "Other chains may be able to make a profit on those terms, but we couldn't," Mr. Selig says. Pacific Theaters was hard pressed last year to find enough first-run movies. "We scrounged and researched every piece of film ever made to put something on the screen," an official says.

Independent theaters complain that relatively well-heeled chains get first crack at all the good movies. "I had to wait eight months after 'Jaws' was released to get it, and eight months for 'The Exorcist,'" says Mr. Patterson, the Jonesboro, Ga., theater owner. "About the time it's dead, they turn it over to us."

Feast or Famine

The theater owners also complain bitterly that movie companies dump most of their output on the market for the Fourth of July and Christmas periods, exacerbating the shortage during the rest of the year. During one slack period last year, movie releases were so scarce that many theaters around the country closed for periods of three weeks to two months until the Christmas releases arrived.

"This is the first time in history that so many large, economically successful theaters closed because there were no movies," says Joseph Aaronian, executive director of the National Association of Theater Owners, who says he doesn't know exactly how many theaters shut. But at least three big theaters in New York City were affected.

Whether the theater owners can overcome their difficulties isn't clear. Lately speakers at conventions of exhibitors have pleaded for an end to theater expansion. But nobody knows yet if the pleading has had any effect.

Meanwhile, the owners say they're struggling to stay in business, often by exhibiting movies that don't deserve to be shown. Here to Sy Evans, an official of General Cinema Corp., the world's largest theater chain, commenting on the quality of many of last season's record movies: "Thank God we sell popcorn and candy bars."

1964 was 0.10, the present value of 0.193 C may be calculated as follows:

$$[(0.193\,C)/4]\int_0^{\infty} e^{-rt}dt = 0.01825C[(1 - e^{-0.4})/0.10] = 0.159\,C.$$

A long, tortuous route has brought us to an estimate of the value of syndication profits, which is nearly 16 percent of the price of a new episode of a program series to the networks.

How sensitive are these estimates to the assumptions made along the way? For instance, if the Little data were taken literally, the estimate of the present value of syndication profits would fall to 11.6 percent of new program costs. If all other assumptions were to be retained, an increase in the assumed cost of capital to 15 percent would lower present value from 0.159 to 0.145 C. An assumed growth rate of syndication profits of 20 percent would raise the estimate to 16.6 percent. Only the denial of the assumptions in the Little Report's calculations of industry profits seems of great importance, but this denial seems warranted even though our adjustment is certainly a rough one.

The final accounting estimate of the value of all syndication interests—16 percent of new program costs to the networks—is well within the confidence interval of our econometric estimate of 19 percent (Table 2). It would therefore appear that networks have paid an amount equal to the discounted present value of the distribution rights and profit shares which they have obtained. The Prime Time Rule has not saved the program suppliers from the rapacious tendencies of network buyers; it has simply required the suppliers to assume more risk or to sell these syndication interests to other buyers.

7. An extension of the results

If we extend the theoretical model developed earlier in this paper, we may utilize the regression results along with further empirical analysis to make a rough estimate of the degree of monopoly-monopsony power possessed by the networks.

For instance, suppose that (1) is appropriately represented by (1'):

$$A_1 = \frac{f\left(\sum_{j=1}^{M} t_{1j}\right)}{F\left(\sum_{n=1}^{3}\sum_{j=1}^{M} t_{nj}\right)} \qquad \begin{matrix} \partial A_1/\partial t_{1j} > 0 \\ \partial A_1/\partial t_{nj} < 0 \\ n \neq 1 \end{matrix} \qquad (1')$$

If we assume further that $f'(\ ) = F'(\ )$, then:

$$\frac{\partial A_1}{\partial t_{1j}}\cdot\frac{t_{1j}}{A_1} = \frac{f_j'(\ )t_{1j}}{f(\ )}\left[1 - \frac{f(\ )}{F(\ )}\right], \qquad (10)$$

where $f_j'(\ )t_{1j}/f(\ )$ is the elasticity of the network's own audience with respect to its own investment in the jth input. If we call this elasticity μ_j, we may insert (10) into (4) to obtain

$$\left|\frac{\eta - 1}{\eta}\right| \cdot P_A A_1 \sum_{j=1}^{M} k_j \cdot \mu_j\left[1 - \frac{f(\ )}{F(\ )}\right] = \sum_{j=1}^{M} p_j t_{1j} \qquad (11)$$

At Cournot equilibrium, $1 - f(\ )/F(\ )$ becomes $1 - 1/N$, where N is the number of rival networks. If we assume further that all $k_j = k$, we may write the expression for Cournot equilibrium as

$$k\left[\frac{\eta - 1}{\eta}\right]\left[\frac{N - 1}{N}\right]\left[\sum_{j=1}^{M} \mu_j\right][P_A A_1] = \sum_{j=1}^{M} p_j t_{1j}. \qquad (12)$$

For talent inputs alone, this relationship simply states that above-the-line expenditures are equal to the product of the audience expected from the program and the sum of the elasticities of audience with respect to each input multiplied by three terms which reflect the intensity of competition among networks for audience, advertising revenue, and performers. In our regression results of the previous section, the estimate of a_2 is

$$a_2 = k\left[\frac{\eta - 1}{\eta}\right]\left[\frac{N - 1}{N}\right]\left[\sum_{j=1}^{K} \mu_j\right] \approx 0.10.$$

If we could determine the value of the sum of the elasticities, $\sum_{j=1}^{K} \mu_j$, we would be able to estimate the value of $k[\eta - 1/\eta]$ for $N = 3$, the number of networks throughout our sample period.

Unfortunately, we do not have precise data on the distribution of above-the-line and below-the-line costs for our U. S. sample, but the foreign noncommercial data do permit us to attempt to estimate $\sum_{j=1}^{K} \mu_j$. These foreign data contain observations on above-the-line costs, payments to performing artists, and audience for 54 light entertainment and drama series. The light entertainment series—mostly filmed comedy or light drama and music-variety programs—are likely to be chosen to provide the maximum audience per unit cost, but the drama series may well be chosen to satisfy the tastes of a sizeable minority despite the costs involved in their production. For this reason, empirical investigation into cost-audience relationships are likely to be useful only for the light-entertainment series.

In order to obtain a measure of $\sum_{j=1}^{K} \mu_j$ from the noncommercial program experience, we estimate two forms of simple regressions of audience upon costs—one which is linear and one which is log-linear.[28] The independent variables are either artists' costs or

[28] The regression of audience upon either component of costs provides us with a direct estimate of the effect of talent inputs upon audience. The linear regression gives us a slope coefficient equal to $\sum_{j=1}^{k}(\partial A/\partial t_j)$ and the loglinear regression yields slope coefficients equal to $\sum_{j=1}^{k} \mu_j$. This result may be proved quite simply. If audience is denoted A and total factor payments of the appropriate category are denoted $\sum_{j=1}^{k} p_j t_j$ and if we assume that $A = \alpha\left[\sum_{j=1}^{k} p_j t_j\right]^{\beta}$, $\partial A/\partial t_j = (\beta A p_j)/\left(\sum_{j=1}^{k} p_j t_j\right)$ and $(\partial A/\partial t_j)(t_j/A) = \beta p_j t_j/\left(\sum_{j=1}^{k} p_j t_j\right)$. Summing over all K inputs gives $\sum_{j=1}^{k}(\partial A/\partial t_j)(t_j/A) = \beta$. But $\sum_{j=1}^{k} \mu_j = \sum_{j=1}^{k}(\partial A/\partial t_j)(t_j/A)$; therefore, $\sum_{j=1}^{k} \mu_j = \beta$.

Response to Comments Submitted by CBS Inc.

CBS directs its comments to two general propositions. First, it argues that the entry of the proposed NBC Judgment is not in the public interest because the activities attacked in the three network complaints are not cognizable under the antitrust laws and in any event are protected by the First Amendment; and, second, it asserts that the Competitive Impact Statement ("CIS") fails to satisfy the requirements of the Antitrust Procedures and Penalties Act ("APPA"), 15 U.S.C. §16(b)-(h) (1976). For the reasons stated below, both of these contentions are, we believe, without merit.

I. Entry of this Judgment is in the Public Interest Since it Satisfactorily Settles an Antitrust Case, Does Not Conflict with any Past or Anticipated FCC Regulatory Action and Does Not Offend the First Amendment.

CBS seeks to paint the proposed Judgment as anticompetitive 1/, but as the Competitive Impact Statement demonstrates,

1/ Under the guise of filing comments on the NBC Judgment, CBS apparently seeks to resurrect for reargument and reconsideration every motion it has made and lost during the pendency of its own case. In that connection, on February 9, 1977, the Court denied CBS's Summary Judgment Motion, finding that the existence of genuine issues of material fact, the complex nature of the litigation, and the controlling issues of motive, intent and reasonableness of the challenged agreements made summary judgment inappropriate. Further, on February 16, 1977, the Court ruled that the FCC did not have exclusive jurisdiction over the subject matter of the three network cases, and denied CBS's motion to dismiss. United States v. CBS Inc., 1977 Trade Cas. ¶61,327 (C.D. Cal. 1977).

Form OBD-183 12-8-76 DOJ

its provisions are pro-competitive and they provide satisfactory and expeditious relief. Moreover, the Judgment's entry is not precluded either by past or anticipated actions of the FCC or by the First Amendment. In sum, when measured against the appropriate antitrust public interest standard, this Judgment is in the public interest.

A. The Procedure and the Standard of Review Established Under the Antitrust Procedures and Penalties Act.

Pursuant to the APPA, the Court must find that entry of a proposed Judgment is in the public interest. [15 U.S.C. §16(e)]. While such a requirement is not new [United States v. Carter Products, 211 F.Supp. 144, 147-48 (S.D.N.Y. 1962)], the procedure for arriving at such a finding has been altered dramatically under the Act.

The APPA sets forth explicit requirements which must be satisfied by the Department of Justice before the Court can enter a judgment. The Act requires that notice be given to the public, and a Competitive Impact Statement ["CIS"] be filed with the Court and published in the Federal Register [15 U.S.C. §16(b)], that the public have a period of at least 60 days from publication within which to file comments to the proposed Judgment, and that the comments and the

/////

1/ continued

Form OBD-183 12-8-76 DOJ

Government responses thereto be filed with the Court and published in the Federal Register. [15 U.S.C. §16(d)].

Once this procedure has been completed, the Court has broad discretion in deciding what further to consider. The APPA suggests that the Court consider the matters addressed in the CIS, including the competitive impact of the judgment, the provisions for enforcement or modification, the alternatives considered, and the impact on the public generally [15 U.S.C. §16(e)(1) and (2)].

While there is broad discretion in the Court in deciding what issues to consider and what steps to take to insure a complete ventilation of the consent process, the cases in which the public interest standard has been considered and the legislative history both strongly suggest that the standard to be met in determining whether entry is in the public interest, is whether the Judgment is consistent with the allegations of the complaint and the enforcement of the antitrust laws. United States v. Associated Milk Producers, Inc., 394 F.Supp. 29 (W.D. Mo. 1975), aff'd, 534 F.2d 113 (8th Cir.), cert. denied, U.S. , 97 S.Ct. 355 (1976); United States v. Gillette Co., 406 F.Supp. 713 (D. Mass. 1975); United States v. Morgan Drive Away, Inc., 1976-1 Trade Cas. $60,949 (D.D.C. 1976); see United States v. Carter Products, Inc., 211 F.Supp. 144, 148 (S.D.N.Y. 1962). This determination must include a recognition that antitrust consent settlements are an appropriate and beneficial enforcement tool, that compromise may be involved, and that the Attorney General has broad discretion as to the terms of such settlements.

Form OBD-183 12-8-76 DOJ

In United States v. Associated Milk Producers, Inc., supra, the District Court entered a consent decree after finding the Government's resolution of dissolution or divestiture relief to be "well within the discretionary power of the Attorney General under existing law." [394 F.Supp. at 45]. The Eighth Circuit, in affirming, noted:

> It is axiomatic that the Attorney General must retain considerable discretion in controlling government litigation and in determining what is in the public interest. [534 F.2d at 117].

In United States v. Gillette Co., supra, the Court, in approving a consent decree, explained:

> It is not the court's duty to determine whether this is the best possible settlement that could have been obtained if, say, the government had bargained a little harder. The court is not settling the case. It is determining whether the settlement achieved is within the reaches of the public interest. Basically I must look at the overall picture not hypercritically, nor with a microscope, but with an artist's reducing glass. [406 F.Supp. at 716].

In United States v. Morgan Drive Away, Inc., supra, the Court also imposed a limited standard of review in determining whether entry of the decree was in the public interest. Judge Flannery stated that:

Form OBD-183 12-8-76 DOJ

> The result of the bargaining toward settlement should not be measured against what concessions the Government might have succeeded in exacting from the defendants had it bargained somewhat harder, or even against the probable outcome had the case gone to trial. [1976-1 Trade Cas. at p. 69,191]

The Court went on to rule, after considering comments in opposition, that the comments "have not undermined the conclusion of the United States that the proposed Judgment is in the public interest. . . ." [1976-1 Trade Cas. at p. 69,191].

These decisions are consistent with the Congressional intent that consent decrees must remain a viable enforcement option. Such an option would not long remain viable were it necessary for a Court to conduct a de novo determination of the factual issues relevant to the adequacy of the proposed decree. 2/ In fact, the Senate Report advises that, "[o]nly

2/ The Senate Report states:

> The Committee recognizes that the court must have broad discretion to accommodate a balancing of interests. On the one hand, the court must obtain the necessary information to make its determination that the proposed consent decree is in the public interest. On the other hand, it must preserve the consent decree as a viable settlement option. It is not the intent of the Committee to compel a hearing or trial on the public interest issue. It is anticipated that the trial judge will adduce the

where it is imperative that the court should resort to calling witnesses for the purpose of eliciting additional facts should it do so." [S. Rep. No. 298, 93d Cong., 1st Sess. 1, 6 (1973)]. 3/

Moreover, Congressional intent is clear that the applicable public interest standard is one of judicial construction based on the antitrust laws and antitrust precedents. The

2/ continued

> necessary information through the least complicated and least time-consuming means possible . . . .
> [S. Rep. No. 298, 93d Cong. 1st Sess. 6 (1973)].

3/ The competitive impact statement required by the APPA is similar to the environmental impact statement required by the National Environmental Policy Act of 1969 ("NEPA"), 42 U.S.C. §4321, [119 Cong. Rec. 24599 (1973)]. NEPA, like the APPA, does not call for a de novo review of governmental action. Upper W. Fork River Watershed Ass'n. v. Corps of Engineers, 414 F.Supp. 908, 915 (N.D. W.Va. 1976). Cf. Camp v. Pitts, 411 U.S. 138 (1973). Further, the Court is neither empowered to substitute its own judgment for that of the Government, Environmental Defense Fund, Inc. v. Corps of Engineers, 470 F.2d 289, 300 (8th Cir. 1972), nor required to make findings of ultimate fact or resolve conflicts between the economic theory and data relied on by the Government and that presented by those objecting to the Government's action. Environmental Defense Fund, Inc. v. Froehlke, 368 F.Supp. 231, 240-41 (W.D. Mo. 1973), aff'd sub nom. Environmental Defense Fund, Inc. v. Callaway, 497 F.2d 1340 (8th Cir 1974).

original bill included a provision 4/ which stated that the entry of a consent decree must be found to be "in the public interest as defined by law." The phrase "as defined by law" was deleted from the bill according to the House Report,

> . . .as a recognition that the content of the phrase, "public interest," is a product of judicial construction in the context of particular statutes . . . and to provide illumination and consistency in the usage of the phrase, the "public interest" . . . . Preservation of antitrust precedent rather than innovation in the usage of the phrase, "public interest," is, therefore, unambiguous. 5/

Thus, based upon the Act itself, upon the interpretive Court decisions to date, and upon the Congressional intent as expressed in the legislative history, the Court must decide, after taking into consideration all evidence in support of the proposed Judgment and all opposition to it, whether the Government made a clear error in judgment or abused its discretion. If, based upon that review, the Court finds that the entry of the decree would be consistent with the allegations of the Complaint and the enforcement of the antitrust laws, then the Court should enter this Judgment in order to provide expeditious relief by eliminating anti-

competitive restraints. See United States v. Carter Products, Inc., 211 F.Supp. at 148.

B. The Judgment Provides Satisfactory and Expeditious Relief from the Violations Alleged in the Complaint.

The proposed Judgment addresses the antitrust violations alleged in the NBC complaint and seeks to provide procompetitive relief from those violations. 6/ CBS has challenged

6/ The CIS states:

> The Complaint alleges that NBC used its control over access to the broadcasting time of the NBC Television Network during prime evening hours for the following purposes: to exclude from network broadcast those entertainment programs in which NBC had no financial interest; to compel independent program suppliers to grant to NBC financial interests in television programs which it accepted for broadcast; to refuse to sell air time to advertisers and other independent program suppliers seeking to have their own programs shown on the NBC network; to control the prices paid by NBC for television exhibition rights to motion picture feature films; and to obtain competitive advantages over other producers and distributors of television entertainment programs and of motion picture feature films. [CIS at 2]

The Judgment addresses those issues: (1) by limiting for a period of 10 years, the amount of television entertainment programming that NBC may produce for use on its own network;

the entry of the proposed decree as anticompetitive, basing its contention on the proposition that the antitrust laws do not apply to the activities alleged in the complaint. [CBS Comments at 4-17]. However, the Court already rejected the contention that the antitrust laws do not apply to such network activities when it denied defendants' Motions for Summary Judgment. 7/ Further, the Government believes that the relief provided in the Judgment would be procompetitive.

CBS first argues that the program production limitation of Section V is anticompetitive, since it would to some

---

6/ continued

(2) by prohibiting NBC from conditioning access to its television network upon an independent program supplier's grant of any other right or interest to NBC, including its agreement to use NBC's production facilities; (3) by limiting for periods of 10 or 15 years the contractual rights which NBC may obtain in connection with network exhibition of a program, including limitations on NBC's right to exclusive use of a program; (4) by enjoining NBC from obtaining any right or interest in television entertainment programs produced by others, except for the right to network exhibition; (5) by enjoining NBC from engaging in domestic syndication of any television entertainment programs, and from engaging in foreign distribution of programs other than those produced abroad or by NBC; and (6) by prohibiting reciprocal program production arrangements between NBC and either CBS or ABC.

7/ See p. 1 at n.1, supra.

extent eliminate NBC as a potential competitor in the program production market. [CBS Comments at 6-7]. 8/ The limited ban, however, is procompetitive, not anticompetitive, because it would eliminate the possibility that NBC could substantially increase its internal production of network programs, thereby excluding independent program suppliers with which it competes. While it prevents NBC from supplying more than 2-1/2 hours during prime time, plus 2 specials every six months, it at the same time insures that the remaining prime time is open to all potential program producers to compete with each other in supplying programs to NBC. 9/ CBS's position mistakenly assumes that each network has an unquestioned right to require that all the entertainment programming

/////

8/ Plaintiff originally sought a complete ban on production by NBC, and will continue to press for this relief against CBS and ABC. Relief against NBC's internal production was limited in order to put a lid on such production without the necessity of a full trial.

9/ CBS's reliance on United States v. Penn-Olin Chemical Co., 378 U.S. 158 (1964), for the proposition that NBC is important as a potential entrant to the oligopolistic entertainment program production market, is misplaced. The problem being addressed in these cases is the illegal conversion of each network's power in broadcast distribution and exhibition into monopsonistic buying power in the television program procurement market.

broadcast by its nationwide chain of affiliated television stations be produced by it. 10/

A limitation on total integration, in the face of an abuse of market power or a restraint of trade, is a recognized remedy under the antitrust laws. Thus, in the movie cases, the Supreme Court upheld a Judgment which prohibited the defendants from engaging in all phases of the movie industry:

10/ CBS asserts, in effect, that it not only has a legal right to produce all the prime time entertainment programming shown on its network, but that it can condition access to its network on program suppliers' agreement to grant subsidiary rights and interests in programs, can refuse to sell air time to advertisers or others who might provide their own programs, and can extract long term options and exclusivity from program suppliers, all without scrutiny under the antitrust laws. This argument goes well beyond a possible, plausible objection to entry of this Judgment. For, under the antitrust laws,

> . . .the existence of power 'to exclude competition when it is desired to do so' is itself a violation of §2, provided it is coupled with the purpose or intent to exercise that power [citation omitted]. It is indeed 'unreasonable, per se, to foreclose competitors from any substantial market.' International Salt Co. v. United States, 332 U.S. 392, 396. [United States v. Griffith, 334 U.S. 100, 107 (1948)].

production, distribution and exhibition. United States v. Paramount Pictures, Inc., 334 U.S. 131, 170-175 (1948). Here, NBC is currently in the production, distribution and exhibition of television programs; the production limitation would prohibit it from using the combined power of its affiliated group of television stations to totally engross television entertainment program production unto itself.

The production limitation is also important because it would curtail NBC's ability to favor internally produced programs over independently produced programs in which it had no rights and interests. In sum, in conjunction with the prohibitions of Sections IV and VI of the proposed Judgment, the production cap would severely inhibit NBC's ability to use its control over access to its nationwide chain of stations to restrain trade.

CBS also asserts that the "restrictions on the terms of trade" found in Section VI are anticompetitive [CBS Comments at 13-17]. 11/ The gist of CBS's argument is that each network should be permitted to continue to exact, as its price for considering an entertainment program (including feature films), the producer's agreement not to permit its use by any other network, station or communications medium. 12/

11/ It specifically criticizes Sections VI(E)(i) and (ii) and VI(H).

12/ Another element of CBS's argument against these restrictions is that the networks will offer decreased license fees for programming because they can no longer

In short, CBS wants to continue to eliminate any possible competition for any possible use of an entertainment program, and the proposed Judgment would put some limits on this practice. 13/ All of the contract provisions affected by

---

12/ continued
acquire various residual rights and protection from competition, and as a result, will force out small independent producers without ample resources. This, CBS asserts, would result in higher concentration in the program production industry. [CBS Comments at pp. 13-16].

While this theory is open to question on several grounds, the basic difficulty with it is that it involves sheer speculation as to whether or not NBC will offer decreased license fees, a dubious premise since such fees are presently below the cost of production for many programs. Moreover, CBS itself contradicts this hypothesis when it states that entry of the decree would be anticompetitive because it allegedly would "restrict the supply of programming and drive up program prices." [CBS Pleading in Intervention, dated April 20, 1977, par. 4, at p. 2]. CBS's observations on the decree's effects on programming price levels appear to differ depending upon which provision CBS is attacking.

13/ The antitrust laws are as much violated by the prevention of competition as by its destruction. United States v. Aluminum Co. of America, 148 F.2d 416, 428-429 (2d Cir. 1945). Thus, acquisition of syndication and other distribution rights and profit shares, often before the development

this Judgment involve restraints on competition, be that competition during the first "prime time" run, or competition for the use of repeat rights or syndication rights. Restraints such as NBC's exclusivity against domestic syndication or stripping, prevent local stations and the other networks from competing for the right to broadcast the program until after NBC has milked every possible bit of revenue from it. This exclusivity provision also allows the network, if it so chooses, to strip reruns of the program on its own network at a different time without any fear that the supplier can seek a better price or better terms from any other broadcaster. The proposed Judgment seeks to increase the chance that a program supplier could exploit the after market uses of his product much earlier than is currently possible, and would permit other networks and television stations to compete with NBC for rights to do so. This is hardly anticompetitive.

Antitrust relief often involves the imposition of limitations on the contractual abilities of a defendant who

---

13/ continued
of a program has passed the idea stage, prevents competition for those rights by other syndication or merchandising companies. Long term renewal options on the program prevents competition for successful programs among the networks or from first run syndication on a station by station basis. The current contracts of all three networks also prevent the supplier from stripping or syndicating older episodes of a series for the entire life of the series on the network.

has violated the Sherman Act. 14/ It is not a valid ground for objection that the particular contractual terms subjected to injunctive provisions may be legal in themselves. 15/ Indeed, a court may affirmatively "interfere" in the bargaining process by requiring mandatory selling or leasing on reasonable terms, and even by setting reasonable rental charges, if such measures are necessary to reestablish competitive market conditions. 16/

Since the relief in an antitrust case must be structured to effectively redress violations and restore competition,

---

14/ For example, the consent decree entered in United States v. Swift & Co., No. 37623 (D.C. Sup. Ct., Feb. 27, 1920), a case in which several large meatpacker defendants were accused of unduly extending their market power into other related lines of commerce, enjoined the defendants from inter alia (1) engaging in the business of manufacturing, selling or transporting any of over a hundred commodities, (2) using or permitting others to use their distribution facilities for the handling of any of those commodities, (3) selling meat at retail, (4) holding any interest in any public cold storage plant and (5) selling fresh milk or cream.

15/ See International Salt Co. v. United States, 332 U.S. 392, 400 (1947). Cf. American Tobacco Co. v. United States, 328 U.S. 781, 809 (1946).

16/ See United States v. Glaxo Group Ltd., 410 U.S. 52, 64 (1973); United States v. United States Gypsum Co., 340 U.S. 76, 94 (1950); In re Multidistrict Vehicle Air Pollution, 538 F.2d 231, 235-236 (9th Cir. 1976).

"the District Court is clothed with 'large discretion' to fit the decree to the special needs of the individual case" 17/, and it is clear that in these cases, the networks' power to coerce restrictive contract provisions cannot remain unbridled.

C. The Entry of this Judgment is not and should not be Precluded by Past or Anticipated Actions of the Federal Communications Commission.

Despite the fact that the FCC itself has made clear that its actions should not "in any way preclude the Department from prosecuting its case or from arranging an appropriate settlement" 18/, CBS has dusted off its well-worn and oft rejected argument that the FCC's actions can and should do just that [CBS Comments at 17-18]. In particular, CBS contends that because the proposed consent Judgment does not adjudicate the illegality under the antitrust laws of NBC's

---

17/ Ford Motor Co. v. United States, 405 U.S. 562, 573 (1972), citing International Salt Co. v. United States, 332 U.S. at 401; United States v. DuPont & Co., 353 U.S. 586, 608 (1957); United States v. Crescent Amusement Co., 323 U.S. 173, 185 (1944). See United States v. Glaxo Group, Ltd., supra, at 64.

18/ Notice of Inquiry, In the Matter of Commercial Television Network Practice and the Ability of Station Licensees to Serve the Public Interest, Docket No. 21049, January 14, 1977 ("Notice of Inquiry"), at Par. 5, 42 Fed. Reg. 4992. See also the FCC Memorandum to the Court in this litigation, January 11, 1973.

past conduct, this litigation should not be settled, but should instead be referred to the FCC for some uncertain resolution at some undetermined date. While a consent Judgment does not, by definition, adjudicate any issue of law, this Judgment's provisions are fashioned so as to prevent the continuation of conduct which the Complaint charged was anticompetitive. The cases against CBS and ABC are proceeding to trial because the Court has repeatedly determined that it has jurisdiction to fashion relief against their alleged antitrust violations. It would be strange indeed if, because NBC has agreed to settle its own litigation, that fact and the nature of the relief achieved could deprive the Court of its jurisdiction in this action.

CBS further argues that entry of the provisions of the decree would duplicate, overlap and collide with the FCC regulatory scheme. [CBS Comments at 18]. Yet, no examples of actual collision between the decree and the regulatory scheme of the FCC are cited. Rather, CBS, as does ABC, attempts to conjure up numerous possible problems with the FCC's new Notice of Inquiry. However, the FCC, which is perfectly capable of speaking for itself, has, as already noted, commented only that its announced inquiry should not be used to "foreclose" the Department of Justice in its antitrust action, or to preclude the Department from arranging "an appropriate settlement." 19/

/////

19/ Notice of Inquiry, Par. 5, 42 Fed. Reg. at 4992.

CBS also alleges that this Judgment is inconsistent with the FCC rules [CBS Comments at 21-22], but cites Section IV which is completely consistent with and supportive of the FCC's financial interest and syndication rules. [47 C.F.R. §73.658(j)(i)-(ii)]. CBS further contends that Section IV is inconsistent with the FCC's authority because it is not limited in time [CBS Comments at 24-25], but neither are the corresponding FCC rules so limited. If the FCC, after its Notice of Inquiry, were to propose changes in its rules, and if the changes were enacted on a full record, the Court retains jurisdiction in Section XII to consider any appropriate modification of the Judgment, if that were desirable under antitrust standards.

Finally, CBS's contention that the continued production of entertainment programming by the networks was specifically approved by the FCC, is without merit. [CBS Comments, at 25-26]. The FCC did consider a ban on a network's offering any network supplied program to its affiliates during 50% of prime time, and did so because it was concerned with "continuing dominance by network corporations of the television program production and procurement process." 20/ Thereafter, the FCC concluded

20/ The Notice of Proposed Rulemaking, Docket 12782, 45 F.C.C. 2146, 2162 (1965), states:

> Strict adherence to the principle of free competition would perhaps suggest the total elimination of network corporations from production and financial and proprietary control of tele-

that network program production should be limited. 21/ This is precisely what Section V of the proposed Judgment would

20/ continued

> vision programming. However, the record of the Program Inquiry and our general knowledge of the situation as it currently exists in network television leads us to the view that the public interest in a nationwide television structure sustained by network program service would not be furthered by eliminating network corporations entirely from the program production and procurement process. We are persuaded that, in order reasonably to insure the quantity and quality of television programming necessary to maintain adequate community service, network corporations should be permitted to engage to a substantial but limited degree in program production, procurement and financing. On the other hand, it is our tentative view that to permit continuing dominance by network corporations of the television program production and procurement processes as disclosed by the record of our Inquiry not only would injure the public interest in a competitive national television structure but also would act as a stricture on the "larger and more effective" use of television channels in the public interest.

21/ The FCC considered prohibiting each network from producing, procuring or financing entertainment programs

accomplish. Significantly, the FCC has not objected to the proposed production limitation of Section V, but merely sought comment on that provision among others in its recently instituted inquiry into commercial television network practices. 22/

D. Retention of Jurisdiction by the Court is Standard Practice in Antitrust Cases and Should Not Preclude Entry of the Proposed Judgment.

CBS asserts that entry of this Judgment is not in the public interest because the Court would have to maintain continuous supervision of it. [CBS Comments at 20-21]. Of course, all antitrust judgments provide that the Court retains jurisdiction over the subject matter thereof, and

21/ continued

during 50% of all prime time hours. Ultimately, in 1970, the FCC prohibited each network from originating any entertainment program during one hour of prime time, prohibited network acquisition of subsidiary interests or profit shares and prohibited each network from engaging in domestic syndication of television programming. These prohibitions are commonly referred to as the Prime Time Access, Financial Interest and Syndication Rules, 47 C.F.R. §73.658(j) (1975). [Report and Order, Docket No. 12782, 23 F.C.C. 2d 382, 384 (1970), aff'd sub nom. Mt. Mansfield Television, Inc. v. F.C.C., 442 F.2d 470, 482 (2d Cir. 1971)].

22/ See Notice of Inquiry, par. 23, 42 Fed. Reg. at 4995.

this case is no exception. The Court, once it recognizes its jurisdictional duty, has no other choice. If Courts refused to consider or enter judgments in antitrust cases simply because to do so might be burdensome, few antitrust cases would be successfully concluded. In any event, the provisions of this Judgment will not prove to be unduly burdensome to the Court. Many of its provisions are limited to terms of 15 years or less 23/, for the express purpose of not burdening the Court with matters which may prove to be temporal. Only Sections IV(A), IV(B), VI(A) and VI(B), which embody general antitrust principles, have no time limitations. However, none of the Judgment provisions call for the type of Court supervision that evolved in United States v. Paramount, 1948-49 Trade Cas. ¶62,377 (S.D.N.Y. 1949), or in United States v. ASCAP, 1940-43 Trade Cas. ¶56,104 (S.D.N.Y. 1941).

An examination of the Paramount and ASCAP decrees quickly reveals features which substantially distinguish them from this proposed Judgment. The RKO decree 24/, for example, enjoined defendant:

> From acquiring a beneficial interest in any theatre, other than those named [in the decree] unless the acquiring defendant shall show to the satisfaction of the court and the court shall first find, that such acquisition will not unduly restrain competition in the exhibition of feature motion pictures (emphasis added). [1948-49 Trade Cas. at 62,886]. 25/

The ASCAP decree calls for extensive judicial review of proposed license fees to be paid applicants. 26/ Section IX provides, in part:

> If the parties are unable to agree upon a reasonable fee within sixty (60) days from the date when such application is received by ASCAP, the applicant therefor may forthwith apply to this Court for the determination of a reasonable fee . . . . [1950-51 Trade Cas. at 63,754].

These two provisions, which resulted in much of the post-Judgment litigation under those decrees, have no counterpart in the NBC Judgment. Here, the Court would not be required to pass on each and every transaction, or indeed any transaction, engaged in by NBC. This substantial distinguishing difference

23/ Sections V, VI(C), VI(D), VI(E), VI(F) and VI(G) are all effective only for fifteen years or less.

24/ United States v. Paramount Pictures, 1948-49 Trade Cas. ¶62,335 (S.D.N.Y. 1948). (The RKO decree is one of the Paramount decrees.)

25/ Also see United States v. Paramount Pictures, 1948-49 Trade Cas. ¶62,377 (S.D.N.Y. 1949) (the Paramount Decree). Paragraph III.A.6(a)(iii-iv) and (b) are to similar effect as the RKO decree.

26/ United States v. ASCAP, supra, as amended United States v. ASCAP, 1950-51 Trade Cas. ¶62,595 (1950).

between the judgments cited by CBS and the proposed NBC Judgment demonstrates that the extensive Court oversight envisaged by CBS is a myth.

E. The Proposed Judgment Does Not Violate NBC's First Amendment Right to Free Speech.

Curiously, CBS argues that the Judgment would violate NBC's constitutional right to free speech. [CBS Comments at 30-34]. CBS, however, has no standing to object to an alleged violation of NBC's First Amendment rights. The Courts have long held that persons may not raise or adjudicate the constitutional rights of third parties who have not asserted those rights in their own behalf. Tileston v. Ullman, 318 U.S. 44, 46 (1942); Warth v. Seldin, 422 U.S. 490, 509-510 (1975); Paton v. LaPrade, 524 F.2d 862, 874 (3d Cir. 1975). In any event, there is no First Amendment issue in this proceeding.

CBS argues that this Judgment would infringe First Amendment rights because, as a broadcaster, a network is immune from prosecution under the Sherman Act. However, the First Amendment affords no antitrust immunity for businesses such as newspaper publishing or broadcasting. In Associated Press v. United States, 326 U.S. 1 (1945), the Court denied outright Associated Press' argument for immunity. Justice Black, writing for the Court, stated:

> The First Amendment, far from providing an argument against application of the Sherman Act, here provides powerful reasons to the contrary. That Amendment rests on the assumption that the widest possible dissemination of information from diverse and antagonistic sources is essential to the welfare of the public . . . . The First Amendment affords not the slightest support for the contention that a combination to restrain trade in news and views has any constitutional immunity. [326 U.S. at 20].

In addition, the Supreme Court similarly denied a claim for unlimited immunity by a broadcaster in Red Lion Broadcasting Co. v. FCC, 395 U.S. 367 (1969), where the Court stated that "it is idle to posit an unabridgeable First Amendment right to broadcast comparable to the right of every individual to speak, write, or publish." [395 U.S. at 388]. See Columbia Broadcasting System, Inc. v. Democratic Nat'l Comm., 412 U.S. 94, 101-103 (1973). Unfortunately, NBC's network cannot be used by all who would desire to do so. National Broadcasting Co., Inc. v. United States, 319 U.S. 190, 226 (1943). Certainly, it cannot be used by NBC to restrain or monopolize a substantial part of trade and commerce.

Further, in the case of United States v. Paramount Pictures, Inc., 334 U.S. 131 (1948), the Supreme Court, overriding a similar First Amendment challenge, held that in the face of a restraint of trade, it was proper to prohibit movie distributors from integration into the related business of exhibition. [334 U.S. at 170-175]. Subsequently, the District Court ordered that the theatre circuits of each defendant be divested from their production and distribution

arms. [85 F.Supp. 881, 895-896 (S.D.N.Y. 1949)]. While not totally precluding such integration, the proposed Judgment in this case seeks to insure that there will be no abuse flowing from NBC's limited production of programs and that total engrossment of its entertainment program production by NBC cannot occur.

CBS raised the same First Amendment claim when the FCC imposed the prime time access rule which prohibited each network's affiliates in the top fifty markets from accepting network originated programming for an hour period each night. It said this constituted an absolute ban on network "speech." The Second Circuit expressly considered and rejected CBS's claimed infringement, stating:

> The unique structure of the broadcast media requires a determination as to who will have priority in the exercise of First Amendment rights when there is a potential conflict in the operation of the industry. The Supreme Court has ruled that the public's right to access must prevail over all other claims. . . . [Mt. Mansfield Television, Inc. v. FCC, 442 F.2d 470, 477 (2d Cir. 1971)].

Plaintiff can conceive of no more serious restriction on free speech than acceptance of CBS's argument that it, NBC and ABC should be permitted to produce all of the television programming broadcast on their respective networks, totally foreclosing all independent program suppliers from their nationwide chains of affiliated stations. This Judgment, rather than infringing on constitutional rights, seeks to insure that no such infringement is possible.

II. The Competitive Impact Statement Satisfactorily Complies With the Requirements of the Antitrust Procedures and Penalties Act.

CBS seeks to bolster its opposition to entry of the Judgment by alleging that the CIS does not satisfy the requirements of the APPA [CBS Comments at 34-46]. Upon analysis, however, CBS's entire argument is the same as that raised in an earlier portion of its comments; that is, that entry of the Judgment would be anticompetitive because no valid antitrust claim is asserted by the complaints. [CBS Comments at 4-17, 40-44]. However, the Government has alleged serious violations of the antitrust laws, and this Judgment seeks to neutralize those violations. That CBS does not presently concede the validity of the Government's claims is understandable, but not persuasive. Since the competitive effects of this Judgment, as well as the nature and purpose of the case were fully discussed above, no further response is deemed necessary.

Re: United States v. National Broadcasting Company, Inc. (Civil No. 74-3601-RJK, C.D. Cal.)

Dear Mr. Hollander:

Pursuant to 15 U.S.C., Section 16(d)(Supp. 1976) and the order of the court extending the time within which comments may be submitted to and including March 1, 1977, enclosed are copies of ABC's Comments on the Proposed NBC Consent Decree.

Very truly yours,

Daniel H. Margolis

UNITED STATES DISTRICT COURT

CENTRAL DISTRICT OF CALIFORNIA

UNITED STATES OF AMERICA, Plaintiff,	:	
v.	:	Civil Action No. 74-3601-RJK
NATIONAL BROADCASTING COMPANY, INC., Defendant.	:	

COMMENTS OF AMERICAN BROADCASTING COMPANIES, INC. ON THE PROPOSED NBC CONSENT DECREE

American Broadcasting Companies, Inc. ("ABC") submits these comments pursuant to the Antitrust Procedures and Penalties Act[1] ("APPA"), with respect to the proposed consent decree filed in this case on November 17, 1976.[2]

Companion civil suits brought by the Antitrust Division of the Department of Justice ("the Department") are pending against ABC and CBS Inc.,[3] both of which operate national

1/ 15 U.S.C. § 16(b)(Supp. 1976).

2/ Proposed Consent Judgment, 41 Fed. Reg. 51992 (1976); United States v. National Broadcasting Co., Civil Action No. 74-3601-RJK (C.D. Cal., Complaint filed December 10, 1974).

3/ United States v. American Broadcasting Cos., Civil Action No. 74-3600-RJK (C.D. Cal., filed December 10, 1974); United States v. CBS Inc., Civil Action No. 74-3599-RJK (C.D. Cal., filed December 10, 1974).

commercial television networks in competition with NBC. These suits challenge the same network conduct and practices which are alleged to be unlawful in the suit against NBC. Some of the provisions of the proposed decree will not become effective unless similar relief is obtained against ABC (and CBS).[4]

ABC has been vigorously defending, and will continue to defend, the action pending against it. Because ABC believes that the Government's allegations are utterly without merit, and that the Court should dismiss these actions on jurisdictional as well as other grounds, ABC is moved to submit these comments with respect to the proposed decree in the pending action against NBC.

Before this proposed consent decree may be entered, the Court is required by statute to determine that its entry "is in the public interest."[5] For the reasons explained in the comments

4/ Competitive Impact Statement, 41 Fed. Reg. 52015 (1976) [hereinafter cited as "Impact Statement"]. Section VII of the proposed decree suspends the effectiveness of several provisions of the decree "until similar injunctive relief is obtained in Final Orders, Judgments or Decrees" entered against CBS and ABC. The suspended provisions are as follows: V, VI(C), VI(E)(i), and VI(F) through (H). Proposed Consent Judgment, 41 Fed. Reg. 51992, 52007-08 (1976). Also, if a final order is entered against either CBS or ABC that places NBC "at a competitive disadvantage," Section IX of the decree requires the Court to modify or exempt NBC from any provision of the proposed decree "as may be necessary to prevent NBC from being placed at a competitive disadvantage with respect to CBS or ABC." Proposed Consent Judgment, 41 Fed. Reg. 51992, 52009 (1976).

5/ 15 U.S.C. § 16(e)(Supp. 1976).

which follow, ABC submits that the Government should withdraw its consent to the proposed decree; and if the Government declines to do this, then the Court should reject the decree as not in the public interest. In brief, the reasons for ABC's position are as follows.

FIRST, this decree would superimpose inflexible, judicially fashioned regulations on an industry already subject to pervasive and ongoing regulatory control by the FCC. The Court can neither make the required public interest determination, nor administer the decree, without duplicating the FCC's role and conflicting with the FCC's authority.

A. The proposed decree is entirely regulatory in nature. If entered it will substantially, directly, and unnecessarily impinge on a recently commenced FCC proceeding encompassing precisely the same allegedly anticompetitive network practices, policies and conduct. See Notice of Inquiry, Docket No. 21049 (In the Matter of Commercial Television Network Practices and the Ability of Station Licensees to Serve the Public Interest), released January 14, 1977, 42 Fed. Reg. 4992 (1977).

B. Thus, in this respect the Court is confronted with a dilemma: Either the Court must evaluate

and administer the decree under the FCC's view of the public interest, which would be redundant, or the Court must create and adopt its own, different and inevitably conflicting version of the public interest.

SECOND, Congress has charged the FCC with the responsibility and granted it the power and authority to regulate the broadcast industry in accordance with the "public interest, convenience and necessity."[6] While the Court may have power to adjudicate antitrust issues and determine antitrust liability, the FCC has concurrent power and its "regulatory scheme is broad enough to comprehend the subject matter of this litigation."[7] Moreover, the FCC's power to regulate is not dependent upon a determination that a particular practice violates the antitrust laws. Therefore, it would be unwise, unnecessary and contrary to the public interest for the Court in the first instance, and without regard to an ongoing FCC proceeding covering the same subjects, to attempt to regulate the matters covered by the proposed decree.

A. The Department of Justice could request the FCC to exercise its authority to remedy the alleged anticompetitive

6/ 47 U.S.C. § 309 (1970).

7/ United States v. American Broadcasting Cos., Civil Action No. 74-3600-RJK slip op. at 6 (C.D. Cal. February 16, 1977).

network conduct and practices by promulgating rules identical to those embodied in the proposed consent decree. The FCC is both competent and required to weigh antitrust as well as other concerns in regulating the broadcast industry.

B. If the Court enters the proposed consent decree, it will necessarily become enmeshed in an enduring and burdensome task of regulation and industry administration.

C. There is no legal or practical reason why the Court should become involved at this time in attempting to regulate the television broadcasting industry. Accommodation of antitrust policies to FCC policies requires the Court at least to await the outcome of the pending FCC inquiry before undertaking to determine whether the provisions of the proposed consent decree are in the "public interest."

THIRD, the FCC's congressionally mandated jurisdiction over the subject areas of the proposed decree may not be ignored or defeated by a mere stipulation of the parties purporting to transfer the FCC's regulatory functions to the Court. The Department's only

justification for invoking the jurisdiction of the Court, rather than the jurisdiction of the FCC, is that the FCC does not have the power also to determine that the challenged network conduct was in violation of the antitrust laws, although its remedial powers are concededly at least as broad as the Court's. The decree which the Department of Justice has now submitted to the Court for approval, however, is a consent judgment. By its terms, the Court expressly refrains from making any finding that NBC's conduct or practices violated the antitrust laws.[8/] Hence, the Government's purported jurisdictional premise no longer exists. Since the Government is willing to accept a consent decree absent a finding of antitrust liability, the question whether the regulatory provisions of the proposed decree are in the "public interest" should now be referred, at least initially, to the agency specifically empowered by Congress to deal with such matters.

8/ The proposed consent decree provides that the parties consent to the entry of judgment

> without trial or adjudication of any issue of fact or law herein, and without this Final Judgment constituting any evidence against or admission by any party with respect to any issue of fact or law in any action or proceeding. . . .

Proposed Consent Judgment, 41 Fed. Reg. 51992, 51995 (1976) (emphasis added).

I.

Entry of the Proposed Decree Will Inevitably Involve the Court in Duplicating the FCC's Role and Conflicting with the FCC's Authority

A. The Decree is Entirely Regulatory in Nature.

In the Competitive Impact Statement filed pursuant to Section 2(b) of the APPA, the Government presents (without any factual support) the following statement of the nature and purpose of the proposed consent decree.

> The structure of the market is such that each of three networks controls program producers' and advertisers' access to the nation's commercial television audiences and each network has abused its power by refusing access to programs which it did not produce or in which it had no financial interest. Consequently, the only meaningful relief that can be obtained short of restructuring the networks is to limit network program production and restrict the program rights that each network may obtain from outside suppliers to the rights essential to networking, which are those incident to the right to exhibit the program. This the proposed NBC judgment seeks to do. It would establish specific outer limits on NBC's own program production and on the type of rights and interests which NBC may acquire from independent program suppliers in addition to the right of network exhibition. 9/

The Government admits that "many" of the proposed decree's injunctive provisions are of a "regulatory nature."[10/] The actual extent to which those provisions are indeed identical to already promulgated FCC rules, or would affect the precise network policies and practices which are the subject of a new

---

9/ Impact Statement, supra note 4, at 52021.

10/ Id. at 52023.

and comprehensive FCC inquiry,[11/] is startling. Thus:

(1) Section IV of the proposed decree embodies, without material alteration, the FCC's existing financial interest and syndication rules.[12/]

The FCC's Notice of Inquiry in Docket 21049 (released January 14, 1977) recognizes this, but indicates that these present rules may be modified as a result of its current inquiry "if that appears to be warranted."

> The proposed NBC consent decree contains terms . . . virtually identical to [the Commission's financial interest and syndication rules] . . . . We invite interested parties to comment on the adequacy of our present rules and to propose alternatives if that appears to be warranted. 13/

(2) Section V of the proposed decree restricts the number of hours of NBC-produced entertainment programming that NBC may schedule each week.[14/] The Government argues in the Competitive Impact Statement that this will eliminate

---

11/ See Notice of Inquiry, Docket No. 21049 (In the Matter of Commercial Television Network Practices and the Ability of Station Licensees to Serve the Public Interest), released January 14, 1977, 42 Fed. Reg. 4992 (1977) [hereinafter cited as "Notice of Inquiry in Docket No. 21049"].

12/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 51998-99 (1976).

13/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4995.

14/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 51999-52000 (1976).

"the possibility that NBC could substantially increase its internal production . . . and thereby exclude independent program suppliers."[15/]

The FCC's Notice of Inquiry in Docket 21049, however, indicates that the Commission is considering regulation in the same area, although expressly recognizing that this is an issue in this antitrust action.

> Although most network entertainment programs are acquired from outside producers, a small number have been and are produced entirely by the networks themselves. This was one subject of the Department of Justice's antitrust action. The Department's position (as set forth in its competitive impact statement filed with the NBC consent decree) is that, just as with programs produced by others but in which the network acquires subsidiary rights, there arises a network predisposition to use such material regardless of its merit, and independent producers are thus unduly excluded from the network program market. Other parties have alleged that the unlimited network potential for producing their own entertainment programs can be used to obtain first-run programming at unreasonably low prices. While we are not concerned with the profits of program producers as such, we are interested in the question of whether this factor gives the networks an anticompetitive advantage over potential competitors, and whether the advantage works to limit the supply of independently produced programs. 16/

15/ Impact Statement, supra note 4, at 52022.

16/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4995.

(3) Section VI(B) of the proposed decree enjoins NBC, in connection with its acquisition of network exhibition rights, from requiring a program supplier to use NBC production facilities; and Section VI(C) prohibits NBC from leasing facilities for the production of a filmed or taped program for a period longer than the time needed to produce episodes for one season.[17/]

In its Notice of Inquiry in Docket 21049, the FCC notes that independent production companies have periodically maintained that networks condition the purchase of a program on the use of network-owned production facilities, and then suggests

> that commenting parties address themselves to the question of whether such arrangements to the extent that they exist, may affect competition in the offering of program production facilities. 18/

(4) Section VI(E)(i) of the proposed decree reduces to three the number of annual renewal options that NBC may initially acquire on a series program.[19/] The Government purports to justify this restriction on the ground that it "is

17/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 52000-01 (1976).

18/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4995.

19/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 52001-02 (1976).

designed to restrict NBC's present ability to obtain exclusive rights to a program series for as long as seven years on terms and conditions set before the program has ever been developed."[20/]

The Notice of Inquiry in Docket 21049 addresses the identical question.

> It is also alleged that the networks commonly demand options on exhibition rights for as much as five to seven years following the development of a script or program pilot, thereby precluding competition in bidding for the rights to a program which develops into a highly successful series. We invite comments on the effects which such practices could have on competition. . . . 21/

(5) Section VI(F) of the proposed decree requires NBC to release every pilot it has not financed by the earliest date on which an episode of the contemplated series may be broadcast under the series development contract.[22/] Upon payment of its unrecouped development investment, NBC must release 65% of the pilots it has financed but does not select for broadcast within three to nine months after delivery.[23/] NBC

20/ Impact Statement, supra note 4, at 52025.

21/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4995.

22/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 52004-06 (1976).

23/ Id. at 52005.

must release the balance of the pilots it has financed within one year.[24/]

In its Competitive Impact Statement, the Government contends that this provision "would permit increased competition between the networks by freeing the producers of as many as 65% of the program pilots not selected by NBC to offer their pilots to other networks or television stations."[25/]

The FCC's Notice of Inquiry in Docket 21049 addresses the same issue, asking whether

> some present practices unduly restrict the release of a significant number of pilots for further development and thereby limit the amount of first-run material available for syndication, and whether this programming might, in some instances, provide viable competition to network offerings. 26/

(6) Section VI(H) of the proposed decree generally prohibits NBC from acquiring the right to repeat a series episode after the season in which it was first broadcast.[27/] NBC may, however, acquire the right to choose three new episodes

24/ Id.

25/ Impact Statement, supra note 4, at 52026.

26/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4996.

27/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 52007 (1976).

each season and repeat these episodes in later seasons.[28] Section VI(H) does not apply to cartoon or other children's series.[29]

The FCC's Notice of Inquiry in Docket 21049 expressly notes that

> [t]he Department of Justice has raised a question as to whether limitations should be placed on the ability of networks to secure exclusive rights to rebroadcast episodes originally shown in a previous television season. [30]

It then invites comments on the need for restrictions on this practice.[31]

(7) Section VI(E)(ii) of the proposed decree limits the duration of NBC's exclusivity rights against non-network stripping during daytime and fringe time to four years from the date the first episode of the series is broadcast.[32] Against all other broadcast uses during day time and fringe time, such as daytime network stripping, Section VI(E)(ii) limits exclusivity to three years from that date.[33]

28/ Id.

29/ Id.

30/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4996.

31/ Id.

32/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 52002-03 (1976).

33/ Id. at 52003.

Section VI(G) of the proposed decree limits NBC to first negotiation/first refusal rights in a spin-off involving a non-continuing character (one who appears in no more than 25 percent of the previous year's episodes).[34]

Although neither exclusivity as applied to non-network stripping nor first refusal rights in spin-offs is expressly referred to in the Notice of Inquiry in Docket 21049, these issues are within the ambit of the FCC's inquiry "whether the networks have maintained anticompetitive policies which unduly restrict the development of other programming sources."[35] Thus, the Notice of Inquiry observes that

> [i]t is obvious, of course, that the categories of questions concerning network-affiliate relations and network-program supplier relations are far from being mutually exclusive. Developments in one area can and generally do impact on the other. [36]

(8) Section VI(E)(iii) of the proposed decree prohibits NBC from acquiring any exclusive rights in a theatrical feature film against methods of exhibition other than pay or subscription television.[37]

34/ Id. at 52006-07.

35/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4992.

36/ Id. at 4992-93.

37/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 52003-04 (1976).

With respect to pay or subscription television use, Section VI(E)(iii) limits the duration of NBC's exclusive rights in a film to 25 months (plus one year for each run beyond two acquired by NBC), commencing no earlier than thirty days prior to the film's availability to NBC for use on the NBC network.[38]

The question of the extent to which the commercial television networks need exclusive rights with respect to theatrical feature films as against subscription television is presently under investigation by the FCC in a proceeding commenced on March 20, 1975.[39] The Notice of Inquiry in that proceeding states that

> [t]he second major focus of this inquiry concerns the question of what measure of contractual exclusivity, if any, is appropriate as between the conventional and subscription television services. [40]

The Commission then specifically asks for comments as to: "What are the relevant anti-trust implications of existing or foreseeable exclusivity arrangements?"[41] It invites comments on the need for restrictions on this practice.[42]

30/ Id. at 52004.

39/ FCC Docket No. 20402.

40/ Notice of Inquiry, Docket No. 20402, 52 F.C.C.2d 87, 90 (1975).

41/ Id. at 92.

42/ Id. at 91.

Thus, the decree which the Court has been asked to evaluate and enter is the precise subject of comprehensive regulatory FCC investigations.

B. The Proposed Decree Confronts the Court with A Dilemma: Either it Must Evaluate and Administer the Decree Under the FCC's View of the Public Interest, Which Would be Redundant, or it Must Create and Adopt Its Own, Conflicting Version of the Public Interest.

Before entering the proposed consent judgment, the Court must find pursuant to Section 2(e) of the APPA that the decree is in the public interest. But what public interest standard is to be applied in making this determination?

In light of the breadth of the FCC's concern, and the many interests it must take into account, the Court might be constrained to evaluate, enter and attempt to administer the proposed decree in accord with the FCC's public interest standard, accepting those provisions which conform, rejecting those which do not. That would seem to minimize disruption of the FCC's regulatory plan. But merely duplicating an existing regulatory regime hardly serves any cognizable public interest. And because the decree is regulatory and essentially prospective in nature, attempting to mimick the FCC would be expensive and difficult to accomplish.

In the first place, the Court would have to determine in each instance how the FCC would interpret the public interest. While that may be apparent when the FCC has issued specific regulations covering the matters in issue, when the FCC has not formulated a clear policy or has not given it concrete expres-

sion -- such as in the critical area of network production of television programming -- the Court would have to wait for the FCC to develop a position (or engage in guesswork) before duplicating the result the FCC would reach under the same circumstances.

In the second place, the Court will have to keep up with the FCC. As we have observed, the FCC is currently investigating the television industry to determine whether, considering the issues raised by the antitrust complaints, its existing regulatory scheme best serves the public interest. It is possible that, after investigation, which the FCC predicts may take a year, the FCC may find the public interest requires that it vary the current regulations as to syndication by and financial interests of networks, for example, or it may create new regulations or determine that regulation is not in the public interest. Any addition to, subtraction from or variation by the FCC of its rules would be based on a determination that the existing rules do not serve the public interest as adequately as the proposed variation. In such a case, the Court would be faced with the unenviable choice between modifying the NBC decree to follow the FCC rules revision (thus pointing up the meaninglessness of a judicial decree on the same subject) or declining to modify the decree (thus without the benefit of any evidentiary record both disagreeing with the expert agency designated by Congress to deal with this industry as to what

was "in the public interest" and imposing inconsistent requirements on NBC which are likely to interfere with the effectiveness of the FCC's pervasive regulatory scheme).

Alternatively, rather than attempting to follow the FCC, the Court may be constrained to evaluate, enter and administer the decree according to its own, distinct conception of the public interest. While there are innumerable other ways of defining or giving different emphasis to elements of the public interest, using this decree to give different concerns a greater role in broadcast regulation would be wrong for a number of reasons.

As the Court suggested in denying the networks' 1972 motions for a stay, to second guess the FCC by administering the decree according to a conflicting interpretation of the public interest would subvert the purpose of administrative agencies. The Court stated:

> Nevertheless, assuming antitrust violations are proven, accommodation of antitrust policies to F.C.C. policy in terms of remedies will be a real and substantial problem. Accordingly, the court will give great weight to the F.C.C. rules in the event that it becomes necessary to afford to plaintiff a remedy. This caveat, as a practical matter, might render the prosecution of these cases unnecessary, but that is for others than the court to decide. 43/

Equally significantly, second guessing the FCC would exceed the appropriate role of a reviewing court. By statute, exclusive jurisdiction to review final orders of the FCC is lodged in

43/ United States v. National Broadcasting Co., 1974 Trade Cas. ¶ 74,885, at 95,992 (C.D. Cal. 1973).

the courts of appeals, not the district courts.[44/] And, the scope of appellate review of FCC orders is narrow. FCC action must be sustained if it is "based upon findings supported by evidence"; trial de novo of the matters considered by the Commission is improper.[45/] It is equally improper for the reviewing court to consider whether the FCC correctly weighed and balanced the conflicting factors it took into account in determining that its actions served the public interest. As the Supreme Court stated in upholding the programming origination rules the Commission applied to cable, "[i]t was, of course, beyond the competence of the Court of Appeals itself to assess the relative risks and benefits of cablecasting."[46/]

The reason for the limited role of a reviewing court lies in the expertise of administrative agencies. The FCC was created to regulate the communications industry. After more than a generation in that role, the Commission has developed expertise in that field and of course has been funded and staffed to maintain that expertise. The judiciary does not possess those resources. The Court of Appeals for the Second Circuit recognized this in upholding the FCC's second modification of the prime time access rule.

44/ 28 U.S.C. § 2342 (Supp. 1976); 47 U.S.C. § 402(a)(1970).

45/ National Broadcasting Co. v. United States, 319 U.S. 190, 224, 227 (1943).

46/ United States v. Midwest Video Corp., 406 U.S. 649, 674 (1972).

> The issue of whether network dominance has actually increased under [the original prime time access rule] is peculiarly within the competence of the Commission, which has access to all phases of the industry and has conducted hearings not only under this docket but under related dockets as well. We cannot, as a reviewing court, determine de novo the relative weight of the several conflicting economic factors that should be considered. 47/

The Court, therefore, would effectively circumvent the permissible bounds of judicial review of agency action if it decided to administer the proposed decree according to a different standard from the one employed by the FCC. As a matter of public policy and the proper allocation of responsibilities between court and agency, the weighing and balancing of factors involved in formulating the public interest in broadcast regulation must be left exclusively to the FCC.

Moreover, if the Court evaluates the decree according to a standard different from the FCC's, unless that evaluation results in rejection of the decree, the networks will a fortiori be caught between inconsistent regulatory schemes. Indeed, the Court took note of this problem in its Memorandum of Decision and Order filed February 16, 1977, denying the defendant's motion to dismiss.

> . . . [I]mposition of the remedies requested by the government in this action may conflict with the directives of the FCC's regulations, thereby subjecting the networks to varying standards of conduct. 48/

47/ National Ass'n of Independent Television Producers and Distribs. v. FCC, 516 F.2d 526, 534 (2d Cir. 1975). See also Mt. Mansfield Television, Inc. v. FCC, 442 F.2d 470, 481-82 (2d Cir. 1971).

48/ United States v. American Broadcasting Cos., Civil Action No. 74-3600-RJK slip op. at 9 (C.D. Cal. February 16, 1977).

And it is reasonable to predict that the burden and unfairness of this inconsistency will not be confined to an occasional instance. In many practical respects, important provisions of the proposed decree overlap, duplicate and are inconsistent with the FCC's already existing regulatory scheme. We discuss three of these.

1. Limitations on Production.

Part V of the proposed consent decree would prevent NBC from producing more than 2-1/2 hours per week of its own prime time entertainment programming.[49/] Thus, regardless of marketplace circumstance, NBC would be forced to fill at least approximately 90% of its prime time entertainment programming needs from outside sources. Additional restraints would apply to daytime and fringe time programming.[50/]

The Government claims in its Competitive Impact Statement that there is a predisposition by networks to use their own programming which forecloses outside suppliers of programs.[51/]

49/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 51999 (1976).

50/ Id. at 51999-52000.

51/ In its Competitive Impact Statement, the Department states that the proposed decree

> would establish specific outer limits on NBC's own program production and on the type of rights and interests which NBC may acquire from independent program suppliers in addition to the right of network exhibition. This should minimize NBC's incentive to select a program on the basis of financial interests in it.

Impact Statement, supra note 4, at 52021.

The FCC considered this contention when it declined to adopt the "50/50" rule, which would have limited network-originated programs in prime time to 50% or 14 hours per week.[52/] The proposal had a purpose similar to the instant provision:

> to restrain network domination of nighttime television and to open access to the valuable nighttime hours to independent producers. [53/]

As the Commission noted, however, in rejecting the 50/50 rule,

> the public interest . . . would not be furthered by eliminating network corporations entirely from the program production . . . process. We are persuaded that, in order reasonably to insure the quantity and quality of television programming necessary to maintain adequate community service, network corporations should be permitted to engage to a substantial but limited degree in program production . . . . [54/]

The Commission chose instead to adopt the prime time access rule, as an alternative solution to the same alleged problem.[55/] The Commission explained its decision in part on the ground that networks might not be able to secure sufficient product from independent sources to fill their schedules, and thus might be damaged competitively by a limitation on internal

52/ Notice of Proposed Rule Making, Docket No. 12782, 4 R.R.2d 1589, 1611 (1965) [hereinafter cited as "Notice in Docket No. 12782"].

53/ Report and Order, Docket No. 12782, 23 F.C.C.2d 382, 384 (1970).

54/ Notice in Docket No. 12782, supra note 52, at 1611.

55/ Report and Order, Docket No. 12782, supra note 53, at 383-84.

production.[56/] The FCC expressly left open for future consideration in the light of experience whether the institution of the 50/50 proposal or some other variation was necessary, and consistent with that continuing responsibility, this is precisely what the FCC is now undertaking to do in its new investigation.[57/]

By consenting to the proposed decree, which permits some production, the Department of Justice has conceded agreement with the position of the FCC that networks "should be permitted to engage to a substantial but limited degree in program production. . . ."[58/] Thus the question is no longer whether a network may, consistent with the antitrust laws, produce its own entertainment programming. The only issue now is whether any limitation on network production is necessary in the public interest.

From an economic and competitive standpoint, production limitations such as those in the proposed decree are clearly contrary to the public interest. They curtail network flexibility to create new and innovative programs and to schedule network produced programming during periods of short supply. The integration of television program suppliers into the business of networking, coupled with increasing competition from other purchasers of such programming has made the continued

58/ Notice in Docket No. 12782, supra note 52, at 1611.

availability of an adequate supply of high quality programming from non-network sources highly uncertain and unpredictable.

Some recent examples of developments which threaten to diminish the supply of quality programming available to networks from outside sources include the following:

(a) Paramount Pictures Corporation, a subsidiary of the conglomerate, Gulf & Western Industries, Inc., aided and encouraged by its joint venture connections with Sony Corporation of America, is reported to have acquired the Hughes Television Network and to have signed a $2.8 million agreement to expand the network's delivery capabilities via satellite to virtually 24 hours a day.[59/]

(b) MCA/Universal, the largest supplier of television programming to networks, has agreed with a pool of affiliated and independent television stations to produce made-for-television movies and distribute them directly to the stations, bypassing the networks.[60/] MCA's first offering, an eight-hour first-run mini series, was commissioned by over 50 stations and is scheduled to begin airing in May, 1977. One licensee is reported to have characterized this activity as an "explosion" caused by "Hollywood production studios, as well as advertisers, [who] were anxious to open markets other than those afforded by ABC, CBS and NBC."[61/]

59/ Variety, December 29, 1976, at 33, Col. 1; Broadcasting, January 31, 1977, at 62, Col. 1.

60/ Variety, December 22, 1976, at 75, Col. 2.

61/ Broadcasting, January 24, 1977, at 21, Col. 1; The New York Times, January 19, 1977, at 22, Col. 1.

(c) Metromedia Television and a major advertising agency have announced plans to offer stations prime time programming five nights a week beginning in October, 1977 with thirty minutes a night, but planning to expand upwards.[62/] The plan was said to be designed to reach 60% of the nation's television households and to include plans for up to three hours of weekend programming.[63/]

(d) Another leading advertising agency plans soon to announce an offering of Sunday programming from 7-9 p.m., also developed in association with Metromedia.[64/]

(e) Norman Lear has indicated he plans to offer an entire evening of Lear-generated programming on Saturday nights as an alternative to the networks, beginning next year.[65/]

Some of these developments present the possibility of fourth (or fifth) networks.[66/] They all present serious threats of curtailing the outside supply of important programming available to the existing networks. While they may represent legitimate competitive efforts, they underscore the undesirability of placing artificial and inflexible restraints on the

62/ Broadcasting, January 24, 1977, at 20, Col. 3; The Washington Post, January 18, 1977, at B1, Col. 1; The New York Times, January 24, 1977, at 38, Col. 3.

networks ability to produce their own programs.

Furthermore, the production limitations contravene established antitrust policies favoring business growth through internal expansion. Vertical integration through internal expansion is prima facie lawful under the antitrust laws, particularly because entering a new phase of production or distribution necessarily results in the addition of a new competitor.[67/]

Most importantly, on economic and competitive grounds the production restrictions in the decree are unnecessary. There are natural limitations on network production that inhere in the business of networking. The advertising revenues that a network receives for the commercial time in its programs depend upon the expected audiences of those programs. Because networks compete among themselves and with other media for those audiences, they must include in their schedules only the best programs available, regardless of source.

Ignoring these economic facts of life, the Government argues in its Competitive Impact Statement that the proposed internal production limitations "should minimize NBC's incen-

67/ Ford Motor Co. v. United States, 405 U.S. 562, 568 (1972); Columbia Pictures Indus., Inc. v. Pueblo Bowl-O-Mat, Inc., 1977 Trade Cas. ¶ 61,255 (U.S. January 25, 1977).

tive to select a program on the basis of financial interests in it" and will eliminate "the possibility that NBC could substantially increase its internal production of its network programs and thereby exclude independent program suppliers."[68/] That, however, is the same argument which was raised and rejected in Columbia Pictures Indus., Inc. v. American Broadcasting Cos.[69/] In that case the major producers and suppliers of television entertainment programming sought to enjoin ABC from offering for telecast theatrical feature films produced by ABC. The majors argued that "[b]y its own evaluations [of feature films being considered for broadcast], ABC creams the product of its competitor-suppliers and accepts the mediocre product of its own."[70/] In denying the producers' motion for a preliminary injunction, however, Judge Palmieri found that "the intense nature of the competition between the networks for television audiences"[71/] effectively prevents a network from discriminating

68/ Impact Statement, supra note 4, at 52021-22.

69/ Columbia Pictures Indus., Inc. v. American Broadcasting Cos., 1974 Trade Cas. ¶ 74,912 (S.D.N.Y. 1974), aff'd, 501 F.2d 894 (2d Cir. 1974).

70/ Memorandum of Law in Support of Plaintiffs' Motion for Temporary Relief Against ABC's Exhibition of Its Own Films on Its Own Network, July 3, 1973, at 31, Columbia Pictures Indus., Inc. v. American Broadcasting Cos., 70 Civ. 4202 (S.D.N.Y., filed September 28, 1970).

71/ Columbia Pictures Indus., Inc. v. American Broadcasting Cos., 1974 Trade Cas. ¶74,912, at 96,096 (S.D.N.Y. 1974), aff'd, 501 F.2d 894 (2d Cir. 1974). In affirming Judge Palmieri the Court of Appeals observed that plaintiffs had injected "a 'public interest' argument which, viewed in one light, is as

[continued]

in favor of its own product.

> [T]he Court is not persuaded that ABC . . . has deliberately embarked upon a policy of selecting inferior [self-produced] programming to its own financial advantage and to the prejudice of plaintiffs. The television networks are in vigorous competition with each other. They are engaged in a continuous and lively rivalry for the attention of audiences, which is the very crux of their commercial objectives. The advertising revenue and thus its profits are directly related to and dependent upon the share of the television audience each network can attract with its programming. 72/

Thus, the natural discipline of competition for audiences supplies the only production limitation needed to protect the public interest.

2. Restrictions on Series Options.

The decree's provisions limiting NBC's acquisition of series options to four years (Part VI(E)(i)) also conflict with already existing FCC regulation.[73/] In 1975, the FCC decided to elimi-

71/ [Footnote continued from preceding page]

much to say that they believe the public has more of a right to view their films than those of ABC . . . ." 501 F.2d at 896. Moreover, Judge Palmieri had found "[a] persuasive showing has been made . . . that feature film product has been for a number of years in a state of continuing and acute shortage . . . ." 1974 Trade Cas. at 96,094. It has recently been reported that the major theatrical film producers "have slashed their output to a comparative trickle . . ." and ". . . 'a good flow of movies' is impossible with Hollywood's tight fist on the faucet." The Wall Street Journal, February 8, 1977, at 46, Col. 1.

72/ Columbia Pictures Indus., Inc. v. American Broadcasting Cos., 1974 Trade Cas. ¶ 74,912, at 96,095 (S.D.N.Y. 1974), aff'd 501 F.2d 894 (2d Cir. 1974). In this respect the Government's Competitive Impact Statement shows the proposed decree is based on wrong and naive assumptions which are not only lacking in evidentiary support but are also contrary to prior judicial determinations. Impact Statement, supra note 4, at 52018-21.

73/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 52001-02 (1976).

nate its restraints on pay cable broadcast of series.[74] It did so despite the contention that pay cable might siphon off successful conventional television series because it believed that this would not happen in light of the fact that

> almost all network series contracts include a purchase option from one season to another for a period of five or more television seasons . . . . (I)t is likely that the networks will continue to have sufficient leverage to demand and receive similar contract provisions. [75]

Thus, while the FCC clearly viewed siphoning of series by pay cable as an evil to be avoided, it felt that the networks' ability to protect themselves against this eventuality by five year and longer option contracts provided sufficient protection against this evil. By prohibiting such option contracts, the proposed decree would eliminate this protection and open the door to series siphoning by pay cable.

3. Restrictions on Cable Exclusivity.

The proposed decree's provisions as to cable exclusivity (Section VI (E)(iii)(e))[76] also conflict with Commission regulation. Under the decree, NBC could obtain exclusivity against subscription television of feature films for at most 25 months (for two runs of a film) of which no more than 30 days could

74/ Second Report and Order, Docket No. 19554, 35 R.R.2d 767 (1975).

75/ Id. at 772.

76/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 52003-04 (1976).

precede the first date for which NBC held exhibition rights.[77] Commission regulations, on the other hand, prohibit subscription showing of English language films (i) in the fourth through tenth years following theatrical release unless a broadcaster in the market has a present contractual exhibition right and (ii) after the tenth year if the film has never been shown on the market on a subscription basis, but has been shown on conventional television in the preceding three years.[78] In promulgating this regulation, the Commission noted that "the public interest in maintaining the conventional television structure has outweighed the interest in unregulated competition."[79]

Thus two regulatory authorities would attempt to deal with the same alleged problem (conflicts between conventional and subscription broadcasters over rights to television exhibition of feature films) in vastly different ways. And the regulations of the FCC, at least, are subject to change. As indicated earlier, the FCC has now open a proceeding to determine "what measure of contractual exclusivity, if any, is appropriate as between the conventional and subscription television services."[80] This proceeding may culminate in a rule identical

77/ Id. at 52004.

or similar to the decree provision; alternatively, the FCC may determine that no relief, or quite different relief, is dictated by all the public interest considerations involved. In any event, the Commission has made it clear that it is interested in "the relevant anti-trust implications of existing or foreseeable exclusivity arrangements."[81]

Whatever action the FCC takes in the three areas discussed above, this decree will not further the public interest. If the two forms of regulation coincide, the decree will be superfluous and will merely serve to burden the Court, the parties and the interested members of the industry. If the Commission, applying its public interest standards, orders different relief because, for example, it has considered, in addition to competitive considerations, the importance of maintaining a free television system which is able to present quality programs to the public at no direct cost to viewers,[82] there will be a regulatory collision.

II.

The Government Has Offered No Reason Why the Court Should Oust the FCC from Jurisdiction

It is unnecessary and would be unwise and contrary to the public interest for the Court to enter the decree and circumvent the FCC, both because the FCC can readily deal with all the

81/ Id. at 92.

02/ See Further Notice of Proposed Rulemaking and Notice of Inquiry, Docket No. 11279, 7 R.R.2d 1501, 1508 (1966); First Report and Order, Docket Nos. 19554 and 18893, 52 F.C.C.2d 1, 45 n. 30 (1975); Notice of Inquiry, Docket No. 20402, 52 F.C.C.2d 87 (1975).

issues raised by this case, including competition, and because the administration of the decree by the Court would be highly burdensome to all concerned. There is no excuse for such waste and burden.

A. In Fulfilling Its Statutory Responsibilities the FCC Is Both Competent and Required to Weigh Competitive and Other Public Interest Concerns.

Competition is a factor which the FCC has consistently weighed in carrying out its statutory mandate. The Communications Act of 1934 requires the FCC, in exercising its authority over broadcasting, to act in accordance with the "public interest, convenience and necessity."[83] As the Supreme Court has made clear, the phrase "public interest" comprehends the principle of free competition in the broadcasting industry. In FCC v. Sanders Bros. Radio Station,[84] for example, the Court stated:

> In contradistinction to communication by telephone and telegraph . . . the Communications Act . . . recognizes that the field of broadcasting is one of free competition. The sections dealing with broadcasting demonstrate that Congress has not, in its regulatory scheme, abandoned the principle of free competition, as it has done in the case of railroads. . . . [85]

In practice, the FCC has vigorously pursued competitive objectives. The history of Docket 12782, the FCC's earlier, extensive investigation of network contracts and practices,

83/ 47 U.S.C. § 309 (1970).

84/ 309 U.S. 470 (1940).

85/ Id. at 474. Accord, United States v. Radio Corp. of America, 358 U.S. 334 (1959).

supports the FCC's declaration that competition will be a major focus of the FCC's comprehensive new inquiry into the television industry. In the notice of proposed rulemaking in Docket 12782, which culminated in the syndication, financial interest and prime time access rules, the FCC declared:

> The purpose of the rule proposed herein is to foster free competition in television program markets. Specifically, the proposed rule is designed (a) to provide opportunity for entry of more competitive elements into the market for television programs for network exhibition and (b) to encourage the growth of alternate sources of television programs for both network and non-network exhibition. 86/

The FCC entertained the views of, and allowed extensive participation by, the Department of Justice at every stage of Docket 12782.[87/] During the investigation leading to the rulemaking proceeding, the FCC utilized the Antitrust Division's independent investigation of the networks and discussed the proposed rules and supporting data with the Division's staff.[88/] During the rulemaking proceeding itself, the Antitrust Division repeatedly informed the FCC of its belief that its proposed rules would have a beneficial effect on competition.[89/]

88/ Transcript of May 4, 1959, at 13-14, Docket No. 12782.

89/ Letter from Assistant Attorney General Richard W. McLaren to FCC Chairman Dean Burch (April 22, 1969); Letter from Assistant Attorney General Richard W. McLaren to FCC Chairman Dean Burch (July 15, 1970).

Similarly, on petition for review of the Commission's rules in the United States Court of Appeals for the Second Circuit, the Commission was strongly supported by the Justice Department[90/] in urging affirmance of the Commission's order.[91/]

Now again, the Commission's Notice of Inquiry in Docket 21049 makes abundantly clear its intention to focus on competitive factors.

> [T]he Commission must take a careful look at the question of whether the networks may have engaged in conduct which . . . restricts effective competition in the programming market.
>
> . . .
>
> . . . [T]his inquiry concerns the business practices of the networks as they may impact on industry competition. . . .92/

Indeed, the Court has recognized that "[t]he Commission's obligation to regulate for the public interest can, and should offer sufficient assurance that antitrust policy and concerns will be considered in the course of regulating the telecommunications industry."[94/]

90/ Brief for the United States and FCC, Mt. Mansfield Television, Inc. v. FCC, 442 F.2d 470 (2d Cir. 1971).

91/ In a similar fashion, the FCC has considered competitive concerns often at the urging of the Department, in more recent rulemaking proceedings. See, e.g., Comments of the United States Department of Justice, May 3, 1976, Docket No. 20350 (New Jersey Television Service).

92/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4993, 4996. See also supra pp. 8-15.

93/ United States v. American Broadcasting Cos., Civil Action No. 74-3600-RJK, slip op. at 13-14 (C.D. Cal. February 16, 1977).

FCC, as opposed to judicial, action is appropriate in this case also because there are complementary and at time countervailing concerns -- going beyond the scope of the antitrust laws -- which Congress has mandated as objectives in the regulation of the broadcast industry. Thus, the FCC must weigh, among others, four general objectives in carrying out its statutory mandate: to insure (1) locally-oriented programming;[94/] (2) diversity in programming content, concepts and sources;[95/] (3) high-quality, informative, socially desirable programming;[96/] and (4) competitive market structure.[97/]

Because of this broad mandate, the FCC has the ability to strengthen competition in circumstances in which the Department of Justice cannot act. As the Department noted in its joint brief with the FCC urging the Second Circuit to uphold the FCC's

rules in Docket 12782,

> [i]t is precisely because of the preventive nature of the Commission's powers in the area of competition that its regulation need not derive, for example, from findings of antitrust violation, for the antitrust laws exhaust neither the Congressional policy favoring free competition in radio communications (FCC v. Sanders Bros. Radio Station, 309 U.S. 470, 474) nor the Commission's particularization of that policy in rules designed to promote the most effective utilization of broadcast resources and to protect licensee responsibility from unwarranted infringements. The courts have long since held that the proper reach of such policies is far broader than any mere determination as to whether a particular practice violates the antitrust laws. 98/

At times, the FCC has determined that the interest in competition must be subordinated to other elements of the public interest. In Stauffer Publications, Inc.,[99/] for example, the FCC granted a license renewal to a qualified licensee even though the Department contended that, because the licensee also published morning and evening newspapers, control over communications media in the community would become unduly concentrated. Similarly, in decisions governing cable television, the FCC has

---

98/ Brief for United States and FCC at 67 n.19, Mt. Mansfield Television, Inc. v. FCC, 442 F.2d 470 (2d Cir. 1971)(citations omitted).

99/ Stauffer Publications, Inc., 59 F.C.C.2d 836 (1976). In rejecting the Department's views, the FCC declared that

> antitrust considerations are but one element of many which enter into the Commission's evaluation of the public interest. "The development of competition, while desirable, is not the single goal for the Commission, as it may be for the Department of Justice." Id. at 848 (citations omitted).

determined that the public interest in unfettered competition in some instances is outweighed by other FCC objectives.[100/]

B. Entry of Proposed Decree Will Enmesh the Court in the Burdensome Task of Administering the Television Industry

Entry of the decree will not end the Court's regulatory involvement with the FCC and this industry. Section IX requires the Court to modify or waive any provision of the decree if a final judgment against ABC or CBS places NBC at a competitive disadvantage and Section XII preserves jurisdiction in the Court "for the purpose of enabling either party . . . to apply . . . at any time for such further orders and directions as may be necessary or appropriate for the construction or modification of any of the provisions. . . ."[101/] It is reasonable to expect that there would be many such applications. Managing and disposing of applications for further orders and directions concerning this decree will be predictably burdensome.

100/ In a recent decision upholding, over the Department's objection many of the restrictions on cable television, the FCC stated:

> That our rules affect competition between the two forms of television is apparent and uncontroverted. The proper question is not whether our rules affect competition, but whether the public interest considerations which underlie the rules outweigh the public interest considerations in support of unfettered competition.

First Report and Order, Docket Nos. 19554 and 18893, 52 F.C.C.2d 1, 45 (1975).

101/ Proposed Consent Judgment, 41 Fed. Reg. 51992, 52009, 52011 (1976).

For the same reasons the Court is required by the APPA to consider the comments of all interested parties before entering a decree, the Court will find it necessary to provide for public comment on petitions to construe, modify or enforce the decree.[102/] In this important and highly visible industry, public comment could often be voluminous. There are many parties interested in the scope and specific content of network regulation: producers (major studios and independents), talent, unions, advertisers and advertising agencies, and television stations (affiliates and independents) not to mention the viewing public.[103/] In Docket 12782, for example, public hearings produced a record of over 11,000 pages of transcript in 70 volumes, with nearly 500 exhibits. The Commission received testimony from approximately 250 witnesses representing nearly 200 organizations.[104/]

Experience with other regulatory decrees confirms this forecast. For example, in litigation under the Paramount

decrees,[105/] the district court which administered the decrees found it had to consider the comments of all interested parties. Although it formally treated the interested parties as amici curiae, the court allowed them to introduce evidence and acted upon the evidence. "As a result each acquisition case in which amici are active has become a private antitrust suit in miniature. . . ."[106/]

The FCC's experience with the prime time acess rule provides further indication that there will be frequent petitions for modification or waiver should this decree be entered. The production limitations in the proposed decree impose constraints on the amount of network-produced programming a network may offer during each day part. The FCC's prime time access rule in effect imposes similar constraints on the total amount of programming (independently supplied as well as network produced) that a network offers during prime time. As originally adopted in 1970, the rule basically prohibited television stations in the top 50 markets from carrying more than 3 hours of network

105/ The decrees were entered after the Supreme Court decision in United States v. Paramount Pictures, Inc., 334 U.S. 131 (1948). United States v. Paramount Pictures, Inc., 1948-49 Trade Cas. ¶ 62,363 (S.D.N.Y. 1948) (the RKO Decree); United States v. programming during prime time.[107/] To date, the FCC has issued almost one hundred orders disposing of petitions for waivers or exemptions from the rule. The sheer number and difficulty of these petitions left the FCC, as the Second Circuit observed, with a "sense of uncertainty and frustration."[108/] To stem the stream of petitions and to correct other deficiencies in the rule, the Commission modified the prime time access rule on three separate occasions.[109/]

Moreover the proposed decree resembles the Paramount decrees in extent and intimacy of judicial regulation of ongoing business practices.[110/] The Paramount decrees provoked an avalanche of litigation. Between January 20, 1949, and January 27, 1975, the Paramount docket of the Southern District of New York recorded 2,932 entries.[111/] This massive and still continu-

110/ See generally, Experiment, supra note 106.

111/ See Equity Docket No. 87-273 (S.D.N.Y.). Even though the various consent decrees are reported under separate captions, the district court has recorded under one docket number every paper filed and order entered in connection with any of the decrees. Many of the petitions presented the court with significant and difficult questions. In 1970 and 1972, for example, RKO, Stanley Warner Theatres, and National General all sought, despite the clear prohibitions of the decrees, to enter motion picture production.

ing litigation has consumed the time and energy of the Department of Justice and the courts as well as the resources of the defendants and the interested parties who participated. Indeed, to insure that its views were fully represented, the Department of Justice assigned one attorney full time to this litigation. He became the Government's "motion picture attorney."[112/] Contemplating this commitment of resources, Donald F. Turner, while Assistant Attorney General in charge of the Antitrust Division, warned that regulatory provisions in consent decrees "should be looked at with great care," and that regulatory decrees are ordinarily not "the proper business of antitrust."[113/]

C. Accommodation of Antitrust Policies to FCC Policies Requires the Court to at Least Await the Outcome of FCC Docket No. 21049 Before Undertaking to Determine Whether the Decree Is in the "Public Interest."

The above discussion makes it clear that this is not the type of case in which the Court is asked to examine the antitrust implications of a discrete transaction or event and render antitrust relief apart from and without regard to the FCC's pervasive regulatory scheme, as was the case in United States v. Radio Corp. of America.[114/] Rather, this Court is asked to approve the imposition of judicially administered ongoing regu-

114/ 358 U.S. 334 (1959).

latory provisions which in some respects duplicate and in other respects conflict with the FCC's comprehensive scheme of regulations.

In United States v. Radio Corp. of America,[115/] the district court, upon entering the final decree on remand from the Supreme Court, expressly disavowed any intent to substitute its equitable powers for the supervisory and regulatory role of the FCC. The final judgment in RCA explicitly states that the Court will not entertain challenges to, or pass upon the validity of, future conduct; that is, the validity of any acquisition, or undertaking of national spot representation, other than those directly related to particular transactions expressly enjoined by the decree.

> Nothing contained in this Final Judgment shall be construed to require this Court to pass upon any transaction of acquisition or exchange by the defendants or any undertaking by them of national spot representation except to the extent expressly stated in subsections (B) [covering acquisitions in seven specific metropolitan market areas] and (C) of Section IV [limiting national spot representation by NBC other than in six specified markets] and in Section V [ordering divestment of a television and radio station] of this Final Judgment. 116/

By contrast, the essential effect of the proposed decree in this case would be to enmesh the Court deeply in the affairs of the broadcast industry well into the future by requiring the Court (1) to render endless interpretations and judge innumerable applications of the complex and far-reaching provisions of

115/ 1959 Trade Cas. ¶ 69,459 (E.D. Pa. 1959).

116/ Id. at 75,755.

the decree, (2) to consider frequent changes in the decree to render it compatible with ofttimes duplicative rules and regulations of the Federal Communications Commission, and (3) to consider changes aimed at maintaining harmony between the decree and the needs of an industry in which flexibility is vitally important in dealing with constant changes in technology, public tastes and advertiser marketing strategies.

The FCC, aware of the pending antitrust actions and the proposed consent decree in the NBC case, nevertheless observes in its Notice of Inquiry in Docket 21049, that "the Department of Justice has a direct responsibility for the enforcement of the Sherman Act, whereas the Commission's inquiry will focus on public interest questions affecting communications policy pursuant to our responsibilities under the Communications Act of 1934."[117/] The FCC states that it has "neither the power nor the desire to foreclose the Department in its antitrust action."[118/] That however, is no longer the issue, if it ever was. The proposed decree shows there is nothing "antitrust" left in the antitrust action.[119/] The questions now raised by the impending collision of these two regulatory regimes are whether the proposed decree in fact duplicates and conflicts with FCC

117/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4992.

118/ Id.

119/ The proposed decree does not declare an antitrust violation. See supra note 8.

regulation; whether the Court is the proper forum for this type of continuing and changing regulation; and whether the entry of the proposed decree may hinder or prevent the FCC, after completing its new inquiry, from implementing and molding its regulatory scheme for television broadcasting to that which it deems best to serve the public interest.[120/]

To be sure, the FCC has not indicated any formal objection to Court approval of the proposed consent settlement, despite the absence of any factual basis establishing that its provisions are in the public interest.[121/] Nevertheless, it must be observed that even with its intimate knowledge of the industry and expertise in the field, the FCC estimates that it will need a year to complete the investigation recently announced in its Notice of Inquiry in Docket 21049. This time is required by the

120/ The Court has recognized that "maintenance of this action could possibly disrupt the FCC's regulatory efforts. . . ." United States v. American Broadcasting Cos., Civil Action No. 74-3600-RJK, slip op. at 10 (C.D. Cal. February 16, 1977). Such disruption is inevitable. Suppose, for example, the FCC, upon ending its inquiry, finds that the public interest requires a change in the rules regarding exclusivity vis-a-vis pay cable. If some other rule has been set in the cement of a court decree, the FCC's efforts will have been meaningless. The FCC will have been effectively ousted from jurisdiction over the area.

121/ The fact that the FCC has indicated in its Notice of Inquiry that its action should not preclude the Department from prosecuting these cases or seeking a settlement is essentially irrelevant. In Pan American World Airways, Inc. v. United States, 371 U.S. 296 (1963), the Civil Aeronautics Board took the position that it had no authority over practices challenged in an antitrust suit, and it filed a brief as amicus curiae supporting the Department's antitrust suit. The Supreme Court held, nevertheless, that the conduct was immunized from antitrust scrutiny by the Federal Aviation Act. 371 U.S. at 327-28. Similarly, in United States v. National Ass'n of Securities Dealers, 422 U.S. 694 (1975), the Supreme Court dismissed

[continued]

FCC to provide "information necessary to a thorough understanding of television networking"[122] and thus insure that any regulations it may adopt are in the public interest. The fact that Congress' chosen agency, expert in the field, feels the need to conduct such an investigation before formulating new regulations affecting the subjects of this litigation, should at the very least be sufficient to make the Court pause and refer these questions to that agency for initial resolution. The Court's observation in its decision on defendant's original primary jurisdiction motion is particularly apt and merits repeating in view of this new development.

> . . . [A]ccommodation of antitrust policies to F.C.C. policy in terms of remedies will be a real and substantial problem. Accordingly, the court will give great weight to the F.C.C. rules in the event that it becomes necessary to afford to plaintiff a remedy. 123/

III.

The Primary Administrative Jurisdiction of the FCC Cannot Be Defeated by a Stipulation of the Parties Purporting to Transfer Prospective Regulatory Authority to the Court

Shortly after the commencement of this litigation, NBC (as well as ABC and CBS in their companion cases) moved for an

121/ [Footnote continued from preceding page]

Count I of the complaint notwithstanding the fact that the SEC was not opposed (as it was with respect to the remaining Counts) to the maintenance of a Department challenge to the conduct involved.

122/ Notice of Inquiry in Docket No. 21049, supra note 11, at 4992.

123/ United States v. National Broadcasting Co., 1974 Trade Cas. ¶ 74,885 at 95,992 (C.D. Cal. 1973).

order staying or dismissing the case without prejudice on the grounds that primary jurisdiction resided in the FCC, and that comity between court and agency required deference to the FCC, lest the Court, by its actions, run afoul of the agency's pervasive regulatory scheme.

The Department of Justice resisted the motion, arguing that the FCC had completed its inquiry and that the issues involved were not the subject of ongoing regulatory activity. Except for a minor re-examination of the prime time access rule, it was argued, the FCC had closed its inquiry into network practices. While that proceeding had resulted in the financial interest, syndication and prime time access rules, the Department contended that it was seeking affirmative relief going beyond those rules, and that there was no ongoing FCC proceeding likely to result in such expanded relief.[124] In short, while conceding that the FCC could regulate all matters covered by its complaint, the Department argued the Commission had done all it was going to do.[125] As counsel for the Department put it: "So it gets to be a never-never land, we are talking about an ongoing proceeding that doesn't exist."[126]

The Department also opposed these motions on the ground that the FCC had no power to make a determination or finding of antitrust violation, that the Department was entitled to such an

124/ Transcript of December 4, 1972, at 20, 25-27, 84-85, 95.

adjudication and that this was something that could be resolved only by the Court. As counsel for the Department stated,

> [s]ince it is the courts, and not the Commission, which must apply the Sherman Act here, it is obvious that defendants' motions must be denied.
>
> Only this court, your Honor, can decide whether the combination and conspiracies in restraint of trade that we charge have violated the Sherman Act. . . .127/

The Court denied the motions, holding that deferral to the agency was not required because FCC rulemaking proceedings "provide for future conduct" and "do not determine the propriety of past conduct" and because "the F.C.C. is not empowered to adjudicate alleged antitrust violations."[128]

In view of the Supreme Court's decision in United States v. National Ass'n of Securities Dealers,[129] in November 1975

> The plaintiff seeks an adjudication that the actions of each defendant be declared violative of Sections 1 and 2 of the Sherman Act. The Commission is without power to make a Sherman Act determination.

Id. at 22.

128/ United States v. National Broadcasting Co., 1974 Trade Cas. ¶ 74,885, at 95,992 (C.D. Cal. 1973). The Court also observed: "Nevertheless, assuming antitrust violations are proven, accommodation of antitrust policies to F.C.C. policy in terms of remedies will be a real and substantial problem." Id. This case was dismissed without prejudice on grounds not pertinent to these Comments and was refiled as the instant case United States v. American Broadcasting Cos., Civil Action No. 74-3600-RJK (C.D. Cal., filed December 10, 1974).

129/ 422 U.S. 694 (1975).

the three network defendants each separately moved to dismiss the actions on the ground that the Court lacked subject matter jurisdiction.[130] The networks argued that because of the FCC's pervasive regulatory scheme, exclusive jurisdiction resided in the FCC.[131]

In opposition, the Department repeated its earlier contention that the FCC was not then actively engaged in or considering any rulemaking related to the principal issues in the antitrust cases.[132] The Department also urged, as it had previously, that only the courts, and not the FCC, had authority to find violations of the antitrust laws.[133]

In a Memorandum of Decision and Order filed February 16, 1977, the Court denied defendants' motions, declining "to find that with respect to television programming activities Congress intended to displace the Sherman Act with the regulatory scheme of the Communications Act."[134] However, in so holding the Court

130/ Motions to Dismiss the Complaints With Prejudice for Lack of Subject Matter Jurisdiction, November 19, 1975.

131/ Id.

132/ Plaintiff's Supplemental Reply Memorandum in Opposition to Defendants' Motions to Dismiss for Lack of Subject Matter Jurisdiction, July 14, 1976, at 8-10.

133/ Memorandum of the United States in Opposition to Defendants' Motions to Dismiss the Complaints With Prejudice for Lack of Subject Matter Jurisdiction, January 13, 1976, at 11-12.

134/ United States v. American Broadcasting Co., Civil Action No. 74-3600-RJK slip op. at 10 (C.D. Cal. February 16, 1977).

noted that the FCC's regulatory scheme "can be considered nothing less than 'pervasive,'" and that "the FCC has been active in exercising its regulatory powers with respect to the subject matter of this suit."[135/] The Court further observed that although the Government "seeks an adjudication" of antitrust violation, "[t]he Commission's obligation to regulate for the public interest can, and should offer sufficient assurance that antitrust policy and concerns will be considered in the course of regulating the telecommunications industry."[136/]

It is now evident that the two reasons put forward by the Department of Justice as grounds for denying the network defendants' primary jurisdiction and exclusive jurisdiction motions have vanished. First, as we have shown the FCC has commenced a proceeding that covers precisely the issues before the Court.[137/] Indeed, this was done over the objections of the Department, which advised the Commission that its comments "should not be construed as suggesting that the inquiry encompass those issues now being litigated in the Federal District Court in California."[138/]

135/ Id. at 9.

136/ Id. at 7, 13-14. Compare United States v. Columbia Broadcasting System, Civ. 3762 (N.D. Ill. 1941) and United States v. Radio Corp. of America, Civ. 3763 (N.D. Ill. 1941) which were dismissed on the Government's motion after it became apparent the FCC had authority to eliminate the challenged practices. See CCH, The Federal Antitrust Laws with Summary of Cases 1890-1951, at 274-275 (1952).

137/ Notice of Inquiry in Docket No. 21049, supra note 11.

138/ Letter, Donald I. Baker, Assistant Attorney General, Antitrust Division, to Honorable Richard E. Wiley, Chairman, Federal Communications Commission (December 3, 1976).

Second, it is apparent that the Department's assertion that only a federal court may adjudicate antitrust violations, and that the FCC is without power to determine that issue,[139/] is nothing more than a makeweight argument. By agreeing to a consent decree, the Department of Justice no longer seeks a judicial determination of antitrust violation.[140/] The proposed consent decree does not find an antitrust violation. Nor does it "determine the propriety of past conduct." It only "provide[s] for future conduct."[141/] Thus, the mere assertion of a right to pursue an antitrust adjudication can no longer be viewed as a serious prosecutorial objective and should not be taken as an insuperable impediment to allowing the FCC to exercise its primary administrative jurisdiction over the subject matter of this litigation.

Although the parties to the proposed judgment have stipulated the Court has jurisdiction to enter the decree, it is well settled that the "jurisdiction of the federal courts -- their power to adjudicate -- is a grant of authority to them by Congress and thus beyond the scope of litigants to confer."[142/] The

---

139/ United States v. American Broadcasting Cos., Civil Action No. 74-3600-RJK slip op. at 7 (C.D. Cal. February 16, 1977); United States v. National Broadcasting Co., 1974 Trade Cas. ¶ 74,885 at 95,888 (C.D. Cal. 1973).

141/ See supra p. 47 at note 128.

142/ Neirbo Co v. Bethlehem Shipbuilding Corp., 308 U.S. 165, 167-68 (1939). See also American Fire & Casualty Co. v. Finn, 341 U.S. 6, 17-18 (1951); People's Bank of Belleville v. Calhoun, 102 U.S. 256, 260-61 (1880); Beach v. KDI Corp., 490 F.2d

parties may not by stipulation oust the FCC from its primary role in this area. Thus, because there are substantial jurisdictional as well as practical conflicts between the proposed decree and the FCC's exercise of authority, the Court should reject the proposed decree.

At the very least, the Court should delay consideration of the proposed decree until the FCC has completed its new inquiry. The Notice of Inquiry in Docket 21049 makes it clear that the FCC believes that further consideration of the matters encompassed by the proposed decree is required. By deferring action on the proposed decree, the Court will afford the FCC, as well as other parties, including the Department, the opportunity to develop the necessary factual record on which to base a reasoned determination as to whether the proposed regulations are in the "public interest."

CONCLUSION

For all the above reasons, ABC urges the Department to withdraw its consent to the proposed decree. The decree disserves the public interest. Its entry would rob the FCC of its congressionally mandated administrative role in the telecommunications industry. If, upon consideration of these comments, the

Response to Comments of American Broadcasting Companies, Inc. ("ABC") on the Proposed NBC Consent Decree

Introduction

In essence, ABC's comments assert that this Court has no guidelines, independent of the Communications Act of 1934 1/, for determining the public interest under the Antitrust Procedures and Penalties Act ("APPA") [15 U.S.C. §16(b)-(h)], and that the proposed Consent Judgment should not be entered because the Federal Communications Commission ("FCC") has either exclusive jurisdiction, primary jurisdiction or both. ABC is in error on both scores. As discussed below, the proper determination of public interest under Section 2(e) of the APPA [15 U.S.C. §16(e)] involves an antitrust standard, rather than one based on the Communications Act, and since the Court has already decided that the FCC has neither primary nor exclusive jurisdiction over this case 2/, this response will address only those ABC comments which relate to (1) the proper standard of judicial review to be applied in considering the proposed Judgment and (2) the substance of the proposed Judgment. 3/

1/ 47 U.S.C. §301 et seq. (1976).

2/ United States v. National Broadcasting Co., Inc., 1974-1 Trade Cas. ¶74,885 (C.D. Cal. 1973); United States v. CBS Inc., 1977 Trade Cas. ¶61,327 (C.D. Cal. 1977).

3/ The jurisdictional issues are treated in the Memorandum of the United States in Opposition to ABC's Motion for Reconsideration of its Motion to Dismiss or Stay, filed March 25, 1977.

I. The Procedure and the Standard of Review Established Under the Antitrust Procedures and Penalties Act.

Pursuant to the APPA, the Court must find that entry of a proposed Judgment is in the public interest. [15 U.S.C. §16(e)]. While such a requirement is not new [United States v. Carter Products, 211 F.Supp. 144, 147-48 (S.D.N.Y. 1962)], the procedure for arriving at such a finding has been altered dramatically under the Act.

The APPA sets forth explicit requirements which must be satisfied by the Department of Justice before the Court can enter a judgment. The Act requires that notice be given to the public, and a Competitive Impact Statement ["CIS"] be filed with the Court and published in the Federal Register [15 U.S.C. §16(b)], that the public have a period of at least 60 days from publication within which to file comments to the proposed Judgment, and that the comments and the Government responses thereto be filed with the Court and published in the Federal Register. [15 U.S.C. §16(d)].

Once this procedure has been completed, the Court has broad discretion in deciding what further to consider. The APPA suggests that the Court consider the matters addressed in the CIS, including the competitive impact of the judgment, the provisions for enforcement or modification, the alternatives considered, and the impact on the public generally [15 U.S.C. §16(e)(1) and (2)].

While there is broad discretion in the Court in deciding what issues to consider and what steps to take to insure a complete ventilation of the consent process, the cases in

which the public interest standard has been considered and the legislative history both strongly suggest that the standard to be met in deciding whether entry is in the public interest, is whether the Judgment is consistent with the allegations of the complaint and the enforcement of the antitrust laws. United States v. Associated Milk Producers, Inc., 394 F.Supp. 29 (W.D. Mo. 1975), aff'd, 534 F.2d 113 (8th Cir.), cert. denied, U.S. , 97 S.Ct. 355 (1976); United States v. Gillette Co., 406 F.Supp. 713 (D. Mass. 1975); United States v. Morgan Drive Away, Inc., 1976-1 Trade Cas. §60,949 (D.D.C. 1976); see United States v. Carter Products, Inc., 211 F.Supp. 144, 148 (S.D.N.Y. 1962). This determination must include a recognition that antitrust consent settlements are an appropriate and beneficial enforcement tool, that compromise may be involved, and that the Attorney General has broad discretion as to the terms of such settlements.

In United States v. Associated Milk Producers, Inc., supra, the District Court entered a consent decree after finding the Government's resolution of dissolution or divestiture relief to be "well within the discretionary power of the Attorney General under existing law." [394 F.Supp. at 45]. The Eighth Circuit, in affirming, noted:

> It is axiomatic that the Attorney General must retain considerable discretion in controlling government litigation and in determining what is in the public interest. [534 F.2d at 117].

/////

In United States v. Gillette Co., supra, the Court, in approving a consent decree, explained:

> It is not the court's duty to determine whether this is the best possible settlement that could have been obtained if, say, the government had bargained a little harder. The court is not settling the case. It is determining whether the settlement achieved is within the reaches of the public interest. Basically I must look at the overall picture not hypercritically, nor with a microscope, but with an artist's reducing glass. [406 F.Supp. at 716].

In United States v. Morgan Drive Away, Inc., supra, the Court also imposed a limited standard of review in determining whether entry of the decree was in the public interest. Judge Flannery stated that:

> The result of the bargaining toward settlement should not be measured against what concessions the Government might have succeeded in exacting from the defendants had it bargained somewhat harder, or even against the probable outcome had the case gone to trial. [1976-1 Trade Cas. at p. 69,191]

The Court went on to rule, after considering comments in opposition, that the comments "have not undermined the conclusion of the United States that the proposed Judgment is in the public interest. . . ." [1976-1 Trade Cas. at p. 69,193].

These decisions are consistent with the Congressional intent that consent decrees must remain a viable enforcement option. Such an option would not long remain viable were it necessary for a Court to conduct a de novo determination of the factual issues relevant to the adequacy of the proposed decree. 4/ In fact, the Senate Report advises that, "[o]nly where it is imperative that the court should resort to calling witnesses for the purpose of eliciting additional facts should it do so." [S. Rep. No. 298, 93d Cong., 1st Sess. 1, 6 (1973)]. 5/

4/ The Senate Report states:

> The Committee recognizes that the court must have broad discretion to accommodate a balancing of interests. On the one hand the court must obtain the necessary information to make its determination that the proposed consent decree is in the public interest. On the other hand, it must preserve the consent decree as a viable settlement option. It is not the intent of the Committee to compel a hearing or trial on the public interest issue. It is anticipated that the trial judge will adduce the necessary information through the least complicated and least time consuming means possible . . . .

[S. Rep. No. 298, 93d Cong. 1st Sess. 6 (1973)].

5/ The competitive impact statement required by the APPA is similar to the environmental impact statement required by the National Environmental Policy Act of 1969

Moreover, Congressional intent is clear that the applicable public interest standard is one of judicial construction based on the antitrust laws and antitrust precedents. The original bill included a provision 6/ which stated that the entry of a consent decree must be found to be "in the public interest as defined by law." The phrase "as defined by law" was deleted from the bill according to the House Report,

> . . .as a recognition that the content of the phrase, "public interest," is a product of judicial construction in the context of particular statutes . . . and to provide

---

5/ continued

("NEPA"), 42 U.S.C. §4321, [119 Cong. Rec. 24599 (1973)]. NEPA, like the APPA, does not call for a de novo review of governmental action. Upper W. Fork River Watershed Ass'n. v. Corps of Engineers, 414 F.Supp. 908, 915 (N.D. W.Va. 1976). Cf. Camp v. Pitts, 411 U.S. 138 (1973). Further, the Court is neither empowered to substitute its own judgment for that of the Government, Environmental Defense Fund, Inc. v. Corps of Engineers, 470 F.2d 289, 300 (8th Cir. 1972), nor required to make findings of ultimate fact or resolve conflicts between the economic theory and data relied on by the Government and that presented by those objecting to the Government's action. Environmental Defense Fund, Inc. v. Froehlke, 368 F.Supp. 231, 240-41 (W.D. Mo. 1973), aff'd sub nom. Environmental Defense Fund, Inc. v. Callaway, 497 F.2d 1340 (8th Cir. 1974).

6/ In Section 2(e).

> illumination and consistency in the usage of the phrase, the "public interest" . . . . Preservation of antitrust precedent rather than innovation in the usage of the phrase, "public interest," is, therefore, unambiguous. 7/

Thus, based upon the Act itself, upon the interpretive Court decisions to date, and upon the Congressional intent as expressed in the legislative history, the Court must decide, after taking into consideration all evidence in support of the proposed Judgment and all opposition to it, whether the Government made a clear error in judgment or abused its discretion. If, based upon its review, the Court finds that the entry of the decree would be consistent with the allegations of the Complaint and the enforcement of the antitrust laws, then the Court should enter this Judgment in order to provide expeditious relief by eliminating anti-competitive restraints. See United States v. Carter Products, Inc., 211 F.Supp. at 148.

II. ABC's Comments on Specific Provisions of the Proposed Judgment.

ABC has commented adversely on the production limitation of Section V, the option term limitation of Section VI(E)(i), and the limitation on exclusivity against pay cable television in Section VI(E)(iii)(e) of the proposed Judgment.

/////

7/ H.R. Rep. No. 1463, 93d Cong., 2d Sess. 1, 11 (1974).

A. The Production Limitation in Section V of the Judgment is an Appropriate Restraint on NBC's Monopoly Power.

As discussed in the CIS, Section V, which would limit for 10 years the entertainment programming which could be produced by NBC for use on its network, should enhance competition in the entertainment program production market, "by eliminating the possibility that NBC could substantially increase its internal production of its network programs and thereby exclude independent program suppliers." [CIS at 8]. ABC's contention that the continued production of entertainment programming by the networks was approved by the FCC [ABC Comments, at 22], is disingenuous. ABC would have the Court believe that the FCC sanctioned in-house program production by the networks. However, the FCC language quoted by ABC for this proposition, in fact reflects the FCC's concern in 1965 with "continuing dominance by network corporations of the television program production and procurement process. . . ." 8/

8/ The Notice of Proposed Rulemaking, Docket 12782, 45 F.C.C. 2146, 2162 (1965), states:

> Strict adherence to the principle of free competition would perhaps suggest the total elimination of network corporations from production and financial and proprietary control of television programming. However, the record of the Program Inquiry and our general knowledge of the situation as it currently exists in network television leads us to the view that the public interest

Moreover, the FCC concluded that network program production should be limited. 9/ This is precisely what Section V of the proposed Judgment would accomplish.

8/ continued

in a nationwide television structure sustained by network program service would not be furthered by eliminating network corporations entirely from the program production and procurement process. We are persuaded that, in order reasonably to insure the quantity and quality of television programming necessary to maintain adequate community service, network corporations should be permitted to engage to a substantial but limited degree in program production, procurement and financing. On the other hand, it is our tentative view that to permit continuing dominance by network corporations of the television program production and procurement processes as disclosed by the record of our Inquiry not only would injure the public interest in a competitive national television structure but also would act as a stricture on the "larger and more effective" use of television channels in the public interest.

9/ The FCC considered prohibiting each network from producing, procuring or financing entertainment programs during 50% of all prime time hours, something quite different than ABC's characterization. Ultimately, in 1970, the FCC prohibited each network from originating any entertainment

Significantly, the FCC has not objected to the proposed production limitation of Section V, but merely sought comment on that provision among others in its recently instituted inquiry into commercial television network practices. In fact, tne FCC stated explicitly that its Notice of Inquiry was not intended to preclude the litigation of these network cases or the arrangement of an appropriate settlement. 10/

ABC also argues that the production limitation, when viewed from an economic and competitive standpoint, is unnecessary because the natural forces of the market limit each network's ability to produce and exhibit its own

---

9/ continued

program during one hour of prime time, prohibited network acquisition of subsidiary interests or profit shares and prohibited each network from engaging in domestic syndication of television programming. These prohibitions are commonly referred to as the Prime Time Access, Financial Interest and Syndication Rules, 47 C.F.R. §73.658(j) (1975). [Report and Order, Docket No. 12782, 23 F.C.C. 2d 382, 384 (1970), aff'd sub nom. Mt. Mansfield Television, Inc. v. F.C.C., 442 F.2d 470, 482 (2d Cir. 1971)].

10/ See Notice of Inquiry, Docket No. 21049 (In The Matter of Commercial Television Network Practices and the Ability of Station Licensees to Serve the Public Interest), par. 5, 42 Fed. Reg. 4992 (January 14, 1977); see also the FCC Memorandum to the Court in this litigation, January 11, 1973.

programs. 11/ [ABC Comments at 26]. However, while the FCC rules severely limit the rights and interests which NBC can now acquire in independently produced programs, they permit the retention of certain rights in programs produced by NBC itself. This provides an added incentive for increased internal production by a network, which must be curbed if competition is to be maintained in television programming. Further, a central allegation of the case against NBC was that its "unrestricted ability to produce prime time television entertainment programming, together with its domination and control over access to its combined and affiliated group of television stations and its course of conduct, constitutes an unreasonable restraint of non-network program producers' ability to produce and negotiate for distribution and exhibition of their programming." 12/ The production limitation of Section V, together with the prohibitions of Sections IV(A) and (B) and VI(A), are designed to

---

11/ ABC erroneously contends that since the consent decree permits NBC some entertainment production, the issue is no longer whether program production violates the antitrust laws. Lest ABC be misled in its own case, the Government notes that it will seek to have an absolute production ban imposed on ABC, should its case go to trial. The fact that the NBC case is settled for less, is no bar to such a position since the proposed Judgment is not an "adjudication of any issue of fact or law." [Proposed Final Judgment, at p. 1].

12/ Government's Supplemental Statement of Genuine Issues, filed May 21, 1976, Issue I(G).

insure that NBC will not again abuse its market power to gain an unfair competitive advantage over independent program suppliers.

ABC's contention that the production limitation will inhibit NBC's scheduling of programming during periods of short supply [ABC Comments at 23] is based on sheer speculation. There is no shortage of supply in the industry, and no likelihood that one will develop. 13/ Further, insofar as this Judgment holds out the possibility that independent producers might share in the success of highly rated programs while on the network, and would permit such producers to retain rights and interests in programs after network exhibition, it should discourage any future shortage of supply by encouraging entry into the production of television programming.

ABC misstates the law when it argues that the production limitation is unnecessary because "[v]ertical integration through internal expansion is prima facie lawful under the antitrust laws." [ABC Comments at 26]. 14/ While vertical integration is not per se illegal,

---

13/ Many more program pilots are produced for each network every year than are ever used. See discussion of Section VI(F), CIS at 12.

14/ None of the cases which ABC cites for this proposition holds that vertical integration is prima facie lawful. While some of them assume that vertical integration may bring a new competitor into the market, that is not the issue in this case, where the contention is that the vertical

> . . . a vertical enterprise, like other aggregations of business units (United States v. Aluminum Co. of America, 148 F.2d 416), will constitute monopoly which though unexercised, violates the Sherman Act, provided a power to exclude competition is coupled with a purpose or intent to do so. [Paramount Pictures, 334 U.S. at 174.)

The three complaints charge that each network excludes competition from program production through the exercise of monopoly power derived, in part, from the ability of each to produce, distribute and exhibit its own product nationwide. However, these actions are not based solely on vertical integration. Central to each charge is abuse of the monopoly power which derives from each network's combination with its owned and operated and affiliated television stations. A combination or conspiracy violates Section 2 of the Sherman Act whenever an appreciable part of interstate commerce is monopolized. 15/

14/ continued

integration is used for the purpose and with the effect of controlling or eliminating competition. United States v. Paramount Pictures, Inc., 334 U.S. 131, 174 (1948); see also United States v. Griffith, 334 U.S. 100, 108 (1948).

15/ United States v. Yellow Cab Co., 332 U.S. 218 (1947); United States v. Lehigh Valley R.R. Co., 254 U.S.

Although the proposed Judgment will, of course, provide no final determination as to the legality of NBC's internal production of entertainment programming for use on its own network of stations, this activity by a network poses serious antitrust questions which are the proper subject of a consent decree. 16/ If ABC believes that the Government will not prevail on the merits, it can proceed to trial in its own case, but its contentions should not interfere with NBC's decision to settle this litigation.

B. The Limitation on the Number of Years of Options which NBC Can Acquire for Program Series is Pro-Competitive.

ABC also objects to Section VI(E)(i), which limits to four the number of yearly options NBC may initially acquire

15/ continued

255 (1920). See Memorandum of the United States in Opposition to Defendants' Motions for Summary Judgment on the Sherman Act Claims, at 12-27 (filed January 19, 1976).

16/ In that connection, ABC also seeks [Comments at 27-28] to twist the court's decision on a motion for a preliminary injunction in Columbia Pictures Industries, Inc. v. American Broadcasting Companies, Inc., 1974 Trade Cas. ¶74,912 at 96,095 (S.D.N.Y. 1974), aff'd, 501 F.2d 894 (2d Cir. 1974), into a finding that ABC's internal production is permissible under the antitrust laws. Actually the Court recognized "that there are 'substantial, serious, difficult and doubtful' questions. . . ." concerning ABC's production and exhibition of feature films on its own network. [501 F.2d at 897].

for a program series, and permits an additional fifth year option only if the parties renegotiate the agreement. This provision would restrict NBC's present ability to initially obtain exclusive rights to programs for as long as 5-7 years and to renegotiate for even longer periods of time [CIS at 11]. This limitation seeks to increase competition for program series among the networks and with television stations at an earlier point in the life of a successful program. By permitting producers to share earlier in their programs' successes, this provision should encourage increased program production and attract new entrants into the field.

ABC contends that the FCC, by assuming that the networks would obtain longer options on program series, has sanctioned such options. [ABC Comments, at 28-29]. However, the FCC has never addressed itself to the contractual options granted to networks by producers, and even if it had, this could not immunize network conduct which violated the antitrust laws. More significantly, the FCC has not indicated that this or any other provision of the proposed Judgment is, in any fashion, inconsistent with its position. To the contrary, it states that its current Notice of Inquiry is in no way intended to interfere with the entry of this Judgment. 17/

C. The Provision on Pay Cable Exclusivity Has Been Withdrawn.

ABC also commented adversely about Section VI(E)(iii)(e), which would have limited NBC's right to acquire exclusivity

17/ Notice of Inquiry, at Paragraph 5. See also the FCC Memorandum to the Court in this litigation, January 11, 1973.

for theatrical feature films against their use on pay cable television. The relief proposed in this provision was simply intended to establish an upper limit on terms obtained by NBC, at a level lower than the current practice, rather than a determination of what period of network exclusivity would be reasonable under the Sherman Act. Because of strong adverse comment by numerous public interest and Congressional entities, and by pay cable television operators, asserting that the provision would establish a standard which would adversely affect the pay cable industry, the Government became convinced that it would not provide meaningful relief. And, since no agreement on a more limited period for this type of exclusivity could be reached with NBC, the Government seriously considered withdrawing its consent to entry of the Judgment. However, in a recent decision the District of Columbia Court of Appeals, citing "antitrust questions," ordered the FCC to consider and resolve this problem within 180 days. 18/ Coneequently, it was decided that outright removal of thie provision would be appropriate and desirable as well, because its deletion would permit entry of the remainder of

18/ Home Box Office, Inc. v. FCC, No. 75-1280 (D.C. Cir. March 25, 1977). In addition, since the Court vacated the FCC rules which limited pay cable's access to feature films during the third through the tenth year after their theatrical release, all of ABC's comments on this provision reflect a situation which is no longer in existence and are, therefore, obsolete.

the Judgment. The parties have stipulated that removal of this provision does not preclude any possible future action in this area against NBC, and does not in any way prejudice any person. 19/ It is our belief that this deletion from the NBC Judgment does not eliminate the issue from the pending litigation against CBS and ABC.

19/ The Stipulation, in pertinent part, provides:

> . . . the original inclusion and subsequent deletion of Section VI(E)(iii)(e) from the proposed Final Judgment, shall not estop plaintiff or defendant, or any person, in this or any other action or proceeding, from asserting any issue of fact or law as to the subject matter of Section VI(E)(iii)(e) or as to the use of contractual rights to the exclusive use of talent or of literary properties for television exhibition, nor shall they constitute any evidence or admission as to any such issue.

Washington, D.C. 20530

Dear Mr. Hollander:

These comments are submitted by the Institute for Public Interest Representation ("Institute") pursuant to the Antitrust Procedures and Penalties Act (hereinafter "APPA") (15 U.S.C. § 16(b)(1974)) relating to the proposed consent judgment entered against National Broadcasting Company, Inc. (hereinafter "NBC") in United States v. National Broadcasting Company, Inc. (Civil Action No. 74-3601-RJK)(C.D. Cal.).

60 2 11 77
27
ANTITRUST

The Interest Of The Institute

The Institute is a public interest law firm operated by Georgetown University Law Center. The work of the Institute is centered around activities of federal agencies. Through written reports, participation in rulemaking proceedings and litigation undertaken when administrative remedies have been exhausted, the Institute strives to assist agencies of our government in carrying out their responsibilities to promote and protect the various public policies entrusted to them. The Institute, as a public interest law firm, is especially interested in the APPA. That Act embodies a Congressional intent to encourage participation by the public in the antitrust consent decree process by affording an opportunity to interested persons to comment on such decrees. In order to facilitate public comment, the Act requires the Antitrust Division to publish a competitive impact statement (hereinafter sometimes "CIS"). The Act requires each such statement to explain the nature and purpose of the case proposed to be settled and the estimated effect on competition of the proposed decree. The APPA also requires in subsection (b) that written comments from the public on proposed antitrust decrees

be forwarded by the Division to the district court which is considering the proposed decree.

In view of the Congressional interest in permitting informed public comment, the Institute, as a public interest law firm specializing in agency procedures, endeavors to insure that competitive impact statements filed by the Antitrust Division adhere to the requirements of the APPA. We believe we serve an important public interest in seeking to have the Division adhere to the Act's requirements in the NBC case and in asking the District Judge presiding in the case to consider our comments in the light of the purposes of the APPA.

Summary

Our comments undertake to demonstrate that the competitive impact statement in the NBC case fails to meet the requirements of the APPA in three important and distinct respects. First, it contains, we submit, a misstatement as to the relief provided. Second, it fails to explain adequately why the unusual provisions set out in sections VII and IX of the proposed decree were adopted. We submit that these provisions constitute an "unusual circumstance" within the

meaning of subsection (b)(3) of the APPA and therefore require an "explanation," which the Justice Department has failed to provide. Third, the competitive impact statement does not comport with the requirements of subsection (b)(3) insofar as it fails to explain the "anticipated effects on competition" of the relief that actually will be forthcoming in the event that similar injunctive relief is not obtained in final decrees entered against CBS and ABC. We seek to show below that the relief that the government will in fact obtain is largely dependent on the outcome of two other pending lawsuits; that the Division has entirely omitted in its discussion of the competitive impact statement the effects the decree will have on competition should the other lawsuits be lost or yield a substantially less restrictive final decree; and that the failure to submit such an alternative analysis violates the APPA and makes unnecessarily difficult public critical scrutiny of the proposed decree.

In our comments we do not consider whether the relief sought in the complaint is in the public interest. Nor do we consider the difficult question whether elimination of the anti-competitive evils alleged in the complaint would better be achieved by resort to the administrative remedies

provided at the Federal Communications Commission. Cf. CIS(2)(FCC rules govern certain relationships between major networks and independent producers). Nor do we consider whether or not it is wise for a final judgment in a Sherman Act case to be filled with injunctions of a "regulatory nature" as is the case here. See CIS(3), Section VI. The competitive impact statement filed by the Antitrust Division offers an inadequate basis for public comment on these questions.

Specific Comments

1. Subsection (b)(3) of the APPA (15 U.S.C. § 16(b)(3)(1974)) provides that " . . . the United States shall file with the district court . . . a competitive impact statement which shall recite --

* * *

> (3) an explanation of the proposal for a consent judgment, including an explanation of any unusual circumstances giving rise to such proposal or any provision contained therein, relief to be obtained thereby, and the anticipated effects on competition of such relief."

The competitive impact statement in section (1) describes the relief sought by the Government in the complaint

and then states that the consent decree "provides relief similar and substantially equivalent to that requested in the complaint." See CIS(1); see also CIS(6). That statement is, we submit, not correct. */ The complaint (prayer 5) sought to have NBC enjoined from producing any entertainment programs for broadcast over any commercial television network . Instead of a flat prohibition, the decree limits "the amount of television entertainment programming which may be produced by NBC." CIS(3), Section V.

2. Many of the more important provisions of the consent decree do not take effect unless and until similar injunctive relief is obtained in separate civil actions against CBS and ABC. See CIS(3), Section VII. Moreover, Section IX of the decree provides that if the Division loses either the case against CBS or that against ABC, the decree against NBC may be nullified, on motion of NBC, to the extent "necessary to prevent [NBC] from being placed at a competitive disadvantage." With respect to Section IX,

---

*/ We wish to emphasize that we have no evidence indicating, nor do we believe, that the Antitrust Division or its counsel acted in bad faith in this matter.

the competitive impact statement contains this cryptic sentence:

> While this type of provision is unusual in an antitrust judgment, it is warranted by the unique nature of this industry, and the pendency of the companion actions.

CIS(3), Section IX.

This conclusory and unilluminating statement hardly qualifies as an "explanation of any unusual circumstances giving rise to such proposal" as required by subsection (b)(3) of the APPA. Why does the Antitrust Division propose to enter into a consent decree containing such "unusual" provisions? What are the relevant "unique" aspects of "this industry?" Why is this provision "warranted" in view "of the pendency of the companion actions?" The competitive impact statement neither asks nor answers any of these questions.

We submit that the Antitrust Division has an obligation under the APPA to disclose and explain, fully and fairly, all of the circumstances that gave rise to these unusual provisions. To be sure the APPA by its terms requires an explanation of "unusual circumstances," not "unusual" provisions. Thus it might be argued that usual "circumstances" could give rise to "unusual" provisions, and that in such a

situation no explanation is required by the APPA. But this would ignore one of the principal objectives of the APPA: to inform the public and the Court of any non-routine situation giving rise to any provision in any proposed antitrust consent decree. Interested persons would thereby be placed in a position to comment intelligently on such a decree.

In the words of Congresswoman Jordan on the floor of the House while the APPA was under consideration: The "simple purpose [of the APPA is] to ventilate the consent decree process . . . [The APPA] would pierce the secrecy with a requirement that the Justice Department file a competitive impact statement . . . The public will [then] have 60 days to comment . . ." 120 Cong. Rec. 36343-44 (1974).

If the Antitrust Division is not required to reveal in its competitive impact statement the reasons for adopting unusual provisions in consent decrees, the public is left to the mercy of the Division. It must trust the Division to decide what circumstances are unusual. It was the revelations surrounding the ITT case that provided a major impetus for adoption of the APPA. The drafters of that Act

intended to require the Division to reveal anything about any proposed antitrust consent decree that is "unusual." Thus a sensible construction of the Act, and one that comports with its broad remedial purposes, is to read it as establishing a requirement that the Division explain any unusual provisions in order that the Court and the public may be made aware of the circumstances that led the Division to propose them.

In brief, once a provision in a consent decree is admitted to be "unusual" as the Division does in the CIS in the NBC case, it can be inferred that "unusual circumstances" produced it. At the very least, it is incumbent upon the Division to explain the circumstances that lead to unusual provisions in order that the public and the courts may assess for themselves whether the circumstances warranted such unusual provisions. We ask, and we submit the APPA requires, that the Division describe and justify those circumstances in its CIS, whatever they were.

3. The relief the Division has obtained in the proposed NBC decree is almost entirely dependant on the outcome of the pending cases against CBS and ABC. This is demonstrated by close analysis of Sections VII and IX of the

decree itself. Section VII provides that six specific sections or subsections of the decree "shall not take effect until similar injunctive relief is obtained . . . against CBS [and] ABC." */ Section IX provides that NBC may have the remainder of the injunctive relief in the decree nullified if the Government loses either its case against ABC or CBS, or if the Government obtains against CBS or ABC "injunctions different . . . than those required by this Final Judgment . . . NBC . . . shall be granted a modification of . . . any terms set forth herein as may be necessary to prevent NBC from being placed at a competitive disadvantage . . ."

Subsection (3) of the competitive impact statement is captioned "The proposed consent judgment and its anticipated effect on competition." Nowhere in this section of the CIS is there discussed the "anticipated effect on competition" if similar relief is not obtained in the cases against CBS and ABC.

We submit that the CIS should have discussed separately (a) the likelihood that the Government will obtain relief against both CBS and ABC of the types that will take effect against NBC upon entry of the proposed decree; (b) the

*/ Sections V, VI(c), VI(E)(i), VI(F), VI(G) and VI(H).

likelihood that it will obtain relief against both CBS and ABC of the types contained in those parts of the proposed decree against NBC which do not go into effect until similar relief is obtained against both CBS and ABC; and (c) the anticipated effect on competition of that part of the decree against NBC which goes into effect immediately but would remain in effect only until the cases against CBS and/or ABC are finally concluded by entry of a decree containing no relief or different relief than that obtained in the proposed decree against NBC.

If the Division is unwilling or unable to make categorical predictions as to the outcome of the cases against CBS and NBC, then the competitive impact statement, we submit, should have evaluated the relief against NBC in the alternative. In other words, the competitive impact of the NBC decree should have been evaluated, first, on the assumption that similar relief will be obtained against both CBS and ABC, and second, on the assumption that such relief will not be obtained against both. Only if this is done can interested members of the public have a basis on which to judge whether the decree will have any significant "effects on competition" (APPA, subsection (b)(3)). The

failure to discuss these questions would be all the more serious if, as we are informed, both CBS and ABC separately advised the Antitrust Division before it filed its CIS that each would not consent to relief similar to that obtained against NBC.

Conclusion

We recognize that considerations of trial strategy may have made the Division hesitate to reveal the circumstances that caused it to enter into this unusual decree while the companion cases against CBS and ABC are pending. But the APPA, by mandating full disclosure of all unusual circumstances, requires the Division to assume the risk, if risk there be, of disclosure.

Our objection to the competitive impact statement filed in this case is not that the Division has been mistaken or misguided in its decision to enter into the decree against NBC. Rather, it is our position that the Division has failed to comply with the dictates of the APPA. That Act, we repeat, was intended -- quite literally -- to compel the Antitrust Division to disclose and justify any unusual circumstances surrounding acceptance of any unusual antitrust consent decree. The purpose of Congress in adopting this novel legislation was to open up the circumstances surrounding adoption of consent decrees to public scrutiny so that

interested members of the public could intelligently comment on them. We submit that the Division has not adhered to the legislative command in the APPA in its competitive impact statement filed in this case. Accordingly informed comment by the public on the question whether the proposed decree against NBC is in the public interest has been rendered very difficult, if not impossible.

We urge the Division either to withdraw its consent to the proposed decree, or to file an amended competitive impact statement correcting its deficiencies. If any amended CIS is filed, interested members of the public should be given sixty days after its publication to comment on the proposed NBC decree.

If the Antitrust Division should consider these comments to be substantially without merit, we respectfully urge the District Court */ to consider our comments and, if they are found to be sound, to direct the Antitrust

---

*/ Subsection 2(b) of the APPA requires the Division to file these comments and its response with the Court. See supra, pp. 2-3.

Division to file an amended competitive impact statement, correcting the deficiencies herein noted.

Respectfully submitted,

Victor H. Kramer
Director

Thomas Krattenmaker

Consultant

Response to the Institute For Public Interest Representation, Georgetown University Law Center

The Institute contends that the Competitive Impact Statement ("CIS") filed with respect to this proposed Judgment does not satisfy the requirements of the Antitrust Procedures and Penalties Act ("APPA") (15 U.S.C. §16(b)-(h) (1974)), because it is inaccurate in characterizing the relief obtained; because it does not explain the unusual circumstances leading to the provisions in Sections VII and IX; and because it does not explain the effects on competition, if similar relief is not obtained from CBS and ABC. While the Department shares the Institute's desire to improve and upgrade the process for entry of consent Judgments and the quality of Competitive Impact Statements, we disagree with its contentions here.

The CIS correctly states that the proposed Judgment provides relief which is similar and substantially equivalent to that requested in the complaint [CIS at 2-3]. The Institute points out that the proposed limitation on NBC's production of television entertainment programs is not substantially equivalent to the complete ban originally sought. The CIS, however, carefully and fully explains the differences between the Judgment provisions and the relief prayed for in the complaint, stating, with respect to the production limitation:

> A provision permanently prohibiting NBC from producing any television entertainment program for network exhibition was sought in the complaint. The compromise reached in Section V of the judgment would limit for ten years NBC's production of television entertainment for its network use, not only during prime time, but also during daytime or fringe hours. . . . While the Government at trial would have sought a complete prohibition of television entertainment program production by NBC, this judgment provides substantial relief which will prevent NBC from foreclosing significant amounts of independently produced programming from its television network. [CIS at 16-17].

While some may differ subjectively as to whether this is substantial and equivalent relief with respect to internal production, the CIS fully explains the relief sought and that obtained. In any event, the "similar and substantially equivalent" language of the CIS refers not to the relief provided by any section standing alone, but to the relief obtained in the Judgment as a whole. That relief, when viewed en toto, is substantially equivalent to that requested in the complaint.

These actions were not brought to eliminate the three networks, but to limit their use of market power and encourage as much competition as possible within this three program buyer market structure. By opening up the stripping and syndication markets, by limiting network production, and by reducing program renewal options, the Judgment seeks to encourage competition in television entertainment program production, both among networks and between networks and other broadcasters. Moreover,

the injunctions in Sections IV and VI(A)-(C) should prevent NBC from abusing its market power when acquiring network exhibition rights.

Further, the Government does not believe that the CIS falls short in its discussion of the provisions of Sections VII or IX, or in its discussion of the anticipated effects on competition, if similar injunctive relief is not obtained from ABC or CBS. As explained, this is an unusual industry [CIS at 14], in that the three networks are the only purchasers of commercial television programming for simultaneous nationwide broadcasting. Each network as a purchaser has enormous market power, not subject to meaningful competition from the other two networks or from non-network television stations. This Judgment seeks to limit NBC's use of its power in purchasing television entertainment programs. If, however, the Court were to decide after a trial not to prohibit or limit the use of similar market practices by CBS or ABC, then it might be appropriate for NBC to seek relief from any portions of this Judgment which place it at a competitive disadvantage vis-a-vis CBS and ABC. For example, while Section VI(E)(ii) of the Judgment would limit to three years the period during which a prime time program series could be exclusive to NBC (as against syndication in other day parts), the present network practice is to require such exclusivity for the length of the initial 5-7 year contract, plus extensions which may run substantially longer. Should the Court after trial fail to award similar relief against CBS and ABC, then NBC should be free to seek modification of this provision,

upon a showing that it had been placed at a competitive disadvantage.

The same analysis is valid with respect to those other portions of the Judgment, which pursuant to Section VII will not become effective until similar injunctive relief is obtained against CBS and ABC. For example, Section V of the Judgment would enjoin NBC from producing for its own use more than 2-1/2 hours of prime time entertainment programming per week, plus 2 additional special programs every six months. Were the Court to rule after trial that CBS's or ABC's unlimited power to produce entertainment programming should not be curtailed, then NBC, because of the peculiar structure of the market, should not be subject to such a prohibition. 1/

The provisions of the decree which go into effect immediately, or within 30 days after entry of the Judgment, would have the procompetitive effect ascribed to them in the CIS. Section IV tracks the Federal Communications Commission Financial Interest and Syndication Rules (47 C.F.R. §73.658(j)), which are already in effect, and have increased competition for syndication rights and allowed program producers to retain more ownership rights in their programs.

1/ See CIS at 5-6. It should be noted, however, that the Government has not conceded that each provision which does not become effective until similar relief is obtained against CBS and ABC would place NBC at a competitive disadvantage if it were applicable to NBC alone.

Section VI(A) is a general injunction against abuse by NBC of its market power through acquiring more control over programs and producers than is necessary to permit network exhibition. Section VI(B) prevents NBC from conditioning access to its chain of stations on the producer's agreement to use NBC's production facilities in producing his program. This provision seeks to assure that a producer's decision on facility use will be made on a competitive basis and not to increase the chance that NBC would accept his program. Sections VI(E)(ii) and (iii) would limit the exclusivity rights which may be obtained by NBC in connection with its licensing of a program series or a motion picture, and should increase the amount of such programming available in the syndication and other media markets. All of these provisions would become effective upon entry of the Judgment, even if no injunctive relief were obtained against CBS or ABC.

In sum, we believe that the CIS satisfies the requirements of the APPA in every respect, and that entry of the Judgment against NBC would be in the public interest.

list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month.

A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Agriculture

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment revokes the position of Director, Conservation and Land Use Programs Division, because the position no longer meets Schedule C criteria.

EFFECTIVE DATE: May 13, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3313(h)(8) is amended to read as follows:

§ 213.3313 Department of Agriculture.

* * * * * *

(h) *Agricultural Stabilization and Conservation Service.* * * *

(8) (Revoked)

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–13876 Filed 5–16–77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Agriculture

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment excepts from the competitive service under Schedule C one position of Private Secretary each to the Assistant Secretary and Deputy Assistant Secretary for Marketing Services because the positions are confidential in nature.

EFFECTIVE DATE: May 17, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling (202–632–4533).

Accordingly, 5 CFR 213.3313 (a)(37) and (a)(38) are added to read as follows:

§ 213.3313 Department of Agriculture.

(a) *Office of the Secretary.* * * *

(37) One Private Secretary to the Assistant Secretary for Marketing Services.

* * * * * *

(38) One Private Secretary to the Deputy Assistant Secretary for Marketing Services.

(5 U.S.C. 3301; 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–14062 Filed 5–16–77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of the Army

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This section is amended to show that one position of Secretary (Steno) to the Deputy Under Secretary of the Army is excepted under Schedule C because the position is confidential in nature.

EFFECTIVE DATE: May 17, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, (202–632–4533).

Accordingly, 5 CFR 213.3307(b)(2) is added to read as follows:

§ 213.3307 Department of the Army

* * * * * *

(b) *Office of the Under Secretary.* * * *

(2) One Secretary (Steno) to the Deputy Under Secretary.

Title 7—Agriculture

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

PART 354—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Commuted Traveltime Allowances

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends administrative instructions prescribing commuted traveltime. These amendments establish commuted traveltime periods as nearly as may be practicable to cover the time necessarily spent in reporting to and returning from the place at which an employee of the Plant Protection and Quarantine Programs performs overtime or holiday duty when such travel is performed solely on account of such overtime or holiday duty. Such establishment depends upon facts within the knowledge of the Animal and Plant Health Inspection Service.

EFFECTIVE DATE: May 17, 1977.

FOR FURTHER INFORMATION CONTACT:

H. I. Rainwater, Regulatory Support Staff, Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs, U.S. Department of Agriculture, Hyattsville, MD 20782, 301–436–8247.

Therefore, pursuant to the authority conferred upon the Deputy Administrator, Plant Protection and Quarantine Programs, by 7 CFR 354.1 of the regulations concerning overtime services relating to imports and exports, the administrative instructions appearing at 7 CFR 354.2, as amended, March 18, 1977 (42 FR 15055) prescribing the commuted traveltime that shall be included in each period of overtime or holiday duty are further amended by adding (in appropriate alphabetical sequence) the information as shown below:

The following entry is added to the table in 7 CFR 354.2:

§ 354.2 Administrative instructions prescribing commuted traveltime.

(64 Stat. 561; (7 U.S.C. 2260).)

It is to the benefit of the public that this instruction be made effective at the earliest practicable date. Accordingly, it is found upon good cause, under the administrative procedure provisions of 5 U.S.C. 553, that notice and other public procedure with respect to the foregoing amendment are unnecessary and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

NOTE.—The Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Done at Washington, D.C., this 11th day of May, 1977.

JAMES O. LEE, Jr.,
Deputy Administrator, Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service.

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

BEEF RESEARCH AND INFORMATION

Procedure for Conduct of Referendums

CROSS REFERENCE: For a document establishing procedure for conducting referendums regarding any Beef Research and Information Order, see FR Doc. 77–14021, in the Rules and Regulations Section of this issue.

CHAPTER XI—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS: MISCELLANEOUS COMMODITIES), DEPARTMENT OF AGRICULTURE

PART 1260—BEEF RESEARCH AND INFORMATION

Subpart—Procedure for the Conduct of Referendums in Connection With Beef Research and Information Order

AGENCIES: Agricultural Marketing Service and Agricultural Stabilization and Conservation Service USDA.

ACTION: Final rule.

SUMMARY: This rule establishes the procedure for conducting referendums with respect to any Beef Research and Information Order or amendment issued pursuant to the Beef Research and Information Act. Such a rule is necessary because an order must be approved in a referendum among eligible beef producers before the Order can become effective. It will give beef producers notice of eligibility requirements, registration and voting procedures, challenges of eligibility, and publication of the result of each referendum.

EFFECTIVE DATE: May 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert Cook, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–7998).

SUPPLEMENTARY INFORMATION: The Act provides that the Secretary of Agriculture shall issue a Beef Research and Information Order, or amendments thereto, applicable to producers and slaughterers of cattle to effectuate the delcared policy of the Act. The Act further provides that the Secretary shall conduct a referendum among cattle producers for the purpose of ascertaining whether the issuance of an Order is approved or favored by cattle producers. This procedure for the conduct of referendums is in accordance with the authority vested in the Secretary of Agriculture by the Act.

The proposed rules for conducting referendums were published in the FEDERAL REGISTER on April 15, 1977 (42 FR 19885), and interested persons were invited to submit comments on the proposal by April 30, 1977.

Two changes in the proposed rules were recommended in the comments received. One suggestion was to change the 12-day voting period provided for in § 1260.201(n) to an 11-day voting period in order that the voting period for the forthcoming referendum could be scheduled during a suggested period which included the 4th of July holiday-shortened workweek. Such a change is unnecessary since § 1260.204 provides that Sundays and Federal holidays are counted in the computation of time except where the last day falls on a Sunday or holiday; then the next business day shall be the last day. Also, these rules are applicable not only to the forthcoming referendum but to all referendums held under any order or amendments issued under the Act. Therefore, it would be impractical to include special provisions to accommodate particular situations occurring in different referendums.

It was also recommended that paragraph 1260.207(b) be changed to provide that a list of registered producers be prepared on a daily basis and made available for inspection throughout the registration period in addition to a complete list of registered producers to be prepared after the registration period closes. The recommended change is adopted since it results in a more open registration procedure by making the names of registrants available to the public daily rather than only after the registration period.

The following other changes are also made to clarify or correct provisions in the proposed rules:

Section 1260.202 is added to the rules. It was inadvertently omitted in the proposed rules published for comment. The section outlines responsibilities of the Deputy Administrator, ASCS, State ASC committees, and county ASC committees for conducting referendums. This added section represents no substantive change from the proposal since the duties of the Deputy Administrator and the State and county ASC committees are stated in other provisions elsewhere in the rules.

The wording of § 1260.206(b) is changed to show that proxy registration and voting is not permitted for individual producers.

Section 1260.209(a) is changed by adding a requirement that any challenge of a person's eligibility must be made prior to the end of the voting period. This requirement is necessary to provide adequate time for resolving any challenges or appeals and compiling the final results of the referendum within the limits specified in the rules.

Since this procedure is essentially the same as the proposed rule published April 15, 1977, and an earlier effective date will not impose any additional burden on any person, good cause exists for making the procedure effective on less than 30 days notice.

Accordingly, with these changes and additions, the proposed rules (7 CFR Part 1260) are adopted as set forth below.

Issued at Washington, D.C., this May 11, 1977.

VICTOR A. SENECAL,
Acting Administrator, Agricultural Stabilization and Conservation Service.

IRVING W. THOMAS,
Acting Administrator, Agricultural Marketing Service.

Subpart—Procedure for the Conduct of Referendums in Connection With Beef Research and Information Order

§ 1260.200 Referendums.

Referendums for the purpose of ascertaining whether the issuance by the Secretary of Agriculture of a Beef Research and Information Order, or the amendment, continuance, termination, or suspension of such an Order, is favored by producers, shall, unless supplemented or modified by the Secretary, be conducted in accordance with this Subpart.

§ 1260.201 Definitions.

(a) "Secretary" means the Secretary of Agriculture or any other officer or employee of the U.S. Department of Agriculture to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in his stead.

(b) "ASCS" means the Agricultural Stabilization and Conservation Service.

(c) "Act" means the Beef Research and Information Act (7 U.S.C. 2901 et seq.) and any amendments thereto.

(d) "Deputy Administrator" means the Deputy or Acting Deputy Administrator, Programs, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture.

(e) "State ASC Committee" means the group of persons within a State designated by the Secretary to act as the State Agricultural Stabilization and Conservation committee.

(f) "County ASC Committee" means the group of persons within a county elected to act as the county Agricultural Stabilization and Conservation committee, pursuant to the regulations governing the election and functioning of the county Agricultural Stabilization and Conservation committee.

(g) "County ASCS Executive Director" means the person employed by the county ASC committee to execute the policies of the county ASC committee and be responsible for the day-to-day operation of the county ASCS office, or the person acting in such capacity.

(h) "Person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity.

(i) "Cattle" means live domesticated bovine quadrapeds.

(j) "Producer" means any person who owns or acquires ownership of cattle

other than one who acquires cattle solely for the purpose of slaughter: *Provided*, That a person shall not be considered to be a producer if his only share in the proceeds of a sale of cattle or beef is a sales commission, handling fee, or other service fee.

(k) "Order" means the Beef Research and Information Order or any amendment thereto promulgated pursuant to the Act with respect to which the Secretary has directed that a referendum be conducted.

(l) "Representative Period" means a consecutive twelve-month period preceding the referendum designated by the Secretary.

(m) "Registration Period" means a 12-day period to be announced for the registration of producers desiring to vote in a referendum. The registration period shall end not less than ten calendar days prior to the first day of the voting period.

(n) "Voting Period" means a 12-day period to be announced for voting in a referendum.

§ 1260.202 Supervision of referendum.

The Deputy Administrator shall be in charge of and responsible for conducting each referendum in accordance with this subpart. Each State ASC committee shall be in charge of and responsible for conducting the referendum in its State. Each county ASC committee shall be responsible for conducting the referendum in its county.

§ 1260.203 Requirements of referendum.

No Beef Research and Information Order or amendment thereto issued under the Act shall become effective unless the Secretary determines (a) that valid ballots were cast by at least 50 percent of the eligible producers registered to vote, and (b) that the issuance of such Order is approved or favored by not less than two-thirds of the producers casting valid ballots in such referendum.

§ 1260.204 Computation of time.

Sundays and Federal holidays shall be included in computing the time allowed for the filing of any documents or taking any action: *Provided*, That when such time expires on a Sunday or a Federal holiday, such period shall be extended to include the next following business day.

§ 1260.205 Public notice.

Advance public notice of the referendum shall be provided without advertising expense by the State and county ASCS offices by means of newspapers, television, county newsletter, county extension agents, etc. Such notice shall announce the registration requirements and other pertinent information.

§ 1260.206 Eligibility.

(a) *Eligible Producer.* Each person who was a producer at any time during the representative period is entitled to register and vote in the referendum. Each producer entity shall be entitled to cast only one ballot in the referendum.

(b) *Proxy Registration and Voting.* Proxy registration and voting is not authorized except that an officer or employee of a corporate producer, or any guardian, administrator, executor, or trustee of a producer's estate, or an authorized representative of any producer entity (other than an individual producer), such as a corporation or partnership, may register and cast a ballot on behalf of such entity. Any individual registering to vote in the referendum on behalf of any producer entity shall certify that he is authorized by such entity to take such acion.

(c) *Joint and Group Interest.* A group of individuals, such as members of a family, joint tenants, tenants in common, a partnership, owners of community property, or a corporation, engaged in the production of cattle as a producer entity shall be entitled to only one vote: *Provided, however*, That any member of a group may register to vote as a producer if he is an eligible producer separate from the group.

§ 1260.207 Registration.

(a) *Registration procedure.* Each producer desiring to vote in the referendum must register during the registration period with the county ASCS office serving the county in which his farm or ranch headquarters is located. An absentee producer who does not have a local headquarters may register and vote in any county where his cattle are located, but shall register and vote in only one such county. To register, a producer must complete a registration card, Form ASCS–151, during the registration period. Registration may be in person or by mail. A producer who wishes to register by mail may request the county ASCS office to mail him a registration card. A registration card shall be considered received during the registration period if (1) it was delivered in person to the county ASCS office prior to the close of business on the final day of the registration period, or (2) it was postmarked not later than midnight of the final day of the registration period, and was received in the county ASCS office prior to the close of business on the fourth day after the close of the registration period.

(b) *List of registered producers.* A list of registered producers shall be prepared and posted daily in a conspicuous public location at the county ASCS office during the registration period. A final list shall be posted on the fifth day after the close of the registration period. The list shall include all persons who submitted a valid registration card in a timely manner.

§ 1260.208 Voting.

(a) *Facilities and ballot box.* Each county ASCS office shall provide (1) adequate facilities and space to permit producers to mark their ballots in secret and (2) a sealed ballot box which shall be kept under observation during office hours and secured at all times until the ballots are counted.

(b) *Voting.* Voting may be in person or by mail. A producer wishing to vote by mail may request the county ASCS office to mail him a ballot. Ballots will be issued only to eligible cattle producers who have registered to vote. Ballots will not be provided nor accepted prior to the voting period. Each registered cattle producer voting shall obtain and cast his ballot on Form ASCS–151A with the county ASCS office where he registered to vote. The ballot shall be marked to indicate "yes" or "no" and must be signed by the producer. Producers voting in person shall place their own ballots in the ballot box. Ballots received by mail shall be placed promptly in the ballot box.

§ 1260.209 Challenge of eligibility.

(a) *Who may challenge.* A person's eligibility to register and vote may be challenged by any person. The county ASCS executive director shall review all registrations and promptly challenge any registrant who appears to be ineligible. Any challenge of a person's eligibility to register and vote must be made prior to the end of the voting period.

(b) *Determinations of challenges.* Any person whose eligibility to register and to vote has been challenged must prove to the satisfaction of the county ASCS executive director that he was a producer during the representative period. Records such as tax returns, sales documents, purchase documents, or other similar documents may be submitted to prove that a person is a producer. The county ASCS executive director shall make his determination concerning the eligibility of a producer who has been challenged as soon as practicable, and in all cases before the opening of the ballot box.

(c) *Challenged ballot.* A person whose eligibility to register or to vote has been challenged but not resolved by the county ASCS executive director or by the county ASCS committee, if on appeal, may be allowed to cast a ballot, but such ballot shall be considered a challenged ballot for the purpose of the referendum until a resolution of the challenge has been made. A challenged ballot shall be determined to have been resolved if no appeal is taken from the determination of the county ASCS executive director within the time allowed for appeal or there has been a determination by the county ASC committee after appeal.

(d) *Appeal.* Appeal from a decision by the county ASCS executive director on the eligibility of a person to register or to vote must be made to the county ASC committee within three business days after notification of such decision. An appeal shall be determined by the county ASC committee as soon as practicable, but in all cases not later than 5 days after the opening of the ballot box.

§ 1260.210 Receiving ballots.

A ballot shall be considered to have been received during the voting period (a) if it was cast in the county ASCS office prior to the close of business on the final day of the voting period, or (b) if mailed, the ballot was postmarked not later than midnight on the final day of the voting period and received in the county ASCS office prior to the close of business on the fourth day after the close of the voting period.

§ 1260.211 Canvassing ballots.

(a) *Counting the Ballots.* As soon as possible after opening of the county ASCS office on the fifth day after the close of the voting period, employees of the county ASCS office shall open the ballot box and count the ballots. The ballots shall be tabulated as follows: (1) Number of eligible producers casting valid ballots, (2) number of producers favoring the order, (3) number of producers not favoring the order, (4) the number of challenged ballots deemed invalid, and (5) the number of spoiled ballots.

(b) *Spoiled Ballots.* Ballots shall be considered as spoiled ballots when they are unsigned, mutilated, or marked in such a way that it cannot be determined whether it is a "yes" or "no" vote. Spoiled ballots shall not be considered as approving or disapproving the Order, or as a ballot cast in the referendum.

(c) *Confidentiality.* All ballots shall be treated as confidential and the contents of the ballots shall not be divulged except as provided for in this Subpart or as the Secretary may direct. The public may witness the opening of the ballot box and the counting of the ballots, but shall remain a reasonable distance from the tabulation so as not to interfere with the tabulation or see how any person voted in the referendum.

§ 1260.212 County ASCS office report.

(a) *Preliminary report.* The county ASCS office shall notify the State ASCS office by telephone, telegraph, or messenger as to the preliminary results of the referendum as soon as possible. Such report shall also include the total number of eligible producers that registered to vote in the referendum. Each county ASCS office may release the unofficial results of the referendum in its county after the report has been given to the State ASCS office.

(b) *Final report.* Within seven days after the opening of the ballot box, each county ASCS office shall transmit a written summary certified by the county ASCS executive director of the final results of the referendum in its county to the State ASCS office. Any appeal concerning a producer's eligibility shall be resolved by the county ASC committee prior to the date of the final report. A copy of the summary shall be posted for 30 days in the county ASCS office in a conspicuous place accessible to the public and a copy shall be kept on file in the county ASCS office for a period of at least 12 months.

§ 1260.213 State ASCS office report.

(a) *Preliminary report.* Each State ASCS office shall send to the Deputy Administrator by telegraph as soon as possible a summary of the preliminary results of the referendum received from the county ASCS offices within its State. Such report shall also include the total number of eligible producers that registered to vote in the referendum. Each State ASCS office may release the unofficial results of the referendum in its State after its report has been sent to the Deputy Administrator.

(b) *Final report.* Within ten days after the opening of the ballot boxes in the county ASCS offices each State ASCS office shall transmit to the Deputy Administrator a written summary of the final results of the referendum received from the county ASCS offices within the State. Such summary shall be prepared in triplicate and certified by the State ASCS executive director. The orginal and one copy of the summary shall be sent to the Deputy Administrator. One copy of the summary shall be maintained in the State ASCS office where it shall be available for public inspection for a period of not less than 12 months.

§ 1260.214 Results of the referendum.

(a) The Deputy Administrator shall prepare and submit to the Secretary or his designee a report of the results of the referendum. The official results of the referendum shall be published in the FEDERAL REGISTER. State summaries and related papers shall be available for public inspection in the office of the Deputy Administrator, Programs, ASCS, U.S. Department of Agriculture, Room 243–W, Administration Building, Washington, D.C.

(b) If the Deputy Administrator or the Secretary deems it necessary, the report of any State or county shall be reexamined and checked by such persons that may be designated by the Deputy Administrator or the Secretary.

§ 1260.215 Disposition of ballots and records.

The county ASCS executive director shall place the registration cards, list of registrants, eligible voter lists, voted ballots, challenged registration cards and challenged ballots found to be ineligible, spoiled ballots, and county summaries in sealed containers marked with the identification of the referendum. Such records shall be placed under lock in a safe place under the custody of the county ASCS executive director for a period of not less than 12 months after the referendum. If no notice to the contrary is received from the Deputy Administrator by the end of such time, the records shall be destroyed.

§ 1260.216 Suspension and termination of order.

The Secretary of Agriculture may conduct a referendum at any time, and shall hold a referendum on request of 10 percent or more of the number of cattle producers voting in the referendum approving the Order, to determine whether such producers favor the termination or suspension of the Order, and he shall suspend or terminate such Order six months after he determines that suspension or termination of the Order is approved or favored by a majority of the producers voting in such referendum who, during a representative period determined by the Secretary of Agriculture, have been engaged in the production of cattle, and who produced more than 50 percent of the volume of cattle produced by the producers voting in the referendum.

§ 1260.217 Instructions and forms.

The Deputy Administrator is hereby authorized to prescribe additional instructions and forms not inconsistent with the provisions of this subpart to govern the conduct of the referendum.

[FR Doc.77–14021 Filed 5–16–77;8:45 am]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 73—SCABIES IN CATTLE

Release of Area Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to release a portion of Webster County in Nebraska from areas quarantined because of cattle scabies. Surveillance activity indicates that cattle scabies no longer exists in the area quarantined. No areas in the State of Nebraska remain under quarantine.

EFFECTIVE DATE: May 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. Glen O. Schubert, Chief Staff Veterinarian, Sheep, Goats, Equine, and Ectoparasites Staff, United State Department of Agriculture, Room 737, 6505 Belcrest Road, Federal Building, Hyattsville, Maryland 20782 (301–436–8322).

SUPPLEMENTARY INFORMATION: This amendment releases a portion of Webster County in Nebraska from the areas quarantined because of cattle scabies. Therefore, the restrictions pertaining to the interstate movement of cattle from quarantined areas contained in 9 CFR Part 73, as amended, will not apply to the excluded area, but the restrictions pertaining to the interstate movement of cattle from nonquarantined areas contained in said Part 73 will apply to the excluded area.

Accordingly, Part 73, Title 9, Code of Federal Regulations, as amended, restricting the interstate movement of cattle because of scabies, is hereby amended in the following respect:

§ 73.1a [Amended]

In § 73.1a, paragraph (b)(1) relating to the State of Nebraska is deleted.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111–113, 115, 117, 120, 121, 123–126, 134b, 134f; 37 FR 28464, 28477; 38 FR 19140.)

The amendment relieves restrictions no longer deemed necessary to prevent

the spread of cattle scabies and should be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 12th day of May 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

R. I. BROWN,
Acting Deputy Administrator, Veterinary Services.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Docket No. R-0099]

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

Revocation of Certain Previous Delegations Regarding Personnel, Buildings, etc.

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: In order to expedite and facilitate performance of certain of its functions, the Board of Governors revokes certain previous delegations regarding personnel matters, building matters, and other miscellaneous delegations.

EFFECTIVE DATE: May 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Theodore E. Allison, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., 20551 (202-452-3257).

SUPPLEMENTARY INFORMATION: The Board of Governors has amended its Rules Regarding Delegation of Authority by revoking certain functions previously delegated to Board members.

The provisions of section 553 of Title 5, United States Code, relating to notice and public participation and deferred effective date, are not followed in connection with the adoption of these amendments, because the changes involved are procedural in nature and do not constitute substantive rules subject to the requirements of that section.

Effective May 9, 1977, 12 CFR 265.1a is amended by deleting paragraph (a) and redesignating paragraphs (b) and (c) as (a) and (b) respectively. (12 U.S.C. 248(k))

Board of Governors of the Federal Reserve System, May 9, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-13508, IC-9753; File No. S7-654]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Securities Confirmations

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: This rule prescribes the delivery and disclosure requirements for confirmation slips sent to customers by brokers and dealers when they buy securities for or from customers or sell securities for or to those customers. The rule describes the situations in which confirmations must be sent and the information they must contain. It revises the confirmation requirements under the federal securities laws to provide investors with fundamental information pertaining to securities transactions consonant with the costs of providing that information.

EFFECTIVE DATE: January 1, 1978, except for paragraphs (b), (c), (d) and (e) as to which the effective date is June 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Jeffrey L. Steele, Esq., Office of the Chief Counsel, Division of Market Regulation, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-8746.

SUPPLEMENTARY INFORMATION: The Commission today announced the adoption of Rule 10b-10 (17 CFR 240.10b-10) under the Securities Exchange Act of 1934 (the "Act")[1] and the intention to rescind Rule 15c1-4 (17 CFR 240.15c1-4). Rule 10b-10 will make it unlawful for any broker or dealer to effect transactions in securities for or with a customer without making certain written disclosures to that customer.[2]

Rule 10b-10 will become effective on January 1, 1978, with the exception of paragraphs (b), (c), (d) and (e) of the rule, which will become effective on June 1, 1977. Paragraph (b) provides for the optional use of quarterly statements in lieu of immediate confirmations in connection with certain regular investment plans.[3]

The Commission also expects to publish a release shortly setting forth certain proposed revisions to Rule 10b-10 or separate rules relating to, among other things, the provisions contained in Rule 10b-10 as originally proposed, with regard to "riskless principal" transactions, "special remuneration" in connection with principal transactions,[4] and the use of quarterly statements in lieu of immediate confirmations with respect to certain "investment company plans."[5] Those further provisions, together with the provisions adopted today, are expected to supersede Rule 15c1-4 in its entirety and the Commission currently intends to rescind that rule upon taking final action on the proposed additions to Rule 10b-10.

By adopting paragraphs (b), (c), (d) and (e) of Rule 10b-10 effective June 1, 1977, the Commission has sought to afford broker-dealers an immediate opportunity to implement the "periodic plan" provisions of paragraph (b). With respect to confirmations not covered by paragraph (b), however, brokers and dealers are urged to review the amendments to be proposed shortly before making major adjustments in confirmation preparation procedures.

BACKGROUND AND PURPOSE

As the Commission noted in proposing to adopt Rule 10b-10, it has undertaken a general review of the requirements under the federal securities laws which have imposed a duty upon brokers, dealers and municipal securities dealers to make written disclosures to their customers at or before completion of a transaction. The so-called "confirmation requirements" have, for the most part, been contained in section 11(d)(2) of the Act[6] and Rule 15c1-4.[7]

Numerous considerations have led the Commission to undertake a general review at this time. Business practices within the securities industry have been changing or have changed since the development of the basic confirmation requirements. In recent years, for example, broker-dealers and others have sought to attract increased participation by individual investors in the securities markets through regular or periodic investment plans. Employee stock purchase plans, dividend reinvestment plans and systematic plans for the purchase of investment company securities did not exist when the confirmation requirements were originally written.

The securities markets are also undergoing changes and the Securities Acts Amendments of 1975[8] reflect those changes in considerable measure. In enacting the 1975 Amendments, Congress substantially revised the Act to accomplish numerous purposes, including the development of a "national market system." In that connection, the Congress found, among other things, that it was in the public interest and appropriate for the protection of investors to assure fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets[9] and to assure equal regulation of all markets for securities qualified for trading in a national market system and of the brokers and dealers effecting transactions in such securities.[10] In addition, the Congress provided that persons effecting transactions in municipal securities would be subject for the first time to various provisions of the Act and the rules thereunder[11] and mandated the creation of the Municipal Securities Rulemaking Board (the "MSRB") to propose and adopt, subject to Commission approval, rules to effect the purposes of the Act with respect to transactions in municipal securities.[12]

In addition, changes are occurring in the types of market participants acting as intermediaries between investors and the securities markets. Under the federal securities laws, many of those participants are characterized as "brokers," "dealers," "banks" or "investment advisers." At the same time, those who are characterized other than as "borkers" or "dealers" (but who, nonetheless, deal directly with investors) are becoming more integrally involved in the process of effecting transactions in securities. Not all of those persons have been subject to Commission regulation and some have been subject to varying Commission regulation. A person who is a "broker"[13] or "dealer"[14] under the Act is, of course, required to comply with applicable provisions of the Act and the rules thereunder. A person who is characterized as an "investment adviser,"[15] on the other hand, is subject to different regulation. A "bank"[16] is excluded from the statutory definitions of "broker," "dealer" and "investment adviser." A number of commentators drew attention to the variations in the regulatory pattern and made suggestions that the coverage of the confirmation rule be extended. While the Commission has decided at this time to adhere to the traditional pattern of requiring only brokers and dealers to comply with the confirmation rule, it will continue to evaluate confirmation procedures with reference to the fundamental transactional information which should be made available to all investors.

PERSONS SUBJECT TO RULE 10b-10

BROKERS AND DEALERS

Rule 10b-10 applies to brokers and dealers. Section 11(d)(2) has since 1934 required a broker-dealer to disclose whether he has acted as a dealer for his own account or as a broker for the customer or some other person in effecting a transaction,[17] and Rule 15c1-4 has since 1937 imposed disclosure requirements upon brokers and dealers effecting transactions otherwise than on a national securities exchange. Rule 10b-10 will, however, apply regardless of the manner in which a broker-dealer conducts its business or the marketplace where transactions are effected.

MUNICIPAL SECURITIES

In 1976 the Commission amended Rule 15c1-4, effective July 5, 1976, to require a bank municipal securities dealer to disclose whether it has acted as agent or as principal in effecting a transaction in municipal securities.[18] Shortly after that amendment to Rule 15c1-4 became effective and shortly before the Commission proposed Rule 10b-10, the MSRB filed with the Commission a confirmation rule (MSRB rule G-15) to require all brokers, dealers and municipal securities dealers effecting transactions in municipal securities to disclose to their customers information pertaining to each transaction.[19] In proposing to apply Rule 10b-10 to transactions in municipal securities, the Commission called attention to MSRB rule G-15.[20]

Some who commented on Rule 10b-10, including the MSRB, urged the Commission to consider whether it was necessary for Rule 10b-10 to apply to transactions in municipal securities in view of the proposed MSRB confirmation rule. Generally, proposed MSRB rule G-15 would provide for more detailed disclosures relating specifically to the nature of the security being purchased or sold. Certain additional disclosures were, however, required by proposed Rule 10b-10. For example, as proposed, it would have required certain dealers to disclose their mark-up or mark-down (i.e, remuneration) in connection with "riskless" principal transactions. As noted above, the Commission intends to publish shortly revised proposals in that regard.

In urging the Commission to consider whether Rule 10b-10 need apply to transactions in municipal securities, some commentators referred to the expertise of the MSRB and its special role under the Federal securities laws. The MSRB was established by the Commission, at the direction of Congress,[21] to propose and adopt rules to effect the purposes of the Act with respect to transactions in municipal securities effected by brokers, dealers and municipal securities dealers.[22] The legislative history of the 1975 Amendments makes clear the desirability of taking "into account the uniqueness of the (municipal securities) industry,"[23] so long as investors are adequately protected. Accordingly, the Commission has determined to withdraw, at this time, the proposal to provide confirmation requirements applicable to municipal securities transactions in Rule 10b-10. The Commission anticipates that further consideration will be given to applying to the municipal securities markets the types of disclosures included or soon to be proposed for inclusion in Rule 10b-10. All brokers, dealers and municipal securities dealers should recognize that the requirements of Rule 15c1-4(a) remain in effect until January 1, 1978, and should anticipate that a comprehensive confirmation rule applicable to municipal securities will also be in effect by that date.

CONFIRMATION DELIVERY REQUIREMENTS UNDER RULE 10b-10

Paragraph (a) of Rule 10b-10 requires, as did Rule 15c1-4, that a written statement be given or sent to a customer at or

---

[10] See Section 11A(c)(1)(F) of the Act (15 U.S.C. 78k-1(c)(1)(F)).

[11] See generally Section 15B of the Act (15 U.S.C. 78o-4).

[12] See, e.g., Sections 15B(b)(2) and 15B(c)(1) of the Act (15 U.S.C. 78o-4(b)(2) and (c)(1)).

[13] Section 3(a)(4) of the Act, 15 U.S.C. 78c(a)(4).

[14] Section 3(a)(5) of the Act, 15 U.S.C. 78c(a)(5).

[15] See section 202(a)(11) of the Investment Advisers Act of 1940, 15 U.S.C. 80b-2(a)(11).

[16] Section 3(a)(6) of the Act, 15 U.S.C. 78c(a)(6) and section 206(a)(2) of the Investment Advisers Act of 1940, 15 U.S.C. 80b-2(a)(2).

[17] Section 11(d)(2) applies to any "member of a national securities exchange who is both a dealer, and a broker, (and) any person who both as a broker and a dealer transacts a business in securities through the medium of a member or otherwise."

[18] See Securities Exchange Act Release No. 12466 (May 20, 1976), 41 FR 22820 (1976).

[19] See Securities and Exchange Commission File No. SR-MSRB-76-9. The rules of the MSRB are adopted by the MSRB subject to Commission approval pursuant to section 19(b)(2) of the Act (15 U.S.C. 78s(b)(2)).

[20] See Securities Exchange Act Release No. 12806 (Sept. 16, 1976), 41 FR 41432 (Sept. 22, 1976).

[21] See section 15B(b)(1) of the Act (15 U.S.C. 78o-4(b)(1)).

[22] See section 15B(b)(2) of the Act (15 U.S.C. 78o-4(b)(2)). It is a violation of the Act if a broker, dealer or municipal securities dealer effects a transaction in a municipal security in contravention of a rule of the MSRB. See section 15B(c)(1) of the Act (15 U.S.C. 78o-4(c)(1)). Accordingly, a confirmation rule adopted by the MSRB and approved by the Commission would assume a status under the Federal securities laws that is substantially equivalent to any confirmation rule the Commission may adopt.

[23] Securities Acts Amendments of 1975, Report of the Senate Comm. on Banking, Housing and Urban Affairs to Accompany S. 249. S. Rep. No. 75, 94th Cong., 1st Sess. 46 (1975).

before completion of a transaction. "Customer" and "completion of the transaction" are respectively defined in paragraphs (d)(1) and (d)(2) of the rule.

Proposed Rule 10b–10, however: *Provided*, That in lieu of the written statement required by paragraph (a), a monthly statement could be used in connection with transactions effected pursuant to a "periodic plan" and a quarterly statement could be used with respect to an "investment company plan."[24] The proposals with respect to periodic plans have been modified somewhat in Rule 10b–10 as adopted. The Commission intends to revise the provisions with respect to investment company plans in the release to be published shortly.

PERIODIC PLANS

Proposed Rule 10b–10 defined a "periodic plan" as a customer's written authorization to a broker to purchase or sell for his account a specific security or securities (other than investment company securities), in specific amounts (calculated in security units or dollars), at specific time intervals. That definition has not been substantially altered and appears in paragraph (d)(4) of Rule 10b–10, as adopted.

Some commentators objected to the requirement that transactions effected pursuant to a periodic plan must be agency transactions. It was observed that small transactions, such as those effected for dividend reinvestment plans, may involve odd-lot transactions which some broker-dealers have recently begun effecting on a principal basis. The Commission, however, is concerned that there may be risks to investor protection inherent in further relaxing the confirmation delivery requirements to permit a broker-dealer to effect transactions as a principal (and, therefore, at prices determined by the broker-dealer) without providing for reasonably current reporting to the customer under the confirmation rule.[25]

The Commission was also urged to permit the use of quarterly rather than monthly statements in connection with transactions effected pursuant to a periodic plan. Quarterly statements have been permitted by the Commission in connection with various plans for the purchase of certain investment company shares,[26] and the Commission has revised the rule, as adopted, to permit the use of quarterly statements in connection with periodic plans as well. In addition, Rule 10b–10, as adopted, will permit the delivery of quarterly statements in bulk to a person designated by the customer for distribution to the customer. A similar provision was also previously permitted in the case of purchases of investment company securities pursuant to a "group plan" under Rule 15c1–4, and the Commission has concluded that such a procedure would also be appropriate under a "periodic plan."

INVESTMENT COMPANY PLANS

In 1974, the Commission amended Rule 15c1–4 by adding paragraph (b) to provide for the use of quarterly statements in connection with certain transactions in securities issued by open end investment companies or unit investment trusts registered under the Investment Company Act of 1940 ("investment company securities"). Proposed Rule 10b–10 was drafted to restate the substance of that 1974 amendment. The Commission had, however, received indications that the quarterly procedure was not being used and accordingly solicited comments to assist it in determining what, if any, revisions would be appropriate.[27]

A number of comments confirmed that the quarterly procedure was not being used. A survey by the National Association of Securities Dealers, Inc. (the "NASD") of its members which act as principal underwriters for investment companies indicated that the quarterly statement procedure was not used because of various business problems. For example, many principal underwriters believe that the costs associated with establishing and maintaining dual confirmation systems (e.g., segregating those accounts for which a quarterly statement could be used), exceed the possible cost savings. Some also believed that for business reasons immediate confirmations were generally preferable. On the other hand, some who commented directly on proposed Rule 10b–10 and some who responded to the NASD survey indicated that various requirements contained in Rule 15c1–4 (and proposed Rule 10b–10) unnecessarily restricted the use of quarterly statements.

As noted above, the Commission intends to propose revised requirements with respect to the use of quarterly statements for investment company plans; and until such new requirements are proposed and finally adopted, the provisions of Rule 15c1–4(b) will continue in effect.

SUMMARY OF DISCLOSURE REQUIREMENTS UNDER RULE 10b–10

As now adopted, Rule 10b–10 provides for the written disclosure of certain material information[28] pertaining to a transaction effected by a broker or dealer for or with a customer. The rule is structured to require different disclosures depending upon whether the broker-dealer has acted as agent or as principal in effecting transactions.

DISCLOSURES TO BE MADE BY ALL BROKERS AND DEALERS

Paragraph (a)(1) of the rule requires disclosure of the capacity in which a broker or dealer acts in effecting a transaction. Since, in some instances, a broker may act as agent for someone other than the customer to whom the confirmation is to be sent, the rule has been revised to reflect that fact.

Paragraph (a)(2) of the rule requires disclosure of the date and time of the transaction (or the fact that the time of the transaction will be furnished upon request) and the identity, price and number of shares or units (or principal amount) of the security purchased or sold by the customer.[29]

TIME OF A TRANSACTION

A number of comments were received with regard to the existing requirement in Rule 15c1–4 that the time of the transaction be disclosed or made available upon request and the modification of that requirement proposed in Rule 10b–10. Time of a transaction was argued not to be material in the context of transactions in debt securities generally or in the context of certain transactions in securities issued by investment companies. Also the Commission was urged to clarify the meaning of "time of a transaction."

With respect to transactions in debt securities, the Commission believes that the time of a transaction may on occasion be of sufficient materiality to warrant its disclosure upon request and, since the time of a transaction is required to be maintained under Commission and MSRB recordkeeping rules,[30] there appears to be little burden created solely by advising customers that information on time is available on request.[31]

With respect to time of a transaction generally, it was suggested that Rule 10b–10 should be drafted to conform to the requirements of the Commission's recordkeeping rule, Rule 17a–3 (17 CFR 240.17a–3). That rule generally requires brokers and dealers to maintain a record of the "time of execution" of a transaction "to the extent feasible."[32] The Commission believes that the confirmation and recordkeeping requirements do not in fact differ with respect to the time of a transaction and paragraph (d)(3) of Rule 10b–10 defines the phrase "time of a transaction" to reflect that view.

PRICE OF A SECURITY

In proposing Rule 10b–10, the Commission noted that, under certain circumstances, it was not thought to be inappropriate for broker-dealers to send confirmations which reflect the average price where an order has been effected in several transactions.[33] For example, it was observed that a person exercising investment discretion with respect to several different accounts may decide to purchase or sell a particular security for one or more of such accounts. Because a substantial block may be involved, the purchase or sale of the security for all such accounts may be effected in several transactions over a reasonable period of time and, therefore, at varying prices. The question then arose as to whether the person exercising investment discretion should seek some basis for allocating particular purchases and sales to particular accounts, even though the investment decision for all such accounts was made simultaneously, or whether all such accounts would be more appropriately treated pari passu by attributing to each account an average price paid or realized for the series of transactions required to effect the overall purchase or sale. Under the circumstances described, it generally would not appear inappropriate for a broker to prepare and send confirmations which reflect the average price while making appropriate disclosures as to the overall series of transactions.

While several commentators suggested that a specific procedure be prescribed in the text of Rule 10b–10, it could be that any such formalization of the procedure might, at this juncture, prove premature and overly restrictive. Nevertheless, the Commission concurs generally with the view that an average price confirmation procedure would not be inappropriate (and would not in and of itself raise questions under either Rule 15c1–4 or Rule 10b–10) when (1) the order has been placed by a person known to the broker to have investment discretion with respect to the customers on whose behalf the order has been given, (2) the order is executed on an agency basis, and (3) the confirmations disclose that the price stated is an average price and that the actual transactional data is available on request.[34]

DISCLOSURES BY A BROKER-DEALER ACTING AS AGENT

Paragraph (a)(3) of Rule 10b–10 requires any broker-dealer effecting transactions in an agency capacity to make certain additional disclosures. As described below, the Commission has made certain technical revisions to this paragraph of Rule 10b–10.

OTHER PARTIES TO A TRANSACTION

Paragraph (a)(3)(i) requires disclosure of the name of the person from whom the security was purchased or to whom it was sold for the customer or that such information is available on request. In cases where a broker effects a transaction for a customer with another broker-dealer (who may in turn have been representing a third party) the rule requires disclosure of the name of that broker-dealer and does not obligate a broker to obtain information as to the capacity in which another broker-dealer was acting or the identity of any third party.

REMUNERATION

Paragraph (a)(3)(ii) of the Rule requires disclosure of the remuneration to be paid by the customer, and paragraph (a)(3)(iii) requires disclosure of the source and amount of any other remuneration[35] to be received by the broker in connection with the transaction. Paragraph (a)(3)(iii), however, alternatively permits, in most instances, a broker to state that the source and amount of other remuneration is available on request. As proposed, the alternative was subject to the proviso that the broker was not exercising investment discretion (as defined by section 3(a)(35) of the Act[36]) on behalf of such customer, or in the case of a purchase was not participating in a distribution, or in the case of a sale was not participating in a tender offer in connection with the transaction. A number of comments were received concerning the requirement to disclose on the confirmation the source and amount of remuneration in those three situations. While one commentator called the proposal a "sensible accommodation of competing considerations," others asserted that the source and amount of other remuneration should be required to be disclosed only on request regardless of the circumstances surrounding the transaction.

In proposing Rule 10b–10, the Commission noted that a number of persons had stated that there were practical difficulties in reporting on a confirmation the source and amount of remuneration paid or to be paid by someone other than the customer receiving the confirmation. At the same time, the Commission observed that dual agency representation presents a potential for abuse since there is a prima facie problem in representing fairly the rights of parties having conflicting interests. The three situations covered by the proviso represent either situations of special trust and confidence (where the broker is exercising investment discretion) or situations (distributions and tender offers) where the remuneration to be received may be anticipated, in many cases, to be substantially larger than might be customary in typical brokerage transactions, in which the difficulties inherent in a dual agency may be substantially less. Some commentators stated that the meanings of the terms "distribution" and "tender offer" were not clearly defined under the federal securities laws and that in any event other remuneration may be disclosed in a prospectus or other documents delivered to a customer.[37]

One alternative would be to rely solely on the general agency disclosure requirement with respect to source and amount of other remuneration set forth in Rule 15c1–4 since 1937. Nevertheless in view of the strong representations that have been made as to the administrative difficulties involved in providing disclosure

[24] As the Commission noted in proposing Rule 10b–10, the rule is not intended to require a broker dealing with the trustee of a plan to deliver statements to plan participants where the trustee is the shareholder of record of the securities being purchased or sold. Paragraph (a) of the rule would require such a broker only to deliver a confirmation to the plan trustee.

[25] These considerations do not appear to apply equally to "investment company plans" as defined in paragraph (d)(3) of proposed Rule 10b–10.

[26] See Rule 15c1–4(b).

[27] See Securities Exchange Act Release No. 11025 (Sept. 24, 1974), 39 FR 35345 (Oct. 1, 1974).

[28] The rule does not attempt to set forth all possible categories of material information to be disclosed by broker-dealers in connection with a particular transaction in securities. Rule 10b–10 only mandates the disclosure of information which can generally be expected to be material. Of course, in particular circumstances, additional information may be material and disclosure may be required. See, e.g., Securities Exchange Act Rules 15c1–5 and 15c1–6.

[29] As proposed, Rule 10b–10 would have required disclosure of "title" rather than "identity" of the security. Some commentators believed that the term "title" suggested that broker-dealers must employ the full corporate title as set forth in the issuer's certificate of incorporation or debt instrument. It was suggested that the term "identity" would allow greater flexibility without sacrificing the purpose of the disclosure, and the Commission has accepted that suggestion.

[30] See Securities Exchange Act Rule 17a–3(a)(6) and (7) (17 CFR 240.17a–3(a)(6) and (7)). See also MSRB rule G–8.

[31] With respect to investment company securities, it was observed that for those securities which are priced pursuant to Rule 22c–1 (17 CFR 270.22c–1) under the Investment Company Act of 1940, 15 U.S.C. 80a et seq., time (as opposed to date) of a transaction is not relevant. That rule requires pricing to be based on net asset value computed not less frequently than once daily as of the time of the close of trading on the New York Stock Exchange. With respect to the securities of investment companies the price of which is calculated pursuant to Investment Company Act Rule 22c–1, "time of transaction" for purposes of Rule 10b–10 may be treated as the time at which the price is required to be computed.

[32] See also Securities Exchange Act Release No. 3040 (Oct. 13, 1941), where it is stated, "the phrase 'to the extent feasible' was intended to be applicable only in exceptional circumstances where it might be actually impossible to determine the exact time of execution."

[33] See Securities Exchange Act Release No. 12806 (Sept. 16, 1976).

[34] See Kidder, Peabody & Co. Incorporated (available April 18, 1976).

[35] Questions were raised as to disclosure of remuneration where a transaction might be viewed as having multiple parties. For example, if the broker represented a seller offering 1,000 shares of a security and also represented two purchasers who each decided to purchase 500 shares of that security would it be necessary to disclose to each purchaser the compensation received from the other? In those circumstances, viewed solely from the perspective of one of the purchasers, it would be appropriate to consider the other purchaser to have effected a separate transaction. That conclusion could not, of course, be reached with respect to the seller who, in the example given, participated in both transactions.

[36] 15 U.S.C. 78c(a)(35).

[37] The term "distribution," of course, appears in other disclosure rules; see, e.g., Securities Exchange Act Rule 15c1–6.

of the type required by Rule 15c1–4,[38] the Commission has attempted to reach an accommodation that both permits the broker-dealer community to achieve greater efficiencies in transacting and adequately protects investors. Accordingly, the basic thrust of the proviso to paragraph (a)(3)(iii) has been retained, but some modifications have been made.

As adopted, Rule 10b–10 permits the broker to state on the confirmation that the source and amount of other remuneration is available on request except in two situations. When the customer has purchased the security in a transaction which is part of a distribution in which the broker is participating or when the customer has sold the security in response to a tender offer in which the broker is acting as a so-called "soliciting dealer," Rule 10b–10 requires disclosure of the source and amount of any remuneration received from any person.

The disclosure requirement in the case of transactions on behalf of an account over which the broker exercises investment discretion has been deleted in large part because the circumstances which are most likely to raise questions concerning a broker's impartiality, regardless of whether he is exercising investment discretion, would appear to occur in the case of distributions and tender offers.[39]

While the proviso, even as modified, may not provide the definiteness sought by many commentators, it does permit substantial additional flexibility as compared to the requirements of Rule 15c1–4. On the one hand, in the case of ordinary brokerage transactions, no disclosure on the confirmations is required as to the remuneration paid by the other side. On the other hand, in the case of a transaction effected as part of a "special offering," [40] or otherwise involving special selling efforts, it is apparent that disclosure is required.[41] The Commission anticipates that the proviso in modified form could substantially solve the asserted practical problems encountered in casual trading without creating unnecessary risks to investor protection.[42]

DISCLOSURES BY A BROKER-DEALER ACTING AS PRINCIPAL

Paragraph (a)(3)(ii) of Rule 10b–10, as originally proposed, set forth various disclosures to be made by any broker, dealer, or municipal securities dealer effecting a transaction, as principal, with a customer. The Commission has determined not to retain those requirements in the form proposed in Rule 10b–10 as adopted. In light of certain of the comments received, however, the Commission currently intends to revise certain of those proposals and to republish them.

MISCELLANEOUS MATTERS

CUSTOMER REQUESTS FOR INFORMATION

Various provisions of Rule 10b–10, as proposed and as adopted, offer broker-dealers the option of disclosing certain information on the confirmation or stating thereon that the information is available on request. As proposed Rule 10b–10 would have required such requests to be answered within five business days. A number of persons stated that the rule should be more specific as to how and when requests are to be made and that under some circumstances five days would not be sufficient time to answer, particularly if the request related to a transaction that occurred a month or more before the request.

In response to the comments received, the Commission has modified somewhat the requirements for customer requests for information. Paragraph (c) of the rule, as adopted, provides that a broker-dealer shall give or send requested information to a customer within five business days of the receipt of information except in the case of requests for information pertaining to a transaction effected more than 30 days before the request; in that case, the response must be given or sent within 15 business days. Furthermore, the rule generally specifies that requests for information should be written (although broker-dealers may, of course, respond to oral requests if they wish to do so).

REQUESTS FOR EXEMPTIONS

Several commentators briefly discussed circumstances under which the confirmation delivery or disclosure requirements, as set forth in proposed Rule 10b–10, might be further modified. For example, one commentator suggested that simplified confirmation requirements could be appropriate in connection with transactions in "money market" investment company securities. Money market investment companies permit investors to place funds, not otherwise invested, in securities on a short term basis. Some investors may, for example, desire to invest, on an automatic basis, the proceeds from the sale of securities in a money market investment company pending a determination on long term reinvestment. The Commission believes that the commentators may be correct in suggesting that there could be a basis, in very limited circumstances, for making particular adjustments to the requirements of Rule 10b–10. The Commission does not, however, currently believe it would be appropriate to attempt to anticipate all such circumstances in drafting Rule 10b–10. A new paragraph (e) has, however, been inserted in the Rule to provide that the Commission may exempt any broker or dealer from the requirements of Rule 10b–10 with respect to specified transactions or classes of transactions. Paragraph (e) is not intended to supplant the Commission's interpretive or no-action procedures; it is intended to provide an opportunity to make adaptations in the general provisions of Rule 10b–10 in limited circumstances and upon the substitution of alternative procedures which are adapted to implement adequately the investor protection purposes of the rule.

STATUTORY BASIS

The Securities and Exchange Commission acting pursuant to the Act, and particularly sections 3, 9, 10, 11, 15, 17, and 23 thereof (15 U.S.C. 78c, 78i, 78j, 78k, 78o, 78q, and 78w), hereby adopts § 240.10b–10 of Title 17 of the Code of Federal Regulations effective January 1, 1978, with the exception of paragraphs (b), (c), (d), and (e), which will be effective on June 1, 1977. The revisions made in § 240.10b–10 as originally proposed are either technical in nature or make less restrictive existing or proposed requirements; accordingly, the Commission finds, pursuant to the Administrative Procedure Act (5 U.S.C. 551 et seq.), that further notice and public procedure are not necessary. The Commission is providing for less than the normal 30-day delay in effectiveness of paragraphs (b), (c), (d), and (e) of the rule in view of the absence of objections to the confirmation relief proposed to be afforded under paragraph (b) and in order to allow brokers an earlier opportunity to begin offering periodic plans under the provisions adopted today.

The Commission also finds that adoption of Rule 10b–10's revised confirmation disclosure and delivery requirements should reduce burdens on competition by making confirmation disclosure requirements applicable to brokers and dealers more uniform and by making available to brokers a simplified confirmation procedure in connection with periodic plans. Furthermore, the Commission finds that to the extent those requirements impose a burden on competition such burdens are necessary and appropriate in furtherance of the purposes of the Act. The timely disclosure to investors of material information affords investors an opportunity to insure that brokers and dealers appropriately carry out obligations to their customers under the federal securities laws.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

MAY 5, 1977.

17 CFR Part 240 is amended by adding new Section 240.10b–10 as follows:

§ 240.10b–10 Confirmation of transactions.

(a) It shall be unlawful for any broker or dealer to effect for or with the account of a customer any transaction in, or to induce the purchase or sale by such customer of, any security (other than U.S. Savings Bonds or municipal securities) unless such broker or dealer, at or before completion of such transaction, gives or sends to such customer written notification disclosing

(1) Whether he is acting as agent for such customer, as agent for some other person, as agent for both such customer and some other person, or as principal for his own account; and

(2) The date and time of the transaction (or the fact that the time of the transaction will be furnished upon written request of such customer) and the identity, price and number of shares or units (or principal amount) of such security purchased or sold by such customer; and

(3) If he is acting as agent for such customer, for some other person, or for both such customer and some other person,

(i) The name of the person from whom the security was purchased, or to whom it was sold, for such customer or the fact that such information will be furnished upon written request of such customer; and

(ii) The amount of any remuneration received or to be received by him from such customer in connection with the transaction unless remuneration paid by such customer is determined, pursuant to a written agreement with such customer, otherwise than on a transaction basis; and

(iii) The source and amount of any other remuneration received or to be received by him in connection with the transaction: *Provided, however,* That if, in the case of a purchase, the broker was not participating in a distribution, or in the case of a sale, was not participating in a tender offer, the written notification may state whether any other remuneration has been or will be received and that the source and amount of such other remuneration will be furnished upon written request of such customer.

(b) A broker or dealer may effect transactions for or with the account of a customer without giving or sending to such customer the written notification described in paragraph (a) of this section (until January 1, 1978, § 240.15c1–4(a)) if:

(1) Such transactions are effected pursuant to a periodic plan; and

(2) Such broker or dealer gives or sends to such customer within five business days after the end of each quarterly period a written statement disclosing each purchase or sale, effected for or with, and each dividend or distribution credited to, or reinvested for, the account of such customer (pursuant to the plan) during the period; the date of each such transaction; the identity, number and price of any securities purchased or sold by such customer in each such transaction; the total number of shares of such securities in such customer's account; any remuneration received or to be received by the broker or dealer in connection therewith; and that any other information required by paragraph (a) of this section will be furnished upon written request: *Provided, however,* That the quarterly written statement may be delivered to some other person designated by the customer for distribution to the customer.

(c) A broker or dealer shall give or send to a customer information requested pursuant to this rule within five business days of receipt of the request: *Provided, however,* In the case of information pertaining to a transaction effected more than 30 days prior to receipt of the request, the information shall be given or sent to the customer within 15 business days.

(d) For the purposes of this rule,

(1) "Customer" shall not include a broker or dealer;

(2) "Completion of the transaction" shall have the meaning provided in Rule 15c1–1 under the Act;

(3) "Time of the transaction" means the time of execution, to the extent feasible, of the customer's order;

(4) "Periodic plan" means any written authorization for a broker acting as agent to purchase or sell for a customer a specific security or securities (other than securities issued by an open end investment company or unit investment trust registered under the Investment Company Act of 1940), in specific amounts (calculated in security units or dollars), at specific time intervals and setting forth the commissions or charges to be paid by the customer in connection therewith (or the manner of calculating them).

(e) The Commission may exempt any broker or dealer from the requirements of paragraphs (a) and (b) of this section with regard to specific transactions or specific classes of transactions for which the broker or dealer will provide alternative procedures to effect the purposes of the section; any such exemption may be granted subject to compliance with such alternative procedures and upon such other stated terms and conditions as the Commission may impose.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE

[T.D. 77–136]

INSPECTION, SEARCH, AND SEIZURE

Customs Regulations Amended

AGENCY: United States Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This rule sets forth Customs policy that unless required by law merchandise should only be seized for Customs violations in those situations in which seizure is necessary to protect the revenue of the United States. A monetary penalty shall be the remedy for violations of laws enforced by Customs unless it is determined that seizure is necessary. These amendments are needed to clarify those situations in which a monetary penalty should be assessed against the violator rather than seizing the merchandise.

EFFECTIVE DATE: May 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Marvin M. Amernick, Attorney, Regulations and Legal Publications Division, 1301 Constitution Avenue NW., United States Customs Service, Washington, D.C. 20229 (202–566–8237).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 162.21(a) of the Customs Regulations (19 CFR 162.21(a)) provides that any Customs officer having reasonable cause to believe that any law enforced by the Customs Service has been

---

[38] On several occasions, since early 1975, some commentators have suggested that those difficulties arose with the final elimination of minimum commission rates for exchange transactions. Though brokerage commissions for most exchange transactions were theoretically fixed by exchange rules until May 1, 1975, they were, nevertheless, subject to a practical process of negotiation. See, e.g., Securities Exchange Act Release Nos. 11093 (Nov. 8, 1974) and 11293 (Jan. 23, 1975), 40 FR 7403 (Feb. 20, 1975). Of course, Rule 15c1–4 only made explicit, in large part, general disclosure principles with respect to dual agency transactions effected in the over-the-counter market rather than exchange transactions. Because in many instances brokerage commissions for over-the-counter transactions were parallel to those for exchange transactions, it was frequently possible to rely on a blanket statement, to comply with Rule 15c1–4, that a "like" commission was charged the other party. Rule 10b–10 reflects, nevertheless, an effort to accommodate administrative problems but also reflects a view that, in some situations, information as to the commission charged on the other side of a cross is of sufficient importance to the customer to justify the expenditure of the time and effort required.

[39] Experience with Rule 10b–10 and other proposals (see, e.g., proposed Rule 206(3)–2 under the Investment Advisers Act of 1940, Investment Advisers Act Release No. 557 (Dec. 2, 1976)) may assist the Commission in analyzing concerns in this area. See also Investment Advisers Act Release No. 581 (Apr. 20, 1977), extending temporary Rule 206A–1 until April 30, 1978.

[40] See, e.g., New York Stock Exchange Rule 391.

[41] "[T]he term distribution is not defined either in the Securities Act of 1933 or in the Securities Exchange Act of 1934 and its meaning and applicability to particular persons in each context should be derived from the differing purposes for which it is used." Matter of Collins Securities Corporation, Securities Exchange Act Release No. 11766 (Oct. 23, 1975). In the context of Rule 10b–10, "a distribution is to be distinguished from ordinary trading transactions and other normal conduct of a securities business upon the basis of the magnitude of the offering and particularly upon the basis of the selling efforts and selling methods utilized." Bruns, Nordeman & Co., 40 SEC 652, 660 (1961). See also 3 Loss, Securities Regulation 1478, 1597 (1961); 6 Loss, Securities Regulation 3673, 3766 (1969); Weiss, Registration and Regulation of Brokers and Dealers 113 (1965).

A number of commentators noted that transactions in connection with distributions, particularly in the case of offerings registered under the Securities Act of 1933, were frequently structured as principal transactions, and, in those cases, dual agency disclosure requirements would not apply. Of course, in the case of offerings registered under the Securities Act of 1933, the final prospectus delivered to the customer should generally set forth the information required by the proviso with respect to source and amount of remuneration. Similarly, tender forms customarily set forth information with respect to fees proposed to be paid to brokers acting as "soliciting dealers." In such situations the information specified in the proviso need not be separately set forth on the confirmation.

[42] Should experience prove to the contrary, however, the provisions of Rule 15c1–4 could be reinstated.

violated, making any property subject to forfeiture, shall seize such property if available.

While certain provisions of the Tariff Act of 1930, as amended, require seizure of merchandise for violations, other provisions authorize the forfeiture of either the merchandise or its value. For example, under the provisions of section 592, Tariff Act of 1930, as amended (19 U.S.C. 1592), the entry, or attempted entry, of merchandise into the commerce of the United States by means of any false declaration subjects the merchandise or its value to forfeiture. Seizure of merchandise is not required; a claim for its value may be made.

Section 148.19 of the Customs Regulations (19 CFR 148.19) provides that a passenger who makes any false statement or engages in other conduct which causes a Customs officer to pass an article free of duty or at less than the proper amount of duty has violated section 592. Therefore, except as otherwise provided, the article involved must now be seized if it is available and seizure is practicable. If the article is not available for seizure or if seizure is impracticable, the domestic value of the article shall be demanded from the passenger.

Likewise, § 162.41(a) of the Customs Regulations (19 CFR 162.41(a)), provides that when merchandise or the value thereof is subject to forfeiture, the district director may elect to seize the merchandise or assess a claim for its domestic value. However, if the merchandise is in the possession of an innocent purchaser, it shall not be seized. In such cases, or when the merchandise is not available for seizure, the district director shall proceed to recover the domestic value of the merchandise.

The United States Customs Service is aware that seizure of property may be an unnecessarily harsh action. Seizure of merchandise may place an importer in the position of being unable to continue his business, or of breaching his contractual commitments with his customers causing him unwarranted financial losses.

Recognizing the possible consequences that seizure of property may have in circumstances where absolutely prohibited importations are not involved, it is the position of the United States Customs Service that unless required by law, property should only be seized when it is necessary to protect the revenue.

In order to clearly set forth Customs policy in this regard, it has been determined that § 162.21(a) of the Customs Regulations should be amended to provide for assessment of a monetary penalty unless it is determined that seizure is necessary to protect the revenue. The revised language will remove any possible inference that this regulation compels seizure in all cases where the property that is subject to forfeiture is available for seizure.

Section 148.19 of the Customs Regulations is also amended to establish that in cases where a passenger violates section 592 of the Tariff Act, the article which is the subject of the violation shall be seized only if certain conditions are met. As amended, § 148.19 will include a reference to subparagraph (3) of § 162.41(a), which is being added to the regulations to specify the appropriate circumstances for seizure.

The amendment to § 162.41(a) of the Customs Regulations provides that merchandise shall only be seized when the district director is satisfied that the violator appears to be insolvent or may soon become insolvent, the violator or his assets appear to be beyond the jurisdiction of the United States, or, for some other reason, a claim for the domestic value of the merchandise would not protect the revenue.

Because these amendments merely state general policy and impose no additional requirements on the public, notice and public procedure thereon is found to be unnecessary and good cause exists for dispensing with a delayed effective date under the provisions of 5 U.S.C. 553.

Drafting Information

The principal author of these regulations was Marvin M. Amernick, Attorney, Regulations and Legal Publications Division of the Office of Regulations and Rulings, United States Customs Service, Washington, D.C. 20229. However, personnel from other offices of the Customs Service participated in their development, both on matters of substance and style.

Amendments to the Regulations

Sections 148.19, 162.21, and 162.41 of the Customs Regulations (19 CFR 148.19, 162.21, 162.41) are amended in the following manner:

PART 148—PERSONAL DECLARATIONS AND EXEMPTIONS

1. The second and third sentences of § 148.19 are amended to read as follows:

§ 148.19 False or fraudulent statement.

* * * In any such case the article involved shall be seized only if one or more of the conditions set forth in § 162.41(a)(3) of this chapter are present, if it is available for seizure at the time the violation is detected, and if such seizure is otherwise practicable, unless the article is in the possession of an innocent holder for value who has full right to possession as against any party to the Customs violation. If seizure is not made, the domestic value of the article, determined in accordance with section 606, Tariff Act of 1930, as amended (19 U.S.C. 1606), shall be demanded from the passenger. * * *

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 162—INSPECTION, SEARCH, AND SEIZURE

2. Section 162.21(a) is amended to read as follows:

§ 162.21 Responsibility and authority for seizures.

(a) *Seizures by Customs officers.* Except as provided for in § 162.41(a), any Customs officer having reasonable cause to believe that any law enforced by the Customs Service has been violated, making any property subject to forfeiture, shall seize such property if available.

3. Section 162.41(a) is amended to read as follows:

§ 162.41 Merchandise entered by false invoice, declaration, other document or statement, subject to forfeiture.

(a) *Election to proceed against merchandise or value when forfeiture incurred.* (1) When merchandise or the value thereof is subject to forfeiture under section 592, Tariff Act of 1930, as amended (19 U.S.C. 1592), including any article seized under the provisions of section 499, Tariff Act of 1930, as amended (19 U.S.C. 1499), the district director may elect to proceed against the merchandise or its domestic value.

(2) If the merchandise is in the possession of an innocent purchaser, it shall not be seized. In such cases, or when the merchanise is not available for seizure, the district director shall proceed to recover the domestic value.

(3) Merchandise shall only be seized if the district director is satisfied that:

(i) The violator appears to be insolvent or may soon become insolvent;

(ii) The violator or his assets appear to be beyond the jurisdiction of the United States; or

(iii) For some other reason, a claim for the domestic value of the merchandise would not protect the revenue.

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

VERNON D. ACREE,
Commissioner of Customs.

Approved: May 9, 1977.

BETTE B. ANDERSON,
Under Secretary.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket No. 75N-0120]

PART 169—FOOD DRESSINGS AND FLAVORINGS

Mayonnaise, French Dressing, and Salad Dressing Standards Revision; Confirmation of Effective Date

AGENCY: Food and Drug Administration (FDA).

ACTION: Rule.

SUMMARY: This document confirms the effective date of a final regulation, published in the FEDERAL REGISTER of May 26, 1976 (41 FR 21444), revising the standards of identity for mayonnaise, french dressing, and salad dressing to provide for label declaration of ingredients, to allow the use of functional classes of safe and suitable ingredients that would not modify the fundamental characteristics of the foods, and to revise and update the format of the standards.

EFFECTIVE DATE: January 1, 1978, for all products initially introduced into interstate commerce on or after this date. Voluntary compliance, including any labeling changes required: July 26, 1976.

FOR FURTHER INFORMATION CONTACT:

Eugene T. McGarrahan, Bureau of Foods (HFF-415), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-245-1155).

SUPPLEMENTARY INFORMATION: The May 26, 1976 final regulation provided that any person who would be adversely affected by the amendments to §§ 169.115, 169.140, and 169.150 (21 CFR 169.115, 169.140 and 169.150, formerly §§ 25.2, 25.1, and 25.3 respectively, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)) could at any time, on or before June 25, 1976, file written objections and, if desired, request a hearing on the specific provisions objected to. Five objections were filed, one from a consumer and four from industry. None of the objections were accompanied by a request for a hearing.

1. *Use of food additives.* One objection was to the use of food additives and ingredients other than vegetable oils, acids, egg ingredients, salt, and spices in salad dressing. Furthermore, the objection questioned the safety and necessity of the use of other ingredients.

The Commissioner of Food and Drugs advises that the salad dressing defined by the standard of identity under § 169.150 is traditionally a thick, whitish-colored dressing similar in appearance to mayonnaise, but having an entirely different flavor. Lower fat content and a starch ingredient further differentiate salad dressing from mayonnaise. The specific objection was to the use of starch in salad dressing. The Commissioner points out that starch is a characterizing ingredient in salad dressing and that starch, along with the other ingredients provided for, is necessary to obtain the traditional product recognized by consumers. Furthermore, only "safe and suitable" ingredients, as defined in § 130.3(d) (21 CFR 130.3(d), formerly § 10.1(d) prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), that perform appropriate functions may be used in salad dressing. The Commissioner therefore concludes that it is neither practical nor necessary to limit further the ingredients that may be used in salad dressing.

2. *Cooked or partly cooked starchy paste.* Three objections pointed out that the Commissioner had not dealt fully with the comment on the proposal concerning "safe and suitable thickeners" in salad dressing (§ 169.150). These objections acknowledge the fact that the starchy paste is a characterizing ingredient, but request that the requirement that it be either cooked or partly cooked be dropped. These objections cite advances in starch technology and the development of pregelatinized starch that does not require cooking as reasons for eliminating this requirement.

The Commissioner acknowledges that in dealing with the main issue in the original comment, i.e., whether or not to allow the use of safe and suitable thickening agents in salad dressing, consideration should have been given to the request that the cooking requirement be eliminated from the standard. Upon reviewing these objections, the Commissioner agrees that the cooking requirement is unduly restrictive and has dropped it from the standard, as reflected below.

3. *Labeling of artificial colors.* One objection was to the Commissioner's contention that paprika and oleoresin of paprika, when used in french dressing (§ 169.115), need not be declared as "artificial coloring." The objection maintains that requiring β-apo-8'-carotenal to be declared as "artificial color" but not requiring paprika and oleoresin of paprika to be declared as "artificial color" when they clearly impart a color to french dressing that is not otherwise present, subjects products containing β-apo-8'-carotenal to an unfair competitive disadvantage.

The Commissioner acknowledges that his statement concerning the correct label declaration of paprika or oleoresin of paprika, added to french dressing for the sole purpose of imparting color, was erroneous. When either of these ingredients is added only to provide color to the food, its presence must be declared as "artificial color" or "artificial coloring" in accordance with § 101.22(a)(4) (21 CFR 101.22(a)(4), formerly § 1.12(a)(4) prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)) and § 70.3(f) (21 CFR 70.3(f), formerly § 8.1(f) prior to recodification published in the FEDERAL REGISTER of March 22, 1977 (42 FR 15553)). Paprika and oleoresin of paprika may be added solely for flavoring purposes, but used in this way they still impart color to the food. In this instance, these ingredients must be declared on the label as either "spice and coloring" or by their common or usual names, "paprika" or "oleoresin of paprika", in accordance with § 101.22(a)(2).

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046 as amended, 1055-1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 341, 371)) and under authority delegated to the Commissioner (21 CFR 5.1), notice is given that the objections filed to the final regulation revising the standards for dressings for foods under §§ 169.115, 169.140 and 169.150 are not accepted as valid, except that, in accordance with the foregoing:

It is ordered, That § 169.150, as promulgated in the FEDERAL REGISTER of May 26, 1976 (41 FR 21444), be amended by revising paragraph (a) to read as follows:

§ 169.150 Salad dressing.

(a) *Description.* Salad dressing is the emulsified semisolid food prepared from vegetable oil(s), one or both of the acidifying ingredients specified in paragraph (b) of this section, one or more of the egg yolk-containing ingredients specified in paragraph (c) of this section, and a starchy paste prepared as specified in paragraph (d) of this section. One or more of the ingredients in paragraph (e) of this section may also be used. The vegetable oil(s) used may contain an optional crystalization inhibitor as specified in paragraph (e)(8) of this section. All the ingredients from which the food is fabricated shall be safe and suitable. Salad dressing contains not less than 30 precent by weight of vegetable oil and not less egg yolk-containing ingredient than is equivalent in egg yolk solids content to 4 percent by weight of liquid egg yolks. Salad dressing may be mixed and packed in an atmosphere in which air is replaced in whole or in part by carbon dioxide or nitrogen.

* * * * *

Effective date: Compliance with the final regulation, including any labeling changes required, may have begun on July 26, 1976, and all products initially introduced into interstate commerce on or after January 1, 1978, shall fully comply.

(Sec. 401, 701, 52 Stat. 1046 as amended, 1055-1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 341, 371))

Dated: May 11, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Corrected S.O. No. 1249; Amdt. 2]

PART 1033—CAR SERVICE

Octoraro Railway, Inc., Authorized To Operate Over Portion of USRA Line No. 142, Former Octoraro Branch of Penn Central Transportation Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Amendment No. 2 to Service Order No. 1249).

SUMMARY: This amendment extends for six months authority given the Octoraro Railway, Inc., to operate approximately 36.2 miles of railroad extending southwest from Wawa, Pennsylvania, to the Maryland-Pennsylvania state line in the vicinity of Sylmar. Service on this line was discontinued April 1, 1976, under authority of the Regional Railroad Reorganization Act of 1973 and the Railroad Revitalization and Railroad Reform Act of 1976. The line has since been purchased by an agency of the Common-

wealth of Pennsylvania. The Commonwealth has designated the Octoraro Railway, Inc., as its agent for the operation of this line. An application for permanent authority for the Octoraro Railway to operate this line has not been filed. Service Order No. 1249 enables the Octoraro Railway to provide rail service to shippers located adjacent to this line pending disposition by the Commission of its application for permanent authority.

DATES: Effective 11:59 p.m., May 15, 1977. Expires 11:59 p.m., November 10, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone 202–275–7840.

SUPPLEMENTARY INFORMATION: The order is reprinted in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 10th day of May 1977.

Upon further consideration of Corrected Service Order No. 1249 (41 FR 34607 and 50448), and good cause appearing therefor:

It is ordered, That, corrected Service Order No. 1249 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) thereof:

§ 1033.1249 Octoraro Railway, Inc., authorized to operate over portion of USRA Line No. 142, former Octoraro Branch of Penn Central Transportation Co.

* * * * *

(g) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., November 15, 1977, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date: This amendment shall become effective at 11:59 p.m., May 15, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission.[1]

ROBERT L. OSWALD,
Secretary.

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Ex Parte 252 Sub-No. 2]

PART 1036—INCENTIVE PER DIEM CHARGES ON BOXCARS AND GONDOLA CARS

Incentive Per Diem

MAY 1977.

AGENCY: Interstate Commerce Commission.

ACTION: Correction.

SUMMARY: This document corrects a final rule that appeared at pages 23511 through 23513 in the FEDERAL REGISTER of Monday, May 9, 1977 (Vol. 40, No. 82).

EFFECTIVE DATE: May 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Mrs. Janice Rosenak, Deputy Director, Section of Rates, Interstate Commerce Commission, Washington, D.C. 20423, 202–275–7693.

The following correction is made:

On pages 23512 and 23513, § 1036.4 is corrected to read as follows:

§ 1036.4 Use of funds on boxcars.

The net credit balances resulting from incentive per diem settlements on boxcars, which are earmarked in accordance with § 1036.3, may be drawn down in whole or in part at any time by the carrier to build, lease equivalent of purchase, or purchase, in whole or in part, new unequipped boxcars for general service described in § 1036.1, *Provided*, The carrier has in the same calendar year built, leased, or purchased its 1964–68 average acquisitions of such boxcars and made up an [sic] arrearage in having failed to maintain such average each year this order is in effect. Earmarked funds may also be used in whole or in part to lease any number of new unequipped boxcars for general use described in § 1036.1 in which the carrier is not acquiring an equity interest, *Provided*, The carrier has in the same calendar year leased its 1964–68 average number of such boxcars and made up any arrearage in having failed to maintain such average each year the order is in effect. Nonequity leases must be at least 10 years in duration, and, in connection with such leases, earmarked funds must not be used for the cost of maintenance. Earmarked funds may be used in whole or in part to rebuild any number or portion of general service, unequipped boxcars described in § 1036.1, *Provided*, The carrier has in the same calendar year rebuilt its 1964–68 average number of such boxcars and made up any arrearage in having failed to maintain such average each year the order is in effect. Net balances on Canadian-owned cars may be drawn without regard to prior acquisitions, but where the designee is a class I United States carrier such drawdowns shall not affect that carrier's accumulation of arrearages. However, upon application, including a showing that all parties to the proceeding herein have been notified by the carrier of such application and a showing of good cause why any carrier is unable to draw down in whole or in part the net credit balance resulting from incentive per diem settlements because it cannot comply with the above test period average requirement of having in the same calendar year built, rebuilt, leased, or purchased its 1964-68 average number of such boxcars and made up any arrearage in having failed to maintain such average each year this order is in effect, the Commission may, in its discretion, after consideration of all views regarding the application, modify the test period average to the extent consistent with the public interest and the national transportation policy. Such modification, as a minimum, shall require that a carrier match the earmarked funds it will use with an equal amount of its own funds. Similarly, a carrier using earmarked funds, in whole or in part, to build, rebuild, lease, or purchase general service, unequipped boxcars of the XF designation, shall only be required, as a minimum, to match the earmarked funds it will use to purchase XF boxcars with an equal amount of its own funds. Earmarked funds must be put to use within 18 months after the end of the calendar year in which the funds are collected and result in a net credit balance for the building, rebuilding, leasing, or purchasing of general service, unequipped boxcars described in § 1036.1 for addition to such carrier's or designee's fleet in accordance with this part. Upon a showing of good cause an application, including a showing that the parties to the proceeding herein have been notified by the carrier of such application, may be made to the Commission for waiver of the said 18-month period, which may, in the Commission's discretion, be granted after consideration of all views regarding the application. If the earmarked funds are not used within the 18-month period, they may be voluntarily surrendered to Rail Box whose establishment and operation was approved in *American Rail Box Car Co.—Pooling*, 347 I.C.C. 862. If the carrier fails within the stated period to put to use collected earmarked funds which result in a net credit balance, has not obtained relief from that requirement, and has not surrendered such funds to Rail Box, the Commission will investigate the matter to determine what, if any, corrective action is warranted. Appropriate corrective action would include section 16(12) remedies among others. Carriers may make temporary investments of unexpended funds in Government bonds or other liquid securities. Such securities must be readily convertible to cash so that funds remain available for boxcar purchases. Interest earned must become part of the earmarked fund. As used in this section and § 1036.5, "build," "rebuild," "lease," or "purchase" refer to the commitment to build, rebuild, lease, or purchase which results in the acquisition of a car on line ready for use within 10 months from the date of commitment, except that in extraordinary cases beyond the control of the carrier or the car supplier, a car that is delivered after 10 months from the date of commitment may qualify if approved by the Bureau of Accounts of this Commission.

ROBERT L. OSWALD,
Secretary.

SUBCHAPTER 13—PRACTICE AND PROCEDURE

PART 1121—ABANDONMENT OF RAILROAD LINES

Modification of Regulations for the Abandonment of Railroad Lines and Discontinuance of Service

AGENCY: Interstate Commerce Commission.

ACTION: Reconsideration of Rulemaking.

SUMMARY: Upon consideration of all the evidence of record, including the petitions for reconsideration and arguments of the various parties, it was apparent that certain modifications to the adopted regulations were warranted, primarily to clarify the definition of a line "potentially subject to abandonment, the republication of category 3 lines pending before the Commission, the computation of revenues attributable and avoidable costs for the base year, and the procedue for the filing of the carrier's notice of intent to abandon a line of railroad.

EFFECTIVE DATE: May 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Philip Israel, Deputy Director, Section of Finance, Interstate Commerce Commission, Washington, D.C. 20423 (202–275–7245).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Pursuant to the enactment of the Railroad Revitalization and Regulatory Reform Act of 1976, (4RA) Public Law 94–210, the Interstate Commerce Commission and its Rail Services Planning Office jointly instituted a rulemaking proceeding entitled Ex Parte 274 (Sub-No. 2) for the purpose of developing and promulgating new regulations governing the abandonment of railroad lines and the discontinuance of service.

In the report and order served on November 10, 1976, in Ex Parte 274 (Sub-No. 2), published at 41 FR, November 4, 1976, page 48520, the abandonment regulations in Part 1121 of Chapter X of Title 49 of the Code of Federal Regulations were replaced in full by new regulations designed to implement rigid time limits on the processing of abandonment applications imposed by 4RA, to expand the type of notice required by a railroad proposing to abandon a line or discontinue service, and to provide an opportunity for parties wishing to preserve a line, with respect to which the Commission has found that the public convenience and necessity permit abandonment or discontinuance, to offer financial assistance to the railroad.

Several petitions for reconsideration of the report, order, and regulations were filed by carriers, shippers and other interested parties.

The proposed modifications for clarification were considered and accepted by the Commission in its report and order served May 3, 1977. Accordingly, the adopted regulations in Ex Parte 274 (Sub-No. 2) are modified to read:

§ 1121.20 System diagram map.

* * * * *

(b) * * *

(2) All lines or portions of lines potentially subject to abandonment are those which the carrier has under study and believes may be the subject of a future abandonment application because of either anticipated operating losses or excessive rehabilitation costs, as compared to potential revenues.

* * * * *

§ 1121.22 Filing and publication.

* * * * *

(c) Republication of category 3 lines, which prior to November 1, 1976, were already set for oral hearing, modified procedure, or for which an order has been issued finding public convenience and necessity not to require future continued operation of the line, is not required for compliance with the section.

* * * * *

§ 1121.30 Notice of intent to abandon line or discontinuance service.

(a)(1) The applicant shall give notice of its intent to file an abandonment or discontinuance application by (i) serving notice on the Commission by certified letter at least concurrently with service upon those shippers who are significant users (as defined in § 1121.11 (m)) of the line proposed to be abandoned or discontinued, or at the time the notice is first published, whichever first occurs, on the Governor (by certified mail), on the Public Service Commission (or equivalent agency), and on the designated State agency of each State in which all or part of the line of railroad sought to be abandoned or over which service is proposed to be discontinued is situated, or at the time the notice is first published whichever occurs first (ii) * * *

* * * * *

§ 1121.32 Contents of application.

(d) * * *.

(1) Computation of the revenues attributable, avoidable costs, and reasonable return on value for the line to be abandoned for the base year (as defined by § 1121.11(c) and to the extent such branch level data is available), in accordance with the methodology prescribed in § 1121.45, as Exhibit 1.

ROBERT L. OSWALD,
Secretary.

Title 32A—National Defense, Appendix

CHAPTER VI—DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 634—COPPER AND COPPER-BASE ALLOYS (DMS ORDER 4)

Revision of Schedule A—Set-Aside Percentages

AGENCY: Domestic and International Business Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: The Commerce Department revises the schedule establishing the amount of copper controlled materials that the copper industry must set-aside for use for programs authorized by the Director of the Federal Preparedness Agency of G.S.A. Although the need for copper controlled materials under these programs has not changed much since this schedule was last revised, the percentage set-asides for three copper products is reduced to reflect the greater production of these copper products in 1976 over 1975.

EFFECTIVE DATE: This revised schedule becomes effective July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Gilbert J. Breer, Mobilization Operations & Plans Division, Office of Industrial Mobilization, Bureau of Domestic Commerce, U.S. Department of Commerce, Washington, D.C. 20230, 202–377–3634.

SUPPLEMENTARY INFORMATION: The revision changes Schedule A of August 23, 1976, to DMS Order 4 by changing the base period from calendar year 1975 to calendar year 1976, and by changing the set-aside percentages from 7 to 4 percent on unalloyed rod, bar, shapes and wire; from 10 to 6 percent on alloyed seamless tube and pipe; from 3 to 2 percent on copper foundry products. The purpose of the proposed changes is to more adequately reflect the current structure of the copper controlled materials industry and current authorized program requirements for copper controlled materials.

This amendment of Schedule A to DMS Order 4 is found necessary and appro-

priate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended (50 U.S.C. App. 2154). In the formulation of this order, there was consultation with industry representatives, including trade association representatives, and consideration was given to their recommendations.

This amendment applies to authorized controlled material orders calling for delivery after June 30, 1977.

AUTHORITY: (Defense Production Act of 1950, as amended (64 Stat. 816; 50 U.S.C. App. 2061 et seq.); Executive Order 10480, as amended, 18 FR 4939, 6201, 19 FR 3807, 7249, 21 FR 1673, 23 FR 5061, 6971, 24 FR 3779, 27 FR 9683, 11447, 3 CFR 1949–1953 Com., p. 962; Executive Order 11725, 38 FR 17175; DMO 3, 32A CFR 15; Department of Commerce Organization Orders 10–3, 40 FR 59764, as amended, 41 FR 28334, and 40–1, 40 FR 8978; Department of Commerce, Domestic and International Business Administration Organization and Function Orders 41–1, as amended 39 FR 2780, 39 FR 18490; 45–1, 40 FR 10217, 45–2, 40 FR 10218.)

SCHEDULE A TO DMS ORDER 4

SET-ASIDE PERCENTAGES

(See Sec. 6(f) of DMS Order 4)

Based Period—January–December 1976

(See Sec. 2(o) of DMS Order 4)

Product	Percentage of orders calling for delivery after June 30, 1977
Brass mill products:	
Unalloyed:	
Plate, sheet, strip and rolls	2
Rod, bar, shapes, and wire	4
Seamless tube and pipe	2
Brass mill products—Continued	
Alloyed:	
Plate, sheet, strip and rolls	2
Rod, bar, shapes and wire	2
Seamless tube and pipe	6
Military ammunition cups and discs	(1)
Copper wire mill products:	
Copper wire and cable:	
Bare and tinned	2
Weatherproof	2
Magnet wire	2
Paper and lead power cable	2
Paper and lead telephone cable	2
Asbestos cable	2
Portable and flexible cord	2
Communications wire and cable	2
Shipboard cable	2
Automotive and aircraft wire cable	2
Insulated power cable	2
Signal and control cable	2
Coaxial cable	2
Copper-clad steel wire containing over 20 percent copper by weight regardless of end use	2
Copper foundry products	2
Unalloyed copper powder mill products	(1)
Copper-base alloy powder mill products	(1)

[1] No reserve space required. Producers of these products are nevertheless required to accept authorized controlled material orders for such products in accordance with the provisions of DMS Regulation No. 1 and this order. However, Section 6(f) of DMS Order 4 does not apply to such authorized controlled material orders.

DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION, BUREAU OF DOMESTIC COMMERCE,

JOHN P. KEARNEY,
Acting Deputy Assistant Secretary for Domestic Commerce.

[FR Doc.77–14233 Filed 5–16–77;10:20 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

[7 CFR Parts 1421, 1446]

1977 CROP OF PEANUTS

Loan and Purchase Program

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Proposed rule.

SUMMARY: The purpose of this notice is to advise that the Secretary of Agriculture proposes to make determinations and issue regulations concerning a loan and purchase program for the 1977 crop of peanuts and to schedule a public meeting to receive oral comments. The Loan and Purchase Program is authorized by the Agricultural Act of 1949, as amended, and the Commodity Credit Corporation Charter Act, as amended. The program is intended to stabilize market prices and to protect producers, handlers, processors and consumers.

DATES: Comments must be received on or before June 24, 1977, to be sure of receiving consideration. The date of the public meeting will be June 9, 1977.

ADDRESS: Tobacco and Peanut Division, Agricultural Stabilization and Conservation Service, P.O. Box 2415, U.S. Department of Agriculture, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Dallas R. Smith (ASCS) (202) 447–7405.

SUPPLEMENTARY INFORMATION: The present regulations, to which these changes are proposed for the 1977 crop, were published in the FEDERAL REGISTER on July 15, 1974 (39 FR 25959) and are entitled "General Regulations Governing 1974 and Subsequent Crop Peanut Warehouse Storage Loans". The new regulations to be issued will be a 1977 crop supplement to the general regulations. These regulations will include (1) loan and purchase rates by type of peanuts, (2) premiums and discounts, and (3) other operating provisions necessary to carry out the program.

Section 101 of the Agricultural Act of 1949, as amended, directs the Secretary to make support available on peanuts to cooperators, if producers have not disapproved marketing quotas at a level between 75 and 90 percent of the parity price with the minimum permissible level of support within such range to be determined by the supply percentage. Marketing quotas were approved for the 1975 through 1977 crops by 97 percent of the growers voting in a December 1974 referendum.

Section 401 of that Act requires that in determining the level of support in excess of the minimum level provided by law, consideration be given to the supply of the commodity in relation to the demand therefor, the levels at which other commodities are being supported, the availability of funds, the perishability of the commodity, the importance of the commodity to agriculture and the national economy, the ability to dispose of stocks acquired through a support operation, the need for offsetting temporary losses of export markets, and the ability and willingness of producers to keep supplies in line with demand.

Section 403 of the Act provides that appropriate adjustments may be made in the support level for differences in grade, type, quality, location and other factors. The average of any such adjustments shall, so far as practicable, be equal to the level of support for peanuts for the applicable crop year determined in accordance with the Agricultural Act of 1949, as amended.

Current program provisions regarding peanut warehouse storage loans may be found in regulations in Title 7, Part 1446 of the Code of Federal Regulations. Current program provisions regarding peanut farm storage loans may be found in regulations governing loans, purchases and other operations for grain and similarly handled commodities which appear in Title 7, Part 1421 of the Code of Federal Regulations.

Prior to making any determination, the Department will give consideration to comments, data, views and recommendations submitted in writing within the comment period to the Director, Tobacco and Peanut Division. All written submissions made pursuant to this notice will be made available for inspection from 8:15 a.m. to 4:45 p.m. Monday through Friday, in Room 5746 South Building, 14th and Independence Avenue SW., Washington, D.C. (7 CFR 1.27(b)).

In addition to considering written comments, the Department will hold a public meeting in Washington, D.C., on June 9, 1977, at 9:00 a.m. in the Jefferson Auditorium, South Building, USDA. The meeting will be open to the public. The purpose of the meeting is to give members of the industry and other interested persons the opportunity to furnish oral comments and suggestions with respect to the proposed rule for the 1977 crop.

Signed at Washington, D.C. on May 12, 1977.

VICTOR A. SENECHAL,
Acting Executive Vice President, Commodity Credit Corporation.

[FR Doc.77–14141 Filed 5–13–77;8:45 am]

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 212]

ALASKA NORTH SLOPE CRUDE OIL PRICING AND ENTITLEMENTS TREATMENT

Change of Hearing Locations

AGENCY: Federal Energy Administration.

ACTION: Change of hearing locations.

SUMMARY: This notice changes the location for hearings in San Francisco and Anchorage in connection with the Federal Energy Administration's notice of proposed rulemaking respecting Alaska North Slope Crude Oil pricing and entitlements treatment issued April 30 (42 FR 22889, May 5, 1977).

The site of the hearing in San Francisco on May 26, 1977, remains the same except that Court Room No. 14 will be used instead of Court Room No. 15.

The location of the hearing in Anchorage on May 27, 1977, has been changed to: Z. J. Loussac Library, 427 F Street, Anchorage, Alaska.

Issued in Washington, D.C., May 11, 1977.

ERIC J. FYGI,
Acting General Counsel, Federal Energy Administration.

[FR Doc.77–14078 Filed 5–13–77;8:56 am]

[10 CFR Part 430]

ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Test Procedures for Automatic and Semi-Automatic Clothes Washers and Determination That Test Procedures Cannot Be Developed for any Other Class of Clothes Washers

AGENCY: Federal Energy Administration.

ACTION: Proposed rule.

SUMMARY: The Federal Energy Administration (FEA) hereby proposes to amend its regulations in order to prescribe test procedures for automatic and semi-automatic clothes washers under the Energy Policy and Conservation Act. Automatic and semi-automatic clothes washers are classes included within the broader type of appliances, clothes wash-

ers, covered by the Act. The Act requires that standard methods for testing covered appliance types be prescribed as part of the energy conservation program for appliances. The Act further authorizes FEA to prescribe test procedures for classes within a given type of covered product and permits FEA to determine that test procedures cannot be developed for some class or classes within a given type. FEA has determined that test procedures cannot be developed which meet the requirements of section 323(b) for any class of clothes washers other than the automatic and semi-automatic classes. The intended effect of this proposal is to implement the Acts requirements by soliciting public comments before test procedures are prescribed and to give notice of and the reasons for FEA's determination that certain test procedures cannot be developed.

DATES: Comments by July 13, 1977, 4:30 p.m.; requests to speak by July 8, 1977, 4:30 p.m.; statements by July 15, 1977, 4:30 p.m.; hearing to be held on July 19, 1977, at 9:30 a.m.

ADDRESSES: Comments and requests to speak at the hearing to: Executive Communications, Room 3317, Federal Energy Administration, Box MN, Washington, D.C. 20461; statements to Regulations Management, Room 2214, Federal Energy Administration, 2000 M Street NW., Washington, D.C. 20461. Hearing held at: Federal Energy Administration, Room 2105, 2000 M Street, NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

James A. Smith, Room 307, Old Post Office Building, 12th Street and Pennsylvania Avenue NW., Washington, D.C. 20461 202–566–4635.

SUPPLEMENTARY INFORMATION:

A. Background

The Federal Energy Administration (FEA) proposes to amend Chapter II of Title 10, Code of Federal Regulations, in order to prescribe test procedures for automatic and semi-automatic clothes washers pursuant to section 323, 42 U.S.C. 6293, of the Energy Policy and Conservation Act (Act) (Pub. L. 94–163). The Act requires that FEA prescribe standard methods for testing types of covered appliances and further authorizes FEA to prescribe test procedures for classes within a given type of covered product. Automatic and semi-automatic clothes washers are classes included within the type designated by the Act as "clothes washers".

Development of test procedures is one discrete part of the energy conservation program for appliances. Even when promulgated, final test procedures will not of themselves require testing to be conducted. They will merely establish standard methods for testing when testing is otherwise required by the Act itself or by regulations implementing other parts of the program. For example, the Federal Trade Commission (FTC), in exercising its appliance energy efficiency labeling authority regarding a particular appliance type, may well require the application of substantially less than all of the final test procedures applicable to that appliance type.

By notice issued May 10, 1976 (41 FR 19977, May 14, 1976), FEA proposed to establish Part 430, entitled "Energy Conservation Program for Appliances," in Chapter II of Title 10 of the Code of Federal Regulations. That notice proposed a Subpart A to Part 430, containing general provisions, and a Subpart C, containing proposed energy efficiency improvement targets. Proposed Subparts A and C have not yet been finalized. A further proposal of Subpart C will be necessary in order to meet the requirements of section 325(a)(1) of the Act as amended by section 161 of the Energy Conservation and Production Act (Pub. L. 94–385).

Subpart A as previously proposed (41 FR 19977, May 14, 1976; 42 FR 15423, March 23, 1977) contained definitions in proposed section 430.2, some of which are applicable to the test procedures for automatic and semi-automatic clothes washers. FEA is today withdrawing the previously proposed definition in § 430.2 of "clothes washer" and substituting a new definition of "clothes washer" which includes a description of each of the three different classes of clothes washers. In addition, FEA is proposing to add to the definition in § 430.2 of "Basic model", a subparagraph (10) applying specifically to automatic and semi-automatic clothes washers.

By notice issued July 22, 1976 (41 FR 31237, July 27, 1976), FEA proposed an amendment to proposed Part 430 to add a Subpart B which would contain the appliance test procedures required to be prescribed by section 323 of the Act. The notice issued July 22 described the requirements of section 323 and set forth proposed test procedures for room air conditioners. A further notice issued March 24, 1977 (42 FR 16811, March 30, 1977) solicited comments with respect to a clarification of the provision concerning the number of units to be tested. By notice issued March 17, 1977 (42 FR 15423, March 22, 1977) FEA proposed an amendment setting forth proposed test procedures for dishwashers. Test procedures for water heaters, television receivers, refrigerators and refrigerator-freezers, freezers and clothes dryers were issued on April 21, 1977 (42 FR 21576 et seq., April 27, 1977).

Section 323(a)(2) of the Act requires FEA to direct the National Bureau of Standards (NBS) to develop, for specifically named types of covered products, test procedures for the determination of the estimated annual operating costs and at least one other useful measure of energy consumption which FEA determines is likely to assist consumers in making purchasing decisions. Pursuant to the Act, FEA directed NBS to develop test procedures for FEA's use in prescribing test procedures under the Act. As part of this undertaking, NBS evaluated existing test procedures for measuring energy consumption of clothes washers.

NBS has transmitted to FEA a test procedure review document which recommends test procedures for both automatic and semi-automatic clothes washers. NBS also recommended that test procedures cannot be developed for any class of clothes washers other than automatic and semi-automatic clothes washers, as discussed below. The recommended test procedures incorporate the general approach to calculating the energy consumption of automatic clothes washers contained in the Association of Home Appliance Manufacturers (AHAM) standard HLW–2EC. Copies of the NBS review document will be made available for inspection by interested persons as provided for later in this notice.

B. Measures of Energy Consumption

The Act requires FEA to prescribe test procedures for the determination of estimated annual operating costs and at least one other useful measure of energy consumption which the Administrator determines is likely to assist consumers in making purchasing decisions. Since the annual operating cost of automatic and semi-automatic clothes washers differs significantly depending on whether the water used is electrically heated or heated by gas or oil, FEA is proposing to establish two alternate values for the estimated annual operating cost for automatic and semi-automatic clothes washers: one assuming that electrically heated water is used and the other assuming that either gas-heated or oil-heated water is used. In each case, the estimated annual operating cost is based upon the average number of normal cycles in which the machine is operated annually (representative average-use cycle), the cost of energy (representative average unit costs) and the energy consumption in both heating the water for and operating the machine during a normal cycle.

An additional proposed measure (§ 430.22(j)(2)) that is likely to assist consumers in making purchasing decisions is the energy factor, which is defined as the quotient of a load of clothes divided by the energy consumption per normal cycle. Among other possible applications, the energy factor may be used by FEA to determine the efficiency of automatic and semi-automatic clothes washers for the purposes of the energy efficiency improvement program described by section 325 of the Act.

FEA recognizes that there may be additional useful measures of energy consumption for automatic and semi-automatic clothes washers other than the measures described above. Accordingly, today's proposal, in proposed § 430.22(j)(3), provides for other useful measures which the Administrator determines are likely to assist consumers in making purchasing decisions. These measures, however, must be derived from the application of the uniform test method proposed today as Appendix J to Subpart B. Manufacturers would if required, only have to perform various computations while still applying the same test method contained in Appendix J. For example, if the Administrator determined that annual energy consumption for automatic and semi-automatic clothes washers would aid consumers in making purchasing decisions, this annual energy consumption figure could be derived by applying the uniform test method to calculate the appropriate amount of energy consumption and then performing computations involving this energy consumption data and the appropriate representative average-use cycle or cycles.

C. Laboratory Methodology

Proposed Appendix J to Subpart B provides for a controlled laboratory environment for measuring energy consumption for the various automatic and semi-automatic clothes washers which are available to the consumer.

Based on industry data supplied by AHAM regarding the production-weighted energy consumption for 1972 clothes washers, NBS determined that approximately 97 percent of the total energy required to operate a clothes washer is the energy needed to produce the hot water used by the machine.

NBS conducted tests to determine the effect of a clothes load on the hot water used by clothes washers. Laboratory tests on five representative standard (regular) automatic clothes washers (washers with a tub capacity of at least 16 gallons) indicated that the use of a seven-pound standard dry test load reduced the water consumption measured at the maximum fill level by approximately 6 percent. A test procedure utilizing a "standard" test load was judged to require a test procedure that would be unduly burdensome. NBS, therefore, recommended that the tests be made without a load. Tests conducted without a load will produce repeatable and uniform results for making model-to-model comparisons and for obtaining energy efficiency improvement target data that correspond with the 1972 base year data provided by AHAM.

For the proposed test procedures, NBS recommended that the six percent decrease in hot water consumption be converted to a 0.94 multiplying factor, *MF*, for the use in calculating the annual energy consumption of automatic and semiautomatic clothes washers in Appendix J. This factor is applicable, however, only for those machines where the amount of fill water is influenced by the clothes load. The 0.94 factor, accordingly, is proposed to be used only for clothes washers that are sensor filled, and not time filled.

Since none of the currently available clothes washers are known to have a water temperature control valve, NBS recommends that the test procedures be conducted using only cold water. Although cold water would introduce an inherent error in hot water consumption measurements, the error would not be significant. For example, the density of water decreases with a rise in the temperature in the typical temperature range of water used in clothes washers. Therefore, if a clothes washer is equipped with a pressure sensitive switch to regulate the water fill, the amount of water consumed on a nominal 20 gallon maximum fill would be approximately 20.0 gallons of water at 65°F, 20.30 gallons at 140°F, or 20.35 gallons at 155°F.

Appendix J (section 5) contains hot water usage data for various wash/rinse temperature selections. These data for automatic clothes washers resulted from an industry field usage study and have been published by AHAM as an appendix to HLW–2EC, "Test method for Measuring Energy Consumption on Household Clothes Washers," December, 1975. The data are used in the proposed test method to obtain the per-cycle temperature-weighted hot water consumption for maximum and minimum water fill levels.

Appendix J (section 6) contains hot water usage data for various wash/rinse cycle temperature settings for semi-automatic clothes washers. Semi-automatic clothes washers are those which require user intervention to change the temperature of the water in the machine. The user must manually adjust the hot and cold water faucet valves when operating a semi-automatic clothes washer in order to have a different temperature of water in the machine during the rinse cycle. Hot water usage data for semi-automatic clothes washers was determined by NBS. NBS has estimated that 50 percent of the time the user will not adjust the water faucet valves to the desired setting and, therefore, the water used during the rinse cycle will be the same temperature as that used for the wash cycle. This 50 percent user intervention factor assumes that the user does not intend to rinse in hot water.

The values present in section 6 of the Appendix were determined by NBS using the data in 5.1, Five temperature selection ($n=5$), and applying the 50 percent factor to account for user intervention. The hot/hot use factor shown in section 6 is derived by adding 50 percent of the hot/warm use factor in 5.1 to 50 percent of the hot/cold use factor in 5.1. The hot/warm use factor in 6 is derived by taking 50 percent of the hot/warm use factor in 5.1. The hot/cold use factor in 6 is derived by taking 50 percent of the hot/cold use factor in 5.1. The warm/warm use factor in 6 is derived by taking 50 percent of the warm/cold use factor in 5.1 and adding it to the warm/warm use factor in 5.1. The warm/cold use factor in 6 is derived by taking 50 percent of the warm/cold use factor in 5.1. The cold/cold use factor in 6 is derived by using the cold/cold use factor in 5.1.

Appendix J provides average, per load, energy consumption values for maximum and minimum water fill levels. Field usage data provided by Proctor and Gamble, referenced elsewhere, indicate that maximum fill is used 72 percent of the time and minimum fill 28 percent of the time. Using this information, a weighted average of the energy consumed at both the maximum and minimum fill levels can be calculated by multiplying the per cycle energy for a maximum fill, E_{max}, and the per-cycle energy for a minimum fill, E_{min}, by the appropriate usage fill factors and summing the products.

The same usage fill factors are proposed to be used both for standard or regular (having a tub capacity of at least 16 gallons) and for compact (having a tub capacity of less than 16 gallons) automatic and semi-automatic clothes washers.

Section 323(a)(6) provides that FEA is not required to develop test procedures for a given class within a type of covered product if the Administrator determines that test procedures cannot be developed which meet the requirements of section 323(b). The Administrator, however, must publish such determination in the Federal Register together with the reasons therefore. FEA has determined that test procedures cannot be developed which meet the requirements of section 323(b) for any class within the type of covered product designated as "clothes washers" other than for the classes of clothes washers defined in section 430.2 as automatic and semi-automatic. NBS recommended that test procedures for measures of energy consumption which would not be unduly burdensome to conduct cannot be reasonably designed for any class of clothes washers other than automatic and semiautomatic clothes washers.

A test procedure designed to produce test results which would meaningfully reflect the energy consumption of a clothes washer must be capable of measuring the total volume of water (or the water fill level) typically used by the machine and the amount of hot water that comprises this volume. These measurements are essential since approximately 97 percent of the energy consumed by the machine in a normal washing cycle is the energy required to produce the hot water. The amount of energy consumed is therefore directly related to the total volume of hot water.

An automatic clothes washer predetermines by means of a control system the total volume of water used per wash cycle and the hot water component of that volume. A semi-automatic clothes washer predetermines by means of a control system the total volume of water used, but not the hot water component of that volume. The hot water component, however, can be estimated in the laboratory from use factors for various wash/rinse temperature settings for various automatic clothes washers.

Since the total volume of water (or the water fill level) used by the machine is not predetermined for any class of clothes washers other than automatic and semi-automatic, the hot water component of that volume of water can not be measured in the laboratory or, it is felt, be estimated in a reasonable manner. In addition to these reasons, FEA is influenced by the consideration that automatic and semi-automatic clothes washers comprise approximately 95% of all clothes washers manufactured today.

D. Representative Average-Use Cycle

Section 323(b)(2) (42 U.S.C. 6293(b)(2)) of the Act provides that test procedures for determining estimated annual operating costs of any covered product shall be calculated from measurements

of energy use in a respresentative average-use cycle (as determined by the Administrator) and from representative average unit costs (as provided by the Administrator) needed to operate such product during such cycle. FEA has determined that the representative average-use cycle for regular or standard automatic or semi-automatic clothes washers is eight loads per week or 416 cycles per year. This determination is based upon NBS' recommendation to FEA which, in turn, is based upon a Procter and Gamble field study reporting 7.8 washer loads per week for automatic clothes washers. NBS' recommendation and the Procter and Gamble field study are available for inspection as provided for later in this notice. NBS has recommended four loads per week, or 208 cycles per year, as a typical consumer usage figure for compact washers, starting with the figures developed in the Procter and Gamble study and assuming that compact clothes washers would typically be used by individuals or small families.

FEA intends to develop representative average unit costs of energy needed to calculate the annual operating cost for the representative average-use cycle and to provide this information to manufacturers and FTC on or before the effective date of test procedures for automatic and semi-automatic clothes washers.

E. NUMBER OF UNITS TO BE TESTED

Proposed § 430.23(j) would provide for sampling of each basic model to be tested when testing of automatic and semi-automatic clothes washers is required by the Act or by program regulations of agencies responsible for administering the Act. This provision is intended both to provide an acceptable level of assurance that test results are applicable to any entire basic model for which testing is required and to minimize the testing burden on manufacturers. FEA believes that the sampling approach proposed today will enable consumers to make meaningful comparisons of information appearing on appliance labels, and also will meet the requirements of section 323(b) of the Act that test procedures not be unduly burdensome to conduct.

Under proposed § 430.23(j), a sample of sufficient size of each basic model would be tested to assure that, for each measure of energy consumption described in § 430.22(j), there is a 95 percent probability that the mean of the values of these measures of the sample is within 5 percent of the true mean of these measures of the basic model. The size of the sample of a particular basic model will depend upon the following factors:

(a) The level of confidence required (set at 95 percent in the proposed regulations);

(b) The maximum allowable difference between the sample mean and the mean of the basic model (expressed in the proposal as a percent of the true mean and set at 5 percent); and

(c) The relationship of the mean and standard deviation of the basic model. The relationship of the mean and standard deviation of the basic model can be determined from data available to manufacturers. With this information and using standard statistical techniques, manufacturers can determine the number of units required to be tested. In any case, no fewer than three units of each basic model must be tested. Sample units would be selected randomly from the production stream.

Manufacturers and other interested persons are encouraged to comment on the sampling approach. Manufacturers are especially encouraged to submit any data which relates to the size of the samples which the provision would require to be tested. Comments alleging that the sampling provision is burdensome should include a full discussion of the facts upon which such allegation is based.

F. REQUEST FOR PARTICULAR COMMENTS

While FEA is soliciting comments on all aspects of the proposed test procedures for automatic and semi-automatic clothes washers FEA is particularly interested in receiving comments on any other useful measures of energy consumption or data on typical consumer usage of automatic and semi-automatic clothes washers in addition to those proposed today.

Comments are also specifically requested addressing automatic or semi-automatic compact clothes washer product characteristics, market sales, and field usage patterns, since compact clothes washers are a relatively new product.

Comments concerning the actual procedures proposed to be followed by the laboratory technician and the necessary laboratory facilities and manpower required to perform the proposed tests are also particularly desired. For example, today's proposal includes a procedure, based upon HLW-2EC, which involves discrete hot water measurements for the fill, rinse, and spray rinse portions of a normal cycle for the wash/rinse temperature setting under test. FEA is particularly interested in comments on the advisability of an alternative approach which would allow the complete uninterrupted operation of the normal cycle for the wash/rinse temperature setting under test and would obtain the total electrical energy and volume of hot water consumed directly from the instrumentation.

In addition, FEA is interested in receiving comments on any definitions described in previously proposed § 430.2, as these provisions might affect the testing of automatic and semi-automatic clothes washers. Such comments are timely until the close of the written record, as specified below.

In addition to the definition of "basic model" for automatic and semi-automatic clothes washers, FEA is withdrawing the previously proposed definition in § 430.2 of "clothes washer" and substituting a new definition of "clothes washer" and of each of the three different classes of clothes washers.

G. COMMENT PROCEDURE

1. WRITTEN COMMENT

Interested persons are invited to participate in this rulemaking by submitting data, views or arguments with respect to the proposed test procedures for automatic and semi-automatic clothes washers set forth in this notice to Executive Communications, Room 3317, Federal Energy Administration, Box MN, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA with the designation "Automatic and Semi-Automatic Clothes Washers—Proposed Test Procedures." Fifteen copies should be submitted. All comments received by July 13, 1977, before 4:30 p.m., e.d.t., and all other relevant information, will be considered by FEA before final action is taken on the proposed regulations.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. FEA reserves the right to determine the confidential status of the information or data and treat it according to its determination.

2. PUBLIC HEARINGS

a. *Request procedure.* The time and place of the public hearing are indicated at the beginning of this preamble. The hearing will be continued, if necessary, on July 20, 1977.

FEA invites any person who has an interest in the proposed rulemaking issued today, or who is a representative of a group or class of persons that has an interest in today's proposed rulemaking, to make a written request for an opportunity to make an oral presentation. Such a request should be directed to the address indicated at the beginning of this preamble and must be received before 4:30 p.m., e.d.t., on July 8, 1977. Such a request may be hand delivered to such address, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. A request should be labeled both on the document and on the envelope "Automatic and Semi-Automatic Clothes Washers—Proposed Test Procedures."

The person making the request should briefly describe the interest concerned; if appropriate, state why she or he is a proper representative of a group or class of persons that has such an interest; and give a concise summary of the proposed oral presentation and a telephone number where she or he may be contacted through July 19, 1977.

FEA will notify, before 4:30 p.m., July 11, 1977, each person selected to appear at a hearing. Each person selected to be heard must submit 50 copies of her or his statement to the address and by the date given in the beginning of this preamble. In the event any person wishing to testify cannot meet the 50 copy requirement, alternative arrangements can be made with the Office of Regulations Management in advance of the hearing by so indicating in the letter requesting an oral presentation or by calling the Office of Regulations Management at (202) 254-3345.

b. *Conduct of Hearings.* FEA reserves the right to select the persons to be heard at this hearing, to schedule their respective presentations and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. Any decision made by FEA with respect to the subject matter of the hearing will be based on all information available to FEA. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity if she or he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearing to Executive Communications, FEA, before 4:30 p.m., e.d.t., July 13, 1977. FEA will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The presiding officer, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, included the transcript, will be retained by FEA and made available for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter. A copy of NBS's recommendations concerning test procedures for automatic and semi-automatic clothes washers along with the Proctor and Gamble field study will also be made available for inspection at the FEA Freedom of Information Office.

H. ENVIRONMENTAL AND INFLATIONARY REVIEW

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974 (Pub. L. 93-275), a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator has no comments.

The National Environmental Policy Act of 1969 requires FEA to assess the environmental impacts of any proposal by the Agency for "major Federal actions significantly affecting the quality of the human environment." Since test procedures under the conservation program for appliances will be used only to standardize the measurement of energy usage and will not affect the quantity or distribution of energy usage, FEA has determined that the action of prescribing test procedures, by itself, will not result in any environmental impacts. On this basis, FEA has determined that, with respect to prescribing test procedures under the conservation program for appliances, no environmental impact statement is required.

NOTE.—The proposal has been reviewed in accordance with Executive Order 11821 as amended by Executive Order 11949, and OMB Circular No. A-107 and has been determined not to be a major proposal requiring evaluation of its economic impact as provided for therein.

(Energy Policy and Conservation Act, Pub. L. 94-163, as amended by Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended by Pub. L. 94-385; E.O. 11790, 39 F.R. 23185.)

In consideration of the foregoing, it is proposed to amend Chapter II of Title 10, Code of Federal Regulations, as set forth below.

Issued in Washington, D.C. May 11, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 430.2 is amended by adding a subparagraph (10) as part of the definition of "Basic model," by proposing the definition of "clothes washer," and by adding definitions of "automatic clothes washer," "semi-automatic clothes washer," and "other clothes washer" to read as follows:

§ 430.2 Definitions.

* * * * *

"Basic model" means all units of a given type of covered product manufactured by one manufacturer and—

* * * * *

(10) With respect to automatic and semi-automatic clothes washers, having essentially identical functional physical and other clothes washers.

* * * * *

"Clothes washer" means a consumer product designed to clean clothes, utilizing a water solution of soap and/or detergent and mechanical agitation or other movement, and must be one of the following classes: automatic clothes washers, semi-automatic clothes washers, an dother clothes washers.

"Automatic clothes washer" means a regular, standard or compact clothes washer which has a control system which is capable of scheduling a preselected combination of operations, such as regulation of water temperature, regulation of the water fill level, and performance of wash, rinse, drain and spin functions, without the need for user intervention subsequent to the initiation of machine operation.

"Semi-automatic clothes washer" means a regular, standard or compact clothes washer which is the same as an automatic clothes washer except that user intervention is required to regulate the water temperature by means of external water faucet valves.

"Other clothes washer" means a regular, standard or compact clothes washer that is not an automatic or semi-automatic clothes washer.

2. Section 430.22 is amended by adding a paragraph (j) to read as follows:

§ 430.22 Test procedures for measures of energy consumption.

* * * * *

(j) *Automatic and semi-automatic clothes washers.*

(1) The estimated annual operating cost for automatic and semi-automatic clothes washers shall be—

(i) When electrically heated water is used, the product of the following three factors: (A) The representative average-use cycle of 416 cycles per year for standard models or 208 cycles per year for compact models, (B) the total per-cycle energy consumption for the normal cycle in kilowatt-hours per cycle, determined according to 4.6 of Appendix J of this subpart, and (C) the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year, and

(ii) When gas-heated or oil-heated water is used, the product of: the representative average-use cycle of 416 cycles per year for standard models or 208 cycles per year for compact models and the sum of both (A) the product of the per-cycle machine electrical energy consumption for the normal cycle in kilowatt-hours per cycle, determined according to 4.4 of Appendix J to this subpart, and the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator and (B) the product of the per-cycle water energy consumption for gas-heated or oil-heated water for the normal cycle, in Btu per cycle, determined according to 4.5 of Appendix J to this subpart, and the representative average unit cost in dollars per Btu for oil or gas, as appropriate, as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(2) The energy factor for automatic and semi-automatic clothes washers shall be the quotient of one load of clothes divided by the clothes washer energy consumption per cycle, expressed as the sum of the machine electrical energy consumption and the maximum normal water energy consumption as determined in §§ 4.4 and 4.7, respectively, of Appendix J to this subpart. The resulting quotient for the energy factor shall be rounded off to the nearest 0.01 load per kilowatt-hour.

(3) Other useful measures of energy consumption for automatic or semi-auto-

matic clothes washers shall be those measures of energy consumption which the Administrator determines are likely to assist consumers in making purchasing decisions and which are derived from the application of Appendix J of this subpart.

* * * * *

3. Section 430.23 is amended by adding a paragraph (j), to read as follows:

§ 430.23 Units to be tested.

(j) *Automatic and semi-automatic clothes washers.*

(1) When testing of automatic or semi-automatic clothes washers is required for a measure or measures of energy consumption described in § 430.22 (j), a sample of sufficient size of each basic model shall be tested to ensure that, for each such measure of energy consumption, there is a 95 percent probability that the mean of the sample is within five percent of the true mean of such measures of the basic model, except that no fewer than three units of each basic model shall be tested.

(2) The sample selected for paragraph (j)(1) of this section shall be a simple random sample draw nfrom the production stream of the basic model being tested.

(3) A basic model having dual voltage ratings shall be separately tested at each design voltage such that the requirements of paragraph (j)(1) of this section are satisfied at each rating.

* * * * *

4. Subpart B of Part 430 is amended to add an Appendix J, to read as follows:

APPENDIX J—UNIFORM TEST METHOD FOR MEASURING THE ENERGY CONSUMPTION OF AUTOMATIC AND SEMI-AUTOMATIC CLOTHES WASHERS

1. Definitions

1.1 "AHAM" means the Association of Home Appliance Manufacturers.

1.2 "Compact" refers to a clothes washer with a tub capacity of less than 16 gallons of water.

1.3 "HLW–1" refers to the test standard published by the AHAM and titled "American National Standard Z224.1–1971 Performance Evaluation Procedure for Household Clothes Washers," December, 1971, designated as HLW–1.

1.4 "HLW–2EC" means AHAM "Test Method for Measuring Energy Consumption on Household Clothes Washers," December, 1975, designated as HLW–2EC.

1.5 "Normal cycle" means the cycle recommended by the manufacturer for washing cotton and/or linen clothes.

1.6 "Regular" refers to a clothes washer with a tub capacity of at least 16 gallons of water.

1.7 "Regular cycle" means normal cycle.

1.8 "Sensor filled" refers to a type of water fill control which uses a pressure or weight sensor to terminate the water fill cycle.

1.9 "Standard" means regular.

1.10 "Time filled" refers to a type of water fill control which uses a combination of water flow control in conjunction with time to terminate the water fill cycle.

1.11 "Tub capacity" means the volume of the tub in gallons of water at maximum fill.

1.12 "Temperature use factor" means the percentage of the total number of washes a user would wash with a particular wash/rinse temperature setting.

2. TESTING CONDITIONS

2.1 *Installation.* Install the clothes washer in accordance with manufacturer's instructions.

2.2 *Electrical energy supply.* Maintain the electrical supply to the clothes washer within one percent of the nameplate voltage.

2.3 *Water temperature.* The temperature of the water entering the inlet connections need not be controlled.

2.4 *Water pressure.* Maintain the pressure of the water supply between 32.5 and 37.5 pounds per square inch.

2.5 *Load.* The clothes washer shall be tested without a clothes load for determination of energy consumption.

2.6 *Energy flow and water flow instrumentation.*

2.6.1 *Water meters.* Install a water meter in both the hot and cold water inlet lines to measure water consumption. Each meter shall have a resolution no larger than 0.1 gallon and a maximum error no greater than 1.5 percent for all water flow rates from one to five gallons.

2.6.2 *Watt-hour meter.* A watt-hour meter shall be used to measure the electrical power equipped to operate the clothes washer through a complete normal cycle. It shall have a resolution no larger than 1 watt-hour and a maximum error no greater than one percent.

2.7 *Preconditioning.* If the clothes washer has not previously been tested nor filled with water in the preceding 96 hours, precondition it by running through it a cold rinse and drain to insure that hose, pump and sump are filled with water.

2.8 *Washer setting.* Set the wash time for a 10 minute wash period. The wash time (period of agitation) shall not be less than 9.75 minutes. Where controls are provided for agitation and spin speed, set for normal cycle.

3. TEST MEASUREMENTS

3.1 *Tub capacity.* Measure the tub capacity to determine compact or standard size by filling the clothes washer with the water level control set at its maximum setting. Record the total water accumulation, in gallons, in the tub.

3.2 *Test cycle.* Establish the testing conditions set forth in 2 of this Appendix.

3.2.1 *Per-cycle electrical energy consumption.* Set the water level selector at maximum fill and start the clothes washer. Measure the electrical energy consumption of the clothes washer for a complete normal cycle.

3.2.2 *Hot water consumption for a normal cycle with the water level selector at maximum fill.*

3.2.2.1 Set the water level selector at maximum fill.

3.2.2.2 For automatic clothes washers set the wash/rinse temperature selector to the hottest setting available (hot/warm). For semi-automatic clothes washers open the hot water faucet valve completely and close the cold water faucet valve to achieve the hottest setting (hot/hot).

3.2.2.3 Measure the gallons of hot water used to fill the tub.

3.2.2.4 Measure the total gallons of hot water used for all rinses.

3.2.2.5 Measure the total gallons of hot water used for all sprays.

3.2.2.6 For automatic clothes washers repeat 3.2.2.3, 3.2.2.4, and 3.2.2.5 for each of the other wash/rinse temperature selections available that use hot water. For semi-automatic clothes washers repeat 3.2.2.3, 3.2.2.4, and 3.2.2.5 for Hot/Cold, Warm/Cold, Warm/Warm, and Warm/Cold temperature settings with the following water faucet valve adjustments:

	Faucet position	
	Hot valve	Cold valve
Hot	Completely open	Closed.
Warm	do	Completely open.
Cold	Closed	Do.

3.2.3 *Hot water consumption for a normal cycle with the water level selector at minimum fill.* Set the water level selector at minimum fill and repeat 3.2.2.2 through 3.2.2.6.

3.2.4 *Hot water consumption for clothes washers that incorporate a partial fill during rinse.* For clothes washers that incorporate a partial water fill during rinse and cannot use the procedure in 3.2.2 and 3.2.3, measure hot water consumption over a complete normal cycle at maximum and minimum water fill levels and all wash/rinse temperature selections available that use hot water.

3.3 *Data recording.* Record for each test cycle in 3.2.

3.3.1 Total the kilowatt-hours of electrical energy, M_E, consumed during the test to operate the clothes washer in 3.2.1.

3.3.2 Total the hot water measured at maximum fill levels for each wash/rinse temperature selection.

3.3.3 Total the hot water measured at minimum fill levels for each wash/rinse temperature selection.

4. CALCULATION OF DERIVED RESULTS FROM TEST MEASUREMENTS

4.1 *Per-cycle temperature-weighted hot water consumption for maximum and minimum water fill levels.* Calculate for the cycle under test the per-cycle temperature-weighted hot water consumption for the maximum water fill level, V_{max}, and for the minimum water fill level, V_{min}, expressed in gallons per cycle and defined as:

$$V_{max}=\sum_{i=1}^{n}[V_i\times TUF_i],$$

where

V_i = Reported hot water consumption in gallons per cycle at maximum fill for each wash/rinse temperature selection, as provided in 3.2.2.

TUF_i = Applicable temperature use factor corresponding to wash/rinse temperature selection as shown in 5 or 6.

n = Number of wash/rinse temperature selections available to the user for the clothes washer under test,

and

$$V_{min}=\sum_{j=1}^{n}[V_i\times TUF_i]$$

where

V_i = Reported hot water consumption in gallons per cycle at minimum fill for each wash/rinse temperature selection, as provided in 3.3.3.

TUF_i = Applicable temperature use factor corresponding to wash/rinse temperature selection as shown in 5 or 6.

n = Number of wash/rinse temperature selections available to the user for the clothes washer under test.

4.2 *Total per-cycle hot water energy consumption for maximum and minimum water fill levels.* Calculate the total per-cycle hot water energy consumption for the maximum water fill level, E_{max}, and for the minimum water level, E_{min}, expressed in kilowatt-hours per cycle and defined as:

$$E_{max}=[V_{max}\times T\times K\times MF]$$

where

MF = multiplying factor to account for the influence of the clothes load volume=0.94 for clothes washers that are sensor filled and 1.0 for clothes washers that are time filled.

T = Temperature rise=90° F.

K = Water specific heat in kilowatt-hours per gallon degree F=0.00244.

V_{max} = As defined in 4.1, and

$$E_{min}=[V_{min}\times T\times K\times MF]$$

where

MF = Multiplying factor to account for the influence of the clothes load volume=0.94 for clothes washers that are sensor filled and 1.0 for clothes washers that are time filled.

T = Temperature rise=90° F.

K = Water specific heat in kilowatt-hours per gallon degree F=0.00244.

V_{min} = As defined in 4.1.

4.3 *Total weighted per-cycle hot water energy consumption expressed in kilowatt-hours.* Calculate the total weighted per-cycle hot water energy consumption, E_T, expressed in kilowatt-hours per cycle and defined as:

$$E_T=[E_{max}\times F_{max}]+[E_{min}\times F_{min}]$$

where

F_{max} = Usage fill factor=0.72

F_{min} = Usage fill factor=0.28

E_{max} = As defined in 4.2.

E_{min} = As defined in 4.2

4.4 *Per-cycle machine electrical energy consumption.* The value recorded in 3.3.1 is the per-cycle machine electrical energy consumption, M_E, expressed in kilowatt-hours per cycle.

4.5 *Per-cycle water energy consumption using gas-heated or oil-heated water.* Calculate for the normal cycle the per-cycle water energy consumption. E_{TG}, using gas-heated or oil-heated water, expressed in Btu per cycle and defined as:

$$E_{TG}=E_T\times\frac{1}{e}\times 3412\ \text{Btu/Kwh}$$

where

e = Nominal gas or oil water heater efficiency=0.75

E_T = As defined in 4.3.

4.6 *Total per-cycle energy consumption when electrically heated water is used.* Calculate for the normal cycle the total per-cycle energy consumption, E_{TE}, using electrically heated water, expressed in kilowatt-hours per cycle and defined as:

$$E_{TE}=E_T+M_E$$

where

M_E = As defined in 4.4

E_T = As defined in 4.3.

4.7 *Maximum normal cycle water energy consumption.* Calculate the maximum normal cycle water energy consumption, E_{MC}, expressed in kilowatt-hours per cycle, and defined as:

$$E_{MC}=V_{max}\times T\times K$$

where

V_{max} = As defined in 4.1

T = As defined in 4.2

K = As defined in 4.2.

5. APPLICABLE TEMPERATURE USE FACTORS FOR DETERMINING HOT WATER USAGE FOR VARIOUS WASH/RINSE TEMPERATURE SELECTIONS FOR AUTOMATIC CLOTHES WASHERS

5.1 *Five temperature selection* (n=5).

Wash/rinse temperature setting:	*Temperature use factor* (TUF)
Hot/warm	0.25
Hot/cold	.15
Warm/warm	.30
Warm/cold	.20
Cold/cold	.10

5.2 *Four temperature selection* (n=4).

Wash/rinse temperature setting—Alternate I:	*Temperature use factor* (TUF)
Hot/warm	0.25
Hot/cold	.15
Warm/cold	.50
Cold/cold	.10
Alternate II:	
Hot/warm	0.25
Hot/cold	.15
Warm/warm	.30
Warm/cold	.30
Alternate III:	
Hot/cold	0.15
Warm/warm	.30
Warm/cold	.45
Cold/cold	.10

5.3 *Three temperature selection* (n=3).

Wash/rinse temperature setting:	*Temperature use factor* (TUF)
Alternate I:	
Hot/warm	0.40
Warm/cold	.50
Cold/cold	.10
Alternate II:	
Hot/cold	0.40
Warm/cold	.50
Cold/cold	.10
Alternate III:	
Hot/cold	0.40
Warm/warm	.50
Cold/cold	.10

6. APPLICABLE TEMPERATURE USE FACTORS FOR DETERMINING HOT WATER USAGE FOR VARIOUS WASH/RINSE TEMPERATURE SETTINGS FOR SEMI-AUTOMATIC CLOTHES WASHERS

6.1 *Six temperature settings* (n=6).

Wash/rinse temperature setting:	*Temperature use factor* (TUF)
Hot/hot	0.20
Hot/warm	.13
Hot/cold	.07
Warm/warm	.40
Warm/cold	.10
Cold/cold	.10

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 762 3097]

CBS INC.

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: This consent order requires a New York publishing firm to cease mailing and billing for unauthorized magazines; sending collection letters to receivers of unordered magazines; misrepresenting the effects of nonpayment on credit ratings in such letters; and transferring unpaid accounts of recipients of unsolicited magazines to debt collection or consumer reporting agencies. Further, the order requires respondents to make proper restitution to individuals who paid for unordered magazines; and to send correction letters to consumers whose credit standings may have been adversely affected by respondent's actions. Additionally, respondent is required to maintain prescribed records; and to institute an adequate program of continued surveillance to ensure conformance with the terms of the order.

DATE: Comments must be received on or before July 14, 1977.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th & Pennsylvania Ave., N.W., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Paul R. Peterson, Director, Cleveland Regional Office, Federal Trade Commission, 1339 Federal Office Bldg., 1240 East 9th St., Cleveland, Ohio 44199. (216–522–4207).

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the FTC Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

UNITED STATES OF AMERICA,
BEFORE FEDERAL TRADE COMMISSION

[File No. 762 3097]

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

In the matter of CBS Inc., a corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of the CBS Consumer Publishing Division of CBS Inc., a corporation, and it now appearing that CBS Inc., hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from such acts and practices.

IT IS HEREBY AGREED by and between CBS Inc., by its duly authorized officer in his capacity as Vice President thereof and as President of CBS Publishing Group of which CBS Consumer Publishing is a division, and their attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent CBS Inc. is a corporation organized, existing, and doing business under and by virtue of the Laws of the State of New York, with its office and principal place of business located at 51 West 52nd Street, in the City of New York, State of New York 10019, and one of its components is the CBS Publishing Group.

CBS Consumer Publishing Division, a division of the CBS Publishing Group, with its principal office and place of business located at 600 Third Avenue, New York, New York 10016, is engaged in the manufacture, distribution, and sale of consumer publications, including magazines.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of the complaint here attached.

3. Proposed respondent waives: (a) Any further procedural steps; (b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and (c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint here attached, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if comments or views submitted to the Commission within such 60-day period disclose facts or consid-

erations which indicate that the order contained in the agreement is inappropriate, improper, or inadequate.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the said copy of the complaint here attached which the Commission intends to issue.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of Section 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in exact form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby, and it understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order, and that it may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

ORDER

I

IT IS ORDERED that respondent CBS Inc., a corporation, its successors and assigns, and respondent's agents, representatives, and employees, directly or through the CBS Consumer Publishing Division, or any other corporation, subsidiary, division, or other device in connection with the advertising, publishing, distributing, offering for sale, or selling of magazines in commerce or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do continue to, and forthwith, cease and desist from:

A. Mailing, or causing to be mailed, magazines without the prior expressed request or consent of the recipient.

B. Mailing, or causing to be mailed, a bill to recipients of magazines mailed without the recipient's prior expressed request or consent.

C. Mailing, or causing to be mailed, collection letters to recipients of magazines mailed without the recipient's prior expressed request or consent.

D. Transferring, or causing to be transferred, the alleged delinquent accounts of recipients of magazines mailed without the recipient's prior expressed request or consent, to a debt collection or consumer reporting agency.

Provided, that respondent may act in accordance with the exceptions extended by the Postal Reorganization Act, Section 2, 39 U.S.C. Section 3009 (1970), as amended or modified.

II

IT IS FURTHER ORDERED that respondent CBS Inc., a corporation, its successors and assigns, and respondent's agents, representatives, and employees, directly or through the CBS Consumer Publishing Division, or any other corporation, subsidiary, division, or other device in connection with the collection of consumer debts in commerce or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, do continue to, and forthwith, cease and desist from:

A. Using any forms, letters, or materials which represent directly or indirectly, by any means, that where payment due from a consumer in purported receipt of magazines is not received, the information of said delinquency is referred to a debt collection or consumer reporting agency, unless such agency is notified as represented.

B. Misrepresenting, by any means, the manner, extent, and consequences of the referral of debt delinquency information, compiled as a result of the purported receipt of magazines, to debt collection or consumer reporting departments or agencies.

C. Misrepresenting, by any means, that failure to pay the alleged debt or delinquency, as a result of the purported receipt of magazines, will result in the consumer's credit rating being adversely affected.

D. Misrepresenting, in any manner, the names, roles, functions, relationship to respondent, or titles of individuals who are engaged in the collection of money purportedly due and payable as a result of the purported receipt of magazines, or who transfer information regarding particular consumers to debt collection or consumer reporting departments or agencies as a result of money purportedly due and payable as a result of the purported receipt of magazines.

III

IT IS FURTHER ORDERED, That: A. Respondent deliver a copy of this order to each of its present and future operating Groups, magazine publishers, and employees directly responsible for magazine circulation marketing activities, and to each of its present and future independent contractors engaged in magazine subscription fulfillment activities or magazine subscription advertising activties.

B. Respondent, through its CBS Consumer Publishing Division, institute a program of continuing surveillance adequate to reveal whether the business practices of individuals or entities described in Section III, paragraph A, conform to the requirements of this order.

C. Respondent, through its CBS Consumer Publishing Division, maintain files containing all inquiries or complaints from any source relating to acts or practices prohibited by this order, for a period of two years after their receipt, and that such files be made available for inspection and copying by the Federal Trade Commission or its staff upon request.

IV

It is further ordered, That:

A. Respondent CBS Inc., through its CBS Consumer Publishing Division, shall offer a choice, at the option of the consumer, of full restitution ($2.98) or a free one (1) year subscription to Field & Stream magazine to any consumer who paid in full for an unordered subscription to Field & Stream magazine in connection with the Field & Stream Sweepstakes/Subscription promotion conducted in late 1974 and early 1975, after the receipt by such consumer of the letter signed by Ken Edwards or Vince Dema, which letter stated in part:

"DEAR FRIEND: When you sent us your Field & Stream subscription order I accepted it in good faith, and billed you as you requested.

Since that time I've sent you three action-packed issues of Field & Stream, but have not received your payment. You are long overdue. * * *"

This offer of full restitution or a free one (1) year subscription shall be made in the following manner:

(1) Within thirty (30) days after the date this order becomes final, respondent, through its CBS Consumer Publishing Division, shall identify all consumers described in Section IV, paragraph A.

(2) Within sixty (60) days after the date this order becomes final, respondent, through its CBS Consumer Publishing Division, shall notify in writing by first-class, post-paid mail, all consumers identified in Section IV, paragraph A(1), at their last known addresses, of their right to restitution in the language, manner, and form shown in Appendix A.

(3) The letter set forth in Appendix A shall request a response to respondent's offer by a certain date. Such date shall be at least one hundred twenty (120) days after the date this order becomes final. Any response to such offer postmarked after such date shall be null and void.

(4) Within one hundred fifty (150) days after the date this order becomes final, respondent, through its CBS Consumer Publishing Division, will, in accordance with consumers' replies to Appendix A, either refund, by first-class, post-paid mail, all monies paid by consumers identified in Section IV, paragraph A(1), or initiate, in accordance with the terms of said letter, a free one (1) year subscription to Field & Stream magazine on behalf of said consumer.

(5) Within two hundred ten (210) days after the date this order becomes final, respondent, through its CBS Consumer Publishing Division, will provide to the Commission the following information:

(a) A list of the consumers identified pursuant to Section IV, paragraph A(1), of this agreement.

(b) A list of the consumers to whom letters were sent pursuant to Section IV, paragraph A(2), and which were returned by the United States Postal Service to respondent's CBS Consumer Publishing Division, having been undelivered to consumers.

(c) A list of the consumers who do not return Appendix A or otherwise respond to Appendix A within the time period allowed for such response.

(d) A list of the consumers who elect to receive full two dollars and ninety-eight cents ($2.98) restitution under the terms of the offer extended by Appendix A.

(e) A list of the consumers who elect to receive a free one (1) year subscription to Field & Stream magazine under the terms of the offer extended by Appendix A.

B. Respondent, through its CBS Consumer Publishing Division, shall retain in its files for a period of thre years (3) years after the date that this order becomes final:

(1) All letters and their respective envelopes sent pursuant to Section IV, paragraph A(2), which are returned to respondent's CBS Consumer Publishing Division by the United States Postal Service as undeliverable.

(2) All letters (including those specified by Appendix A) sent to respondent's CBS Consumer Publishing Division by consumers in response to the offer extended by respondent's CBS Consumer Publishing Division pursuant to Section IV, paragraph A.

V

It is further ordered, That, within thirty (30) days after the date this order becomes final, respondent, through its CBS Consumer Publishing Division, shall notify in writing, by first-class mail, in the language, manner, and form shown in Appendix B, those consumers whose names were forwarded by it in respect of Field & Stream magazine to Credit Index, a division of Hooper-Holmes.

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That respondent herein shall, within sixty (60) days after service upon it of this order, file with the Commission a report, in writing, setting forth the manner and form in which it has complied with this order.

APPENDIX A

Date

NAME,
Address,
City, State, ZIP code.

Re: 1975 World of Leisure Sweepstakes—Field & Stream Magazine.

DEAR ----------: Last year, we entered a subscription in your name to *Field & Stream* magazine. If you are dissatisfied with the entry of this subscription and your payment therefore, we would like to make you the following offer:

☐ A cast refund of $2.98 paid; or
☐ A free one-year subscription to *Field & Stream* magazine (newsstand value of $12.00) to begin at once or added at the end of your current subscription.

Please indicate, by checking one box only, which of the above alternatives you desire.

In order to take advantage of this offer, this letter must be postmarkked by ---------
(Date)

We have enclosed a business reply envelope for your convenience.

Looking forward to hearing from you.

Very truly yours,
CBS Consumer Publishing.
By: ----------

APPENDIX B

Date

NAME,
Address,
City, State, ZIP code.

Re: 1975 World of Leisure Sweepstakes—Field & Stream Magazine.

DEAR ----------: Due to confusion with respect to an incompletely filled-out sweepstakes entry form/subscription order form, and the resultant billing to you with respect to copies of *Field & Stream* magazine, we referred your name to a direct-mail bad pay file with a consumer credit reporting agency.

Please be advised that we have caused your name to be removed from said file permanently.

By law (Fair Credit Reporting Act), all debt collection agencies or consumer credit reporting agencies must delete information with regard to this misunderstanding upon presentation of this letter.

You may wish to keep this letter and show it to any company who questions your *Field & Stream* bill with regard to the above.

Please excuse this misunderstanding, and accept our apology.

Very truly yours,
CBS Consumer Publishing.

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

CBS INC.

FILE NO. 762 3097

The Federal Trade Commission has accepted an agreement to a proposed consent order from CBS Inc.

The proposed consent order was placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received, and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint alleges that CBS Inc. violated Section 5 of the Federal Trade Commission Act by engaging in the following acts:

(1) Mailing unordered magazines to consumers;

(2) Billing consumers for the unordered magazines;

(3) Mailing collection letters to certain consumers;

(4) Transferring to a credit reporting agency the alleged delinquent accounts of consumers receiving and not paying for the unordered magazines.

The proposed consent order requires that CBS cease and desist from:

(1) Mailing magazines without the request or consent of the recipient;

(2) Billing for unordered magazines;

(3) Mailing collection letters to recipients of unordered magazines;

(4) Transferring to debt collection or consumer reporting agencies the accounts of recipients of unordered magazines.

In addition, the proposed consent order requires CBS to make refunds to certain individuals who paid for the unordered magazines, and to send a correction letter to those consumers whose credit may have been affected by the actions of CBS.

CBS must also cease and desist from misrepresenting in collection letters the effects of a consumer not paying his debts.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

JOHN F. DUGAN,
Acting Secretary.

FEDERAL POWER COMMISSION

[18 CFR Part 141]

[Docket No. RM77-19]

LABOR DEPARTMENT, RESIDENTIAL ELECTRIC BILL DATA

Proposed Reporting Requirements

AGENCY: Federal Power Commission.

ACTION: Proposed rule.

SUMMARY: The Commission is proposing to extend for fifteen months the required period of parallel reporting using Form No. 3–P or other electric bill data used to compute the Consumer Price Index (CPI). The Commission ordered the reporting of this information in old and new formats to insure continuity while the Bureau of Labor Statistics (BLS) is revising the CPI. Delays in the revision process require extending the parallel reporting period.

DATES: Comments must be received on or before June 1, 1977.

ADDRESS: Office of the Secretary, Federal Power Commission, 825 N. Capitol Street NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT:

William Graban, Bureau of Power (202–275–4731).

Pursuant to Section 553 of the Administrative Procedure Act, 5 U.S.C. 553 and Sections 301, 304, 309, and 311 of the Federal Power Act (49 Stat. 854–856, 858–859; 16 U.S.C. 825(a), 825(b), 825(c), 825(b), 825(c), 825h, 825j), the Commission gives notice that it proposes to amend the reporting requirements of FPC Form No. 3–P as specified in Order No. 554 issued September 15, 1976, 41 FR 41687, for the collection of monthly sample electric bill data for use in compiling the Bureau of Labor Statistics Consumer Price Index. The amendment does not involve altering 18 CFR 141.28 which specifies the information to be completed on Form No. 3–P.

Order 554 specified a temporary period of parallel reporting to serve the needs of both the old and new Consumer Price Index calculations, with the new Index planned to be operational in April 1977. However, the Bureau of Labor Statistics (BLS) has encountered problems with the computer activities associated with the new Index now projects the new Index will not be operational until the Fall of 1977. Consequently, the BLS has requested that the FPC extend the period of parallel reporting until six months overlap of the old and new indexes has been accomplished. To meet the BLS needs it is proposed that Order No. 554 be revised to change the date of termination of parallel reporting from September 1977 to December 1978, with provisions for earlier termination upon notification by BLS that its needs have been satisfied.

Section 311 of the Federal Power Act (49 Stat. 859; 16 U.S.C. 825j) provides that the Commission is to secure and keep current information relating to the rates, charges and contracts in respect of the sale of electric energy and its service to residential, rural, commercial and industrial consumers and other purchases by private and public agencies. In accordance with Section 311 and pursuant to an agreement between the Federal Power Commission and the Bureau of Labor Statistics (Division of Statistical Standards of the Bureau of the Budget) dated November 5, 1940, the Commission has been supplying monthly electric bill data for a selected number of communities to the Bureau of Labor Statistics in order to eliminate duplicate requests among government agencies for information on electric rates.

The data now collected are used in the compilation of the Consumer Price Index and the Wholesale Price Index, the Federal government's official indicators of price movements and are widely used

for measuring changes in the Nation's economy. The data, collected on FPC Form No. 3–P, consist of (1) residential electric bill data for the Consumer Price Indexes, and (2) commercial and industrial electric bill data for the Wholesale Price Index. The Bureau of Labor Statistics determine the data to be collected.

A total of 404 residential electric bills comprise the current monthly sample for the Consumer Price Index. Between three and five residential bills are reported for each community canvassed. Each residential electric bill consists of a net base bill, a total bill and where applicable a fuel adjustment, sales and/or gross receipts tax, and other tax or charge. If applicable, respondents are also requested to provide the monthly fuel cost and the fuel adjustment per kilowatthour and the rate of sales or other tax.

The Bureau of Labor Statistics (BLS) is presently revising the Consumer Price Index (CPI). The revisions include some changes in the information to be collected as well as some changes in the individual utilities required to submit reports. To insure continuity, in April 1976 BLS requested the Commission to institute a parallel reporting system. Utilities previously submitting CPI data on the existing schedule of Form No. 3–P were to continue submitting that information through September 1977. At the same time, utilities chosen to submit data for the revised CPI were to commence reporting on the revised schedule of Form No. 3–P immediately. Because some of the utilities already submitting CPI data on the existing schedule were also to submit data to the revised CPI, a certain amount of parallel reporting was expected to occur. The Commission ordered such parallel reporting in Order No. 554 issued September 15, 1976, 41 FR 41687.

At the time the Commission issued Order No. 554, it was expected that the revised monthly CPI would be released to the public for the first time in April 1977; it was also expected that the existing CPI would be discontinued in September 1977. However, by letter dated March 11, 1977, from W. John Layng, BLS Assistant Commissioner for Prices and Living Conditions, to Jack L. Weiss, Acting Chief, Bureau of Power, the Commission was informed that BLS will not implement the revised CPI in April 1977. The revised CPI is now expected to be published for the first time in the "fall of 1977." Since BLS still plans to continue publishing the existing CPI for at least six months past the time the revised CPI is implemented, BLS now asks the Commission to order an additional fifteen months of parallel reporting, i.e., that parallel reporting be extended from September 1977 through December 1978.

The utilities subject to the extended reporting requirements are listed in the several appendices. The fifty-three utilities listed in Appendix A are currently reporting residential data on the existing schedule, and under the proposed revision of Order No. 554 would continue to do so through December 1978, when such reporting shall be terminated. Their reporting of residential data on the revised schedule, as provided in Order No. 554, would be unchanged. The ten utilities listed in Appendix B are currently reporting residential data on the existing schedule and would continue to do so through December 1978, when such reporting shall be terminated. These utilities are currently reporting commercial and industrial data and shall continue to do so. The twenty-one utilities listed in Appendix C are currently reporting residential data on the existing schedule only, and would continue to do so through December 1978. At that time, all such reporting would be terminated. Appendix D shows an existing schedule for reporting residential data. Appendix E shows a revised schedule for reporting residential data.

Any interested person may submit to the Federal Power Commission, Washington, D.C. 20426, not later than June 1, 1977, data, views, comments, or suggestions in writing concerning all or part of the revisions proposed herein. Written submittals will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, 825 North Capitol Street NE., Room 1000, Washington, D.C. 20426, during regular business hours. The Commission will consider all such written submittals before acting on the matters herein proposed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Submittals to the Commission should indicate the name, title, mailing address and telephone number of the person to whom communications concerning the proposal should be addressed, and whether the person filing them requests a conference with the staff of the Federal Power Commission to discuss the proposed revisions. The Staff, in its discretion, may grant or deny requests for conference.

The proposed amendments to the reporting requirements of FPC Form No. 3–P would be issued under the authority granted to the Federal Power Commission by the Federal Power Act, as amended, particularly Sections 301, 304, 309, and 311 (49 Stat. 854–856, 858–859; 16 U.S.C. 825(a), 825(b), 825(c), 825c (b), 825c(c), 825h, 825j).

Accordingly, the Commission proposes to amend Order No. 554 by changing the reporting requirements of FPC Form No. 3–P, as follows:

The fifty-three utilities listed in Appendix A are currently reporting residential data on the existing schedule, and shall continue to do so through December 1978, when such reporting shall be terminated, or until such earlier date as the Commission may establish based upon notification from the BLS that six months overlap of the old and new indexes, has been accomplished. In addition, they report residential data on the revised schedule as provided for in Order No. 554. The ten utilities listed in Appendix B are currently reporting residential data on the existing schedule and shall continue to do so through December 1978, when such reporting shall be terminated, or until such earlier date as the Commission may establish. These utilities are currently reporting commercial and industrial data and shall continue to do so. The twenty-one utilities listed in Appendix C are currently reporting residential data on the existing schedule only, and shall continue to do so through December 1978. At that time, all such reporting shall be terminated, or until such earlier date as the Commission may establish.

The Secretary shall cause prompt publication of this notice to be made in the FEDERAL REGISTER.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

APPENDIX A

The fifty-three utilities listed in Appendix A are currently reporting residential data on the existing schedule, and would continue to do so through December 1978, when such reporting shall be terminated. In addition, they report residential data on the revised schedule as provided for in Order No. 554.

SACCHARIN AND ITS SALTS

Proposed Rule Making

Correction

In FR Doc. 77–11139, appearing at page 19996 in the issue of Friday, April 15, 1977, make the following changes:

1. On page 20005, the second number in the next to last line of the third full paragraph, first column, should read "189".

2. Also on page 20005, the next to last line of the second to last full paragraph should read "through 189" of Chapter I of Title 21 of the".

3. On page 20007, third column, the section number in the first full line under the heading for Part 172 should read "§ 172.135" and the second line of § 189.185(a) should read, "chemical, 1,2-benzisothiazoline-3-one-1,".

4. On page 20008, the seventh line of § 310.514 should read, "agement or mitigation of diabetes and".

5. Also on page 20008, third column, the words "used in manufacturing the drug product, or that the assay and other control procedures" should precede the word "are" in the last line of § 430.300 (b) (2) (ii).

[21 CFR Part 640]

[Docket No. 77N–0114]

ADDITIONAL STANDARDS FOR HUMAN BLOOD AND BLOOD PRODUCTS SOURCE PLASMA (HUMAN)

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the regulations regarding Source Plasma (Human) to clarify the conditions under which a donor who has not had the red blood cells returned from a unit of blood collected during a plasmapheresis procedure or who has been a donor of a unit of whole blood may be plasmapheresed again within 8 weeks. Exceptions to the 8-week waiting period have become routine; this amendment would permit such waiver only when the donor possesses antibody that is (1) transitory, (2) of a highly unusual or infrequent specificity, or (3) of an unusually high titer.

DATE: Written comments by July 18, 1977.

ADDRESS: Comments may be addresed to the Hearing Clerk (HFC–20), Flood and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Michael L. Hooton, Bureau of Biologics (HFB–620), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, Md. 20014, (301–443–1920).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of March 12, 1976 (41 FR 10762) the Commissioner of Food and Drugs amended the Source Plasma (Human) regulations in §§ 640.60 through 640.70 (21 CFR 640.60 through 640.70) by redefining Source Plasma (Human) and clarifying and strengthening the standards in light of the inspectional and other regulatory experience of the Food and Drug Administration. Section 640.63(e) was amended to prevent subsequent plasmapheresis for 8 weeks of a donor who has not had the red blood cells returned during a plasmapheresis procedure or who has been a donor of a unit of whole blood, unless the donor has been examined and certified by a qualified licensed physician to be acceptable for further plasmapheresis.

The Commissioner expected that the 8-week waiting period would be waived by the physician only when the donor possessed an antibody that is (1) transitory, (2) of a highly unusual or infrequent specificity, or (3) of an unusually high titer. It was not intended that exceptions to the 8-week waiting period would become routine for any donor. Indeed, in the preamble of the March 12, 1976 final order, the Commissioner rejected two comments which suggested that plasmapheresis of a donor should be permitted after loss of red blood cells so long as the donor's hemoglobin or hematocrit value met prescribed levels, regardless of the elapsed time (41 FR 10763, item No. 7).

As the result of a review of license applications for Source Plasma (Human) and inspection reports of establishments collecting plasma, the Commissioner finds that § 640.63(e) has been misapplied to permit routine rather than occasional exceptions to the 8-week waiting period after loss of red blood cells.

For clarification, the Commissioner is proposing to amend § 640.63(e) to specify that exceptions to the 8-week waiting period be made only if the donor possesses an antibody that is (1) transitory, (2) of a highly unusual or infrequent specificity, or (3) of an unusually high titer, and further, consistent with § 606.160 (21 CFR 606.160), that records clearly document the antibody and the need for plasmapheresing the donor.

This proposal is consistent with the interpretation applied by the Bureau of Biologics, FDA, in its regulatory actions since March 12, 1976. Establishments found to misapply § 640.63(e) in their license applications or during inspections have been advised that routine exceptions to the 8-week waiting period is a violation of the regulations which may result in regulatory action. Although this publication is a proposal, FDA will

continue regulatory action based upon its existing application of § 640.63(e).

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 640 by revising § 640.63(e) to read as follows:

§ 640.63 Suitability of donor.

* * * * *

(e) *Failure to return red blood cells.* Any donor who has not had the red blood cells returned from a unit of blood collected during a plasmapheresis procedure or who has been a donor of a unit of whole blood shall not be subjected to plasmapheresis for a period of 8 weeks, unless:

(1) The donor has been examined by a qualified licensed physician and certified by the physician to be acceptable for further plasmapheresis before expiration of the 8-week period; and

(2) The donor possesses an antibody that is (i) transitory, (ii) of a highly unusual or infrequent specificity, or (iii) of an unusually high titer; and

(3) The antibody and the need for plasmapheresing the donor is documented.

Interested persons may, on or before July 18, 1977, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments (in quadruplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this documents does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A–107.

Dated: May 11, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

Public Health Service

[42 CFR Part 86]

EDUCATIONAL RESOURCE CENTERS

NATIONAL INSTITUTE FOR OCCUPATIONAL SAFETY AND HEALTH

Grants for Occupational Safety and Health

AGENCY: Public Health Service, HEW.

ACTION: Notice of proposed rulemaking.

SUMMARY: The proposed rule would amend 42 CFR Part 86 to provide for the award of grants by the National Institute for Occupational Safety and Health (NIOSH) for the establishment of occupational safety and health educational resource centers. An educational resource center grant is an award of funds to an eligible institution or agency to pay part of or all of the costs of the combination of long-term and short-term training activities in occupational safety and health. The objective of the educational resource center grants program is to provide a mechanism for combining and expanding existing activities and arranging for coordinated multidiscipline and multilevel training and continuing education in occupational safety and health under a single grant serving a geographic area. Applications for educational resource center grants will be accepted upon publication of this notice and will be awarded subject to the final regulations.

DATES: Comments concerning these proposed amendments must be received on or before June 16, 1977. Because of the need to act expeditiously to award funds available in FY 1977, and in view of the nature of the grant review process, the comment period has been limited to 30 days. For projects to be funded in FY 1977, initial grant review is expected to begin in May 1977 and be completed by July 1977. Review and funding decisions are expected to be made by August 1977, with project periods beginning on or about September 1, 1977.

ADDRESSES: Written comments concerning the proposed amendments may be sent to Ms. Mary L. Hough, Regulations Office, NIOSH, Center for Disease Control, Room 3–32, Park Building, 5600 Fishers Lane, Rockville, MD 20857. (301–443–6268). Training grant applications (Form PHS 2499–1 (7–75)) may be obtained from the Division of Training and Manpower Development, NIOSH, Robert A. Taft Laboratories, 4676 Columbia Parkway, Cincinnati, OH 45226. Completed applications should be submitted to Division of Research Grants, National Institutes of Health, Westwood Building, 5333 Westbard Avenue, Bethesda, MD 20014.

FOR FURTHER INFORMATION CONTACT:

Dr. Alan Stevens or Mr. David Thelen, Division of Training and Manpower Development, NIOSH, 513–684–8221.

SUPPLEMENTARY INFORMATION: Section 21(a)(1) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 670(a)(1)) authorizes the Secretary of Health, Education, and Welfare to make grants for the conduct of educational programs to provide an adequate supply of qualified personnel to carry out the purpose of the Act. On July 10, 1975, the Department issued regulations to implement this authority (42 CFR Part 86, 40 FR 29076). The Assistant Secretary for Health, with the approval of the Secretary of Halth, Education, and Welfare is proposing to further implement this authority by awarding grants for the establishment of educational resource centers. The specific project requirements for educational resource center grants are set forth in § 86.13(c) of the proposed rule, with the most distinctive feature being a cooperative arrangement for occupational safety and health training between a medical school, a school of nursing, a school of public health or its equivalent and a school of engineering or its equivalent. The educational resource center may be within one educational institution or agency, or comprised of an association of two or more institutions or agencies.

Funds available for this program in fiscal year 1977 are 2.25 million and it is intended to fund 4 or 5 centers. Ultimately, it is expected, depending upon the availability of funds, to support 10 educational resource centers, at least one in each Department of Health, Education, and Welfare region.

It is, therefore, proposed to amend Part 86 of Title 42, Code of Federal Regulations, as set forth below, effective on the date of republication of the amendments in the FEDERAL REGISTER.

(Catalog of Federal Domestic Assistance Program No. 13.263, Occupational Safety and Health Training Grants.)

NOTE.—The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: March 8, 1977.

JAMES F. DICKSON,
Acting Assistant Secretary for Health.

Approved: May 11, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary.

1. In § 86.10, a new paragraph (c) is added to read as follows:

§ 86.10 Nature and purpose of training grants.

* * * * *

(c) *Educational Resource Center Grant.* An educational resource center grant is an award of funds to an eligible institution or agency, hereinafter called the "grantee," to pay part or all of the costs of organized identifiable activities, hereinafter termed the "project," that are undertaken to provide for the combination of long-term and short-term training activities as described in § 86.13 (c) of this subpart.

2. In § 86.11, paragraph (b) is revised to read as follows:

§ 86.11 Eligibility.

* * * * *

(b) *Projects eligible for long-term or short-term training grants or educational resource center grants.* Any project found by the Secretary to be a long-term training project within the meaning of § 86.10(a) or a short-term training project within the meaning of § 86.10 (b) or an educational resource center grant project within the meaning of § 86.10(c) shall be eligible for a grant award. However, no applicant is eligible for assistance for a separate training project grant in any project period in which it receives an educational resource center grant. Nothing in the section shall prevent an existing training grant from being incorporated into an educational resource center grant award.

3. In § 86.13, a new paragraph (c) is added to read as follows:

§ 86.13 Project requirements.

* * * * *

(c) In addition to the requirements set forth in paragraphs (a), (b)(1), and (b)(3) (ii) (iii) and (iv) of this section, an approvable application for an educational resource center grant must contain each of the following, unless the Secretary determines that the applicant has established good cause for its omission:

(1) A description, supported by appropriate documents, of cooperative arrangements to conduct an educational resource center among a medical school (with an established program in preventive or occupational medicine), a school of nursing, a school of public health or its equivalent, and a school of engineering or its equivalent. Other schools or departments with relevant disciplines and resources—e.g., toxicology, biostatistics, environmental health, law, business administration, education—may be represented and contribute as appropriate to the conduct of the total program.

(2) The identification of an educational resource center Director who possesses a demonstrated capacity for sustained productivity and leadership in occupational safety and health training who shall oversee the general operation of the educational resource center program and shall, to the extent possible, directly participate in training activities.

(3) A description of the full-time professonal staff representing various disciplines and qualifications relevant to occupational safety and health and capable of planning, establishing, and carrying out or administering training projects undertaken by the educational resource center.

(4) A description of the training and research expertise, appropriate facilities and ongoing training and research activities in occupational safety and health areas.

(5) A description of its program for conducting education and training of occupational health physicians, occupational health nurses, industrial hygienists/engineers and safety personnel. There shall be full-time students in each of these core disciplines, with a goal of a minimum total of 30 full-time students. Training may also be conducted in other occupational safety and health career categories, e.g., industrial toxicology, biostatistics, epidemiology, and ergonomics. Training programs shall include appropriate field experience including experience with public health and safety agencies and labor-management health and safety activities.

(6) A specific plan for making an impact on the curriculum taught by relevant medical specialties, including radiology, orthopedics, dermatology, internal medicine, neurology, perinatal medicine, and pathology.

(7) A description of its program to assist other institutions or agencies located within the applicant's region including schools of medicine, nursing and engineering, among others, by providing curriculum materials and consultation for curriculum/course development in occupational safety and health, and by providing training opportunities for faculty members.

(8) A specific plan for preparing, distributing, and conducting courses, seminars and workshops to provide short-term and continuing education training courses for physicians, nurses, industrial hygienists, safety engineers and other occupational safety and health professionals, paraprofessionals and technicians, including personnel of labor-management health and safety committees, in the geographical region in which the educational resource center is located. The goal shall be that the training be made available each year to a minimum of 200–250 trainees representing all of the above categories of personnel with priority given to providing occupational safety and health training to physicians in family practice, as well as in industrial practice, and industrial nurses. These courses shall be structured so that educational institutions, public health and safety agencies, professional societies or other appropriate agencies can utilize them to provide training at the local level to occupational safety and health personnel working in the workplace. Further, the educational resource center shall have a specific plan and demonstrated capability for implementing such training directly and through other institutions or agencies in the region including cooperative efforts with labor unions and industry trade associations where appropriate.

4. In § 86.14, paragraphs (c), (d), and (e) are redesignated as paragraphs (d), (e), and (f) respectively and a new paragraph (c) is added to read as follows:

§ 86.14 Evaluation and grant award.

* * * * *

(c) In the case of educational resource center grants:

(1) the criteria set forth in paragraphs (a) and (b) of this section.

(2) the degree to which the proposed project adequately provides for the requirements set forth in § 86.13(c).

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 21]

[Docket Nos. 18261; 21039]

AVAILABILITY OF LAND MOBILE CHANNELS IN THE 470–512 MHz BAND

Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time to file reply comments.

SUMMARY: An extension of time to file reply comments to a proposed rule making concerning the availability of land mobile channels in the 470–512 MHz band in the 13 largest urbanized areas in the United States is ordered because the National Association of Radio-telephone Systems filed comments offering a proposal which may be new to the proceeding. Allowing a modest extension of time will allow interested parties to reply to the comments without significantly delaying the outcome of the proceeding.

DATES: Reply Comments must be received on or before May 23, 1977.

ADDRESSES: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Fred F. Fitzgerald, Common Carrier Bureau, telephone number 202–632–6450.

SUPPLEMENTARY INFORMATION:

In the Matter of Amendment of Parts 21, 89, 91 and 93 of the Rules to reflect the availability of land mobile channels in the 470–512 MHz band in the 10 largest urbanized areas of the United States.

Amendment of Part 21 of the Rules to reflect the availability of land mobile channels in the 470–512 MHz band in 13 urbanized areas of the United States. (See 42 FR 13309.).

ORDER EXTENDING TIME TO FILE REPLY COMMENTS

Adopted May 6, 1977.

Released May 12, 1977.

1. Presently before the Chief, Common Carrier Bureau, is a motion by the National Association of Radiotelephone Systems (NARS), filed on May 2, 1977, requesting an extension of time until May 31, 1977 to file reply comments to the above-referenced docket. The Commission adopted a Memorandum Opinion and Order and Notice of Proposed Rule Making in the above-entitled matter on January 12, 1977, which was released on January 31, 1977.

2. In its initial comments filed in the above-captioned proceeding on April 8, 1977, NARS requested that the Commission adopt a "carriers carrier" approach to licensing the referenced frequencies, in contrast to the licensing plan proposed by the Commission in its January 12, 1977 order. The NARS comments offer a proposal which may be new to the proposed rule making proceeding. We desire reply comments to the NARS and other comments. However, if the Commission were to adopt the substance of the NARS proposal, we think it preferable that the Commission first issue a Further Notice of Proposed Rule Making. Therefore, we conclude that the extension of time requested by NARS will not serve the purpose of expediting the above-referenced docket.

3. Nevertheless, we realize that interested parties may be aware of the NARS request for an extension of time and may have expected the Bureau to grant the extension requested. We find that it is in the public interest to allow

a modest time extension in order that interested parties who may have expected to have additional time after May 9, 1977 to file reply comments have an opportunity to file their comments.

3. Accordingly, *it is ordered*, pursuant to delegated authority under § 0.303 of the Commission's Rules, that the time to file reply comments is extended from May 9, 1977 to May 23, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
WALTER R. HINCHMAN,
Chief, Common Carrier Bureau.

[FR Doc.77-14054 Filed 5-16-77;8:45 am]

[47 CFR Part 68]

CONNECTION OF TERMINAL EQUIPMENT TO TELEPHONE NETWORK

Telephone Equipment Registration; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time for filing comments.

SUMMARY: A motion has been filed to extend for a period of ninety days, the time for filing comments in this proceeding. In order to give the parties an opportunity to respond to this motion, the existing deadline for filing comments is being extended fifteen days.

DATES: Comments must be received no later than May 25, 1977 and reply comments must be received no later than June 14, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Michael S. Slomin, Policy and Rules Division, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554 (202-632-9342).

Adopted: May 5, 1977.

Released: May 9, 1977.

Memorandum Opinion and Order. In the matter of amendment of Part 68 of the Commission's rules (Telephone Equipment Registration) to Specify Standards for and Means of Connection of Telephone Equipment to Lamp and/or Annunciator Functions of Systems, Docket No. 21182, RM-2829.[1]

1. American Telephone and Telegraph Company (AT&T) has filed a motion to extend the time for filing comments in this proceeding from the present specified date of May 10, 1977 until August 10, 1977 (ninety days). AT&T claims that this additional time is necessary because the Commission specified five complex and far reaching issues in its notice of proposed rulemaking, FCC 77-228, released April 1, 1977, which require extensive review and analysis by AT&T's staff.

2. In view of the substantial extension which is sought, interested parties may wish to be heard as to the advisability of granting it. However, such parties may not have an opportunity to respond to AT&T's motion prior to the May 10, 1977 due date for comments herein. To allow such responses, we are granting a fifteen day extension of time, without prejudice to a final disposition of the motion.

3. Accordingly, pursuant to §§ 0.303 and 1.46 of the Commission's rules, 47 CFR 0.303, 1.46: *It is hereby ordered*, That interested parties may file comments on the issues and proposed rules of Docket No. 21182 no later than May 25, 1977, and that replies to such comments may be filed no later than June 14, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
WALTER R. HINCHMAN,
Chief, Common Carrier Bureau.

[47 CFR Part 73]

[Docket No. 20337; RM-2296]

FM BROADCAST STATION IN BAXLEY, GEORGIA

Proposed Change in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion and Order and Further Notice of Proposed Rule Making.

SUMMARY: Memorandum Opinion and Order denying assignment of a proposed wide coverage Class C FM channel to Baxley, Georgia (1970 pop. 3,503) because of failure of petitioner to provide required justification. Class A channel, which has subsequently become available for assignment is proposed instead.

DATES: Comments must be received on or before June 24, 1977 and reply comments must be received on or before July 14, 1977.

ADDRESS: Send comments to Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James Gross, Broadcast Bureau, 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: May 10, 1977.

Released: May 17, 1977.

Memorandum opinion and order and Further Notice of Proposed Rule Making. In the matter of amendment of § 73.202 (b), Table of Assignments, FM Broadcast Stations. (Baxley, Georgia), Docket No. 20337, RM-2296.

1. The Commission has before it comments in support of a first FM assignment to the Georgia community of Baxley (1970 pop. 3,503), as proposed in the Notice of Proposed Rule Making, 40 FR 4939 (1975). The Notice was in response to a 1973 petition by WHAB Radio, Inc. ("WHAB"), licensee of AM Station WUFE, Baxley, for the assignment of Channel 233 to Baxley.[1]

2. This assignment would have required substitution of Channel 228A for 232A at Sandersville, Georgia, and Channel 244A for 228A at Sparta, Georgia. The Notice erroneously stated that both channels were unapplied for, but in fact an application had been tendered by Radio Station WSNT, Inc., for Channel 232A at Sandersville, and the station was licensed on April 1, 1976. Any change in channels at Sandersville would now require reimbursement to WSNT for its costs in changing frequency.

3. Subsequent to the Notice, Channel 240A became available for assignment to Baxley as a result of changes made in the *Atlanta* decision (n. 1, supra). It is the Commission's usual procedure to assign Class A channels to small communities to conserve spectrum space. In the Baxley Notice, we said:

Class C vs. Class A Channel. Petitioner supports assignment of Class C channel to Baxley on the basis that there are presently no Class A channels that can be used at Baxley that would not cause the deletion of or changes in channel assignments elsewhere or changes in proposed rulemaking petitions. Additional support on this issue is requested from petitioner.

No such support was forthcoming. The Baxley petitioner has offered no showing of special circumstances to support a Class C assignment at Baxley. It appears that a Class A assignment would provide significant first service benefits at Baxley. Accordingly, we shall deny the proposed Class C assignment, and ask for comments on the assignment of Channel 240A at Baxley.[2] This proposal has the advantage of not requiring any other assignment changes or reimbursement. Petitioner should state whether it intends to apply for a station on this channel, if it is assigned.

4. Accordingly, it is proposed to amend the FM Table of Assignments (§ 73.202 (b) of the Commission's rules and regulations) to read as follows for the community listed below:

City	Channel No.	
	Present	Proposed
Baxley, Ga.[1]		240A

[1] To comply with separation requirements, the transmitter site for Baxley would have to be 8 km (5 mi) south-southwest of the community. Proponents should show the reasonable availability of a site which would be free of obstruction to the propagation of FM signals to the community. See FCC rule 208(a)(4).

5. *It is further ordered*, That the proposal to assign Channel 233 to Baxley, Georgia, issued by the Notice of Proposed Rule Making, 40 FR 4939 (1975), is hereby denied.

6. The Commission's authority to institute rulemaking proceedings; showings required; cut-off procedures; and filing requirements are contained below and are incorporated herein.

7. Interested parties may file comments on or before June 24, 1977, and reply comments on or before July 14, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in this notice of proposed rulemaking.

2. *Showings required.* Comments are invited on the proposal(s) discussed in this notice of proposed rulemaking. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420 (d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in this notice of proposed rulemaking. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

TELEVISION BROADCAST STATIONS, OHIO

Proposed Change in Table of Assignment; Dismissal of Proposal

AGENCY: Federal Communications Commission.

ACTION: Memorandum opinion and order.

SUMMARY: Proposed assignments of TV Channel *63 to Maplewood, Channel *58 to Georgetown, Channel *17 to Celina and Channel *64 to Conneaut, Ohio are dismissed at request of petitioner, Ohio Educational Television Network Commission. As a result of this action, the Television Table of Assignments remains unchanged.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Gordon Godfrey, Broadcast Bureau (202) 632-9660.

SUPPLEMENTARY INFORMATION:

Memorandum Opinion and Order—Proceeding terminated. In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations. (Maplewood, Georgetown, Celina, Conneaut, Ohio), Docket No. 21110, RM-2744.[1]

Adopted: May 3, 1977.

Released: May 9, 1977.

1. The Commission, by the Chief, Broadcast Bureau, has before it the Notice of Proposed Rule Making adopted in this proceeding on February 4, 1977, and a responsive filing from the petitioner, the Ohio Educational Television Network Commission.

2. In response to the petitioner's request, the Commission proposed to assign and reserve for noncommercial educational use channels at Maplewood (Channel *63), Georgetown (Channel *58), Celina (Channel *17) and Conneaut (Channel *64). Petitioner requested the assignments in order to operate high-powered UHF translators in these communities. Now, petitioner indicates that it no longer wishes to proceed with the assignments.

3. The Commission's decision to begin the proceeding was based on petitioner's request. Now that petitioner no longer desires to proceed in this manner, there is no reason not to terminate the proceeding. As a result of this action, § 73.606(b) of the Commission's rules, the Television Table of Assignments, remains unchanged.

4. *Accordingly, it is ordered*, That the subject proposal is dismissed and the proceeding is terminated.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.77-14070 Filed 5-16-77;8:45 am]

[1] See 42 FR 20315, April 19, 1977.

[1] A proposal by Broadcast Good Music! Committee ("BGMC") to assign a seventh FM channel to Atlanta, Georgia, would have required substitution at seven Georgia communities and the assignment of Channel 259 to Baxley. That proposal was denied by the Commission, 49 F.C.C. 2d 1280 (1974), and affirmed *per curiam* by the U.S. Court of Appeals, District of Columbia Circuit, Case No. 75-1926 (October 29, 1976). BGMC opposed the WHAB proposal.

[2] Channel 234 has also become available for assignment at Baxley, but we shall not propose it for the same reasons as Channel 233 was denied. In addition, Channel 234 would preclude a proposal before us now for FM service at McRae, Georgia.

[1] See 42 FR 9039, February 14, 1977.

CIVIL AERONAUTICS BOARD

[Order 77-5-41; Docket 27573, Agreement C.A.B. 26591, R-1 through R-6]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Specific Commodity Rates

Issued under delegated authority May 9, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA), and adopted pursuant to the provisions of Resolution 590 dealing with specific commodity rates.

As set forth in the attachment, the agreement names three additional specific commodity rates under existing specific commodity rate descriptions, and three new commodity descriptions and rates, reflecting reductions from general cargo rates; and was adopted pursuant to unprotested notice to the carriers and promulgated in an IATA letter dated April 27, 1977.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the subject agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions hereinafter ordered.

Accordingly, *It is ordered*, That:

Agreement C.A.B. 26591, R-1 through R-6, is approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such period a petition for review is filed or the Board gives notice it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Economics.

PHYLLIS T. KAYLOR,
Secretary.

Attachment

Agreement CAB	Specific commodity item No.	Description and rate [1]
26591:		
R-1	6831	Plastic packaging material: 164 c/kg, minimum weight 100 kg, 121 c/kg, minimum weight 1,500 kg, from Helsinki to New York. 164 c/kg, minimum weight 100 kg, 121 c/kg, minimum weight 2,000 kg, from New York to Helsinki.
R-2	0003	Foodstuffs, spices and beverages, excluding caviar and hatching eggs: 128 c/kg, minimum weight 1,000 kg, from Los Angeles to Noumea.
R-3 [2]	2211	Yarn, thread, and/or fibres, natural and synthetic; cloth, exclusively in bales, bolts or pieces, not further processed or manufactured; clothing and footwear; textile manufactures—namely articles or material made principally of textiles: 169 c/kg, minimum weight 2,210 kg, from Hong Kong/Taipei to Los Angeles. 194 c/kg, minimum weight 2,015 kg from Hong Kong/Taipei to Chicago. 205 c/kg, minimum weight 2,021 kg, from Hong Kong/Taipei to New York.
R-4	4309	Electronic calculating machines: 249 c/kg, minimum weight 250 kg, from Delhi to New York.
R-5	4421	Record players and tape recorders/players: 249 c/kg, minimum weight 500 kg, from Delhi to New York.
R-6	4444	Transistor radios: 249 c/kg, minimum weight 250 kg, from Delhi to New York.

[1] Subject to applicable currency conversion factors as shown in tariffs.
[2] Shipped in type 2 containers.

PRIORITY AND NONPRIORITY DOMESTIC SERVICE MAIL RATES—PHASE 2

[Order 77-5-47, Docket 23080-2]

Order To Show Cause

Adopted by the Civil Aeronautic Board at its office in Washington, D.C. on the 11th day of May, 1977.

By Order 74-1-89, January 16, 1974, the Board established temporary domestic service mail rates for sack mail and standard and daylight container mail, container minimum chargeable weights, and pickup and delivery charges effective on and after March 28, 1973.[1] On April 1, 1977, United Air Lines, Inc., (United) filed a petition requesting an amendment of this order to include the type LD-X narrow-bodied aircraft container as an additional mail container in selected markets. United also requests that the LD-X pivot weight be established at 800 pounds and that pickup and delivery charges be set at $5. The carrier proposes to offer this new container in daylight service between selected airports in DC-8 combination aircraft, subject to space availability.

In support of this request, United states that the relief requested is necessary in order that the carrier may utilize the LD-X container for the carriage of mail and be compensated at the temporary rates currently in effect for mail services. Also, United contends that its introduction of the LD-X container will provide the U.S. Postal Service (USPS) with on-airport container loading and unloading capability, thereby saving costs, and will enable the USPS to expand its daylight container mail program to many new city-pair markets. The 800 pounds pivot weight is based on the density applicable to the LD-3 container (13.3 pounds per cubic foot) multiplied by the capacity (61 cubic feet) of the LD-X container. The carrier further cites Orders 74-3-84, 74-7-116 and 74-11-16 in which similar relief was provided for the B, LD-11 and M-1 type containers, respectively.

The USPS, in its answer, supports certain aspects of United's petition and objects to others. While the USPS does not object to the Board establishing temporary service mail rates for LD-X containerized mail service, it does object to limiting the service to markets selected by United and to daylight service only. In the USP's view there is no basis for such a selective offering because it contends that United has had sufficient experience with the LD-X container to provide the service systemwide. Similarly the USPS does not object to a pivot weight of 800 pounds, but requests that a lower pivot weight of 700 pounds be established for standard container service, based on the findings contained in the Initial Decision of the Administrative Law Judge.[2] The USPS also refers to the ALJ's finding in the Initial Decision proposing to eliminate on-airport pickup and delivery charges, but does not object to their retention for temporary rate purposes.

[1] Amended by Order 76-12-60, December 10, 1976, fixing the currently effective temporary rates.
[2] Served October 27, 1976, pp. 112-113.

Subsequently, on April 21, 1977, United filed a motion for leave to file an otherwise unauthorized document in reply to the USPS answer.[3] The carrier states therein that the offering of the LD-X container is a limited one because it represents a new program of one container type in one aircraft type—the DC-8 combination aircraft. United wishes to begin by moving carefully and assessing initial development of this program; and, its offering, both as to market and time of tender, merely reflects its estimate of LD-X space and equipment availability for use by the USPS.

Upon consideration of the pleadings and all other relevant matters, the Board concludes that Order 74-1-89 should be amended to incorporate the LD-X container as requested by United. With respect to the USPS proposal for separate daylight and standard pivot weights, we are not persuaded to make such a distinction at this time. Under the current temporary rate structure, the pivot weights for each type of container used to carry mail are not distinguished by class of service so that the daylight and standard service pivot weight for a given container is uniform. The determination of whether daylight and standard container services should have different pivot weights is under consideration in the Domestic Service Mail Rate Investigation (along with many other isues regarding the level and structure of the rates for mail) and the reasonableness of such distinction will be determined there. In the interim, we are not persuaded to depart from the current rate structure. Accordingly, we propose to establish a uniform pivot weight of 800 pounds for the LD-X container pending our final decision on this proceeding.

The proposed $5 charge for pickup and delivery services does not appear to be unreasonable. This same charge is currently in effect for the LD-W container, which the LD-X container closely resembles.[4] We, therefore, tentatively find United's proposed charge of $5 to be fair and reasonable for temporary rate purposes.

In consideration of the foregoing, the Board tentatively finds and concludes that the rates and charges proposed herein for the LD-X container are fair and reasonable for the purpose of establishing temporary rates in this proceeding. When adopted, these rates will apply systemwide to such mail as is carried in LD-X containers, subject to the terms and conditions set forth in Appendix A of Order 74-1-89. However, it should be reiterated that the establishment of these rates, in itself, will neither authorize nor require any air carrier to provide LD-X container service for the Postmaster General. (See, e.g. Order 75-2-110.) A rate order does not purport to impose any service obligations.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a) and 406 thereof, and the regulations promulgated in 14 CFR Part 302;

It is ordered, That: 1. All interested persons, particularly the Postmaster General and all carrier parties of record in Docket 23080-2, are directed to show cause why the Board should not adopt the foregoing findings and conclusions and fix the temporary rates and charges specified herein, pending the fixing of final rates and charges in this investigation, by amending subparagraphs (e) and (g) of ordering paragraph 3 of Order 74-1-89, January 16, 1974, by changing "LD-W" in the columns headed "Container Type" to "LD-W/LD-X";

2. Further procedures herein shall be in accordance with the Rules of Practice, 14 CFR Part 302, and if there is any objection to the rates and charges or to the other findings and conclusions proposed herein, notice thereof shall be filed within 8 days, and, if notice is filed, written answer and supporting documents shall be filed within 15 days, after the date of service of this order;

3. If notice of objection is not filed within 8 days, or if notice is filed and answer is not filed within 15 days, after service of this order, or if an answer timely filed raises no material issue of fact, all persons shall be deemed to have waived the right to a hearing and all other procedural steps short of an order fixing temporary service mail rates and the Board may enter an order incorporating the findings and conclusions proposed herein, and fix and determine the temporary rates herein specified;

4. If notice of objection and answer are filed presenting issues for hearing, issues going to the establishment of the fair and reasonable temporary rates herein shall be limited to those specifically raised by such answers except as otherwise provided in 14 CFR section 302.307; and

5. This order shall be served upon all parties to Docket 23080-2.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-14032 Filed 5-16-77;8:45 am]

[3] We shall grant the motion as a matter of discretion.
[4] The LD-W container has an internal capacity of approximately 77 cubic feet while the LD-X container has an internal capacity of approximately 61 cubic feet.

[Docket 30656, 30657; Order 77-5-65]

ALIA—THE ROYAL JORDANIAN AIRLINES CORP. AND SYRIAN ARAB AIRLINES

Order Regarding Air Carrier Permit

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 13th day of May, 1977.

On March 24, 1977, the Royal Jordanian Airlines (ALIA) and Syrian Arab Airlines (Syrianair) filed a motion to consolidate their above noted dockets and concurrently filed a joint motion for an order to show cause why the Board should not issue foreign air carrier permits for joint service between Syria and Jordan, on the one hand, and the United States, on the other.[1] The joint request is an application for the routes provided in air services agreements that were effected by an exchange of diplomatic notes between the United States Government and the Governments of Syria and Jordan on March 15, 1977.[2]

On May 10, 1977, the United States Department of State filed its comments supporting the expeditious handling of the instant application by show-cause procedures.

Upon consideration of all of the relevant facts and pleadings, we have decided to grant the request for consolidation of Dockets 30656 and 30657. In addition, we have decided to deny the joint request for the issuance of a show-cause order and to set the applications for hearing before an administrative law judge as promptly as the Boards' docket permits.

Our decision herein is based on the Board's policy not to utilize show-cause procedures for first certification in foreign air carrier cases. The rationale behind this policy is the belief that the issue of fitness should only be determined after all the evidence is explored in a oral proceeding.[3] Moreover, we believe that the hearing process will be beneficial in resolving certain issues present in this case. These issues include, among other things, Syrianair's fitness; the need for holding out provisions for the proposed services; the question of insurance liability arising from the operation of joint services; the extent that the charter authority requested conforms with the intergovernmental agreements; the degree, if any, to which the Board should exercise jurisdiction over the intercarrier agreement between ALIA and Syrianair for joint services to and from the United States; and what conditions, if any, should be imposed on any authority granted.

While we understand the Department of State desires to employ show-cause procedures, because of the first certification issue, we do not deem it advisable to dispense with a formal hearing. In any event, under an expedited hearing procedure, the applicants could receive their permits as fast or faster than by show-cause procedures.[4]

[1] ALIA currently holds a 402 permit to engage in nonscheduled foreign air transportation between the U.S. and Jordan via certain intermediate points. See Orders 75-3-85 and 76-7-30. Syrianair does not hold a permit under section 402 to provide service to the United States.
[2] The notes granted scheduled route rights to the Government of Jordan and specified scheduled route rights consistent with the Air Transport Services Agreement between the United States Government and the Government of Syria.
[3] The only exception to this rule is the U.S.-Canadian transborder carriers. However, those cases involved special circumstances which are not present. See Order 74-6-30, June 6, 1974.
[4] For example, see Docket 25862, Aeroflot Soviet Airlines, wherein the Board issued a permit to the applicant in approximately 60 days from date of hearing.

Accordingly, *it is ordered*, That:

1. The joint motion of the Royal Jordanian Airlines Corporation and Syrian Arab Airlines for an order to show cause be and it hereby is denied;

2. The joint motion of the Royal Jordanian Airlines Corporation and Syrian Arab Airlines to consolidate Dockets 30656 and 30657 be and it hereby is granted; and

3. The applications of the Royal Jordanian Airlines Corporation (Docket 30656) and Syrian Arab Airlines (Docket 30657) be and they hereby are set for hearing before an administrative law judge of the Board at a time and place to be designated hereafter.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

ERDA-OWNED FOREIGN INVENTIONS

Availability for Licensing

The inventions listed below are the subject of U.S. Government-owned foreign patents and patent applications in the custody of the U.S. Energy Research and Development Administration and are available for licensing in accordance with ERDA Patent Licensing Regulations (Title 10 CFR 781.61):

ARGENTINA

ARGENTINE PATENT

208,118, Method for selectively orienting induced fractures in subterranean earth formations.

AUSTRALIA

AUSTRALIAN PATENTS

465,220, Compact dialyzer.
467,175, Folded membrane dialyzer.
467,849, Rotor for multistation photometric analyzer.
468,637, Multisensor particle sorter.
470,212, Glass polymer composites.
470,383, Hemodialyzer with tapered slit blood ports and baffles.
473,950, Reverse osmosis process using cross-linked aromatic polamide membranes.
475,215, Solder leveling.
475,853, Dynamic multistation photometer-fluorometer.
478,144, Dynamic multistation photometric analyzer for seriological testing.

478,367, Portable dynamic multistation photometer-fluorometer
478,804, Rotor for fluorometric measurement in fast analyzer of rotary type
480,952, Pumpable rockbolt method
481,171, Compact dynamic multistation photometer utilizing disposable cuvette rotor

AUSTRALIAN APPLICATION

83,415/75, Radiant energy collector

AUSTRIA

AUSTRIAN PATENTS

334,115, Compact dynamic multistation photometer utilizing disposable cuvette rotor
334,116, Automated sample-reagent loader

BELGIUM

BELGIAN PATENTS

833,846, Electrochemical cell assembled in discharged state
836,171, Process for solidifying nuclear materials
838,515, Method of preparing electrodes with porous current collector structure and solid reactants for secondary electrochemical cells
838,516, Photomultiplier tube gain regulating system
839,896, Method and apparatus for producing synthetic fuels from solid waste
840,425, Folded membrane dialyzer with mechanically sealed edges
840,426, Method for solidifying liquid radioactive wastes
841,140, Method for dissolving plutonium dioxide
841,665, Ferric ion as a scavenging agent in solvent extraction process
843,518, Method and apparatus for growing HgI_2 crystals
843,519, Purification of HgI_2 for nuclear detector fabrication
844,817, Recovery of cesium and palladium from nuclear reactor fuel processing waste
845,200, Method and apparatus for thermal energy storage
845,620, Bidentate organophosphorus solvent extraction process for actinide recovery and partition

CANADA

CANADIAN PATENTS

987,116, Pumpable rockbolt method
987,128, Portable dynamic multistation photometer-fluorometer
988,321, Compact dynamic multistation photometer utilizing disposable cuvette rotor
989,525, Method of detecting a fuel element failure
989,616, In situ coal bed gasification
989,623, Oxidative stripping process for the recovery of uranium from wet-process phosphoric acid
991,840, Chemical plating method for preparing 252 cf neutron source material
991,861, Chemical digestion of low-level solid nuclear solid waste material
991,885, Automated sample-reagent loader
994,999, Freeze drying method for preparing radiation source material
995,812, Computer generated optical sound tracks
996,526, Centrifugal particle elutriator and method of use
997,168, Method and apparatus for measuring pressures in fluid lines
999,686, Energy absorbing structure to prevent damage to the vessel wall as a result of the effects of a sodium-water reaction in a sodium-steam generator
999,757, Isotope-shift zeeman effect spectrometer
999,999, Refuse and sewage polymer impregnated concrete
1,000,421, Tag gas capsule with magnetic piercing device
1,000,876, Method of locating a leaking fuel element in a fast breeder power reactor
1,003,670, Diffraction smoothing aperture for an optical beam
1,004,662, Method for laser drilling subterranean earth formations
1,004,880, Ductile superconducting alloys
1,005,156, On-line ultrasonic gas entrainment monitor
1,006,378, Simplified rotor for fast analyzer of rotary cuvette type
1,006,631, Radioactive waste storage
1,007,945, Radiant energy collector

CANADIAN APPLICATIONS

252,867, Means of increasing efficiency of CPC solar energy collector
256,012, Reducing heat loss from the energy absorber of a solar collector
257,569, Solar collector with improved thermal concentration
271,829, Solar concentrator with restricted exit angles
271,833, Solar radiation absorbing material

FRANCE

FRENCH PATENTS

71.37,718, Removal of plutonium from plutonium hexafluoride-uranium hexafluoride mixtures
72.09,268, Thermoluminescence dosimeter system
72.36,027, Ferroelectric ceramic longitudinal electrooptic scattering mode devices
72.36,450, Process for the separation of components from gas mixtures
72.42,460, Ferroelectric-type optical filter
73.34,038, Chemical digestion of low-level solid nuclear solid waste material
73.40,330, Impregnated chemical separation particles
73.42,891, Pumpable rockbolt method

FRENCH APPLICATIONS

75/23,210, Radiant energy collector
76/19,437, Means of increasing efficiency of CPC solar energy collector
76/22,366, Reducing heat loss from the energy absorber of a solar collector.
76/22,367, Solar collector with improved thermal concentration.
77/6307, Solar concentrator with restricted exit angles.
77/6832, Solar radiation absorbing material.

GERMANY

GERMAN PATENTS

1,962,027 System providing stable pulse display.

GERMAN APPLICATIONS

P 25 33 530.2, Radiant energy collector.
P 26 28 557.4, Means of increasing efficiency of CPC solar energy collector.
P 26 33 029.0, Solar collector with improved thermal concentration.
P 26 33 030.3, Reducing heat loss from the energy absorber of a solar collector.
P 27 09 284.8, Solar concentrator with restricted exit angles.
P 27 09 837.9, Solar radiation absorbing material.

GREAT BRITAIN

BRITISH PATENTS

1,420,044, Zeeman effect absorption spectrometer.
1,436,921, X-ray image intensifier phosphor.
1,443,127, Pulsed multiline CO_2 laser oscillator appartus and method.
1,444,139, Filler alloys for fluxless brazing aluminum and aluminum alloys.
1,445,723, Ductile superconducting alloys.
1,446,762, Rotor for fluorometric measurements in fast analyzer of rotary type.
1,447,395, Portable dynamic multistation photometer-fluorometer.
1,448,789, Diagnoses of disease states by fluorescent measurements utilizing scanning laser beams.
1,449,080, Electrolyte for applying barrier anodic coatings.
1,449,195, Pumpable rockbolt method.
1,452,225, Formaldehyde based disinfectants.
1,455,203, Centrifugal particle elutriator and method of use.
1,456,599, Potential sensing cell analyzer.
1,457,325, Solder leveling.
1,457,650, Method for concentrating macromolecules.
1,458,132, Chemical trap.
1,465,241, Method for improving the extraction properties of a tributyl phosphate solution.
1,465,884, Process for radiation grafting hydrogels onto organic polymeric substrates.
1,466,518, Intrusion detector self-test system.
1,466,806, Cathode for a secondary electrochemical cell.
1,466,841, Encapsulated thermonuclear fuel.
1,467,887, Method of fabricating graphite for use as a skeletal prosthesis and product thereof.
1,469,024, Charge storage device.
1,470,123, Method of locating a leaking fuel element in a fast breeder power reactor.
1,470,280, Superconducting articles of manufacture and method of producing same.
1,475,245, Indentification of failed fuel element.

BRITISH APPLICATIONS

20,481/75, Radiant energy collector.
20,790/76, Means of increasing efficiency of CPC solar energy collector.
26,778/76, Reducing heat loss from the energy absorber of a solar collector.
26,779/76, Solar collector with improved thermal concentration.
6,076/77, Solar concentrator with restricted exit angles.
6,077/77, Solar radiation absorbing material.

INDIA

INDIAN PATENT

140,416, Portable dynamic multistation photometer-fluorometer.

ISRAEL

ISRAELI PATENTS

40,449, Reverse osmosis process using cross-linked aromatic polamide membranes.
42,632, Dynamic multistation photometric analyzer for serological testing.
42,689, Dynamic multistation photometer-fluorometer.
43,372, Compact dynamic multistation photometer utilizing disposable cuvette rotor.
43,681, Rotor for fluorometric measurements in fast analyzer of rotary type.
43,750, Portable dynamic multistation photometer-fluorometer.
44,583, Automated sample-reagent loader.

ISRAELI APPLICATION

47,516, Radiant energy collector.

ITALY

ITALIAN PATENTS

999,500, Rotor for fluorometric measurements in fast analyzer of rotary type.
1,000,868, Portable dynamic multistation photometer-fluorometer.
1,007,912, Automated sample-reagent loader.
1,009,685, Multisided electron beam excited electrically pumped gas laser systems.
1,009,735, Solder leveling.

ITALIAN APPLICATIONS

83,630 A/76, Means of increasing efficiency of CPC solar energy collector.
83,633 A/76, Reducing heat loss from the energy absorber of a solar collector.

83,634 A/76, Solar collector with improved thermal concentration.

JAPAN

JAPANESE PATENTS

800,646, System for detecting sodium boiling in a reactor.
805,924, Radiochemical counter for bulk materials.
809,517, System providing stable pulse display.
809,670, Analytical photometer with means for measuring, holding and transferring discrete liquid volumes and method of use thereof.
809,672, Antiferroelectric voltage regulation.
810,108, Improved position sensitive radiation detector.
819,091, Scavengers for radioactive iodine.
823,996, Compact dialyzer.

JAPANESE APPLICATIONS

78,482/75, Radiant energy collector.
76–73,059, Means of increasing efficiency of CPC solar energy collector.
76–87,693, Solar collector with improved thermal concentration.
76–88,101, Reducing heat loss from the energy absorber of a solar collector.
77–22,602, Solar concentrator with restricted exit angles.
77–25,330, Solar radiation absorbing material.

PORTUGAL

PORTUGUESE PATENT

63,471, Compact fast analyzer of rotary cuvette type.

SPAIN

SPANISH PATENTS

417,075, Dynamic multistation photometric analyzer for serological testing.
420,501, Rotor for fluorometric measurements in fast analyzer of rotary type.

SPANISH APPLICATIONS

438,813, Radiant energy collector.
450,085, Reducing heat loss from the energy absorber of a solar collector.
450,086, Solar collector with improved thermal concentration.

SWEDEN

SWEDISH PATENTS

72.05,169–1, High-transition-temperature subconductors in the Nb–Al–Ge system.
72.12,490–12, Ferroelectric ceramic longitudinal electrooptic scattering mode devices.
72.16,065–8, Rotor for multistation photometric analyzer.
72.16,659–8, Multisensor particle sorter.
73.11,327–6, Dynamic multistation photometer-fluorometer.
73.13,469–4, Compact dynamic multistation photometer utilizing disposable cuvette rotor.
73.16,035–0, Rotor for fluorometric measurements in fast analyzer of rotary type.
73.16,424–6, Portable dynamic multistation photometer-fluorometer.
74.04,747–3, Automated sample-reagent loader.
74.13,373–7, Method for concentrating macromolecules.

SWEDISH AMERICAN

75/7832–9, Radiant energy collector.

SWITZERLAND

SWISS PATENTS

574,735, Method of fabricating graphite for use as a skeletal prosthesis and product thereof.
575,750, Potential sensing cell analyzer.
576,136, Automated sample-reagent loader.
584,892, Compact fast analyzer of rotary cuvette type.

Copies of the foreign patents can be purchased from their respective foreign patent offices. Copies of the foreign patent applications can be purchased from ERDA for thirty cents ($0.30) per page. When ordering copies of a foreign patent or patent application it is necessary to identify the specific number and title of the patent or patent application.

Application forms for, inquiries as to and requests for a license should be directed to the Assistant General Counsel for Patents, U.S. Energy Research and Development Administration, Washington, D.C. 20545. Each application for a license should be accompanied by a ten dollar ($10) processing fee payable to the U.S. Energy Research and Development Administration.

Dated at Washington, D.C., this 6th day of May 1977.

For the U.S. Energy Research and Development Administration.

HUDSON B. RAGAN,
Acting General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 728–6; OPP–50295]

CONREL, ET AL.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 36638–EUP–1. Conrel—An Albany International Company, Norwood, Massachusetts 02062. This experimental use permit allows the use of 500 pounds of the pheromone (Z,Z)-7,11-hexadecadien-o-ol acetate and (Z,E)-7,11-hexadecadien-o-ol acetate on cotton as a confusion agent in the control of the pink bollworm. A total of 20,000 acres is involved; the program is authorized only in the States of Arizona and California. The experimental use permit is effective from April 1, 1977, to April 1, 1978. A temporary exemption from the requirement of a tolerance for residues of the active ingredient in or on cottonseed has been established.

No. 35977–EUP–1. Hoffmann–LaRoche, Inc., Nutley, New Jersey 07110. This experimental use permit allows the use of 388.5 pounds of the herbicide sodium salt of 2,3:4,6-Bis-O-(1-methylethylidene - α - L - xylo - 2 - hexulofuranonosonic acid for chemical pinching of ornamentals (evergreen and deciduous azaleas, begonias, and fuchsias grown in greenhouse and field nurseries), and as a plant growth retardant on hedges, shrubs, and other ornamentals in outdoor locations. A total of 92.5 acres is involved; the program is authorized only in the States of Alabama, California, Florida, New Jersey, North Carolina, Ohio, Oregon, Texas, and Washington. The experimental use permit is effective from April 7, 1977, to April 7, 1978.

No. 39777–EUP–1. Ethyl Corporation, Richmond, Virginia 23219. This experimental use permit allows the use of 2,000 pounds of the microbiocide bromine chloride to evaluate disinfection of effluent in sewage disposal plants. A 100 gpm slip stream of nondisinfected plant effluent from the secondary clarifier will be treated at a dose of 7.5 ppm average for 210 days. Approximately 30 million gallons of effluent are to be treated; the program is authorized only in the State of Virginia. The experimental use permit is effective from April 7, 1977, to April 7, 1978.

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

(Sec. 5, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; (7 U.S.C. 136(a) et seq.).)

Dated: May 9, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

SCIENCE ADVISORY BOARD, ECOLOGY ADVISORY COMMITTEE

Open Meeting

Pursuant to Pub. L. 92–463, notice is hereby given that a meeting of the Ecology Advisory Committee of the Science Advisory Board will be held June 6–7, 1977, beginning at 9:00 a.m., the Administrator's Conference Room (Room 1101), Waterside Mall West Tower, 401 M Street SW., Washington, D.C.

This is the twelfth meeting of the Ecology Advisory Committee. The agenda includes a report on the Science Advisory Board activties; responses to the Committee's review of EPA's draft "National Ecological Effects Research Program 1978–1982" and to the Committee's Advisory Statement, "Ecosystem Research Can Save Money"; discussions relative to the "Draft Sulfates Research Plan—Ecological Effects," and to the program plan, "Biological and Climate Effects Research (BACER)—Effects of Stratospheric Modification;" presentations on selected extramural research projects; discussions on collection and maintenance of scientific specimens, items for the Committee's future consideration; and member items of interest.

The meeting is open to the public. Any member of the public wishing to attend, participate, or obtain information should contact Dr. J. Frances Allen, Executive Secretary, Ecology Advisory Committee, (703) 557–7720.

Dated: May 9, 1977.

LLOYD T. TAYLOR,
Acting Staff Director,
Science Advisory Board.

[FRL 729–2; OPP–00052]

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT SCIENTIFIC ADVISORY PANEL

Meeting

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Notice of meeting.

SUMMARY: There will be a two-day special subcommittee meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel from 9:30 a.m. to 4:30 p.m. daily on Thursday, June 2, and Friday, June 3, 1977. The meeting will be held in the Department of Pathology Conference Room, School of Medicine, University of California, San Francisco, California. The meeting will be open to the public.

FOR FURTHER INFORMATION CONTACT:

Dr. H. Wade Fowler, Jr., Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (WH–567), Room E–315, EPA, 401 M St., SW., Washington, D.C. 20460, telephone 202–755–4851.

SUPPLEMENTARY INFORMATION: In accordance with section 25(d) of the amended FIFRA, the Scientific Advisory Panel will comment on the impact on health and the environment of regulatory actions under sections 6(b) and 25(a) prior to implementation. The purpose of this meeting is to discuss the following topic:

Advance draft of the subpart on Hazard Evaluation: Human and Domestic Animals of the Guidelines for Registering Pesticides in the United States.

Any member of the public wishing to attend this meeting should contact Dr. H. Wade Fowler, Jr., at the address shown above. Time will be allotted for brief comments by the public each day; interested persons should contact Dr. Fowler for special instructions regarding oral statements. Individuals who wish to file written statements are advised to submit ten copies of statements to the Executive Secretary in a timely manner to ensure appropriate consideration by the Advisory Panel. All statements will be made a part of the record and will be taken into consideration by the Panel in formulating its own comments.

All interested persons are further advised that the meeting announced in this notice is a subcommittee meeting of the Advisory Panel for the purpose of conducting preliminary reviews of draft proposed rulemaking. Formal review of topics considered by the subcommittee will be conducted by the FIFRA Scientific Advisory Panel at a later date.

(Sec. 25(d) of FIFRA, as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.); sec. 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 86 Stat. 770).)

Dated: May 12, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator
for Pesticide Programs.

[Docket Nos. 21193, 21194; File Nos. BPH–9674, BPH–9847]

REX K. JENSEN AND KIDO BROADCASTERS, INC.

Applications for Construction Permit; Memorandum Opinion and Order

Adopted: May 6, 1977.

Released: May 11, 1977.

In re applications of Rex K. Jensen, Boise, Idaho, requests: 104.3 MHz, Channel 282, 30 kW (H & V); 2670 feet (H & V); KIDO Broadcasters, Inc., Boise, Idaho, requests: 104.3 MHz, Channel 282, 50 kW (H & V); 1790 feet (H & V).

1. The Commission, by the Chief, Broadcast Bureau, has before it for consideration the above-captioned mutually exclusive applications of Rex K. Jensen (Jensen), Boise, Idaho, and KIDO Broadcasters, Inc. (KIDO), Boise, Idaho, for a construction permit for a new FM broadcast station at Boise, Idaho.

2. Jensen has failed to comply with the requirements of the *Primer on Ascertainment of Community Problems by Broadcast Applicants*, 27 FCC 2d 650, 21 RR 2d 1507 (1971) in three respects. First, from the information before us, it appears that the applicant has failed to survey leaders from a significant group comprising a part of the Boise community. *Voice of Dixie, Inc.*, 45 FCC 2d 1027, 24 RR 2d 1127 (1974), recon. den., 47 FCC 2d 526, 30 RR 2d 851, (1974). Specifically, in his demographic study, Jensen states that Boise is the center of economic and commercial activity in the area, and that the city's manufacturing has expanded so substantially in recent years as to become one of the major industrial employers. However, Jensen has interviewed only several small businessmen, and one representative of a bottling company,

and therefore, our review of his application reveals no one who can be considered as representative of industrial employers within Boise. Second, Jensen has not identified the person who conducted the general public survey as an employee or prospective employee of his proposed station. (See question and answer 11(b) of the *Primer*.) Third, Jensen has not complied with question and answer 29 of the *Primer* which requires that the broadcast matter proposed to meet the needs of the community must be fully described and show which programs are responsive to which problems and needs. For these reasons, a limited ascertainment issue will be specified.

3. Because Jensen proposes independent programming while KIDO proposes to duplicate some of the programming of its commonly owned AM station, KIDO, evidence regarding program duplication will be admissible under the standard comparative issue. When duplicated programming is proposed, the showing permitted under the standard comparative issue will be limited to evidence concerning the benefits and detriments to be derived from the proposed duplication which would offset its inherent inefficiency. *Jones T. Sudbury*, 8 FCC 2d 360 (1967).

4. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purposes of comparison, the areas and populations which would receive FM service of 1 mV/m or greater intensity, together with the availability of other primary aural services in such areas will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to either of the applicants.

5. Except as indicated above, the applicants are qualified to construct and operate as proposed. However, because the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding.

6. Accordingly, *it is ordered*, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the above-captioned applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

(1) To determine with respect to the efforts of Rex K. Jensen to ascertain the community problems of Boise, Idaho, first, whether the applicant consulted with leaders of industry; second, whether the person who conducted the applicant's general public survey was an employee or prospective employee of the proposed station; and third, whether the applicant's proposed programming meets the problems and needs revealed in his community ascertainment.

(2) To determine which of the proposals would, on a comparative basis, better serve the public interest.

(3) To determine in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

7. *It is further ordered*, That to avail themselves of the opportunity to be heard, the applicants herein, pursuant to Section 1.221(c) of the Commission's Rules, in person, or by attorney, shall, within twenty days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

8. *It is further ordered*, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, in Section 1.594 of the Commission's Rules, give notice of the hearing, either individually or, if feasible and consistent with the rules, jointly, within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by Section 1.594(g) of the Rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[Docket No. 21179]

UHF CHANNEL READOUT ON TELEVISION RECEIVERS

Order

Adopted: May 6, 1977.

Released: May 11, 1977.

1. Springfield Television Broadcasting Company; National Business Network, Inc.; Delta Television Corporation; and Oklahoma City Broadcast Company have requested that the time for filing comments in this proceeding be extended to July 1, 1977 and that the time for filing reply comments be extended to July 22, 1977.

2. In support of their request, petitioners state that the additional time is needed to develop the information sought by the Commission in this proceeding. We wish to develop as much information as possible to help us resolve questions addressed in the Notice of Inquiry and are therefore granting the request.

3. Accordingly, *it is ordered*, Pursuant to Section 0.251(b) of the Rules and Regulations, 47 CFR 0.251(b), That the time for filing comments in this proceeding is extended to July 1, 1977, and that the time for filing reply comments is extended to July 22, 1977.

LAWRENCE W. SECREST III,
Deputy General Counsel.

FEDERAL ENERGY ADMINISTRATION

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of April 29 Through May 6, 1977

Notice is hereby given that during the week of April 29 through May 6, 1977, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments on the applications within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

ERIC J. FYGI,
Acting General Counsel.

MAY 12, 1977.

APPENDIX.—*List of cases received by the Office of Exceptions and Appeals, week of Apr. 29 through May 6, 1977*

Date	Name and location of applicant	Case No.	Type of submission
Apr. 29, 1977	Guam Oil & Refining Co., Inc., Dallas, Tex. (If granted: Guam Oil & Refining Co., Inc., would receive a stay of the requirements of 10 CFR 211.67(a) pending a final determination of its application for exception.)	FES-4105	Stay of 10 CFR 211.67(a)
Do	Keener Oil Co., Tulsa, Okla. (If granted: Keener Oil Co.'s Seminole County, Okla., leases from which production was sold to OKC Corp., would be recertified.)	FEE-4110	Price exception (sec. 212.73).
Do	UCO Oil Co., Whittier, Calif. (If granted: UCO Oil Co. would receive an extension of the relief granted in the FEA's Feb. 17, 1977, decision and order and would be assigned new, lower priced suppliers of motor gasoline.)	FXE-4111	Extension of the relief granted in UCO Oil Co., 5 FEA par. 83,065 (Feb. 17, 1977).
May 2, 1977	Commonwealth Oil Refining Co., Inc., Washington, D.C. (If granted: The FEA's Apr. 14, 1977, decision and order would be rescinded and the Commonwealth Oil Refining Co. would receive retroactive and prospective relief from its old oil entitlements program purchase obligations.)	FXA-1279	Appeal of the FEA's decision and order in Commonwealth Oil Refining Co., 5 FEA par. ---- (Apr. 14, 1977).
Do	Montara Petroleum Co., Palo Alto, Calif. (If granted: Crude oil produced from Montara Petroleum Co.'s DT-32x well in the Cat Canyon Oil field in Santa Barbara County, Calif., would be sold at upper tier ceiling prices on a retroactive basis.)	FEE-4113	Price exception (sec. 212.-73).
Do	Stovall Oil Co., Casper, Wyo. (If granted: Crude oil produced from the Caballo unit in the Dead Horse Creek field in Campbell County, Wyo., would be sold at upper tier ceiling prices.)	FEE-4112	Do.
Do	TOSCO Corp., Washington, D.C. (If granted: The FEA's Mar. 31, 1977, decision and order would be rescinded, TOSCO Corp. would not be required to refund overcharges resulting from the incorrect calculation of its May 15, 1973, selling prices, and the firm would be permitted to continue to utilize those prices in determining its maximum allowable selling prices.)	FXA-1280	Appeal of FEA's decision and order in TOSCO Corp., 5 FEA par. ---- (Mar. 31, 1977).

Date	Name and location of applicant	Case No.	Type of submission
May 3, 1977	Atlantic Richfield Co., Los Angeles, Calif. (If granted: The FEA's Jan. 13, 1977, decision and order, would be rescinded and Atlantic Richfield would not be required to comply with the requirements of the remedial order issued by region IX on Sept. 2, 1976.)	FMR-0104	Modification of FEA's decision and order in Atlantic Richfield Co., 5 FEA par. 80,521 (Jan. 13, 1977).
Do	Brooks Exploration Inc., Denver, Colo. (If granted: Crude oil produced from the Kittelson No. 1 well in Divide County, N. Dak., would be sold at upper tier ceiling prices for the benefit of the working interest owners.)	FEE-4114	Price exception (sec. 212.-73).
Do	B. J. Hickman, Kimball, Nebr. (If granted: Mr. B. J. Hickman would be permitted to determine the price of the crude oil which he produced and sold from the J. R. Cross property without regard to a current cumulative deficiency and would not be required to refund alleged over-charges in his sales of crude oil to Koch Oil Co.)	FEE-4119	Price exception (sec. 212.72)
Do	Johns-Manville, Denver, Colo. (If granted: The FEA's information request denial would be rescinded and Johns-Manville would receive a copy of the summary evaluation of the feasibility of total conversion of coal firing for the Waukegan BM plant of Johns-Manville Corp.	FFA-1283	Appeal of FEA's information request denial.
Do	Louis Kahan, Tulsa, Okla. (If granted: Louis Kahan would receive a stay of the requirements of the remedial order issued by FEA region VI on Apr. 11, 1977, pending a final determination on an appeal which the firm states it will file.)	FRS-1281	Stay of the redmedial order issued by region VI on Apr. 11, 1977.
Do	Laketon Asphalt Refining, Inc., Evansville, Ind. (If granted: The FEA would review the entitlements exception relief granted to Laketon Asphalt Refining, Inc., during its 1976 fiscal year in order to determine whether the level of exception relief approved was appropriate.)	FEX-0156	Review of entitlements exception relief.
Do	Sun Co., Inc., Philadelphia, Pa. (If granted: The FEA's Feb. 25, 1977, decisioff and order issued to Amtel, Inc., would be rescinded and Sun Co., Inc., would not be required to reduce its sales price for motor gasoline which it supplies to Amtel, Inc.)	FXA-1282	Appeal of FEA's decision and order in Amtel, Inc., 5 FEA par. 83,091 (Feb. 25, 1977).
Do	UCO Oil Co. (UCO Terminals, Inc.), Whittier, Calif. (If granted: UCO Terminals, Inc., a subsidiary of the UCO Oil Co., would be permitted to import into district V, 1,227,500 bbls. of unfinished product gasoline on a fee-free basis during the allocation period May 1, 1977, through Apr. 30, 1978.)	FPI-0116	Exception to sec. 213.35.
Do	Vickers Energy Corp. (TransOcean Oil, Inc.). (If granted: TransOcean Oil, Inc., a subsidiary of Vickers Energy Corp., would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at its Calumet, Mayfield, Patterson, and Putnam Oswego plants.)	FEE-4115—FEE-4118	Price exception (sec. 212.-165).
May 4, 1977	Franklin Oil Co., Old Saybrook, Conn. (If granted: Franklin Oil Co. would be assigned a new, lower priced supplier of motor gasoline to replace its base period supplier, the A-1 Oil Co.)	FEE-4121	Exception to change suppliers (sec. 211.9).
Do	Peters Fuel Corp., Oakland, Md. (If granted: The FEA's Mar. 30, 1977, decision and order would be rescinded and Peters Fuel Corp. would be permitted to increase its prices for fuel oil above the maximum level permited under 10 CFR 212.93.)	FXA-1285	Appeal of FEA's decision and order in Peters Fuel Corp., 5 FEA par. ---- (Mar. 30, 1977).
Do	San Joaquin Refining Co., Newport Beach, Calif. (If granted: The FEA's Feb. 1977, entitlement notice issued Apr. 26, 1977, would be revised and San Joaquin Refining Co. would be permitted to sell 39,797 entitlements.)	FEA-1284	Appeal of FEA's February 1977, entitlement notice issued, Apr. 26, 1977.
Do	Texas Pacific Oil Co., Inc., Dallas, Tex. (If granted: Crude oil produced from the W.J. Decker lease within the 1st Wilcox sand unit B, East Baton Rouge Parish, La., would be sold at upper tier ceiling prices without regard to the property's cumulative crude oil production deficiency.)	FEE-4120	Price exception (sec. 212.-72).
May 5, 1977	Elliot's Flying Service, Des Moines, Iowa. (If granted: Elliot's Flying Service would be permitted to increase prices for 80 Octane Av Gas, 100 Octane Av Gas, and K-40 jet fuel above the maximum levels specified in 10 CFR 212.93.)	FEE-4123	Price exception (sec. 212.-93.)
Do	Friendly Neighbors Gas Corp., Henryetta, Okla. (If granted: The Friendly Neighbors Gas Corp. would not be classified as a gas distributor and would not be required to remit a yearly pipeline division fee.)	FEE-4125	Exception.
Do	Gas Del Oro, Inc.; Gas Del Oro International, Inc.; and El Dorado Marketing Co. of Laredo, Houston, Tex. (If granted: The office of private grievances and redress would direct other FEA personnel to take action on the request for an interpretation submitted by Gas Del Oro, Inc.; Gas Del Oro International, Inc.; and the El Dorado Marketing Co.)	FSG-0043	Request for special redress.
Do	Hall, Estill, Hardwick, Gable, Collingsworth & Nelson, P.C. Washington, D.C. (If granted: The FEA information access office would be directed to respond to a request submitted by John M. Coffey for documents relating to the requirement that firms compute inventory costs on a companywide basis.)	FFA-1286	Appeal of FEA's information request denial.
Do	Southland Oil Co., Jackson, Miss. (If granted: Southland Oil Co. would receive an extension of the exception relief granted in the FEA's Dec. 15, 1976, decision and order and would not be required to purchase entitlements under the old oil entitlements program.)	FXE-4124	Extension of the relief granted in Southland Oil Co., 4 FEA par. 83,258 (Dec. 15, 1976).
Do	Victoria Equipment & Supply Co. (If granted: Crude oil produced from Keeran Ranch-D lease in Victoria County, Tex., would be sold at upper tier ceiling prices on a retroactive basis.)	FEE-4122	Price exception (sec. 212.73).

[FR Doc.77-14080 Filed 5-13-77;8:57 am]

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Availability of Final Revised Programmatic Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C) and 10 C.F.R., parts 208, 303, and 305, the Federal Energy Administration (FEA) has prepared a final revised programmatic environmental impact statement (EIS) to reflect the amendment of section 2 of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), 15 U.S.C. 791 et seq., effected by the Energy Policy and Conservation Act, Pub. L. 94-163.

Under ESECA, as amended, the FEA is authorized to prohibit certain powerplants and major fuel burning installations from burning natural gas or petroleum products as their primary energy source and to require certain powerplants and major fuel burning installations in the early planning process to be designed and constructed to be capable of using coal as their primary energy source. The FEA implements this authority by issuing prohibition orders and construction orders, respectively. The final revised ESECA programmatic EIS includes public comments received on the draft revised ESECA programmatic EIS and FEA analyses and responses to those comments.

Single copies of the final revised programmatic EIS may be obtained from FEA's National Energy Information Center, Room 1404, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

Copies of the final revised programmatic EIS will also be available for public inspection in the FEA Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Interested persons are invited to submit comments with regard to the final revised ESECA programmatic EIS to Executive Communications, Box MQ, Room 3309, Federal Energy Administration, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on comments submitted to FEA with the designation, "Final Revised ESECA Programmatic EIS." Fifteen copies should be submitted. All comments should be received by June 17, 1977, in order to receive full consideration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Inquiries concerning the final revised programmatic EIS should be directed to Gerald J. Parker or Beverley Crispin,

Office of Coal Utilization, Federal Energy Administration, Room 6149, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461. 202–566–9580).

Issued in Washington, D.C. on May 12, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

[FR Doc.77–14079 Filed 5–13–77;8:57 am]

MID-CONTINENT PETROLEUM PIPELINE SYSTEMS

Public Hearing and Request for Data on Projected Throughputs for and Capacity

AGENCY: Federal Energy Administration.

ACTION: Notice.

SUMMARY: The Federal Energy Administration (FEA) hereby gives notice that it will hold a public hearing and receive written comments from pipeline companies and refiners and other firms participating in the Canadian Allocation Program (CAP) to enable it to determine the projected throughputs for and capacity of the petroleum pielines in the mid-continent serving Illinois and the Northern Tier states. The data received in this proceeding will enable the agency to assess more accurately the extent to which the mid-continent pipeline system can support additional volumes of domestic crude oil to be moved to Canada and exchanged for Canadian crude oil to supplement refiners' supplies in face of the declining export levels for Canadian crude oil.

DATES: Comments by May 27, 1977; requests to speak by May 24, 1977; statements by May 26, 1977; hearing to be held on May 27, 1977, at 9:30 a.m.

ADDRESSES: Written data and request to speak at the hearing to: Executive Communications, Room 3309, Federal Energy Administration, Box MP, Washington, D.C. 20461; statements to Regulations Management, Federal Energy Administration, Room 2214, 2000 M Street NW., Washington, D.C. 20461.

HEARING HELD AT:

Federal Energy Administration, Room 2105, 200 M Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Deanne Williams (FEA Reading Room), 12th and Pennsylvania Avenue NW., Room 2107, Washington, D.C. (202) 566–9161.

Mario Cardullo (Program Office), 2000 M Street NW., Room 6128, Washington, D.C. 20461 (202) 254–8464.

Michael Paige or Samuel M. Bradley, (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461 (202) 566–9565.

SUPPLEMENTARY INFORMATION:

BACKGROUND

In January 1976 FEA adopted the Mandatory Canadian Crude Oil Allocation Regulations set forth in 10 CFR Part 214 in response to the Canadian National Energy Board's (NEB) decision in 1974 to gradually phase out exports of crude oil to the United States in the early 1980's. The regulations, which are intended to give the refiners that are most dependent on Canadian crude oil additional time to arrange for alternative crude oil delivery systems, provide for the allocation on a preferential basis of crude oil and plant condensate imported from Canada to priority classes of refiners and other firms.

Since 1974, the NEB has accelerated the decline in the export levels of Canadian crude oil, particularly the light crude oils, and many refiners are experiencing increasing difficulty in replacing their Canadian feedstocks. In light of the diminishing supply of Canadian crude oil, crude oil exchanges between United States and Canadian refiners appear to have become an inceasingly important short-term supply supplement for refiners participating in the CAP. Canadian crude oil involved in such exchanges is considered to be outside the Canadian exportable surplus and therefore not subject to FEA's Mandatory Canadian Crude Oil Allocation Regulations.

The potential for crude oil exchanges between United States and Canadian refiners is limited by several factors, including (1) limited pipeline capacity from the Gulf of Mexico through Chicago to support exchanges of domestic for Canadian crude oil; (2) the NEB's policy that the Sarina/Montreal pipeline be maintained at full capacity; and (3) the NEB's requirement that, as one of the conditions precedent to NEB approval of exchanges of forign for Canadian crude oil via the Portland, Maine to Montreal pipeline, FEA confirm that the mid-continent pipeline system is at capacity. With regard to the third factor, at present FEA is greatly limited in its ability to furnish the NEB with meaningful data regarding the capacity of the mid-continent pipeline system because there is no requirement to report such data applicable to the firms which own the pipelines or the refiners which use the system. Although FEA has been able to obtain monthly utilization data from some pipeline companies, the agency does not have sufficient information essential to the development of a comprehensive policy for United States and foreign crude oil exchanges with Canadian refiners, such as monthly, quarterly and annual forecasts of required throughput to the various locations served by each pipeline, maximum pipeline capacity to each location, problems encountered by refiners in obtaining adequate throughput space, and expansion plans of each pipeline company.

In light of the increasing demand among refiners for crude oil exchanges with Canadian refiners in response to the declining export levels for Canadian crude oil, FEA has concluded that it should solicit at this time the pipeline information set forth below to improve FEA's ability to determine more adequately whether exchanges of United States for Canadian crude oil utilizing the mid-continent pipeline system should be limited in volume and duration due to a lack of spare pipeline capacity and, in addition, whether there is a resulting need for exchanges between United States and Canadian refiners involving solely foreign source crude oil.

FEA believes that it has ample existing statutory authority to institute a mandatory reporting requirements for pipeline companies and refiners with respect to the pipeline capacity and throughput information solicited in this notice. In the event that the information received in response to this notice is inadequate, FEA will consider the imposition of a mandatory reporting requirement to elicit the required data. In this regard, FEA specifically requests comments as to the extent to which this information is already available to the U.S. Government; the frequency of reports; what sort of analysis, if any, should accompany reports; the most appropriate reporting mechanism to be utilized; the costs and burdens of such a reporting requirement; and the extent to which pipeline throughput and capacity data should be accorded treatment as proprietary.

DATA REQUESTED FROM PIPELINE COMPANIES

The following information is requested from firms that own and/or operate crude oil and petroleum product pipelines in the mid-continent that provide direct or interconnecting service to Illinois and the Northern Tier states, i.e., Michigan, Wisconsin, Minnesota, North Dakota, Montana and Washington. Information furnished to FEA should not necessarily be limited to the items enumerated below but may be expanded to include any other factors affecting the pipelines' systems capabilities to transport crude oil and petroluem products into the Northern Tier states.

(1) Name of the pipeline, point of origin and locations served.

(2) The rated capacity of the pipeline by segment by calendar quarter for 1976 and the first half of 1977, and the projected rated capacity by calendar quarter for the second half of 1977, 1978, 1979, and 1980. The basis for the capacity figures, i.e., viscosity, service factors, etc., should be identified.

(3) The actual throughput by calendar quarter for 1976 and the first half of 1977, and the projected throughput by calendar quarter for the second half of 1977, 1978, 1979, and 1980. FEA recognizes that projections of throughput are generally used for planning purposes only and that they may vary from actual throughput and requests that the methodology used in developing projections of throughput be set forth.

(4) The crude oil and petroleum product capabilities of the pipeline, including quality of product and crude limitations, segregation requirements, tender sizes, terminal storage requirements and breakout tankage limitations.

(5) Any existing or projected operating constraints, i.e., dock, terminal or pumping limitations, environmental restrictions, etc., and any existing or future capabilities to increase throughput volumes.

(6) Interconnections with other pipelines and transfer capacities.

(7) Proration policy and procedures.

(8) Nomination procedures and time table.

(9) Planned expansions and modifications through 1980.

DATA REQUESTED FROM REFINERS SUBJECT TO CANADIAN ALLOCATION PROGRAM

The following information is requested from the refiners and other firms participating in the CAP that utilize the pipelines in the mid-continent system.

(1) Any operating factors that have limited or will limit utilization of pipelines in the mid-continent system.

(2) Any problems encountered in obtaining adequate throughput space in the mid-continent pipeline system.

In addition to the foregoing specific items, FEA also invites comments from both pipeline companies and refiners participating in the CAP as to an appropriate data collection procedure that will enable FEA to advise the NEB when the mid-continent pipeline system is operating at capacity and thus cannot support additional exchanges of domestic for Canadian crude oil.

CONFIDENTIAL INFORMATION

In accordance with the procedures stated in 10 CFR 205.9(f), any person or firm which believes that any information provided to FEA in its response is a trade secret or commercial or financial information that is privileged or confidental and that disclosure of this information may cause significant competitive damage to it must inform FEA of this conclusion. Specifically, the person or firm must (1) file, together with the response, a second copy of the response on which has been clearly indicated the information the release of which the person or firm believes would cause significant competitive damage and (2) indicate on the original response that it contains confidential information. The person or firm should file a statement which explains, item by item, the exact nature of the significant competitive damage which would result from the release of each item, and whether that item is customarily treated as confidential by the firm and the industry. FEA retains the right to make its own determination regarding any claim of confidentiality. Notice of the decision by FEA to deny such claim in whole or in part, and an opportunity to respond, shall be given to a person or firm claiming confidentiality of information no less than five days prior to its public disclosure.

PROCEDURES FOR PUBLIC HEARINGS AND SUBMISSION OF WRITTEN COMMENTS

A. *Written Comment Procedures.* Interested persons are invited to participate in this proceeding by submitting data, views, or arguments with respect to the specific items for comment set forth in this notice to Executive Communications, Federal Energy Administration. Comments should be identified on the outside of the envelope and on documents submitted to FEA with the designation, "Mid-continent Pipeline System", Box MP. Fifteen copies should be submitted. All written comments should be submitted by 4:30 p.m. on May 27, 1977. All comments received by FEA will be available for public inspection in the FEA Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue, N.W. between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

B. *Public Hearings*—1. *Request procedure.* A public hearing to receive oral presentation of data, views and arguments from interested persons will be held at the time and place indicated earlier in this notice.

Any person who has an interest in the subject matter of this notice, or who is a representative of a group or class of persons which has such an interest, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Executive Communications, FEA, and must be received before 4:30 p.m., May 24, 1977. Such a request may be hand-delivered to Room 3309, Federal Building, 12th and Pennsylvania Avenue N.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. A request should be labeled both on the document and on the envelope "Mid-continent Pipeline System."

The person making the request should be prepared to describe the interest concerned; if appropriate, to state why he or she is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he or she may be reached through May 26, 1977.

Each person selected to be heard will be notified by FEA before 4:30 p.m., May 25, 1977, and must submit 15 copies of his or her statement to the address and by the date given earlier in this notice.

2. *Conduct of hearings.* FEA reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearing to Executive Communications, FEA, before 4:30 p.m., on the day prior to the hearing. Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question in writing to the presiding officer. FEA, or the presiding officer if the question is submitted at the hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer. Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by FEA and made available for inspection in the FEA Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

Issued in Washington, D.C., May 13, 1977.

ERIC J. FYGI,
Acting General Counsel.

FEDERAL MARITIME COMMISSION

CAPITALIZATION OF THE COST OF FUNDS USED DURING VESSEL CONSTRUCTION

Request for Comments and Information

The issue of capitalizing the cost of funds employed during a period of construction has become a matter of interest to both the maritime industry and the Commission. This cost of funds concept includes two elements: (a) actual interest paid on funds borrowed to finance construction, and (b) the cost of other funds, if any, used for construction—representing the cost of equity funds.

Concern over the question of capitalizing actual interest expense during construction is not unique to the maritime industry. The accounting profession, through the Financial Accounting Standards Board, has the matter under active consideration. The Securities and Exchange Commission (SEC) has recently imposed a moratorium on changing to the capitalization method, with exceptions for utility companies, savings and loan associations, and retail land companies, which have all traditionally followed this practice.

The question of capitalization of the cost of using equity funds for construction is another matter. Although permitted by certain regulatory agencies, it does not have the broad support of interest expense capitalization.

Matson Navigation Company, (Matson) a common carrier by water in the domestic offshore trades, has petitioned the Commission to institute a rule-making proceeding which would result in the promulgation of the following rule:

Carriers using the uniform system of accounts prescribed by the Maritime Administration shall include in the original cost of a vessel acquired by the carrier from the builder: (a) actual interest expense paid on funds borrowed to finance the cost of construction of a new vessel or of conversion or alteration of an existing vessel prior to the time the new, converted or altered vessel is placed in service; and (b) the cost of other funds when so used, calculated at a rate representing the cost of the carrier of equity funds.

We do not have sufficient information on the capitalization of the cost of funds used in construction to determine whether the rule proposed by Matson is adequate or whether another rule would be more suitable. Before considering issuance of a Notice of Proposed Rulemaking regarding the capitalization of the cost of construction funds, we wish to solicit comments on the entire question of the capitalization of the cost of construction funds so that the Commission may be better informed as to the scope and impact of any proposed rule. In addition to comments on Matson's proposed rule, we are particularly interested in obtaining comments on the following questions:

(1) Should investment income be applied to reduce interest expense incurred during construction;

(2) Should capitalization of interest expense be limited to vessels, or include other assets;

(3) What method of computing the rate of interest should be used, such as:

(a) prime rate on paper of various maturities;

(b) current rate of long-term debt;

(c) rate to be earned on short-term investment;

(d) historic cost of obtaining construction funds, and

(e) interest on federally insured loans;

(4) What is the impact of cost of funds capitalization on Capital Construction Fund utilization;

(5) When is a period of construction terminated—e.g., date of delivery, date of completion, date asset is introduced into service, etc., and

(6) What is an appropriate method of determining the rate of return on investment when one carrier capitalizes the cost of funds and the other does not?

Interested persons should submit their comments to the Office of the Secretary, Federal Maritime Commission, Washington, D.C. 20573 on or before June 17, 1977.

In light of the foregoing the petition for rulemaking is denied.

By the Commission.

JOSEPH C. POLKING,
Acting Secretary.

[FR Doc.77-14075 Filed 5-16-77;8:45 am]

HAWAII AND MATSON

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Streeet, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement as indicated hereinafter) and the statement should indicate that this has been done.

STATE OF HAWAII
MATSON TERMINALS, INC.

and

CALIFORNIA AND HAWAIIAN SUGAR COMPANY

Notice of Agreement Filed by: E. Alvey Wright, Director, State of Hawaii, Department of Transportation, 869 Punchbowl Street, Honolulu, Hawaii 96813.

Agreement No. T-2171-6, among the State of Hawaii (Hawaii), Matson Terminals, Inc., (Matson) and California and Hawaiian Sugar Company (C & H), modifies the basic agreement between Hawaii and Matson which provides for the lease of marine terminal space by Hawaii to Matson for use primarily as a container facility. The purpose of the modification is to provide for C & H's construction and installation of improvements on Parcel I for the purpose of receiving, storing and handling of bulk liquid molasses produced on the island of Oahu. Hawaii agrees to the intended construction and installation of the improvements and Matson's operation and maintenance of the improvements on behalf of C & H. C & H shall have title to the improvements, however, in the event that the lease is terminated, Hawaii shall have the option to acquire title to the improvements by paying C & H the then fair market value of such improvements.

Dated: May 12, 1977.

By Order of the Federal Maritime Commission.

JOSEPH C. POLKING,
Acting Secretary.

[Docket No. RI77-60]

FEDERAL POWER COMMISSION

ALFRED D. McKELVY

Petition for Special Relief

MAY 10, 1977.

Take notice that on April 15, 1977, Alfred D. McKelvy (Petitioner), c/o Richard Jones, 700 Farm Credit Banks Building, Wichita, Kansas 67202, filed in Docket No. RI77-60 a petition for special relief pursuant to Order Nos. 481 and 551 and § 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76). Petitioner seeks to collect a rate of 30 cents per Mcf after Btu adjustment for the sale of natural gas to Northern Natural Gas Company from the Boyd No. 1 Gas Unit Well, Finney County, Kansas. Petitioner states that due to declining production and age and formation conditions, it was necessary to rework, tube and equip the well for the purpose of disposing of excessive amounts of salt water. Petitioner further states that as a result of reworking and reconditioning the well, it is anticipated that abandonment of the well will be postponed for a period of several years and that additional gas production will be secured.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 31, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-13982 Filed 5-16-77;8:45 am]

[Docket No. CS75-380, et al.]

BOBCAT OIL COMPANY, ET AL.

Notice of Applications for "Small Producer" Certificates [1]

MAY 10, 1977.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and § 157.40 of the regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before June 6, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[Docket No. RP72-142 (PGA77-5)]

CITIES SERVICE GAS CO.

Proposed Changes in FPC Gas Tariff

MAY 5, 1977.

Take notice that Cities Service Gas Company (Cities Service) on April 6, 1977, tendered for filing proposed changes in its FPC Gas Tariff, Second Revised Volume No. 1. Cities Service states that it has filed its Nineteenth Revised Sheet PGA-1 to be effective May 23, 1977, to track tariff changes made by two of its pipeline suppliers, Transwestern Pipeline Company (Transwestern), and Arkansas Louisiana Gas Company (Arkla).

Transwestern has filed its Sixth Revised Sheet Nos. 5 and 6 to its FPC Gas Tariff, Second Revised Volume No. 1, to track increased purchased gas costs and a decreased surcharge adjustment to clear the balance in its Gas Cost Adjustment Account. Such rates will become effective April 1, 1977, pursuant to the order issued March 31, 1977.

Arkla filed its Ninth Revised Sheet No. 185 to its FPC Gas Tariff, Original Volume No. 3, to track increases in its cost of gas due to pipeline supplier rate changes. Such rates became effective January 15, 1977, pursuant to FPC order issued January 18, 1977.

Cities Service states that copies of its filing were served on all jurisdictional customers, interested state commissions and all parties to the proceeding in Docket Nos. RP72-142 and RP76-135.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, Union Center Plaza Building, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-13967 Filed 5-16-77;8:45 am]

[Docket No. CP77-354]

COLUMBIA GAS TRANSMISSION CORP.

Notice of Application

MAY 6, 1977.

Take notice that on April 22, 1977, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, filed in Docket No. CP77-354 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 170 Mcf of natural gas per day for Peoples Natural Gas Company (Peoples), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 170 Mcf of natural gas per day for a 2-year period for Peoples, which volumes would be received by Applicant into its Line 7917 in Menallen Township, Fayette County, Pennsylvania, from Peoples. Applicant states that it would redeliver the subject gas to Columbia Gas of Pennsylvania, Inc. (Columbia Pa.), a wholesale customer of Applicant, at an existing point of delivery located at the outlet side of the McClellandtown Compressor Station, German Township, Fayette County, Pennsylvania. Applicant states that the gas so delivered to Columbia Pa. would balance, in part, continuing intrastate exchange of natural gas between Columbia Pa., and Peoples made pursuant to authority of the Pennsylvania Public Utilities Commission at other locations all within the State of Pennsylvania.

It is stated that the gas to be transported is produced by Peoples from a small production field northwest of Uniontown in Fayette County, Pennsylvania. The production from this field has been declining over the years and the decrease in volume has made the continued operation of Peoples' Union Pump Station economically infeasible, it is said. Applicant asserts that the transportation of this gas would allow Peoples to shut down its Union Pump Station which is obsolete and uneconomical to operate; and provide a means for Peoples to utilize the remaining gas production.

Pursuant to a gas transportation agreement dated March 29, 1977, between Peoples and Applicant, Peoples has contracted to pay Applicant a transportation charge reflecting Applicant's average system-wide unit transmission and gathering costs, exclusive of company-use and unaccounted-for gas, which is 17.24 cents per Mcf. Applicant states it would retain for company-use and unaccounted-for gas a percentage of the total volume received for the account of Peoples, which percentage is currently 3.1 percent.

Applicant further states that it would transport the proposed volumes of gas subject to the limits of its pipeline capacity and to its service obligations to its CD, WS, SGES, G and SGS customers.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 27, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-13985 Filed 5-16-77;8:45 am]

[Docket No. ES77-35]

COMMUNITY PUBLIC SERVICE CO.

Notice of Application

MAY 10, 1977.

Take notice that on April 29, 1977, the Community Public Service Company (Applicant) filed an application pursuant to section 204 of the Federal Power Act with the Federal Power Commission seeking authorization to borrow from certain banks and to issue (prior to March 31, 1979) short-term unsecured promissory notes or commercial paper to evidence such borrowing in the maximum principal amount of $15,000,000.

Applicant was incorporated in the State of Texas on April 18, 1963, and is domesticated in the States of New Mexico and Arizona. Applicant is the surviving corporation following a merger with Community Public Service Company, a Delaware corporation.

According to Applicant, the purpose of the proposed short-term bank loans and commercial paper will be the reimbursement of the Applicant's treasury for expenditures for the construction, completion, extension or improvement of facilities.

Any person desiring to be heard or to protest the said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 23, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-13983 Filed 5-16-77;8:45 am]

[Docket No. RP77-18]

EL PASO NATURAL GAS CO.

Notice of Tender of Tariff Filing

MAY 10, 1977.

Take notice that on May 2, 1977, El Paso Natural Gas Company ("El Paso") tendered for filing, pursuant to Part 154 of the Commission's Regulations Under the Natural Gas Act, certain revised and substitute tariff sheets to its FPC Gas Tariff,[1] providing proposed adjustments to its rates contained on the tariff sheets submitted in the notice of change in rates filed at Docket No. RP77-18 on November 30, 1976, and suspended until June 1, 1977, by order issued December 29, 1976, in this docket.

El Paso states that the rates set forth on the tendered tariff sheets differ from the rates which were suspended in Docket No. RP77-18 in that the suspended rates have been modified by: (i) The required changes resulting from the settlement agreement approved at Docket No. RP72-150, et al.; (ii) the restructured rates as provided by the settlement agreement dated March 21, 1977, pending approval at Docket No. RP76-59; and (iii) the authorized PGAC increases made effective on December 1, 1976, and April 2, 1977, respectively.

Tariff vol. No.	*Tariff sheet designation*
Original vol. No. 1	Substitute 20th revised sheet No. 3-B.
3d revised vol. No. 2	Substitute 10th revised sheet No. 1-D.
Original vol. No. 2 A	Substitute 12th revised sheet No. 1-c.
Original vol. No. 1	Substitute 5th revised sheet No. 63-C.5.
3d revised vol. No. 2	Substitute 5th revised sheet No. 1-M.5.
Original vol. No. 2 A	Substitute 5th revised sheet No. 7-MM.5.
Original vol. No. 1	5th revised sheet No. 27-B.
Original vol. No. 1	6th revised sheet No. 27-C.
Original vol. No. 1	3d revised sheet No. 27-D.

The filing states that El Paso has concurrently filed its motion to place into effect on June 1, 1977, the end of the suspension period in Docket No. RP77-18, the increased rates in Docket No. RP77-18, as contained in the instant tendered, as well as El Paso's related agreement and undertaking respecting El Paso's refund obligations.

El Paso has requested further that the Commission grant waiver of its Regulations Under the Natural Gas Act as may be necessary in order to implement the instant filing on June 1, 1977. El Paso states that copies of the filing and attachments thereto, have been served upon all parties of record in Docket No. RP77-18 and, otherwise, upon all affected customers and interested state regulatory commissions.

Any person desiring to be heard or to make any protest with reference to said tariff filing should, on or before May 24, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations Under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Copies of this filing are on file with the Commission and are available for public inspection.

Acting Secretary.

[FR Doc.77-13979 Filed 5-16-77;8:45 am]

[Docket No. E-9590]

GEORGIA POWER CO.

Filing of Application to Sell Facilities

MAY 10, 1977.

Take notice that on April 19, 1977 Georgia Power Company (Company) tendered for filing an application for an order authorizing (on or before June 1, 1977) the sale of approximately 68 miles of 115 kv transmission lines, 53 miles of 230 kv transmission lines, and nine substations to the City of Dalton, Georgia ("Dalton"). In addition, the Company filed a document on April 19, 1977 entitled "Motion for Waiver of Filing Requirement". In its motion, the Company requested a waiver of the requirement to file Exhibit D (as required by Section 33 of the Commission's Regulations), subject to the right of the Commission's Staff to request the Company to produce such parts of Exhibit D as are, in the opinion of Staff, necessary for its review of the application. According to the Company, the Company has never filed with the Commission a copy of its First Mortgage Indenture dated March 1, 1941, or supplements thereto. The Company states that the Indenture is 223 pages in length and there have been 42 supplements. The Company further states that assembling and copying these documents would require substantial amounts of time and expense. Finally, in its motion for waiver of requirements, the Company states that Dalton desires to purchase the transmission facilities on or before June 1, 1977.

On April 27, 1977, the Company submitted a letter addressed to the Secretary requesting that the Secretary not publish the notice submitted with the April 19th application. Also in that letter, the Company stated that it would provide the Secretary with an updated notice and a revised application.

On May 2, 1977, the Company tendered for filing a document entitled "First Amendment to Application of Georgia Power Company for Authorization to Sell Facilities." In that filed document the Company states that it seeks authority to sell to Dalton approximately 109 miles of 115 kv transmission lines, 48 miles of 230 kv transmission lines, and nine substations to Dalton. The Company also states that the parties have entered into an Integrated Transmission System Agreement (the "Transmission Agreement") providing for the establishment of an integrated transmission system to be operated by the Company and Dalton which will carry both of their loads free of charge (subject to the conditions of the Transmission Agreement). The Company also states that the Transmission Agreement requires an aggregate investment by each party in the transmission facilities which comprise the integrated transmission system in the proportion of the load in which each party (as defined in the Transmission Agreement) bears to the aggregate load on such system. The Company further states that Dalton desires to purchase certain transmission facilities presently owned by the Company which, after such sale, shall become the Dalton Transmission Facilities under the provisions of the Transmission Agreement.

Any person desiring to be heard or to protest said application should file a Petition to Intervene or Protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Petition to Intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP77-61]

McCULLOCH INTERSTATE GAS CORP.

Proposed Changes in Rates and Charges

MAY 9, 1977.

Take notice that on April 29, 1977, McCulloch Interstate Gas Corporation (McCulloch) tendered for filing Eleventh Revised Sheet No. 32 and Second Revised Sheet No. 38 to its FPC Gas Tariff, Original Volume No. 1. The Proposed effective date of such revised tariff sheets is June 1, 1977. McCulloch proposes to increase its presently effective PL-1 rate to 132.66¢ per MMBtu (14.65 psia). The presently effective PL-1 rate is subject to final Commission action in Docket No. RP75-98 and McCulloch's pending PGA filing in Docket No. RP73-91. This proposed change in rate is made to recover increases in the cost of service on sales of gas in the Powder River Basin, Wyoming to Colorado Interstate Gas Company ("CIG"), due to diminishing gas reserves, and to insure a reasonable rate of return. McCulloch also proposes to decrease its presently effective X-1 rate to 7.67¢ per Mcf (14.65 psia). The presently effective X-1 rate is subject to final Commission action in Docket No. RP76-66. This proposed rate represents an annual increase in revenues of approximately $43,800 over that amount agreed to by stipulation between CIG and McCulloch in the aforementioned pending Docket No. RP76-66 proceeding. This proposed change in rate is made to recover the same increase in cost referred to hereinabove for PL-1 rates for the transporting of gas from the Spearhead Ranch Area, Wyoming through McCulloch facilities to CIG's Powder River Lateral, Section 34, Township 36 North Range 73 West, Converse County, Wyoming, and to insure a reasonable rate of return. McCulloch states further that this rate request will be applicable to sales of gas in Montana-Wyoming Area. According to McCulloch, its total net operating revenue for 1976 was $4,793,183.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, Washington, D.C. 20426, in accordance with § 1.8 and 1.10 of the Commission's Rules of Practice and Procedures (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-13974 Filed 5-16-77;8:45 am]

[Docket No. RP77-58]

MID LOUISIANA GAS CO.

Proposed Change in FPC Gas Tariff

MAY 9, 1977.

Take notice that Mid Louisiana Gas Company (Mid Louisiana) on April 29, 1977, tendered for filing as a part of First Revised Volume No. 1 of its FPC Gas Tariff, Twenty-Fifth Revised Sheet No. 3a, Original Sheet No. 12c, Original Sheet No. 12d and Third Revised Sheet No. 26b.

Mid Louisiana states that the purpose of the filing is to reflect an increase in rates to be effective June 15, 1977, to submit a new transportation rate schedule and to make a change in the method of computing future purchased gas adjustments to reduce future surcharges. The proposed changes would increase Rate Schedules G-1, SG-1 and I-1 from 81.13 cents per Mcf to 108.73 cents per Mcf based on operations for the calendar year 1976, as adjusted.

Mid Louisiana states that the principal reasons for the proposed increase are (1) the cost increases arising from the connection and transportation of new sources of supply, at higher costs, to replace declining volumes from existing sources, (2) increases in employee pay-

roll and benefit program expenses, and (3) other cost increases net of decreases arising during the past two years. Adjustments have also been made to reflect cost decreases associated with Mid Louisiana's sale of the Hester Storage Field to Transcontinental Gas Pipe Line Company (Transco) and the cost of future storage services to be provided by Transco. Mid Louisiana states that the net effect of these adjustments does not have a significant impact upon the Company's rates.

Copies of the filing have been served on interested customers and state commissions.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E. Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. RP76-4].

NATIONAL FUEL GAS SUPPLY CORP.

Filing of Revisions to Settlement Agreement

MAY 9, 1977.

Take notice that on April 18, 1977, National Fuel Gas Supply Corporation (National Fuel) tendered for filing certain revisions to the proposed settlement agreement certified to the commission in the captioned proceeding on September 27, 1976. National Fuel states that the revisions, having resulted from further settlement discussions among the parties, reduce the settlement cost of service by $23,666.

Any person desiring to be heard or to protest said revisions to the proposed settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before May 23, 1977. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

[Project Nos. 2498 and 2499]

NEKOOSA PAPERS INC.

Notice of Application for Approval of Transfer of Licenses

MAY 9, 1977.

Public notice is hereby given that an application was filed on March 11, 1977, under the Federal Power Act, 16 U.S.C. 791a–825r, by Nekoosa Papers Inc. (Correspondence to: Mr. Robert R. Johnson, Secretary, Nekoosa Papers Inc., 100 Wisconsin River Drive, Port Edwards, Wisconsin 54469; and Mr. John M. Forester, Ruder, Ware, Michler & Forester, S.C., P.O. Box 1244, Wausau, Wisconsin 54401) for Commission approval of the transfer of the minor licenses for the Hewittville Project, FPC No. 2498, and the Unionville Project, FPC No. 2499, to Potsdam Paper Corporation of Wilmington, Delaware. Projects Nos. 2498 and 2499 are located in St. Lawrence County, New York, on the Raquette River.

The Hewittville Project consists of: (1) a combination gravity and buttress dam 550 feet long and 19 feet high above bedrock, with flashboards which add two feet to the height of the dam when used; (2) six 18-foot-deep and 13-foot-wide masonry flumes which convey water to six waterwheels; and (3) a reinforced steel and concrete powerhouse containing generating facilities with a total installed capacity of 1,770 horsepower.

The Unionville Project consists of: (1) a concrete buttress dam 299 feet long and 18 feet high, with flashboards which add two feet to the height of the dam when used; (2) a masonry flume 18 feet wide and 80 feet long; and (3) a brick and reinforced concrete powerhouse containing generating facilities with a total installed capacity of 1,859 horsepower.

The projects are located adjacent to paper mills and the power generated at the projects is utilized in the mill operations.

Potsdam Paper Corporation has filed a certificate of incorporation, corporate by-laws, and a certificate of authority to do business in the State of New York as evidence of its compliance with all applicable State laws as required by Section 9(b) of the Federal Power Act, 16 U.S.C. 802(b). Following the conveyance of title to the project properties, the transferee would submit certified copies of all of the instruments of conveyance.

Applicant has requested the shortened procedure provided for under Section 1.32(b) of the Commission's Rules of Practice and Procedure, 18 CFR 1.32(b) (1976).

Any person desiring to be heard or to make any protest with reference to said application should, on or before June 1, 1977, file with the Federal Power Commission, 825 N. Capitol St., N.E., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules, of practice and procedure, 18 CFR § 1.8 or § 1.10 (1976). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and conferred upon the Federal Power Commission by sections 308 and 309 of the Federal Power Act, 16 U.S.C. 825g and 825h, and the Commission's rules of practice and procedure, specifically § 1.32(b), a hearing on this application may be held before the Commission without further notice if no issue of substance is raised by any request to be heard, protest, or petition filed subsequent to this notice within the time required herein. If an issue of substance is so raised, further notice of hearing will be given.

Under the shortened procedure herein provided for, unless otherwise advised, it will not be necessary for Applicant to appear or be represented at the hearing before the Commission.

The application is on file with the Commission and is available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. G-17350, etc.]

PACIFIC GAS TRANSMISSION CO. AND NORTHWEST PIPELINE CORP.

Order Granting Reconsideration and Amending Prior Order

MAY 9, 1977.

On February 17, 1977, the Commission issued an order in the above docketed proceeding authorizing the continued importation of gas from Canada by Northwest Pipeline Corporation (Northwest) [Docket No. CP75-340] together with permission for Pacific Gas Transmission Company (PGT) [Docket Nos. G-17350, G-17351, CP69-346 and CP69-347] to transport the imported gas on a best efforts basis for the benefit of Northwest. Ordering Paragraph (C) of the February 17, 1977 order conditioned the importation such that none of the volumes "shall be used to displace alternate fuel capability or cause the gas to displace alternate fuel capability." On March 21, 1977, Northwest filed an untimely application for rehearing[1] requesting that the condition contained in Ordering Paragraph (C) be deleted. PGT submitted, on April 4, 1977, a statement in support of the Northwest application.

The most recent Northwest import request is a continuation of a series of arrangements with Canadian companies first authorized in Docket No. CP73-332 by order issued September 21, 1973.[2] The historical context of the Northwest imports is set forth in our February 17, 1977 order in this proceeding, and it is sufficient to note here that the instant application is part of an established pattern of imports that provides a substantial portion of the base supply of Northwest.

In its application for reconsideration, Northwest points out the long-term nature of the Canadian imports and their contribution to base supply. Northwest attempts, thereby, to differentiate its situation from the emergency type imports authorized this part winter,[3] which Northwest surmises, was the cause of the alternate fuel capability condition being imposed on it, since none of Northwest's prior import authorizations contain this restriction. Furthermore, Northwest contends that because the Canadian gas is part of its base supply used to service high priority customers, the possibility could arise that a Northwest customer may use imported gas to displace alternate fuel. Northwest concludes, therefore, that the logical result of the condition in Ordering Paragraph (C) would be to entirely prevent Northwest from being able to take the Canadian gas, thereby depriving its distributor customers of much needed gas supply.

Northwest has protested the inclusion of Ordering Paragraph (C) of the February 17, 1977 order primarily because it is not applicable to its particular situation, but the company also argues that Ordering Paragraph (D), to which Northwest is not opposed, will provide the same public interest protections as were intended by the alternate fuel capability displacement condition in Ordering Paragraph (C). Ordering Paragraph (D) provides that the importation is allowed with the understanding that Northwest may in the future be required by the Commission to sell the Canadian volumes to another pipeline with a greater need to protect high priority uses.

Upon reconsideration, we find that the alternate fuel capability displacement condition contained in Ordering Paragraph (C) of the February 17, 1977, order should be deleted. That restriction was imposed on the recipients of emergency foreign purchases for the purpose of insuring that the vitally needed assistance from Canada would be preserved for uses that only natural gas could satisfy and to prohibit the recipients from utilizing the more expensive imported gas to serve new customers. The Commission continues to encourage Northwest's customers to actively change over to alternate fuels where possible. The Commission is also opposed to the use of imported gas to permit the addition of system customers. However, due to Northwest's need for imported gas to service its base customers and the practical problems Northwest has in monitoring numerous indirect customers, the alternate fuel capability condition imposed on the company by Ordering Paragraph (C) of the February 17, 1977, order should be deleted.

The Commission finds: The motion of Northwest for reconsideration of the order issued on February 17, 1977, should be granted, and Ordering Paragraph (C) of said order should be deleted therefrom.

The Commission orders: The motion for reconsideration of the February 17, 1977, order in Docket Nos. G-17350, et al., filed by Northwest on March 21, 1977, is granted and Ordering Paragraph (C) of said order is herewith deleted therefrom.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-13965 Filed 5-16-77;8:45 am]

[1] We will treat the late-filed application of Northwest as a motion for reconsideration.

[Docket No. RP77-62]

TENNESSEE GAS PIPELINE CO.

Filing of Proposed Changes in Rates

MAY 6, 1977.

Take notice that on April 29, 1977, Tennessee Gas Pipeline Company a Division of Tenneco Inc. (Tennessee), tendered for filing proposed changes in its FPC Gas Tariff to be effective June 1, 1977, consisting of the following revised tariff sheets:

Ninth Revised Volume No. 1: Seventh Revised Sheet Nos. 12A and 12B.

Sixth Revised Volume No. 2: Second Revised Sheet Nos. 246D, 247D, 248D, 249H, and 249I; Third Revised Sheet No. 245D; Fourth Revised Sheet Nos. 76 and 215; Fifth Revised Sheet Nos. 53, 54, 77 and 141; Eighth Revised Sheet Nos. 11 and 12.

The proposed changes would increase revenues from jurisdictional sales and services by $41,492,762 based on a test period consisting of the twelve months ended January 31, 1977, adjusted for known changes through October 31, 1977.

Tennessee states that the increased rates are required to reflect declining sales due to gas supply curtailment, an increase in rate of return to 11.67 percent and related income taxes, increased plant and related expenses, and increases in the cost of materials, supplies, wages, and taxes.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-13968 Filed 5-16-77;8:45 am]

[Docket No. RP76-99]

TENNESSEE NATURAL GAS LINES, INC.

Filing of Stipulation and Agreement in Settlement of Rate Proceeding

MAY 10, 1977.

Take notice that on May 2, 1977, Tennessee Natural Gas Lines, Inc. (TNGL)

filed with the Commission a Stipulation and Agreement proposed in settlement of the above captioned rate proceeding and a motion for approval thereof. TNGL states that the Stipulation and Agreement, if approved by the Commission, provides for resolution of all issues in this proceeding "with the exception of the issue as to the proper-rate-making treatment to be applied to TNGL's LNG facilities and operations, which issue is reserved for hearing."

Any person desiring to be heard or to protest said stipulation and agreement should file comments with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before June 1, 1977. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-13977 Filed 5-16-77;8:45 am]

[Docket No. CP77-362]

TEXAS GAS TRANSMISSION CORP.

Application

MAY 6, 1977.

Take notice that on April 28, 1977, Texas Gas Transmission Corporation (Applicant), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP77-362 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction, installation, and operation of two 1,100 horsepower compressor units and related pipeline facilities, and for permission and approval to abandon and relocate certain other facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is indicated that on March 17, 1977, Applicant was granted temporary authorization to install and operate a 1,100 horsepower, skid-mounted compressor engine as an emergency and temporary measure to ensure that Applicant would be able to receive 51,000 Mcf of natural gas per day (at 14.73 psia) which had, prior to February 23, 1977, been received through a three-way, best-efforts exchange arrangement among Applicant, Transcontinental Gas Pipe Line Corporation (Transco) and United Gas Pipe Line Company (United). Applicant states that on February 23, 1977, the exchange delieveries were terminated because of United's need for capacity to handle emergency deliveries of gas in the segment of United's system which was involved in the three-way exchange.

It is stated that in addition to providing a long-term solution of the three-way exchange, supra, the facilities have been designed to enable Applicant to bring directly into its system all gas being transported by Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), and Columbia Gulf Transmission Company (Columbia Gulf) through their offshore facilities, as well as to provide flexibility which is needed in an important segment of Applicant's supply system.

Applicant requests authorization to construct, install, and operate the following facilities:

Approximately 18.88 miles of 20-inch pipeline and appurtenant facilities in Acadia Parish, Louisiana, extending from Applicant's Eunice, Louisiana Compressor Station to the western terminus of Columbia Gulf's Blue Water System;

Two 1,100 horsepower compressor units to be relocated at Applicant's Eunice Compressor Station; and

Approximately .13 miles of 24-inch pipeline interconnecting Applicant's Eunice-Grand Cheniere pipeline and Michigan Wisconsin Pipe Line Company's (Michigan-Wisconsin) 30-inch pipeline near Grand Cheniere, Cameron Parish, Louisiana.

Applicant states that approximately 9.50 miles of the 18.88 miles of 20-inch pipeline would be pipe which would be removed from the Sharon-Carthage line of Applicant and relocated, and that only 9.38 miles of new 20-inch pipeline would be needed to complete the proposed interconnection between the Blue Water System and Application's Eunice Compressor Station. The 9.50 miles of the 13.61 miles of 20-inch loop pipeline to be relocated is the only portion of the 13.61 miles of 20-inch loop pipeline located on the Sharon-Carthage line which is reusable, it is said.

It is stated that the two existing 1,100 horsepower compressor units proposed to be relocated in the Eunice Compressor Station are presently installed in Applicant's Sharon, Louisiana Compressor Station, and that because of declining gas supplies in the North Louisiana and East Texas Areas attached to Applicant's system. Applicant does not foresee utilizing such units in the future. The estimated cost, to be financed from funds on hand, of the proposed facilities, including relocation, is $6,306,120, it is said.

Applicant requests permission and approval to abandon and relocate the following facilities:

Approximately 13.61 miles of 20-inch loop pipeline on its Sharon-Carthage line, of which approximately 9.50 miles would be relocated in South Louisiana; and

Two 1,100 horsepower compressor units proposed to be removed from the Sharon Compressor Station and relocated at Applicant's Eunice Compressor Station.

The 18.88 miles of 20-inch pipeline and the compressors proposed herein would be utilized by Applicant to receive directly into its system deliveries of natural gas transported for Applicant by Columbia Gulf and Tennessee through their offshore facilities, it is said. Applicant states that it proposes to abandon and relocate the reusable portion of the existing 20-inch loop pipeline, which is no longer required for service on the Sharon-Carthage line, to provide a portion of the pipeline required herein, in order to conserve energy and to utilize more fully the facilities of applicant's system. Applicant also proposes to retire two 1,100 horsepower compressor units and the property associated therewith at the Sharon Compressor Station and relocate certain of these facilities at Applicant's Eunice Compressor Station. Applicant states that one unit would transport gas which Applicant receives through the Blue Water System, and that the other unit would be used as a spare, or as required additional compression, in the event that significant additional quantities of gas are transported through the proposed line. Applicant further states that in this connection, the long-term supply projections for Applicant indicates that its major sources would be from the offshore Louisiana and offshore Texas Areas, and the relocation of unused horsepower located in North Louisiana, where development is relatively minor as compared to South Louisiana, provides flexibility in an area of increasing importance at the lowest cost.

It is stated that the other two units presently installed at the Eunice Compressor Station would be used to provide for continuity of service for additional gas supplies, and would be transported for Applicant through the High Island Offshore System and Michigan Wisconsin from Offshore Texas, thus assuring continuity of service for the gas which it would purchase offshore Texas. The Grand Cheniere tie-over to the facilities of Michigan Wisconsin would provide additional flexibility in the event of an outage on either system between Grand Cheniere and Eunice, which is an important segment of Applicant's supply system, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 31, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH E. PLUMB,
Secretary.

[FR Doc.77-13966 Filed 5-16-77;8:45 am]

[Docket No. CP76-363]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Petition To Amend

MAY 10, 1977.

Take notice that on April 28, 1977, Transcontinental Gas Pipe Line Corporation (Petitioner), P.O. Box 1396, Houston, Texas 77001, filed in Docket No. CP76-363 a petition to amend the Commission's order of August 13, 1976 (56 FPC—), issued in the instant docket pursuant to Section 7(c) of the Natural Gas Act and Section 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) so as to authorize Petitioner to render a new transportation service for Pine Hall Brick and Pipe Company, Inc. (Pine Hall) for gas purchased pursuant to a gas purchase contract, dated March 21, 1977, between Pine Hall and Herbert L. Miller and M. M. Miller, Jr., dba M. M. Miller & Sons (Miller), a producer in Duval County, Texas, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

On August 13, 1976, Petitioner was authorized to transport, on an interruptible basis, up to 1,250 Mcf of natural gas per day for Pine Hall for use in its brick plant at Madison, North Carolina. Petitioner states that it transported such gas to North Carolina Gas Service Division of Pennsylvania and Southern Gas Company (N.C. Gas), one of Petitioner's resale customers served under Rate Schedule CD-2, and that the gas was purchased from Wm. T. Burton Industries, Inc. and El Toro Production Corp., pursuant to a contract dated March 22, 1976, from production in the Egan Field, Acadia Parish, Louisiana. Because of salt water flooding of the well shortly after production commenced, deliveries from such well ceased in October 1976 and have not resumed, it is said. Petitioner states that efforts to rework the well have failed and such contract has been canceled. Petitioner indicates that Pine Hall gas supply has been completely curtailed since the end of November 1976.

It is stated that in order to obtain a supply of gas, Pine Hall has now executed a gas purchase contract, dated March 21, 1977, with Miller to purchase an estimated average daily quantity of 500 Mcf of natural gas and up to 1,250 Mcf per peak day from wells located in the Longhorn West Field, Duval County, Texas for a period ending August 1, 1977. Pine Hall and Miller have the option to extend such sale and purchase of gas under terms to be agreed upon, it is said. Petitioner indicates that Pine Hall would pay Miller $2.25 per million Btu's inclusive of existing taxes levied on the gas prior to delivery.

It is stated that Miller would deliver the subject gas to Esperanza Oil & Gas Company (Esperanza) at the inlet side of the measurement facilities of Esperanza's Benavides (J&J) Gathering System near Petitioner's pipeline in Section 24 of the Agua Poquita Survey Santos Flores Grant A-213, Duval County, Texas, and Esperanza would dehydrate and measure the gas and redeliver such gas to Petitioner at the existing point of interconnection between Esperanza's and Petitioner's pipelines designated Transco Meter Stations Nos. 1010 and 1011. Esperanza would charge Pine Hall 5 cents per Mcf for the gathering, dehydration and measurement services, it is said.

Petitioner states that it has entered into a transportation agreement, dated April 4, 1977, with Pine Hall and N.C. Gas, and that the subject agreement amends their previous transportation agreement dated April 8, 1976. Such agreement, as amended, provides that Petitioner would transport the subject gas for Pine Hall to existing delivery points of N.C. Gas in order that N.C. Gas may deliver such gas to Pine Hall's Madison, North Carolina plant. Petitioner proposes to increase its transportation rates for interruptible transportation into Zone 2 to 45.8 cents per Dekatherm. Pine Hall is said to be in Petitioner's Zone 2.

Petitioner states that it would retain 3.8% of the quantities of gas it receives for compressor fuel and line loss make-up.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 23, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-13969 Filed 5-16-77;8:45 am]

[Docket No. RP77-64]

VALLEY GAS TRANSMISSION, INC.

Proposed Change in Rates

MAY 9, 1977.

Take notice that on April 29, 1977, Valley Gas Transmission, Inc., ("Valley"), filed proposed increased rates to its jurisdictional sale-for-resale customers. Valley also proposed an increase in its rate for jurisdictional transportation service. The proposed effective date is June 1, 1977.

The increased revenues from the rates as proposed would amount to $290,337 annually.

Any person desiring to be heard or to make any protest with reference to said filing should on or before May 23, 1977, file with the Federal Power Commission, Washington, D.C. 20426 a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedures (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-13973 Filed 5-16-77;8:45 am]

[Docket No. RP77-94]

WESTERN GAS INTERSTATE CO.

Proposed Changes in FPC Gas Tariff

MAY 9, 1977.

Take notice that on May 2, 1977, Western Gas Interstate Company ("Western") tendered for filing proposed changes in its FPC Gas Tariff to be effective on June 1, 1977, consisting of the following tariff sheets:

Seventh Revised Sheet No. 3A.
First Revised Sheet No. 33A.
First Revised Sheet No. 33B.
First Revised Sheet No. 33C.

The proposed changes would increase revenues from jurisdictional sales by $774,452 based upon the twelve month period ending December 31, 1976, as adjusted. Such revenue increase is exclusive of increases in purchased gas costs which will occur prior to the rates involved becoming effective and which would otherwise be recovered through the purchased gas adjustment clause provisions of Western's tariff. Western states that, at the time it moves to make effective the rates involved in the instant proceeding, it will revise the tendered base tariff rates so as to reflect its actual purchased gas costs as of the time of the rates becoming effective.

Western states that the principal reasons for the proposed rate increase are: (1) increase in overall rate of return necessary to maintain its financial integrity; (2) increases in plant and related cost of service items: (3) increases in cost of materials, supplies, wages, services, and other operating expenses necessary to maintain and operate its pipeline system and appurtenances; (4) increase in working capital; and (5) increases in taxes other than income.

Western states that there are other changes in its tariff in the sheets tendered but that these changes are either minor

word changes for clarification, updating of required information, or changes required to bring such sheets into conformity with the proposed rates.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-13972 Filed 5-16-77;8:45 am]

[Docket No. CP77-347]

WESTERN GAS INTERSTATE CO.

Notice of Application

MAY 6, 1977.

Take notice that on April 18, 1977, Western Gas Interstate Company (Applicant), 1800 First International Building, Dallas, Texas 75270, filed in Docket No. CP77-347 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of approximately 10.12 miles of 4-inch transmission line and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that Southern Union Supply Company (Susco), has filed with the Commission applications in Docket Nos. CI76-578 and CI76-579 for authority to sell gas to Southern Union Company (Southern Union) and El Paso Natural Gas Company (El Paso), respectively, and that the gas involved is to be produced for the Gallagher No. 2 Well. Applicant states that the subject gas would be gathered by Phillips Petroleum Company (Phillips), processed at Phillips' Lusk Gasoline Plant in Lea County, New Mexico, and delivered to El Paso at the tailgate of the Lusk Plant. Applicant further states that the primary purchaser of such gas would be Southern Union, and El Paso would transport the gas to be sold to Southern Union to various points along El Paso's lines in Texas, New Mexico, and Arizona for delivery to Southern Union. Whatever gas is not purchased by Southern Union would be sold by Susco to El Paso, it is said.

It is stated that Susco and Applicant developed a three-well proposal under which gas would be produced by Susco from three wells (The Gallagher No. 3 Well and the Supco State No. 1 Well, in addition to the Gallagher No. 2 Well), and delivered by Applicant through a proposed 4-inch line to a mutually agreeable point of interconnection with the Lusk-to-Caprock 20-inch pipeline of El Paso.

The facilities which Applicant requests authorization to construct and operate are described as follows:

(a) Approximately 10.12 miles of 4-inch transmission line and appurtenant facilities necessary to transport gas from the Gallagher No. 2 Well, the Gallagher No. 3 Well, and the Supco State No. 1 Well in Lea County, New Mexico, to a point of interconnection with the Lusk-to-Caprock 20-inch pipeline of El Paso; and

(b) Authority to transport and deliver said gas to El Paso.

Applicant indicates that the total estimated cost of the proposed facilities is $487,166, which cost would be financed from cash on hand, supplemented as necessary by short-term borrowings.

Applicant asserts that the construction and operation of the proposed transmission facilities, and the subject transportation of such gas pursuant to the three-well proposal would result in greater quantities of gas for the interstate market at lower prices.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 27 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.-10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-13584 Filed 5-16-77;8:45 am]

[Opinion No. 798; Docket Nos. CP76-220, CI76-346]

ARKANSAS LOUISIANA GAS CO. v. AMAREX, INC.

Opinion and Order Directing the Delivery of Natural Gas

MAY 9, 1977.

1. On December 22, 1975, Arkansas Louisiana Gas Company (Arkla) filed a complaint in Docket No. CP76-220 asking the Commission to direct Amarex, Inc. (Amarex) to deliver Amarex's share of the natural gas produced from the Helmerich & Payne Cupp "C" No. 1 Well, Beckham County, Oklahoma (the Cupp C No. 1 Well) to Arkla pursuant to a prior dedication of that gas to interstate commerce. On January 14, 1976, Amarex filed a petition in Docket No. CI76-346 for a declaratory order that the natural gas in question is not dedicated to Arkla in interstate commerce. The Commission, on January 29, 1976, transmitted a copy of Arkla's complaint to Amarex and gave and published notice of the commencement of both proceedings. On February 17, 1976, Amarex filed an answer to the complaint in which it admitted the allegations of fact but denied the conclusion that the gas in question is deliverable to Arkla, reasserted the allegations in its petition for declaratory relief, moved for consolidation of the two proceedings on the basis of identity of issues and moved, further, for a decision on the pleadings on the basis that there are no factual issues. On March 5, 1976, Arkla filed an answer and joined Amarex's motion insofar as it sought consolidation, but requested a hearing on the ground that "the issue presented in these proceedings may not be entirely a legal issue.

2. By order issued July 15, 1976, the Commission, among other matters, found that there are no factual issues, consolidated Docket Nos. CP76-220 and CI76-346 for the purpose of decision and set a briefing schedule for direct Commission decision. The record before us therefore consists of the pleadings (including the briefs) and the attached documents which have been filed in the respective dockets, together with the notices and orders which have been issued therein. Additionally, we take official notice of Docket No. CS71-92 which contains, among other matters, Amarex's application for the small producer certificate of public convenience and necessity pursuant to which the natural gas service involved herein is claimed by Arkla to have been certificated, as well as certain other documents as specified herein.

THE "DEDICATION"

3. On or about May 4, 1967, the First State Bank of Pittsburg, Pittsburg, Kansas, and Isadore E. De Lappe, as co-trustees of certain testamentary trusts, executed an oil and gas lease (the 1967 Lease) to Sinclair Oil & Gas Company (Sinclair) covering approximately 160 acres which are identified therein as "The Southeast Quarter (SE/4) in Section 22, Township 10N, Range 26W" situated in Beckham County, Oklahoma,[1] for the term ending September 26, 1972, and as long thereafter as any of the products covered by the lease "is or can be produced." Among other matters, the lease authorized the unitization of the Southeast Quarter or any portion of it and provided, in this connection,

> "Any well drilled or operations conducted on any part of each such unit shall be considered a well drilled or operations conducted under this lease, and there shall be allocated to the portion of the above described land included in any such unit such proportion of the actual production from all wells on such unit as lessors' interest, if any, in such portion, computed on an acreage basis, bears to the entire acreage of such unit. And it is understood and agreed that the production so allocated shall be considered for all purposes, including the payment or delivery or royalty, to be the entire production from that portion of the above described land included in such unit in the same manner as though produced from the above described land under the terms of this lease."

In other words, unitization would transform the leasehold into an undivided part of a larger whole.[2]

4. Sinclair's interest in the 1967 Lease was assigned to Amarex on January 15, 1970, as part of an assignment of a large number of leases on that date. Thereafter, under a Gas Purchase Contract dated June 6, 1970 (the 1970 Gas Purchase Contract), Amarex agreed to sell and deliver to Arkla, and Arkla agreed to purchase and receive from Amarex "the natural gas production attributable to [Amarex's] interest in all Contract Wells, and to that end [Amarex] hereby subjects and commits hereto the Contract Leases" for the term ending on the 20th anniversary of the date of the first delivery from the subject properties.[3] The term, "'Contract wells'," in the 1970 Gas Purchase Contract, "refers to all wells now or hereafter completed as commercially productive of natural gas on lands covered by the Contract Leases or on a production unit which includes any part of said lands," and the term, "'Contract Leases' refers to the oil and gas leases and other mineral interests described in the schedule attached hereto and made part hereof as Exhibit A."[4]

5. Pursuant to another agreement dated June 6, 1970, Amarex assigned a 25 percent interest in the Exhibit A Contract Leases, including the 1967 Lease, to Arkla Exploration Company (Arkla Exploration), an affiliate of Arkla.[5] And by agreement dated August 20, 1970,[6] Arkla Exploration agreed to sell and deliver to Arkla, and Arkla agreed to purchase and receive form Arkla Exploration, Arkla Exploration's "share of all production attributable to" the Exhibit A Contract Leases, including the 1967 Lease, "on the same terms and conditions" as under the 1970 Gas Purchase Contract.

6. On November 2, 1970, Amarex filed an application in Docket No. CS71-92 pursuant to § 157.40 of the Commission's Regulations under the Natural Gas Act for a small producer certificate of public convenience and necessity. By Order No. 428 issued March 18, 1971, the Commission amended § 157.40 to provide in subsection (b) that such certificates would thereafter be blanket certificates covering existing and future jurisdictional sales.[7] And thereafter, by order issued in Docket No. CS71-92 on August 12, 1971, the Commission issued a blanket small producer certificate to Amarex (and to the applicants in numerous other dockets covered by the order) "authorizing the sale for resale and delivery of natural gas in interstate commerce by Applicants . . . as more fully described in the applications in this proceeding." The order also provides,

> "The grant of the certificates • • • shall not imply approval of all of the terms of the contracts, particularly as to the cessation of service upon the termination of said contracts as provided by Section 7(b) of the Natural Gas Act."

7. Deliveries of natural gas to Arkla pursuant to Amarex's certificate of public convenience and necessity in Docket No. CS71-92 commenced under the 1970 Gas Purchase Contract on November 4, 1971, from acreage other than the Southeast Quarter and, conversely, "no natural gas was ever produced under the terms of the 1967 Lease."[8] On or about April 18, 1972, some five months before the primary term of the 1967 Lease was about to expire, The First State Bank of Pittsburg, Pittsburg, Kansas, and Isadore E. De Lappe, as co-trustees of the same testamentary trusts, executed an oil and gas lease (the 1972 Lease) of the Southeast Quarter to Amarex for a primary term of five years beginning September 26, 1972. The 1972 Lease is prepared on a more current revision of the form on which the 1967 Lease is prepared and contains provisions, including these pertaining to unitization, which are similar but not identical to those contained in the 1967 Lease. Furthermore, Amarex assigned a 25 percent interest in the 1972 Lease to Arkla Exploration pursuant to their agreement of June 6, 1970.

8. On February 17, 1975, Helmerich & Payne, as operator for Amarex and others, commenced drilling the Cupp C No. 1 Well in the Southwest Quarter in Section 22, Township 10N, Range 26W, Beckham County, Oklahoma (the Southwest Quarter), which apparently has not at any time been dedicated to interstate commerce, and the well was completed as a commercial producer of natural gas on August 21, 1975. The Southeast and Southwest Quarters, together with the other two quarters of Section 22, Township 10N, Range 26W, Beckham County, Oklahoma, have been designated as a 640 acre unit for the production of natural gas from the Cupp C No. 1 Well,[9] and the respective working interests attributable to the leaseholds embraced by that unit are committed for sale, and the production therefrom has been delivered (through the end of May 1976), as follows:

[In percent]

	Committed	Delivered[1]
To Michigan Wisconsin Pipe Line Co. (interstate)	36.42578	76.5
To Oklahoma Natural Gas Co. (intrastate)	38.57422	8.7
To Arkla (Arkla Exploration's interest—interstate)	6.25000	14.8
In dispute (Amarex's interest)	18.75000	0
Total	100.00000	100.0

[1] Although Amarex contends that Arkla is taking delivery of that part of Amarex's interest which exceeds Arkla's 6.25 pct interest, Arkla responds that its overtakes are within the parameters of the industry practice of balancing new wells pending the marketing of all fractional interests and the development of delivery patterns. Payments due Amarex from Arkla are being held in a suspense account pending resolution of the controversy and a final accounting of the volumes of gas.

POSITIONS OF THE PARTIES

9. Amarex takes the position in its initial brief that its share of the natural gas produced from the Cupp C No.

---

[1] For convenience and particularly to distinguish the acreage from other acreage with which it was unitized, "The Southeast Quarter (SE/4) in Section 22, Township 10N, Range 26W" will be referred to simply as the Southeast Quarter.

[2] The lease also provides, "All provisions hereof, express or implied, shall be subject to all federal and state laws and the orders, rules or regulations (and interpretations thereof) of all governmental agencies administering the same • • •"

[3] The earliest date on which the 1970 Gas Purchase Contract can expire according to its terms is November 4, 1991.

[4] Exhibit A consists of some 134 pages headed "Undeveloped Oil & Gas Leases". In view of the differences in the numbers of leases identified on each page, and the deletions and hand written additions, an exact count of the number of leases embraced by Exhibit A has not been attempted. It appears, however, that at least 2,000 and probably not more than 3,000 leases, including the 1967 Lease, are so embraced by the 1970 Gas Purchase Contract.

[5] The agreement recites that Exhibit A covers approximately 290,000 net leasehold acres.

[6] The agreement dated August 20, 1970, is filed (insofar as it concerns Oklahoma acreage) as Arkla Exploration's FPC Gas Rate Schedule No. 29 and covers natural gas service which was certificated in Docket No. 72-81 by order issued March 27, 1972. Official notice is taken of the foregoing documents.

[7] Official notice is taken of Order No. 428. The Commission indicated therein that pending applications whould not have to be refiled under the amended regulation and, further, that "small producers shall be required to comply with Section 7(b) of the Act with respect to every small producer sale exempted herein."

[8] We read the foregoing statement in Amarex's initial brief as meaning that no natural gas was produced from the Southeast Quarter or from any production unit embracing any part of the Southeast Quarter during the primary term of the 1967 Lease which ended September 26, 1972. But we believe that fact to be immaterial. Under the Commission's concept that the service in which the producer engages under the Natural Gas Act is distinct from the contract which regulates the producer's relationship with the pipeline company (which concept was ratified by the Supreme Court in *Sunray, infra*), the initiation of deliveries under the 1970 Gas Purchase Contract on November 4, 1971, effected a "dedication" of the natural gas reserves underlying all of the acreage described in Exhibit A to that contract.

[9] No information has been furnished as to when the production unit was formed.

1 Well is not dedicated to Arkla in interstate commerce because the 1972 Lease of the Southeast Quarter is not subject to the 1970 Gas Purchase Contract. Amarex asserts that it agreed to sell and deliver, and that Arkla agreed to purchase and receive, "the natural gas production attributable to [Amarex's] interest in all Contract Wells, and to that extent [*sic.*, end] hereby subjects and commits hereto the Contract Leases." The term "Contract Wells" refers to wells "on lands covered by the Contract Leases", Amarex argues, and no lands are covered by a lease after it expires. Furthermore, Amarex asserts the term "Contract Leases" refers to those which are described in Exhibit A, and since the latter document refers to the lease of the Southeast Quarter in terms of both a lease number and an expiration date it is clear that the 1967 Lease, and not the 1972 Lease, was dedicated to the 1970 Gas Purchase Contract. And finally, Amarex argues, there is no provision in the 1970 Gas Purchase Contract for the inclusion of after-acquired leases as in the case of certain other gas purchase contracts between Arkla and various producers, copies of the pertinent portions of which are attached to Amarex's intial brief.

10. Arkla, in its initial brief, takes the opposite position that Amarex's interest in the natural gas produced from the Cupp C No. 1 Well is dedicated to it in interstate commerce and, as a result, that dedicated supply cannot be withdrawn from interstate commerce without Commission approval. Among other court decisions, it relies, in this connection, upon *The Atlantic Refining Co., et al.* v. *Public Service Commission of the State of New York, et al.*, 360 U.S. 378 (1959) (known as the *CATCO* decision) and *Sunray Mid-Continent Oil Co.* v. *Federal Power Commission*, 364 U.S. 137 (1960). Furthermore Arkla relies on *Pioneer Gathering System, Inc., et al.*, 23 FPC 261, 263 (1960), *Cumberland Natural Gas Company, Inc., et al.*, 34 FPC 132, 137 (1965), *Mitchell Energy Corporation*, — FPC —, (Opinion No. 733) (1975),[10] and *United Gas Pipe Line Co.* v. *Billy J. McCombs, et al.*, — FPC — (Opinion No. 740) (1975)[11] for the proposition that the dedication which is consummated by the initiation of deliveries under a certificated gas purchase contract includes all of the acreage which is described in the contract, whether proven or unproven, and whether connected to interstate transportation facilities or not so connected. Accordingly, Arkla asserts that the commencement of deliveries to it on November 4, 1971, consummated the dedication to it in interstate commerce of all of the acreage which is described in the 1970 Gas Purchase Contract.[12]

11. Turning to the question of the expiration of the 1967 Lease, Arkla relies on *El Paso Natural Gas Company, et al.*, — FPC —, (Opinion No. 737) (1975),[13] wherein the Commission said that "it makes no difference whether a lease is transferred or terminates, the obligation of service imposed upon the dedicated gas continues." Arkla asserts, in this connection, that the Supreme Court in *Sunray, supra*, ratified the Commission's long-standing view that an obligation to continue service arises under Section 7 of the Natural Gas Act, and that this obligation exists separate and apart from any contractual obligation to continue service and, therefore, outlasts the term of a contract to sell natural gas. Furthermore, Arkla adds, the statutory obligation to continue service exists both as to contracts for the sale of natural gas and as to the underlying leases, termination of which may impair the obligation of the contract but not the separate and distinct statutory obligation to continue service. Amarex has made no showing to justify abandonment, Arkla concludes, and consequently the Commission should direct Amarex to commence deliveries to it immediately in accordance with the dedication.[14]

12. Although the Commission staff did not file an initial brief, it filed a reply brief in which it asserts that Amarex's presentation of the issue finesses the critical question of whether the expiration of the 1967 Lease terminated the dedication to Arkla of the natural gas reserves underlying (and/or attribute to) the Southeast Quarter:

> Once it is determined that the 1967 lease reserves were dedicated to the 1970 contract and since no abandonment has been authorized under Section 7(b) of the Natural Gas Act, it is simply irrelevant that the subject reserves are now covered by a 1972 lease that was executed after the 1970 contract. Amarex dedicated the subject reserves to the 1970 contract and now that those supplies are being produced from the Cupp C No. 1 Well, Arkla is clearly entitled to the share of production allocated to the reserves committed by Amarex under the 1967 lease to the 1970 contract.

13. Amarex, in its reply brief, attempts to clarify certain statements in Arkla's initial brief; continues to argue that the 1972 Lease is not dedicated to the 1970 Gas Purchase Contract; and asserts that Arkla, by its silence with respect to that issue, concedes "an essential element of" Amarex's case, "for unless the 1972 Lease is covered by the 1970 [Gas Purchase] Contract, there can be no dedication of that lease to interstate use." Amarex cites numerous Commission decisions to the effect that dedication is to be determined by the terms of the contract, and it would distinguish *El Paso, supra*, on the ground that the 1972 Lease is not covered by the 1970 Gas Purchase Contract and, consequently, "the public has not relied on gas which may be produced by virtue of the 1972 Lease." And the Commission's application of *El Paso, supra*, to the present situation, Amarex urges, would invade the integrity of State recording acts by which bona fide purchasers take free and clear of unrecorded encumbrances, and would also violate the public policy against perpetuities insofar as rights created by Section 7(b) may vest at remote times in the future.

14. And Arkla, in its reply brief, asserts that Amarex dedicated the natural gas production attributable to Amarex's interest in Contract Wells which, in turn, are wells on lands covered by the Contract Leases or on production units which include any part of said lands. The reference to Contract Leases, Arkla argues, serves only to identify the acreage, as is evidenced by the fact that the term "Contract Leases" includes both the "oil and gas leases" and the "other mineral interests" described in Exhibit A. And the "mineral interests", Arkla continues to argue, are not limited in duration as in the case of the "oil and gas leases". The Cupp C No. 1 Well is completed on a production unit which includes the Southeast Quarter which, in turn, is acreage described in Exhibit A to the 1970 Gas Purchase Contract and is, therefore, a Contract Well, Arkla concludes.[15]

The Decision

15. While Amarex expresses its position in terms of the nondedication of a particular lease, and Arkla asserts its claim in terms of the dedication of particular acreage and/or the natural gas reserves underlying the acreage, the Natural Gas Act establishes no procedures by which leases, acreage or reserves, or anything else, for that matter, can be dedicated to interstate commerce. Section 7 of that Act establishes, instead, a procedure for certification, wherein subsection (c) provides in pertinent part,

> "No natural-gas company • • • shall engage in the transportation or sale of natural gas, subject to the jurisdiction of the Commission, or undertake the construction or extension of any facilities therefor, or acquire or operate any such facilities or extensions thereof, unless there is in force with respect to such natural-gas company a certificate of public convenience and necessity issued by the Commission authorizing such acts or operations. • • •"

and subsection (e) provides, also in pertinent part,

> "• • • [A] certificate shall be issued to any qualified applicant therefor, authorizing the whole or any part of the operation, sale, service, construction, extension or acquisition covered by the application, if it is found that the applicant is able and willing properly to do the acts and to perform the service proposed • • • and that the proposed service, sale, operation, construction, extension, or acquisition, to the extent authorized by the certificate, is or will be required by the present or future public convenience and necessity. • • •"

16. Accordingly, while the Natural Gas Act is not couched in terms of dedication to interstate commerce, it does establish a procedure by which the Commission can certificate sales of natural gas in interstate commerce and, as the Supreme Court found in *Sunray, supra*,[16] the natural gas service which a particular sale initiates. Once the service is certificated, and the certificate is accepted and the service initiated, the service may not thereafter be discontinued without the permission and approval of the Commission under subsection (b) of Section 7 which provides,

> No natural-gas company shall abandon all or any portion of its facilities subject to the jurisdiction of the Commission, or any service rendered by means of such facilities, without the permission and approval of the Commission first had and obtained, after due hearing, and a finding by the Commission that the available supply of natural gas is depleted to the extent that the continuance of service is unwarranted, or that the present or future public convenience or necessity permit such abandonment.

17. The status of natural gas service as being terminable, lawfully, only through such Section 7(b) permission and approval, is commonly expressed in terms of particular leases being dedicated to interstate commerce, or in terms of the leaseholds or acreage covered by the leases as being so dedicated, or in terms of the underlying reserves or gas supply as being so dedicated. In other words, the term "dedicated" is commonly used by the natural gas industry and the Commission, as well as by the courts, to express the existence of that legal status. But, as the arguments of Amarex and Arkla demonstrate in this instance, the existence of the legal relationship known as "dedication" must be determined on a case by case basis.

18. In order to determine which of the parties is entitled to receive the natural gas from the well in question, we must look to the parameters of the certificated service as they are revealed by the documents through which it was initiated. To that end we turn to the application which Amarex filed in Docket No. CS71–92 for the small producer certificate of public convenience and necessity authorizing it to initiate the service in question, and the Commission's order of August 12, 1971, granting the application and issuing the certificate. *United Gas Pipe Line Company* v. *Billy J. McCombs, et al., supra*. And we focus on the question of whether the certificated service, or any part of it, is limited in its duration.

19. In looking to Amarex's application in Docket No. CS71–92 and the Commission's order of August 12, 1971, granting the application, we are guided by the Supreme Court's statement in *Sun Oil Company* v. *Federal Power Commission*, 364 U.S. 170, 175 (1960):

> [W]e agree with the Commission that the 1956 certificate was a permanent one. The application itself, under the construction we have given the statute in *Sunray*, did not with any explicitness ask for a limited certificate. It asked for one 'authorizing the sale of natural gas' under the 1947 contract; but as we said in *Sunray*, a permanent certificate would do that • • • . And the certificate issued makes no reference to any limitation of time. This is in contrast with explicit references to the limitation in those instances where the Commission had previously issued term certificates. [Footnote omitted.] The Commission's order, which blanketed the many applications before it in the mass proceeding, is no more explicit about limitation than the application, and refers, in fact, to the certificate as both 'authorizing the sale' of natural gas, and authorizing a 'service,' which accords with our construction of § 7(e) in *Sunray*. Under these circumstances we would hardly see any basis for overturning the Commission's view that no limitation as to time was implied."

20. Upon reviewing in their entireties Amarex's application for the certificate and the Commission's order issuing the certificate, we find nothing to suggest that Amarex was then seeking or that the Commission was then issuing a certificate which would be limited in its duration either with respect to the entire panorama of Amarex's service or with respect to any part of its service. And we find that no limitation in the duration of Amarex's service or any part of its service, including its service from or attributable to any one property and its service from any one gas producing well, was implied.

21. Turning to the 1970 Gas Purchase Contract, we find no suggestion of any limitation in the duration of any part of the certificated service which was initiated pursuant thereto[17] other than the possible limitation advocated by Amarex which is inherent in the expiration of a fixed term oil and gas lease. We believe, to the contrary, that unless there is a specific exercise of the Commission's abandonment authority under Section 7(b) of the Natural Gas Act in the order granting a certificate under which a sale is initiated, as where abandonment is authorized prospectively in the case of a limited term certificate, limitations of time in a gas purchase contract and in the underlying leases should not operate as limitations in the duration of the certificated service.[18]

22. As Arkla points out in its reply brief, and there is merit in its argument the term "Contract Leases" refers to both the "oil and gas leases" and to the "other mineral interests" which are described in Exhibit A; and since the "other mineral interests" do not have an inherent time limitation as in the case of the "oil and gas leases", the descriptions in Exhibit A are identifications of particular acreage (embracing both the "oil and gas leases" and the "other mineral interests") rather than identifications of particular leasehold tenures (embracing only the "oil and gas leases"). We would add that such a construction is reinforced by the fact that the term "Contract Leases" is defined by reference to the word "leases" (as well as to "interests"); and while the word "leases" can refer to specialized contracts pertaining to land and interests in land, the word "leases" can also refer to the land or interests land which are the subject of the specialized contracts. And the latter is a less strained and more natural construction in the light of the reference to "other mineral interests". To construe the term "Contract

---

[10] Affirmed, *Mitchell Energy Corporation* v. *Federal Power Commission*, — F.2d — (No. 75–3110) (CA5, 1976).

[11] Reversed on other grounds October 18, 1976, *sub nom Billy J. McCombs, et al.* v. *Federal Power Commission*, No. 75–1829, CA10. Petition for rehearing pending. Arkla cites this case for the additional proposition that the share of production which is attributable to the Southeast Quarter is part of the dedicated gas supply even though the Cupp C No. 1 Well is completed on undedicated acreage.

[12] Arkla points out that, referring to *Phillips Petroleum Co.* v. *State of Wisconsin*, 347 U.S. 672 (1954), the United States Court of Appeals for the Third Circuit said in *J. M. Huber Corporation* v. *Federal Power Commission*, 236 F.2d 550, 558 (1956), "We think the sense of the Phillips decision is altogether opposed to permitting the Commission's control of sales to be nullified by the independent producer's abandonment of those sales at will."

[13] Reversed December 13, 1976, *sub nom Southland Royalty Company et al.* v. *Federal Power Commission*, Nos. 75–3373, et al., CA5. See discussion, infra.

[14] While Arkla also asks for restitution, Amarex has not on this record received any of its entitlement attributable to the Cupp C No. 1 Well. Without discoursing this subject further, the sense of the Ordering Paragraph is to require Amarex to deliver or cause delivery to Arkla of Amarex's share of the production from that well from August 21, 1975, on which date it was completed as a commercial producer of natural gas, forward.

[15] Arkla asserts, additionally, that expiration dates of leases are shown on Exhibit A because it was prepared for attachment to the agreement of June 6, 1970, by which Amarex sold at 25 percent interest in the leases to Arkla Exploration, as well as for attachment to the 1970 Gas Purchase Contract.

[16] 364 U.S., at pages 147 to 151.

[17] Although a limitation in the duration of natural gas service pursuant to the 1970 Gas Purchase Contract would not have the legal effect of limiting the duration of Amarex's service under its small producer certificate (*Sunray* and *Sun Oil, supra*), it is the sense of this and the following three paragraphs that when the 1970 Gas Purchase Contract and the 1967 Lease are viewed against the background of the principal court and Commission decisions pertaining to the duration and other parameters of certificated service, those documents are consistent with the unlimited duration of the service embraced by Amarex's small producer certificate as found in the preceding paragraph.

[18] As noted, the Commission's order of August 12, 1971, issuing the small producer certificate in question, states in furtherance of *Sunray* and *Sun Oil, supra*, that the grant of the certificate shall not imply approval of the terms relating to the cessation of service upon the termination of a contract. Since service under the 1970 Gas Purchase Contract is dependent upon service from the underlying leases, we believe that *Sunray* and *Sun Oil, supra*, should apply to the leases underlying the 1970 Gas Purchase Contract, as well as to that contract itself. In other words, we would not imply from the primary term of the 1967 Lease any limitation in the duration of the natural gas service from or attributable to that lease. Such service should be limited in its duration only by an express grant of abandonment authorization pursuant to Section 7(b), either prospectively as in the case of a limited term certificate, which was not done in this case, or subsequently. And our construction, *infra*, of the 1967 Lease in a manner which is consistent with our foregoing views is facilitated by the provisions in both leases to the effect that all of their provisions, express or implied, are subject to the Natural Gas Act and to the orders, rules or regulations (and interpretations thereof) of the Commission.

Leases" as identifying particular leasehold tenures, as Amarex contends, would clear the way "for every independent producer of natural gas to seek certification only for the limited period of its initial contract with the transmission company, and thus automatically be free at a future date, untrammeled by Commission regulation, to reassess whether it desired to continue serving the interstate market." *Sunray, supra,* 364 U.S., at page 142.

23. Furthermore, we find no suggestion in the 1967 Lease that natural gas service from the Southeast Quarter, or from a production unit embracing the Southeast Quarter commenced after the expiration of the primary term of that lease, should not be included in the service which was certificated in Docket No. CS71–92 and initiated on November 4, 1971. The Supreme Court said in *Sunray, supra* (364 U.S., at page 156), quoting in part from *CATCO, supra,*

> An initial application of an independent producer, to make movements of natural gas in interstate commerce, leads to a certificate of public convenience and necessity under which the Commission controls the basis on which "gas may be initially dedicated to interstate use. Moreover, once so dedicated there can be no withdrawal of that supply from continued interstate movement without Commission approval • • •"

The Commission elaborated upon the parameters of that dedicated supply in *Pioneer* and *Cumberland, supra,* indicating that the commencement of service from any of the acreage described in a gas purchase contract commits all of the acreage described therein to the service, whether proven or unproven, and whether connected to interstate transportation facilities or not so connected. *CATCO, Sunray, Pioneer,* and *Cumberland, supra,* all predated the 1967 Lease which, as noted, states that all of its provisions, "express or implied, shall be subject to all federal and state laws and the orders, rules, or regulations (and interpretations thereof) of all governmental agencies administering the same • • •." Given this background and the foregoing lease provision, Amarex cannot complain that the natural gas service from the Southeast Quarter, or from a production unit embracing the Southeast Quarter, was committed to interstate use by reason of production elsewhere as distinguished from production from or attributable to the Southeast Quarter.

24. From the foregoing, we find and conclude that no limitation in the duration of Amarex's service or any part of its service initiated pursuant to the 1970 Gas Purchase Contract under its blanket small producer certificate of public convenience and necessity issued in Docket No. CS71–92 is to be found in or implied from the 1970 Gas Purchase Contract or the 1967 Lease. We find, further, that Amarex's said certificate embraces all of the natural gas production from or attributable to the acreage which is identified in Exhibit A as being subject to the 1970 Gas Purchase Contract including, without limitation, the Southeast Quarter.

25. We turn, then, to the further question of the effect, if any, of the expiration of the primary term of the 1967 Lease on the certificated service. And we find that on December 13, 1976, while this consolidated proceeding was pending before us for decision, the United States Court of Appeals for the Fifth Circuit reversed our decision in *El Paso, supra, sub nom Southland Royalty Company, et al.* v. *Federal Power Commission,* 543 F.2d 1134, characterizing the principal issue as one of the "property rights vs. regulatory powers":

> Does the lessee under a 50-year fixed-term mineral lease, by making certificated sales of leasehold natural gas in interstate commerce, thereby dedicate to interstate commerce the gas which remains in the ground at the end of the 50th year?

The Fifth Circuit answered the question which it thus framed in the negative, rationalizing that under Texas law pertaining to real property "a person holding a present interest in real property which is limited in duration cannot create an estate which will extend beyond the term of his interest."[19]

26. We are gravely concerned that the Fifth Circuit's decision in *Southland* may open the floodgates of deregulation contrary to the public interest. In recent years the growth of the free or intrastate market for natural gas has effectively eroded the Commission's ability to regulate the price of natural gas flowing in the interstate market. But the Commission has been able to maintain the flow, principally because its Section 7(b) dike stood sacrosanct against the eroding forces of the intrastate market and would not permit natural gas service to be terminated without the Commission's permission and approval. The first breach in that dike appeared on October 18, 1976, when the United States Court of Appeals for the Tenth Circuit held in *McCombs, supra* that a de facto abandonment had occurred without the required statutory hearing and finding by the Commission. And two months later *Southland* revealed the course by which that trickle could develop into a significant flow and thereby undermine the integrity of Section 7(b) if that dike is not now plugged by judicial or legislative action.

27. In *Sunray* the Supreme Court ratified the Commission's long standing view that an obligation to continue service exists under Section 7 of the Natural Gas Act, and that such obligation is separate and apart from any contractual obligation to continue service. If, therefore, a gas purchase contract should expire or otherwise terminate, that separate statutory obligation would require the service to be continued until we permit and approve its termination. The gas consuming public will be able to rely on that service obligation so long as all or substantially all of the oil and gas leases used by the natural gas industry continue to provide in their habendum clauses that the leases shall remain in force for the life of the underlying reserves. But should the natural gas industry gradually change to fixed term leases in the light of *Southland,* and particularly if the industry should change to short term leases on a universal or quasi-universal basis, the statutory service obligation could be circumvented through the terminations of the oil and gas leases underlying that obligation. The gas could be lost to those who had been dependent on it, and our ability to carry out our mission to regulate the price of natural gas flowing in the interstate market would be eroded further, possibly to the point of deregulation, because we could not require the flow to be maintained.

28. If there is a separate statutory service obligation, as the Supreme Court has confirmed, in *Sunray,* why should it not apply to the oil and gas leases underlying gas purchase contracts, as well as to the contracts themselves, to the end that the integrity of that service would be maintained? The Fifth Circuit responds in *Southland* that one having an interest in real property which is limited in time cannot create an estate which will extend beyond the term of his interest. But that rationale does not address the fact that the interest which is limited in time was created by an oil and gas lease, and that an oil and gas lease, like a gas purchase contract, is a specialized form of contract. And the Fifth Circuit would leave us on a carousel on which we find that the statutory service obligation will survive the term of a gas purchase contract but cannot survive the term of an oil and gas lease underlying that contract.

29. If it is "black letter law" that one having an interest in real property which is limited in time cannot create an estate which will extend beyond the term of his interest", so, too, it is the law of the land that the Natural Gas Act, as expressed in Section 1(b), applies "to the sale in interstate commerce of natural gas for resale for ultimate public consumption". In *Interstate Natural Gas Co., Inc.,* v. *Federal Power Commission,* 331 U.S. 682 (1947), in which the Commission's jurisdiction to regulate intrastate (field) sales of natural gas for eventual interstate consumption was unsuccessfully challenged, the Supreme Court said, at pages 692 and 693:

> We have held that these sales are in interstate commerce. It cannot be doubted that their regulation is predominantly a matter of national as contrasted to local concern. All the gas sold in these transactions is destined for consumption in States other than Louisiana. Unreasonable charges exacted at this stage of the interstate movement become perpetuated in large part in fixed items of costs which must be covered by rates charged subsequent purchasers of the gas, including the ultimate consumer. It was to avoid such situations that the Natural Gas Act was passed. [Footnote omitted.]

[19] Petitions for writs of certiorari were filed in the Supreme Court of the United States by the State of California on February 12 1977 (No. 76–1114), and by El Paso Natural Gas Company on February 16, 1977 (No. 76–1133), and will soon be filed by this Commission.

And in *Phillips Petroleum Co.* v. *Wisconsin,* 347 U.S. 672 (1954), the Supreme Court quoted the foregoing with approval and added, at page 681:

> The *Interstate* case is • • • said to be distinguishable in that it did not involve an asserted conflict with state regulation, and federal control was not opposed by the state authorities, while in the instant case there are said to be conflicting state regulations, and federal jurisdiction is vigorously opposed by the producing states. The short answer to this contention is that the jurisdiction of the Federal Power Commission was not intended to vary from state to state, depending upon the degree of state regulation and of state opposition to federal control."

And the Supreme Court added, further, at pages 682 to 684:

> There can be no dispute that the overriding congressional purpose was to plug the "gap" in regulation of natural-gas companies resulting from judicial decisions prohibiting, on federal constitutional grounds, state regulation of many of the interstate commerce aspects of the natural-gas business. A significant part of this gap was created by cases holding that "the regulation of wholesale rates of gas and electrical energy moving in interstate commerce is beyond the constitutional powers of the States." *Interstate Natural Gas Co.* v. *Federal Power Commission, supra* at 689. The Committee reports on the bill that became the Natural Gas Act specifically referred to two of these cases and to the necessity of federal regulation to occupy the hiatus created by them. Thus, we are satisfied that Congress sought to regulate wholesales of natural gas occurring at both ends of the interstate transmission systems. [Footnotes omitted.]

30. As a result of these decisions, we believe that any conflicts between the "black letter law" on which the Fifth Circuit relies in *Southland,* and the Natural Gas Act, must be resolved in favor of the latter and the service obligation which it creates, particularly where a lease, such as the 1967 Lease, unlike those in *Southland* [20], declares:

> All provisions hereof, express or implied, shall be subject to all federal and state laws and the orders, rules, or regulations (and interpretations thereof) of all governmental bodies administering the same • • •.

And whether or not a lease contains such a provision, we believe that anyone who entered into an oil and gas lease on or after June 21, 1938, which is the date on which the Natural Gas Act was approved, and, in any event, on or after June 7, 1954, which is the date on which the Supreme Court held in *Phillips* that independent producers of natural gas are subject to regulation under the Natural Gas Act, did so, and anyone who now enters into such a lease, does so, with actual or constructive knowledge of the provisions of the Natural Gas Act and/or the far-reaching effect of the *Phillips* decision. The 1925 lessors in *Southland,* on the other hand, obviously could not have known that Congress would regulate the interstate aspects of natural gas some 13 years later.

31. The habendum clause which is common to the *Southland leases* (describes them as extending:

> • • • for the term of Twelve (12) years from the date hereof and as much longer thereafter as oil or gas (or other minerals, if produced hereunder) are produced from said land. Provided, that this lease shall not remain in force longer than fifty (50) years from this date • • •.

The leases are, therefore, life-of-the-reserve leases, such as are universal or almost universal in the natural gas industry today, but with outside fixed termination dates. The leases reached the Fifth Circuit in the context of those fixed termination dates, and its decision in *Southland* was prepared and issued in the same context.

32. The habendum clause of the 1967 Lease provides, on the other hand,

> This lease shall remain in force for a term ending September 26 1972, and as long thereafter as oil, gas, casinghead gas, casinghead gasoline or any of the products covered by this lease is or can be produced.

Since it does not have an outside fixed termination date, as in the case of the *Southland* leases, the 1967 Lease contemplates without question that certificated natural gas service from or attributable to the Southeast Quarter might continue indefinitely and, in any event, beyond the dates on which the lessors' interests might terminate or be transferred. It contemplates that no minerals covered by the lease of any economic consequence will remain in the ground at the time of its termination. And the primary or front-end termination date serves the obvious purpose, not of limiting the duration of the estate created by the lease, but of inducing the tenant to commence an early realization of any productive potential of the Southeast Quarter. Such date poses a threat that if the tenant does not start producing royalties for the lessors within the specified period, the lessors will be free to permit some other tenant to do so. In combination with another provision discussed infra under which the tenant is required to pay rentals so long as the Southeast Quarter is not productive, it deters the tenant from permitting the acreage to lie "fallow". In these respects, the termination provision of the 1967 Lease differs from those of the *Southland* leases.

33. Furthermore, the 1967 Lease argumentively did not expire on September 26, 1972. By its terms it was to remain in force as long as natural gas, among other products, "can be produced". A gas well was completed into the Southwest Quarter on August 21, 1975, and the Southeast and Southwest Quarters were unitized with two other quarters to obviate the necessity of drilling offset wells to protect the owners other than those of the Southwest Quarter. The parties thereby assumed the existence of natural gas on an economic basis underlying the Southeast Quarter, and considering the length of time which is required for the formation of natural gas, there exists a rational basis for finding, as we do, the natural gas was capable of economic production from, or at least attributable to, the Southeast Quarter on September 26, 1972.

34. We would note, in this connection, that there is no limit to the number of pre-drilling rental payments discussed infra which are permissible, and that the payments which were apparently made to extend the life of the 1972 Lease from year to year could have been applied to extensions without interruption of the 1967 Lease. Amarex contends that the 1967 Lease per se was dedicated under the 1970 Gas Purchase Contract and, in the light of that contention, we find that the 1972 Lease should be treated as an extension of the 1967 Lease for the purpose of enforcing its obligation under the Natural Gas Act to maintain interstate natural gas service.

35. In keeping with the Supreme Court's views in Phillips that the jurisdiction of the Commission should not vary from state to state, depending upon state law, we believe that the statutory service obligation should not depend upon the construction under state law of an oil and gas lease, or upon the term of such a lease, or upon a question of whether such a lease is extended or replaced by a later lease. If the principal issue was correctly characterized in Southland as one of "property rights vs. regulatory powers", then the statutory service obligation should depend upon the extent to which Congress occupied the interstate commerce of natural gas and the supremacy of the Natural Gas Act over *any* inconsistent state law.[21]

36. The Supreme Court said in Phillips, in this connection, at page 682, that the Natural Gas Act gives the Commission jurisdiction over "all wholesales of natural gas in interstate commerce, whether by a pipeline company or not and whether occurring before, during, or after transmission by an interstate pipeline company." In the context of the free or intrastate market for natural gas which, of course, did not exist as a material market force at the time of Phillips, we believe that any state regulation (including a court decision which is based on state law) which adversely affects present or future volumes of natural gas

[20] For the purpose of comparison, we take official notice of the two leases which are described in, and the subject of, the *Southland* decision: The Waddell lease dated July 14, 1925, begins on page 135 of the Joint Appendix filed therein in the United States Court of Appeals for the Fifth Circuit, and the Goldsmith lease, dated August 7, 1925, begins on page 293 thereof. Both leases appear to have been prepared on the same oil and gas lease form.

[21] Speaking of the Natural Gas Act, the United States Court of Appeals for the Eighth Circuit said in *State Corporation Commission of Kansas* v. *Federal Power Commission,* 206 F. 2d 690 (1953), at page 705, "[T]here is no room for the exercise of any local power to obstruct or prevent the lawful functioning of the federal agency entrusted with the federal power of regulation. The federal power to regulate the commerce in natural gas derives directly from the construction and is, of course, the dominant power. To the extent that Congress has entered the field, exercised its power and authorized its Commission to regulate charges by natural gas companies for the gas they produce and sell in interstate commerce for resale, its mandate must prevail."

in interstate commerce affects interstate "wholesales" of natural gas within the meaning of Phillips, including the price of that gas.

37. Our foregoing views are reinforced by the Supreme Court's decision in *Northern Natural Gas Co. v. State Corporation Commission of Kansas*, 372 U.S. 84 (1963), overturning a state conservation measure which affected natural gas in place and consequently, property rights to that gas, wherein the Supreme Court said with respect to the Natural Gas Act, at page 91:

> The federal regulatory scheme leaves no room either for direct state regulation of the prices of interstate wholesales of natural gas, *Natural Gas Pipeline Co. v. Panoma Corp.*, 349 U.S. 44, or for state regulations which would indirectly achieve the same result. These state orders necessarily deal with matters which directly affect the ability of the Federal Power Commission to regulate comprehensively and effectively the transportation and sale of natural gas, and to achieve the uniformity of regulation which was an objective of the Natural Gas Act. They, therefore, invalidly invade the federal agency's exclusive domain. (Footnote omitted.)

And they are ultimately confirmed by *United Gas Improvement Co. v. Continental Oil Co.*, et al., 381 U.S. 392 (1965) (known as the Rayne Field case), wherein the Supreme Court confirmed the Commission's assertion of jurisdiction over a sale of natural gas in place, noting that state law did not recognize such a sale, and stating, at page 400, "A regulatory statute such as the Natural Gas Act would be hamstrung if it were tied down to technical concepts of local law."

38. In ratifying the Commission's long standing view with respect to the Section 7 obligation to continue service, the Supreme Court, in Sunray, supra, rationalized that producers, and pipelines, would otherwise be free to insist on the inclusion in their certificates of provisions relieving them in advance of their obligations to continue service, thereby nullifying or seriously limiting the Commission's power to authorize abandonment under subsection (b). Such rationalization is applicable to the present situation because the 1967 Lease contains the following provision which, in its substance, is universal or almost universal in the natural gas industry:

> If operations for the drilling of a well for oil or gas are not commenced on said land on or before the 26th day of September, 1968, this lease shall terminate as to both parties, unless the lessee shall on or before said date pay or tender to the lessor * * * the sum of [$160] which shall operate as a rental and cover the privilege of deferring the commencement of operations for drilling for a period of one year. In like manner and upon like payments or tenders, the commencement of operations for drilling may further be deferred for like periods successively.

It is obvious that if Amarex were to prevail, any producer with such a provision in an oil and gas lease could simply fail to make the next payment and thereby permit the lease to lapse within the year free of the prior commitment of the underlying gas to interstate service. And the producer might obtain a new lease of the acreage prior to that time and sell the production from or attributable to that new lease in intrastate commerce, thereby withdrawing dedicated gas from interstate commerce.

39. In rationalizing Sunray, supra, the Supreme Court also relied on the ratemaking scheme of the Natural Gas Act wherein a producer (or any other natural gas company) can file an initial rate under Section 4(c) subject to prospective change following an investigation under Section 5 and a finding that the rate is unjust and unreasonable. But the producer must file a rate change under Section 4(d), subject to suspension and refund following an investigation under Section 4(e) and scrutinization under the "just and reasonable" standard. If Amarex were to prevail, all producers in its shoes would be in a position to withdraw dedicated gas from interstate service and rededicate it to the same or a different interstate customer if they could thereby obtain a higher price for the gas, and in doing so they could file new rates subject only to prospective change while escaping rate change scrutinization under the "just and reasonable" standard and a possible refund obligation. Or they might sell the gas at a higher rate in the intrastate market. The current "Contract Price Schedule" under the 1970 Gas Purchase Contract is $.21 per Mcf, subject to Btu and tax adjustments, and subject to any higher "just and reasonable" area rates prescribed by the Commission. Under the national rate prescribed by Opinion No. 770 issued July 27, 1976, the current maximum rate applicable to gas produced from the Cupp C No. 1 Well is $1.42 per Mcf, subject to adjustments.[23]

40. We find, therefore, that the considerations leading to the Supreme Court's decision in Sunray are equally applicable to the present situation. When natural gas reserves underlying acreage which is described in numerous oil and gas leases are dedicated to interstate commerce as part of the same gas purchase contract, as in the case of the reserves underlying the acreage described in the Exhibit A leases and mineral interests, limitations of capital, equipment and manpower naturally limit a producer's ability to bring all of the reserves into production immediately. And priority will naturally be given to the most likely prospects for returning profits. The simultaneous dedication of numerous reserves envisions a flow which will begin with a single well, enlarge as new wells are brought into production and gradually diminish as the wells age and abandonment is authorized. And effective administration of the Natural Gas Act requires continuous Federal control over those reserves from the moment of their dedication to the moment of their authorized abandonment, whether or not they are producing natural gas at any particular intervening point in time.

41. Section 7(b) of the Natural Gas Act requires the Commission's permission and approval for abandonments of facilities and service and, conversely, prohibits abandonments through the unilateral decisions of particular producers based upon the economic considerations affecting them. Economic decisions to rework natural gas wells in reservoirs which are currently producing or which have produced in the past are naturally interlocked in priority with similar decisions to drill new wells into reservoirs which have never produced. Accordingly, once a natural gas service is initiated under a gas purchase contract (as was done herein on November 4, 1971, under the 1970 Gas Purchase Contract), none of the reservoirs which are thereby "dedicated" to that service may be withdrawn therefrom on the basis of a producer's unilateral decision to drill a particular well at one site ahead of some other well at another site and before the expiration of the primary term of an oil and gas lease for that other site. See the Commission's Order Determining Gas Dedication issued September 29, 1976, in *Northern Natural Gas Company v. Crawford*, Docket No. CS71–6, and its Order on Rehearing issued December 1, 1976.[25]

42. Although Amarex contends that the obligation under Section 7 of the Natural Gas Act to continue the service would invade the integrity of State recording acts as being in the nature of an unrecorded encumbrance, we find that Amarex was advised of its Section 7 obligation in a title opinion issued in connection with the 1972 Lease even though apparently only the 1967 Lease had been recorded:[24]

> By instrument dated June 6, 1970, Amarex, Inc. and Arkansas Louisiana Gas Company entered into a gas purchase contract covering the lease under consideration. The terms and conditions of the contract are not set forth in the instrument of record, but you are advised that any gas produced from the premises is subject to said contract.

And we find that the Section 7 obligation does not violate the public policy against perpetuities, as Amarex contends, because the obligation vests upon the initiation of the interstate service pursuant to the certificate.

Beneficiaries of certificated service might wish to consider recording copies of gas purchase contracts, as well as the underlying oil and gas leases, and Commission orders issuing certificates of public convenience and necessity, so that any prospective transferee of an interest in the affected real estate may be advised of the Section 7 obligation upon a proper title search.

[23] Helmerich & Payne, Inc., the operator of the Cupp C No. 1 Well, informed a member of the staff on May 14, 1976, that the interstate sale to Michigan-Wisconsin Pipe Line Company was being made at the national rate and that the intrastate sale to Oklahoma Natural Gas Company was being made at a rate of $1.68 per Mcf. While such information comes from a reliable source, it is not part of the record in this proceeding and has not been relied upon in reaching our decision. Assuming its truth, however, it is obvious that Amarex would prefer to sell its share of the gas to Oklahoma Natural Gas Company at the intrastate rate of $1.68 per Mcf instead of Arkla at the interstate rate of $1.42 per Mcf.

[24] The opinion is dated May 17, 1972, more than three years before the issuance of the Commission's Opinion No. 737 in El Paso, supra.

[25] Appeal pending in the United States Court of Appeals for the Fifth Circuit sub nom *Harrison v. Federal Power Commission*, No. 76–4318.

THE MOTION FOR INTERIM RELIEF

43. On May 3, 1976, Amarex filed a motion seeking an order which would permit it to sell the natural gas in question to Arkla pendente lite under the 1970 Gas Purchase Contract, provided (1) such as a sale pendente lite would not be an admission that the gas is covered by the contract or dedicated to Arkla in interstate commerce, (2) such a sale pendente lite would not operate as a dedication of the gas to interstate commerce and (3) Arkla would repay the gas in kind in the event that Amarex ultimately prevails. In other words, Amarex would sell the gas to Arkla under the terms of the 1970 Gas Purchase Contract so long as the status quo was maintained pending the outcome of this consolidated proceeding. Arkla, on May 17, 1976, filed an answer opposing the motion on the ground that the gas in question is dedicated to it under the 1970 Gas Purchase Contract and that it does not favor an interim arrangement with a repayment provision in view of its short supply. The Commission, as part of its order of July 15, 1976, denied Amarex's motion, and Amarex, on August 10, 1976, filed an application pursuant to Section 19(a) of the Natural Gas Act and § 1.34 of the Commission's Rules of Practice and Procedure for rehearing of so much of that order as denied its motion to permit it to sell the gas to Arkla pendente lite. Thereafter, the Commission, by order issued September 9, 1976, granted rehearing for the purpose of further consideration.

44. Arkla refuses to purchase the gas from Amarex principally on the ground that it is opposed to a repayment requirement in the event of an ultimate determination that Arkla is not entitled to the gas, and it requests that it not be ordered to purchase the gas from Amarex. Amarex, on the other hand, has not asked for an order directing Arkla to purchase the gas, but only one permitting Amarex to sell the gas to Arkla while maintaining the status quo pendente lite. The Commission finds however, that Amarex's motion and application for rehearing are rendered moot by the action herein.

The Commission further finds: The interest of Amarex, Inc. in the natural gas which is produced from or attributable to the Southeast Quarter in Section 22, Township 10N, Range 26W, Beckham County, Oklahoma, is committed to Arkansas Louisiana Gas Company for interstate sale for resale, by the small producer certificate of public convenience and necessity which was issued to Amarex, Inc., in Docket No. CS71–92 by the Commission's order in that docket of August 12, 1971, and by the subsequent initiation of natural gas service under the Gas Purchase Contract dated June 6, 1970, and the natural gas which is so committed cannot be withdrawn from such interstate service without the permission and approval of the Commission first had and obtained pursuant to Section 7(b) of the Natural Gas Act.

The Commission orders: Commencing not later than sixty (60) days from the date of this opinion and order, Amarex, Inc., shall deliver or cause to be delivered to Arkansas Louisiana Gas Company, and Arkansas Louisiana Gas Company shall receive and take from Amarex, Inc., so much of the natural gas produced from the Helmerich & Payne Cupp "C" No. 1 Well, Beckham County, Oklahoma, from the completion thereof as a commercial producer of natural gas on August 21, 1975, forward, as is sold by Amarex, Inc., to Arkansas Louisiana Gas Company pursuant to the terms of the Gas Purchase Contract between them dated June 6, 1970.

By the Commission.[25]

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–13990 Filed 5–16–77;8:45 am]

[Docket No. RP76–13]

CITIES SERVICE GAS CO.

Order Approving Settlement Agreement

MAY 10, 1977.

On September 22, 1975, Cities Service Gas Company (Cities) filed with the Commission Thirteenth Revised Sheet PGA–1 to Second Revised Volume No. 1 of its FPC Gas Tariff to reflect an increase in jurisdictional revenues of $20,175,304 for the test period (the twelve months ended May 31, 1975, adjusted for known and measurable changes through February 29, 1976). By its order issued October 22, 1975, the Commission accepted Thirteenth Revised Sheet PGA–1 and suspended the effectiveness thereof until March 23, 1976. The Base Tariff Rates on Thirteenth Revised Sheet PGA–1 reflected an average cost of purchased gas of 25.25 cents per Mcf as reflected on Substitute Second Revised Sheet No. 37D which was made effective as of April 23, 1975, without condition or refund obligation by the Commission's order issued September 13, 1976, in Docket No. RP75–27.

On February 23, 1976, Cities filed Alternate Substitute Thirteenth Revised Sheet PGA–1 and Third Revised Sheet No. 37D to reflect an average cost of purchased gas of 35.67 cents per Mcf previously filed pursuant to its PGA provision. There are no gas costs imbedded in the 35.67 cents per Mcf which are subject to refund pending hearing. By letter order dated April 1, 1976, these revised sheets were accepted, effective March 23, 1976, in lieu of the tariff sheet originally filed in this proceeding, with the rates subject to refund and any orders issued in Docket No. RP76–13.

In June, 1976, the Commission's Staff served its top sheets for settlement purposes and settlement conferences were held during June, September and October, 1976. During these conferences, the parties, including the Commission's Staff, reached the agreement reflected in Stipulation and Agreement (Stipulation) for the settlement of Docket No. RP76–13, with certain issues contingent upon the outcome of other pending Commission proceedings, and subject to the understanding that certain intervenors reserved the right to file comments objecting to certain aspects of the settlement[1] and the other parties reserved the right to file reply comments thereto.

On July 23, 1976, Cities tendered for filing further revisions to the subject tariff, requesting an effective date of August 23, 1976. The Comission by its order issued August 19, 1976, in Docket No. RP76–135 rejected the filing in part and accepted it in part, suspended the major part of the filing for five months, so as to be effective January 23, 1977, subject to refund and set the matter for hearing. As a result of these filings and the Commission's order, the proposed Stipulation and Agreement is for a locked-in period.

On December 6, 1976, the City Group Gas Defense Association, and the Kansas Municipal Intervenors, filed comments in opposition to the proposed Stipulation. On December 27, 1976, Cities filed reply comments in support of the Stipulation.

The City Group Gas Defense Association, and the City of Springfield, Missouri and the Board of Public Utilities of Springfield, Missouri, (City Group) takes issue with the settlement rate of return of 10.15%. City Group points out that in Docket No. RP75–27, the Commission approved a settlement overall rate of return computation of 9.47%, yielding a return on common equity of 10.00%. The City Group goes on to argue that the short interval since the September 13, 1976, overall rate of computation, plus the fact that the proposed settlement is based on "top sheets", plus the fact that in Opinion No. 547, 40 FPC 1033 (1968) the Commission found that the unusual capitalization of Cities indicates the need for a much lower return on equity than that of more conventionally financed companies; all show a lack of justification for the rate of return of 10.15% contained in the proposed stipulation. While the unusual capitalization of Cities persists and merits the Commission's consideration, particularly in future rate cases, we cannot say that the rate of return provided by the instant settlement for a locked-in period is inconsistent with our decisions in the two previous dockets, or do not adequately take into consideration the capitalization factor. Further, so much time has elapsed since

[25] Commissioner Watt's dissenting statement filed as part of the original document.

[1] Kansas Municipal Intervenors (City of Abbyville, Kansas, *et al.*), The City of Springfield, Missouri, and Board of Utilities of Springfield, Missouri, and City Group Gas Defense Association reserve the right to object to the rate of return on equity and the resulting overall rate of return. The Kansas Municipal Intervenors further reserved the right to comment upon the matter of cost classification, allocation and rate design.

our Opinion 547, in 1968, as to make that Opinion of limited utility in evaluating the correctness of the rate of return provided for in the proposed stipulation.

The Cities of Abbyville, Kansas, et al. and the Kansas Municipal Utilities (Kansas Cities) oppose the stipulation insofar as it adopts the 50–50 Seaboard formula for cost classification, cost allocation and rate design, and asks that the Commission order that the proper cost classification, cost allocation and rate design shall be governed by the Commission's final and nonappealable order on this issue in Docket No. RP74–4. Staff in its comments does not oppose adoption of the Seaboard method but "emphasizes that its support of the method of cost classification, allocation and rate design herein is limited solely to the resolution of those issues in this proceeding." We concur with Staff's view on this issue and will approve the settlement as being, on balance, just and reasonable, for the purposes of the locked-in period which it covers. Our order of February 2, 1976, in Docket No. RP74–4 in ordering paragraph (B) thereof provided as follows:

"(B) The Commission's determination of the issues of classification, allocation and rate design shall take effect prospectively from the date of the Commission's order with respect to reserved issues herein. However, *if Cities files a general rate change after the date of this order,* the Commission's determination shall take effect the date the new rates go into effect or the date of the order on the reserved issues, whichever is sooner." (Emphasis added).

As is indicated in Article I of the settlement, the above quoted provision of our order of February 2, 1976, in Docket No. RP74–4, provides that any change in cost classification, allocation or rate design will have prospective application only until the first general rate change filed by Cities Service after February 2, 1976, in this case the general rate change filed which was made the subject of our August 19, 1976, order in Docket No. RP76–135, supra.

The stipulation and agreement in summary, provides as follows:

Article I identifies the cost of service underlying the agreement. The cost of service is set forth in Appendix A to the agreement and to this order and is predicated on the test period consisting of the 12 months ended May 31, 1975, adjusted for known and measurable changes through February 29, 1976.

Article II discusses refunds and provides that for the locked-in period covered by the stipulation Cities Service shall refund to each of its jurisdictional customers, an amount determined on the basis of each customers' billing determinants for that period and the difference between Cities Service rates as originally filed in this proceeding and set forth in Appendix D of the settlement, and Appendix B to this order.

Article III concerns contingent issues and refunds. Section 1 of Article III provides that the issue as to the proper rate treatment of unrecovered purchased gas costs is a reserved issue pending decision in Docket No. RP74–4, and that the inclusion of this amount for unrecovered purchased gas costs shall be allowed to the extent permitted by a final order in Docket No. RP74–4. Section 2, provides that the inclusion of $700,000 in rate base for an advanced payment to Belco Petroleum Corporation, shall be allowed to the extent permitted by a final order on either Cities Service's application for rehearing or appeal relating to Docket Nos. R–411 and RM74–4 or its petition for a declaratory order in Docket No. RP76–85.[2]

Section 3 deals with the proper rate treatment of expenditures by Northern Natural Gas Company and by British Gas Corporation to develop a coal slagging gasifier to produce synthetic gas. The issue of proper rate treatment for the described research and development project is pending decision in Docket No. RP72–127 and R&D 75–1. Section 3 of Article III, provides that the inclusion of expenditures for this project shall be allowed to the extent permitted by a final Commission order in the above cited dockets.

Section 4 provides that the inclusion in settlement cost of service in Appendix A of sums for geophysical research expenditures in the Mid-Continent and Rocky Mountain areas are reserved issues in Docket No. RP74–4 and shall be allowed to the extent permitted by final order in that docket.

Section 5 provides for refunds to Cities Service's jurisdictional customers in the event any of the sums described in Sections 1 through 4 of Article III are not allowed as a result of final Commission orders in other pending dockets.

Article IV provides that the Commission's order approving the Stipulation shall constitute final authorization for Cities Service to utilize during the locked-in period covered by the stipulation book depreciation rates of 5.10 percent for gathering and products extraction plant, 3.60 percent for transmission plant and 3.15 percent for storage plant, and to revise depreciation accruals previously recorded for such plant for that period at a composite book depreciation rate of 4.45 percent to reflect such revised depreciation rates.

Article V provides that the Stipulation is effective pursuant to Article IX.

Article VI requires the submission to the Commission of a report of the distribution of refunds to its customers and a copy of such report to its affected jurisdictional customers, interested state commissions and all parties to Docket No. RP76–13.

Article VII provides that nothing in the Stipulation shall either diminish or enlarge the obligations of Cities Service.

Article VIII concerns the reserve for deferred income taxes deducted from the rate base.

Article IX provides that the Stipulation shall become effective only after it has been approved by a final and nonappealable Commission order, that the Commission order shall constitute elimination of any condition or refund obligation with regard to Third Revised Sheet No. 37D, which was accepted, effective as of March 23, 1976, and shall terminate the proceedings in Docket No. RP76–13, except as to contingent issues described in Article III.

Article X, Reservations, provide that the Stipulation represents a settlement only for Docket No. RP76–13 and will not bind any party, including the Commission in a future determination of any issue in any future proceeding.

The Commission further finds: The proposed stipulation and agreement the subject of Commission notice of filing of Stipulation and Agreement dated November 16, 1976, is reasonable and proper and in the public interest. Accordingly, it is approved as hereinafter ordered.

The Commission orders: (A) The stipulation and agreement noticed on November 16, 1976, is incorporated herein by reference, and is hereby accepted and approved.

(B) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its staff, Cities or by any other party or person affected by this order in any proceeding now pending or hereinafter instituted by or against Cities or any other person or party.

(C) The secretary shall cause prompt publication of this order to be made in the Federal Register.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[2] On October 26, 1976, the Commission issued a declaratory order in Docket No. RP76–85 denying rate base treatment for certain advances and granting intervention.

[Docket No. RM74–16]

NATURAL GAS COMPANIES ANNUAL REPORT OF PROVED DOMESTIC GAS RESERVES: FPC FORM NO. 40

Order Deferring Action on Motion To Compel Production of Staff Witness for Cross-Examination and Affirming Judge in Denying Motions To Strike

MAY 6, 1977.

There are involved here an oral motion by Tenneco Oil Company at the hearing held on April 4, 1977, that the Staff be required to make a witness available for cross-examination on comments submitted by the staff and a written motion by Tenneco filed April 8, 1977, requesting the Commission to tender Staff member Gordon K Zareski for this purpose. Staff filed a response to the written motion on April 18, 1977. At the same hearing there were also motions (1) that staff comments be stricken unless staff were required to present witnesses, (2) that if the staff comments were stricken, comments of the producers should be stricken for the reason that the producers did not present witnesses in support of their comments, and (3) that the comments presented by non-producers be stricken for the same reason.

This proceeding commenced with the issue on April 15, 1974, of a Notice of Proposed Rulemaking proposing to require each natural gas company to file an annual report of proved domestic gas reserves on a new FPC Form No. 40. After the filing of comments and a public conference the Commission on February 25, 1975, issued Order No. 526, and later on rehearing, Order No. 526–A, which established a reporting system to provide it with information on the nation's proved reserves of natural gas. However, by orders of October 15, 1975, and June 2, 1976, the United States Court of Appeals in *Union Oil Company of California et al.* v. *F.P.C.*, — F. 2d — (CA9—No. 75–2891 *et al.*) set aside Order Nos. 526 and 526–A and remanded the proceeding to the Commission because the court was not able to determine that the Commission's orders were supported by substantial evidence.

By order of February 2, 1977, the Commission reopened the proceeding, it required the staff to serve written comments on all parties concerning the regulatory need for gas reservoir data, the availability of this data from other government agencies and the regulatory burden of submitting reservoir data; it provided opportunity for the filing of comments, testimony and exhibits, and prescribed a hearing.

A substantial number of written comments were filed and a hearing was held on April 4, 1977, before Presiding Administrative Law Judge Samuel Kanell. There witnesses were presented and cross-examined and their testimony was made part of the record, as were the comments. The oral motions referred to above were then made.

The motions were denied at the hearing because the Staff submission was made in compliance with the procedures prescribed by the Commission in its February 2, 1977 order and because the Commission's Rules (Section 1.19(a)) do not require evidentiary submissions through intervenors in rulemaking proceedings. Certification of his rulings to the Commission was made by the Judge on April 14, 1977.

Meanwhile on April 8, 1977, Tenneco filed its written motion with the Commission to compel production of Gordon Zareski for cross-examination. Tenneco argues that until all interested parties have an opportunity to explore through cross-examination the statements in staff's comments there will be no substantial evidence in the record to support reissuance of Form 40 and to satisfy the legal burden imposed by the Court of Appeals. In its response filed April 18, 1977, the staff contends that Tenneco is making a collateral attack on the Commission's order. Further, staff says, Tenneco's assertion that the staff's filing is not substantial evidence is not only false but would require the Commission to prejudge the remanded case on the basis of a motion. Also staff asserts the motion attempts to permit Tenneco to make its case through cross-examination without presenting an affirmative case.

It is clear that in a rulemaking proceeding information need not be submitted in the form of evidence in an adjudicative proceeding. The Court recognizes this, but concludes that under the Natural Gas Act, the record must contain sufficient factual data, however informally presented, to provide substantial evidentiary support for the ac-

tion taken. Whether the record including the staff's comments, the other comments, the testimony of the three witnesses and the cross-examination contains substantial evidence to support the issuance of Form 40 can only be determined by the Commission upon a full review of the record. If further evidence is necessary to support the Commission's action, the Commission will call for further proceedings. Therefore action on Tenneco's written motion and corresponding oral motion calling for staff witnesses should be deferred pending decision on the whole record. The motions to strike the staff comments and the comments of other parties should be denied on the ground that they form part of the body of evidence in this type of proceeding. *American Airlines, Inc.* v. *C.A.B.* 359 F.2d. 624, 632–633 (CADC–1966). Certiorari denied 385 U.S. 843 (1966).

The Commission further finds: (1) Tenneco's oral motion to require the staff to make a witness available for cross-examination on the comments submitted by the staff and the motions to strike listed above have been certified to the Commission.

(2) Commission ruling on the oral and written motions to require the staff to make witnesses available should be deferred; the motions to strike should be denied.

The Commission orders: (A) Commission ruling on the oral and written motions to require the staff to make witnesses available for cross-examination on the comments submitted by the staff is deferred pending a determination on the whole record in the reopened proceeding.

(B) The remaining oral motions consisting of motions to strike are denied.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP73-332]

NORTHWEST PIPELINE CORP.

Findings and Order Further Amending Order Authorizing Importation of Natural Gas

MAY 10, 1977.

On December 23, 1976, Northwest Pipeline Corporation filed in Docket No. CP73-332 a petition to amend the Commission's order issued in Docket No. CP73-332 on February 26, 1975 (54 FPC—), pursuant to Section 3 of the Natural Gas Act so as to authorize the continued importation of short-term emergency natural gas from Canada at a cumulative average price up to $2.05 per Mcf in lieu of the previously authorized price of up to $1.91 per Mcf. Northwest also requests that the Commission remove Docket No. CP73-332 from the scope of the import authorization pricing orders issued September 9, 1976, and December 17, 1976, in Docket No. CP66-110, et al. The details of Northwest's proposal are more fully set forth in the petition to amend.

On February 26, 1975, the Commission issued an order in Docket No. CP73-332 adopting and modifying the Initial Decision of the Administrative Law Judge whereby Northwest was authorized to import from Canada up to 55,000 Mcf of short-term emergency natural gas per day purchased from Westcoast Transmission Company Limited (Westcoast) under the terms of a 1974 Temporary Agreement at an average border price ranging from $1.61 to $1.91 per Mcf over the life of the contract.[1] The 55,000 Mcf of gas per day partially offsets curtailments of heating season deliveries by Westcoast to Northwest. The subject volumes of gas are purchased by Westcoast from Pan-Alberta Gas Ltd. (Pan-Alberta) in Alberta, Canada, and are delivered to Westcoast by Pan-Alberta in British Columbia, Canada. Westcoast then transports and delivers such gas to Northwest at the Sumas import point on the international boundary. These emergency volumes are available for purchase by Northwest only to the extent Westcoast is unable to deliver gas under the Fourth Service Agreement.[2] Under the terms of the 1974 Temporary Agreement, Northwest is required to take or pay for a minimum annual volume which is equivalent to an 85 percent load factor.

In its order of February 26, 1975, the Commission found that the border price of the gas would, on the average, range between $1.61 and $1.91 per Mcf over the life of the contract subject to adjustments occasioned by the Canadian-U.S. exchange rate and Northwest's carrying costs on certain facilities to be constructed. The order requires Northwest to seek further authorization to continue importing gas under the 1974 Temporary Agreement if the border price rises above $1.91 per Mcf, on the average, over the life of the contract.

On October 8, 1974, Westcoast's Export License GL-41 was amended by the National Energy Board of Canada (NEB) to permit the exemption of the subject volumes of gas from the general pricing provisions affecting Canadian natural gas exports. By Order No. AO-11-GL-41, however, the NEB revoked this exemption and made the subject volumes of gas subject to the general border prices of $1.80 per million Btu effective October 1, 1976, and $1.94 per million Btu, effective January 1, 1977. By Commission orders issued in Docket No. CP66-110, et al., on September 9, 1976 (56 FPC __), and December 17, 1976, (56 FPC __), Northwest was authorized to pay the increased prices. On October 21, 1976, the NEB issued an order which reinstated the border price exemption for gas imported under the 1974 Temporary Agreement.

The average border price ranging between $1.61 and $1.91 per Mcf authorized by the order of February 26, 1975, was dependent upon Pan-Alberta's ability to sell the gas to other parties at the contractual commodity rate during the summer months when the gas could not be used by Northwest and, thus, offset to some degree the 85 percent take-or-pay obligation of Northwest. The high of $1.91 per Mcf represents the inability of Pan-Alberta to dispose of any gas, while the low of $1.61 represents its ability to sell all of the gas in Canada. Pan-Alberta was unable to sell any of the gas in Canada during the summer months to offset the take-or-pay obligation of Northwest. Further, Pan-Alberta was unable to deliver the full contractual volumes during the 1975–1976 heating season. Despite this, Northwest was still obligated to pay the fixed cost of the added transportation facilities of both Pan-Alberta and Westcoast. In view of the fact that it was unable to deliver full contract quantities during the 1975–1976 heating season, Pan-Alberta agreed to reduce its other charges to the extent required so that the total amount due Pan-Alberta and Westcoast over the term of the 1974 Temporary Agreement would not exceed $1.91 per Mcf, assuming that full volumes are delivered for the period October 1, 1976, through April 1, 1977. Despite this agreement, Northwest was unable to import full volumes in October because Westcoast had gas available on certain days under its GL-41 export authorization at the Sumas delivery point.

Northwest now estimates that the average cost of all volumes actually imported for the term of the 1974 Temporary Agreement will be $1.96 per Mcf if full deliveries can be taken during the remaining months of the agreement. However, Northwest states that it is impossible to predict with certainty the volumes that will finally be imported under the agreement. Northwest estimates that if, for example, it were unable to take gas for an additional 15 days during the remaining four months of the agreement (from the time of filing of the instant petition), the cumulative purchased gas cost would be $2.05 per Mcf.

Based on the foregoing facts, Northwest's average cumulative gas purchased cost will exceed the restriction of $1.91 imposed in the Commission order of February 26, 1975. The extent by which the $1.91 will be exceeded cannot be determined until after the agreement expires on April 30, 1977, because deliveries under the 1974 Temporary Agreement are subject to the uncertainty of Westcoast's inability to deliver gas from its own gas supply sources in British Columbia. In any event, the final average cumulative gas purchased cost is beyond the control of Northwest and, upon consideration of the various factors contributing to the average increased purchased cost, the request to raise the $1.91 per Mcf restriction to $2.05 per Mcf seems to be reasonable.

The 1974 Temporary Agreement contains a provision that if, at the end of the agreement, certain conditions are met, Northwest and Westcoast shall attempt to negotiate an extension of said agreement. Therefore, it should be noted that the bases for the determination of

[1] The Temporary Agreement will end on April 30, 1977.

[2] Northwest was authorized in Docket No. CP73-332 to import up to 800,000 Mcf pursuant to the Fourth Service Agreement dated October 1, 1970. Northwest is now authorized in Docket No. CP75-341 to import said gas.

the instant proposal relate only to the subject 1974 Temporary Agreement and any application related to the proposed extension of this agreement will be considered on its own merits.

After due notice by publication in the FEDERAL REGISTER on January 24, 1977 (42 FR 4205), no petition to intervene, notice of intervention or protest to the granting of the petition to amend has been filed.

The Commission finds: It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and not inconsistent with the public interest to amend further the order issued in Docket No. CP73-332 on February 26, 1975, as amended, as hereinbefore described and as more fully described in the petition to amend in this proceeding.

The Commission orders: (A) The Commission's order issued in Docket No. CP73-332 on February 26, 1975, as amended, is further amended so as to authorize Northwest to pay an average price up to $2.05 per Mcf over the life of the contract, as hereinbefore described and as more fully described in the petition to amend in this proceeding. In all other respects said order, as amended, shall remain in full force and effect.

(B) The authorization granted herein is effective as of September 10, 1976.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP76-118]

U-T OFFSHORE SYSTEM

Notice of Further Extension of Time

MAY 9, 1977.

On April 19, 1977, U-T Offshore System filed a motion for a further extension of time to submit the rate schedules and cost of service studies pursuant to Ordering Paragraph (B) of the Commission's January 13, 1977 order.

Upon consideration, notice is hereby given that a further extension of time is granted to and including July 5, 1977.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-13989 Filed 5-16-77;8:45 am]

FEDERAL RESERVE SYSTEM

ALABAMA BANCORP.

Order Approving Acquisition of Bank

Alabama Bancorporation, Birmingham, Alabama, a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares, less directors' qualifying shares, of the successor by merger to The Farmers & Merchants Bank, Ashford, Alabama ("Bank"). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the largest banking organization in Alabama, controls 14 bank subsidiaries with aggregate deposits of approximately $1.4 billion representing 15.1 per cent of total deposits in commercial banks in Alabama.[1] Acquisition of Bank (approximately $8.7 million in deposits) would increase Applicant's share of Statewide commercial bank deposits by less than 0.1 per cent and would have no appreciable effect upon the concentration of banking resources in the State.

Bank is the fifth largest of eight banks in the Dothan banking market, which is the relevant banking market,[2] and controls approximately 3.4 percent of the total deposits in commercial banks in the market. Applicant's subsidiary bank closest to Bank is located in Montgomery, approximately 100 miles from Bank, in a separate banking market. Applicant does have a nonbanking subsidiary that competes in the Dothan market with Bank and ten other firms for the origination of single-family residential mortgage loans within the market. However, Bank originated only $300 thousand in such loans during 1976, amounting to approximately 1.3 per cent of the amount of single-family residential mortgage loans originated in the market during the year. Thus, it appears that approval of this application will not eliminate a substantial amount of competition. It is concluded that consummation of the proposal would have only slightly adverse competitive effects.

The financial and managerial resources and future prospects of Applicant, its subsidiaries, and Bank are regarded as generally satisfactory and consistent with approval of the application. Considerations relating to banking factors are also consistent with approval of the application. Customers of Bank will have access to the services of Applicant's investment, bond, trust, industrial development, and international department. Thus, considerations relating to the convenience and needs of the community to be served lend weight toward approval of the application, and in the Board's view outweigh any slightly adverse effects on competition that might result from consummation of this proposal. Accordingly, it is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[3] effective May 11, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-14014 Filed 5-16-77;8:45 am]

EUROPEAN-AMERICAN BANCORP

Order Approving Formation of Bank Holding Company and Operation of New York Investment Company

European-American Bancorp, New York, New York, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of the formation of a bank holding company through the acquisition of all the voting shares (except directors' qualifying shares) of European-American Bank & Trust Company ("Bank"), New York, New York.

Applicant has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire all of the voting shares (except directors' qualifying shares and 130 additional shares) of European-American Banking Corporation ("EABC"), New York, New York. EABC is an investment company organized and operating under Article XII of New York State Banking Law[1] (a "New York Investment Company") that engages in the following activities: provision of lending and international banking services, including letters of credit, acceptances and other financing facilities in connection with exports and imports, international transfers of funds and foreign exchange services; investments and foreign exchange transactions for its own account; leasing improved real estate and data processing equipment; and maintenance of credit balances incidental to or related to the foregoing activities. Although Applicant believes that certain of EABC's activities have been determined by the Board in § 225.4(a)(1), (3), and (6) of Regulation Y to be permissible for bank holding companies, it has not applied to acquire shares of EABC on the basis of those provisions. Rather, based on the facts and circumstances of this particular case, Applicant has requested under § 225.4(a) of Regulation Y that the

[1] All banking data are as of June 30, 1976, except as otherwise indicated.

[2] The Dothan banking market is approximated by the boundaries of Houston County.

[3] Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Jackson.

[1] See New York Banking Law sections 507–519, 4 McKinney's Consolidated Laws (1976).

Board determine by specific Order under section 4(c)(8) of the Act that its operation of EABC as a New York Investment Company is permissible under section 4(c)(8) of the Act because EABC is engaged in activities so closely related to banking or managing or controlling banks as to be proper incidents thereto.[3] Operation of a New York Investment Company has not heretofore been determined by the Board to be an activity permissible for bank holding companies.

Notice of receipt of these applications has been given in accordance with sections 3 and 4 of the Act (41 FR 49673) and the time for filing views and comments has expired. The Board has considered the applications and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)), and the considerations specified in section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)). No request for a hearing has been received.

Applicant is a nonoperating corporation organized for the purposes of becoming a bank holding company through the acquisition of Bank and of operating a New York Investment Company through the acquisition of EABC. Bank was chartered in 1953 as the Belgium-American Bank and Trust Company, with the Societe Generale de Banque, S.A., Brussels, Belgium as the sole shareholder. In 1968 the Midland Bank, Limited, London, England; Deutsche Bank A.G., Frankfurt, Germany; and Amsterdam-Rotterdam Bank, N.V., Amsterdam, The Netherlands, joined as shareholders, and Bank adopted its present corporate title. Shortly afterwards, Societe Generale, Paris, France, and Creditanstalt Bankverein, Vienna, Austria, also became shareholders of Bank. Bank had two branches in Manhattan and a limited service branch in the Cayman Islands until October 1974, when it acquired from the Federal Deposit Insurance Corporation ("FDIC") the deposits, selected assets, and a network of 100 branches of Franklin National Bank ("Franklin"), Brooklyn, New York. Prior to the Franklin transaction, Bank operated principally as a wholesale bank, serving primarily European companies in the American market and selected U.S. companies. Through the purchase of $1.6 billion of Franklin's assets, Bank became a major retail bank in the Metropolitan New York market,[3] with most of its operations concentrated on Long Island. Bank ($2.2 billion in domestic deposits) is the 11th largest bank in the market with 1.5 percent of the market's deposits.[4]

EABC was organized in 1950 as a New York Investment Company under Article XIII of New York Banking Law, under the name Belgian-American Banking Corporation, replacing and succeeding to the business of the New York agency of Banque Belge pour L'Etranger (Overseas), Ltd., London, England. EABC, which was owned by Banque de la Societe Generale de Belgiuque and other of its Belgian affiliates, assumed its present corporate title in 1968 when Amsterdam-Rotterdam Bank, Midland Bank, and a subsidiary of Deutsche Bank became shareholders. Societe Generale and Creditanstalt Bank later became shareholders of EABC. EABC operates through its main office in New York City, two branch offices in California and a foreign branch located in Nassau, The Bahamas. EABC also has five wholly-owned subsidiaries: Euram Realty Corporation and Euramcor Realty Corporation, Jersey City, New Jersey, special-purpose, single-transaction leasing companies that acquired and lease certain real property as accommodations to EABC's customers in accordance with the conditions of § 225.4(a)(6)(b) of Regulation Y; Disk Pack Leasing Corporation, New York, New York, which is now dormant but which was engaged in the leasing of data processing equipment; and two foreign subsidiaries, European-American Finance (Bermuda), Limited, Hamilton, Bermuda, and Euro-Credit S.A., Panama, Panama, Applicant's indirect acquisition of which the Board has approved by separate letter pursuant to section 4(c)(13) of the Act.

Both Bank and EABC are owned by the same shareholders in substantially the same proportions. The proposed transaction is essentially a restructuring of the interests of these shareholders whereby ownership of Bank and EABC will be transferred to a corporation similarly owned. While Bank and EABC have many similar banking powers, Bank engages to a substantial extent in retail banking, which EABC cannot do because it is prohibited by New York Banking Law from accepting deposits from the general public.[5] It appears from the facts of record that Bank and EABC have concentrated on complementary lines of service. EABC engages primarily in international lending and banking services, and Bank concentrates on providing domestic lending and banking services. This separation derives in part from statutory restrictions on EABC's general deposit-taking and trust powers, and in part from a respective business emphasis determined by the common management of the two companies. In light of the above and other facts in the record, it appears that consummation of Applicant's proposals will eliminate no significant competition. There is a long history of common ownership, common management, and cooperative operation of the two institutions, and it appears unlikely that this relationship would be altered if the subject applications were denied. On the basis of the record before it, the Board concludes that competitive considerations are consistent with approval of the applications.[6]

The financial and managerial resources of Applicant, which will be primarily dependent upon those of Bank and EABC, are considered satisfactory and its future prospects appear favorable. Thus, considerations relating to banking factors are consistent with approval of the application to acquire Bank.

In acting on the application to acquire EABC, the Board must first determine under the provisions of section 4(c)(8) of the Act whether the activities of EABC, as a New York Investment Company, are closely related to banking or managing or controlling banks. The New York Investment Company is a unique type of banking and financing corporation organized under a separate article of New York Banking Law that is believed to have no close institutional parallel under the laws of other States. Its singular powers and status chiefly reflect the diversity of New York's financial markets and the attractiveness of such markets to domestic and foreign financial institutions alike. There are now two principal types of New York Investment Companies. One type engages primarily in financing retail sales; included among this group are some of the nation's largest finance companies, such as General Motors Acceptance Corporation and Commercial Credit Company. The other type, including EABC, is engaged in transacting virtually all of

[3] Under section 4(c)(8) of the Act, the Board may determine that the prohibitions of section 4 of the Act shall not apply to the shares of any company the activities of which the Board after due notice and opportunity for hearing has determined by order or regulation to be so closely related to banking or managing or controlling banks as to be a proper incident thereto.

[3] The Metropolitan New York market consists of the five boroughs of New York City, plus Nassau, Putnam, Rockland, and Westchester Counties, and western Suffolk County, all in New York State, as well as the northern two-thirds of Bergen County and eastern Hudson County in New Jersey and southwestern Fairfield County in Connecticut.

[4] Bank deposit data are as of December 31, 1976; market share and market rank information are as of June 30, 1975.

[5] New York Banking Law Section 509, 4 *McKinney's Consolidated Laws* (1976).

[6] In reaching its determination on competitive factors in this application, the Board took into consideration the fact that Applicant will be owned by the same group of foreign banks that presently controls Bank and EABC and that controlled combined total assets on a world-wide basis of nearly $120 billion at year-end 1975. The subject application proposes a reorganization of these banks' existing interests in Bank and EABC, and does not represent an expansion of their joint presence in U.S. markets. No adverse comments have been received from the Department of Justice on this proposal. In a letter dated July 18, 1975, from Assistant Attorney General Thomas R. Kauper to Congressman Wright Patman, Mr. Kauper stated that the Department "was aware of no evidence which would indicate that the EABTC [Bank] venture is part of a more comprehensive illegal arrangement affecting the domestic or foreign commerce of the United States. Nor does it appear that the joint venture, when viewed in the context of a very large market containing numerous powerful domestic and foreign competitors, may substantially lessen competition as defined by the courts under Section 7 of the Clayton Act." It also appears from the record of this application that the existing joint ownership of Bank and EABC by six large European banks would not be altered if the subject applications were denied. Accordingly, in these circumstances, Applicant's ownership by six large European banks presents no adverse competitive considerations.

the usual activities of a commercial bank, except the general business of accepting deposits. These "banking" Investment Companies,[7] like EABC, are all ultimately controlled or affiliated with foreign banking organizations and are engaged primarily in internationally-related activities. In this regard, it appears that the New York Investment Company has, over the years, served as a means for foreign bank entry into New York in cases where entry through a direct branch or agency was either unavailable or undesirable for the purposes sought.

Each of the lending and banking services presently offered by EABC is offered by commercial banks generally and, in this connection, EABC competes with foreign banking organizations and domestic commercial banks and their Edge Corporation subsidiaries in the provision of such services in New York.[8] It is the Board's view, in light of the above and other facts of record, especially the unique structural and competitive circumstances existing in New York, that the present activities of EABC are closely related to banking.[9] In fact, EABC's activities are so like those generally provided by commercial banks, that there is a substantial question whether EABC should be considered a "bank" for purposes of the Act.

Section 2(c) of the Act (12 U.S.C. 1841(c)) defines the term "bank" to include any institution organized under the laws of any State of the United States which "accepts deposits that the depositor has a legal right to withdraw on demand" and engages in the business of making commercial loans. EABC is a State-chartered corporation that accepts "credit balances" for the account of its customers that the customers have a legal right to withdraw on demand, and it engages in the business of making commercial loans. Accordingly, if EABC's credit balances are deposits within the meaning of section 2(c), it would satisfy the definitional test.

In 1971, the Board determined that a similar New York Investment Company was not a "bank" within the meaning of section 2(c) based largely on three considerations.[10] First, the Board was persuaded at that time that Congress meant to include in the definition of "bank" only those institutions that offer to the public the general convenience of checking account facilities. In this regard, it was found that the New York Investment Company involved could accept credit balances only as an incident to transactions it was legally permitted to perform for its customers, that it could not solicit or accept deposits of idle funds, and that its customers were not permitted to use such balances in the manner of a general checking account, although drafts could be drawn on such accounts to pay for the import and export of goods. Second, the New York Superintendent of Banks had expressed the view that the distinction between credit balances and deposits was "meaningful" and "administrable" in New York. Third, the company involved was principally engaged in financing or facilitating transactions in international or foreign commerce. Since that time, the Board has generally reviewed the activities of New York Investment Companies owned by foreign banks in the course of considering proposed legislation to regulate foreign bank activities in the United States, and has recommended to Congress that these New York Investment Companies, such as EABC, should be subject to Federal banking regulation, including reserve requirements and interest rate controls on their credit balances. In this regard and in other situations, the Board has stated that it believes the credit balance accounts of foreign bank agencies and banking New York Investment Companies are in many respects the functional equivalent of deposits when maintained in connection with the provision of traditional commercial banking services.[11] The Board, however, has not determined that credit balances should be defined as demand deposits within the meaning of section 2(c) of the Act.

Viewing the credit balance activities of EABC in light of these precedents and other facts in the record, the Board is satisfied that the considerations reflected in its 1971 ruling apply equally to EABC and that therefore EABC should not be regarded as a "bank" because it does not accept demand deposits within the meaning of section 2(c) of the Act. The focus of the Act's legislative history on the general provision of checking accounts and the longstanding acceptance of the provision of checking accounts as one of the features distinguishing commercial banks from other financial institutions are factors that must be given particular weight.[12] When such factors are considered with the historical legal and administrative distinction between credit balance and deposit accounts in New York, and Congress' general intent to exclude international banking corporations from the Act's definition of "bank",[13] the Board believes that the Act need not be extended administra-

[7] In addition to EABC, there are: J. Henry Schroder Banking Corporation, New York, New York, a subsidiary of Schroders, Ltd., a registered foreign bank holding company; French-American Banking Corporation, New York, New York, a subsidiary of Banque Nationale de Paris, Paris, France, a registered foreign bank holding company; Nordic American Banking Corporation, New York, New York, which is owned by Svenska Handelsbanken; and Baer American Banking Corporation, New York, New York, a subsidiary of a private Swiss bank.

[8] The following banking and lending activities are those currently engaged in directly by EABC under authority of section 508 of New York Banking Law:

1. Borrowing and lending money (without limitation as to a single borrower);
2. Acquiring and disposing of bills of exchange, drafts, notes, acceptances, and other obligations for the payment of money, including bonds and mortgages on real property; making loans upon the security of such bonds and mortgages, and accepting bills of exchange or drafts upon them;
3. Issuing letters of credit;
4. Buying and selling foreign exchange;
5. Receiving funds for transmission to foreign countries;
6. Receiving and maintaining credit balances incidental to, or arising out of, the exercise of its lawful powers;
7. Investing in equity securities of any company (where such investments constitute no more than 5 per cent of the company's outstanding voting stock); and
8. Operating a foreign branch and through that branch receiving funds in the form of time account credit balances (almost entirely from foreign persons), lending such funds to banks and corporations primarily located outside the United States, and placing such funds in time accounts with banks.

[9] Two courts that have considered the "closely related" language in section 4(c)(8) of the Act have concluded, inter alia, that an activity generally engaged in by banks directly would generally qualify as "closely related" to banking or managing or controlling banks within the meaning of the statute. *National Courier Association* v. *Board of Governors of the Federal Reserve System*, 516 F.2d 1229 (D.C. Cir. 1975); *Alabama Association of Insurance Agents* v. *Board of Governors of the Federal Reserve System*, 533 F.2d 224 (5th Cir. 1976), modified, ---- F.2d ---- (5th Cir. January 10, 1977).

[10] Board letter of November 8, 1971 to the San Francisco Reserve Bank concerning the status of French-American Banking Corporation; see also Board Order of February 7, 1972 approving the application of Banque Nationale de Paris to retain French-American Banking Corporation under section 4(c)(9) of the Act, 58 Federal Reserve Bulletin 312 (1972).

[11] See the Board's Order of May 30, 1975, denying Bank of Tokyo's application to acquire Tokyo Bancorp International (Houston), Inc., Houston, Texas, under section 4(c)(9) of the Act, 61 Federal Reserve Bulletin 449 (1975); and a Board letter of March 17, 1977, to Citibank, N.A., New York, New York, regarding a proposal by Grindlays Bank, Ltd., London, England, to establish an agency in New York City.

[12] See *United States* v. *Philadelphia National Bank*, 374 U.S. 321, 358 (1962), where the Supreme Court in explaining the cluster of products and services that make commercial banking a distinct line of commerce for purposes of section 7 of the Clayton Act, noted that: Some commercial banking products or services are so distinctive that they are entirely free of effective competition from products or services of other financial institutions; the checking account is in this category.

[13] The definition of "bank" in section 2(c) of the Act specifically excludes Edge Act and Agreement Corporations operating under sections 25(a) and 25 of the Federal Reserve Act, respectively, and any other "organization that does not do business within the United States except as an incident to its activities outside the United States."

tively to include institutions such as EABC or other New York Investment Companies owned by foreign banks, so long as they continue to engage primarily in international banking activities. The resolution of the status of such companies under Federal banking laws, in light of the above considerations, is more properly a matter for legislative determination and, in this connection, the Board has recommended to Congress that New York Investment Companies owned or controlled by foreign banks be subject to the same Federal regulation that Congress may impose on branches and agencies of foreign banks.

Although, as determined above, EABC is presently engaged in activities closely related to banking, Applicant has also applied to engage through EABC in all activities permissible to EABC as a New York Investment Company under Article XII of the New York Banking Law, except that Applicant has agreed that (1) notwithstanding its broad investment powers, EABC will not invest in more than 5 percent of the voting shares of any company except with prior Board approval under the Act, and (2) EABC will continue to conduct its indirect leasing activities in accordance with § 225.4 (a)(6) of Regulation Y. Because EABC is already affiliated with Bank, a member bank, it is foreclosed by section 20 of the Glass-Steagall Act (12 U.S.C. § 337) from engaging principally in securities underwriting and distribution activities even though Article XII of the New York Banking Law permits a broad range of such securities activities to New York Investment Companies. Applicant has stated that EABC is not now engaged in underwriting activities and in the future would only engage in underwriting activities permissible to Bank.[14] Subject to these limitations, EABC's present and proposed activities all appear to be closely related to banking.

In order to approve the subject application by Order under section 4(c)(8), the Board is required to determine that Applicant's proposed operation of EABC as a New York Investment Company is a proper incident to banking or managing or controlling banks. This test requires the Board to consider whether Applicant's acquisition and operation of EABC pursuant to this application "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices". This statutory test necessitates a positive showing by Applicant that the public benefits of its proposal outweigh the possible adverse effects of its proposed acquisition. In the present case, the Board has determined that, based on the particular facts and circumstances and unique public benefits associated with this application, factors relating to the convenience and needs of the community to be served lend weight to approval of Applicant's application to acquire Bank, and the public benefits of its application to acquire EABC, subject to the conditions noted in this Order, outweigh the possible adverse effects of that proposal and therefore satisfy the "proper incident" test of section 4(c)(8) of the Act.

It is expected that approval of the subject applications will result in the more efficient operation of both Bank and EABC through improved internal supervision. Moreover, interposition of a holding company structure in this situation can be expected to reduce borrowing costs and permit Bank and EABC to raise capital more efficiently; in particular, since Applicant will become a primary or joint obligor on Bank's note to the FDIC arising out of the Franklin acquisition, EABC's earnings may also be applied toward reducing that debt, thus better enabling Bank to meet the convenience and needs of the communities it serves. In this regard, Applicant specifically expects to reduce the borrowing costs of Bank and EABC through the commitment of its shareholder banks to advance $25 million, $15 million for the benefit of Bank, replacing more expensive debt, and $10 million to EABC as additional capital. Approval of this particular application will also insure that, notwithstanding its broad powers under Article XII of New York Banking Law, EABC, an existing affiliate of Bank, will only engage in activities that are closely related to banking and proper incidents thereto.

EABC, like similar New York Investment Companies owned by foreign banks and agencies of foreign banks, does not have to maintain reserves against its credit balance accounts, and these accounts are not subject to interest rate limitations. While maintenance of such accounts may not cause EABC to be a "bank" for purposes of section 2(c) of the Act, the Board believes that for purposes of reserve requirements and interest rate limitations, such accounts should be considered to be deposits. The Board has, in this regard, specifically recommended to the Congress that it be given the authority to impose reserve requirements and interest rate limitations on all foreign bank operations in this country—whether conducted through branches, agencies, New York Investment Companies, or bank subsidiaries—because of the growing importance of such institutions in this country's money markets and their particular ability to transmit funds from abroad. Thus, from a broader structural and monetary policy viewpoint, the Board is seriously concerned by the fact that credit balance accounts maintained by foreign banking organizations are not generally subject to reserve requirements. In the Board's view, any proposal under section 4(c)(8) of the Act that would have the effect of diminishing the reserve base either by facilitating the acceptance of reserve-free credit balances or encouraging a shift from reservable deposits to such balances would entail serious adverse effects. This particular application, however, involves only a reorganization of the ownership of EABC, and insofar as the credit balances of EABC are concerned, the proposal merely preserves the status quo and does not reduce the reservable deposit base of the banking system or otherwise create an opportunity to shift deposits that does not already exist. If necessary, and in particular if a deliberate attempt to evade or circumvent domestic reserve or interest requirements were discovered, the Board could in the future proceed by regulation or otherwise to subject credit balance accounts held by member bank affiliates engaged in banking operations to the requirements of Regulations D and Q.[15] However, to subject only EABC and possibly one or two other foreign bank operations to these requirements at this time,[16] when most other foreign bank operations are conducted free from monetary controls, would put these institutions at a competitive disadvantage under existing circumstances. The most equitable solution to the problem of reserve-free credit balance accounts at foreign bank operations is uniform foreign bank legislation, a solution the Board has proposed and consistently recommended since 1974.

EABC has established two branches in California at which it engages primarily in international banking and lending services, but at which it may also engage in purely domestic commercial lending activities. The Board does not believe that it was within the intent of Congress to authorize under section 4(c)(8) of the Act the ownership of companies that would enable domestic bank holding companies to conduct an international banking business on a multistate basis outside of the explicit legal framework set up by the Congress in sections 25 and 25(a) of the Federal Reserve Act.[17]

[14] The Board recently decided to defer action on a proposal to make underwriting and dealing in Federal Government securities and general obligations of States or their subdivisions a permissible activity for bank holding companies. Board Order of October 19, 1976, 62 Federal Reserve Bulletin 928, 973 (1976).

[15] Approximately 70 percent of EABC's credit balance accounts are maintained at its foreign branch and payable abroad, and deposits payable only outside the United States are generally exempt from reserve and interest rate requirements.

[16] J. Henry Schroder Banking Corporation is also affiliated with a member bank, and Grindlays Bank, Ltd., in which Citibank has a substantial equity interest, plans to open an agency in New York at which credit balances will be maintained.

[17] In 1972, the Board permitted a foreign bank holding company under section 4(c)(9) of the Act to retain its interest in a New York Investment Company even though it was organizing a bank subsidiary in California. Board Order of February 7, 1972 approving Banque Nationale de Paris' retention of French-American Banking Corporation, 58 Federal Reserve Bulletin 311 (1972). In 1975, the Board denied an application by Bank of Tokyo, Tokyo, Japan, a foreign bank holding company, to acquire an international banking company, Tokyo Bancorp International (Houston), Inc., in a State outside of its State of principal banking operations under section 4(c)(9). Board Order of May 30, 1975, 61 Federal Reserve Bulletin 449 (1975). The Board subsequently

In particular, EABC's California offices are not subject to the restrictions on domestic business imposed on Edge Act and Agreement Corporations. Acquisition of such offices could give Applicant a competitive advantage over other domestic banking organizations and could thus undermine the domestic structure of multistate international banking competition that has been carefully prescribed by the Congress to avoid the conduct of domestic commercial banking operations at offices in more than one State. Such possible adverse effects on the structure and conduct of banking operations in this country are not, in the Board's judgment, outweighed by any particular benefits to be derived from Applicant's acquisition of EABC's California offices. The competitive benefits that may be derived from Applicant's presence in California can be equally achieved through Applicant's direct or indirect acquisition of an Agreement Corporation subsidiary in California, in accordance with the framework established by the Congress for the conduct of such activities on a multistate basis.[18] Accordingly, the Board has determined that ownership by Applicant of EABC, if EABC maintains its California offices, is not a proper incident to banking or managing or controlling banks, and that to conform with this determination Applicant must, if it acquires EABC, divest EABC's California offices within two years from the date as of which Applicant becomes a bank holding company.

EABC also has a branch in Nassau, The Bahamas, which engages in the types of banking activities conducted by shell branches of U.S. banks. So long as this branch limits its activities to those permissible for EABC under this Order, the Board believes that Applicant may operate this branch of EABC under section 4(c)(8) of the Act.[19] If Applicant or EABC proposes to engage in activities outside this country that are not permissible for EABC under this Order, Applicant may file a separate application under section 4(c)(13) of the Act to organize a subsidiary to engage in those activities.

Applicant has also applied to engage in three activities permissible for New York Investment Companies but in which it is not now engaged and has no fixed present intention to engage: underwriting activities permissible to Bank, a member bank, dealing in coin and bullion, and acting as financial agent of the Federal Government and as depositary of Federal money. The Board has deferred consideration of a proposal to specify the first of these activities to be permissible for bank holding companies under Regulation Y,[20] and in the Board's judgement, Applicant has not established any public benefits that would be derived from its engaging in any of these three activities through EABC. For this reason, the Board is unable to conclude that ownership of EABC, if EABC engaged in these activities, would be a proper incident to banking or managing or controlling banks. The Board is compelled to conclude instead, in light of the facts in the record, that EABC as a subsidiary of a domestic bank holding company, should not engage in these activities until it is able to present specific proposals concerning them and the manner in which and extent to which they would be conducted, and the specific public benefits that would be derived.

In its consideration of this proposal, the Board also noted that Applicant will serve as a single vehicle for the ownership of Bank and EABC by their existing foreign bank shareholders. The Board has previously determined that no one of the foreign bank shareholders of Bank is now a bank holding company and that the shareholders have not heretofore formed themselves into a "company", as defined in the Act, to control Bank. On the basis of the record, this reorganization does not appear to affect those conclusions. However, the Board is concerned that the close association of Applicant's shareholders could create opportunities for additional investments and activities by this group in the United States under circumstances that could be inconsistent with the purposes of the Act. Accordingly, the Board's approval of these applications is conditioned on a requirement that Applicant's foreign bank shareholders not proceed, otherwise than through Applicant, in substantially the same combination to engage directly or indirectly in additional banking or nonbanking activities or business ventures in this country.[21] The Board may, in any event, reconsider the question whether the shareholders have combined to act together as a company if in the future it appears the shareholders are not acting independently as essentially passive investors, and take appropriate action under the Act.

On the basis of the foregoing and all the facts of record, the Board has determined that the considerations affecting the competitive, banking, and convenience and needs factors under section 3(c) of the Act, and the balance of the public interest factors the Board must consider under section 4(c)(8) of the Act in permitting a bank holding company to engage in an activity on the basis that it is closely related to banking both favor approval of the applications subject, however, to the following conditions:

(1) That EABC continue to engage principally in the financing or facilitating of transactions in international or foreign commerce, and not accept demand deposits;

(2) That EABC comply with all reserve and interest rate requirements that may be imposed on it either as a result of action of the Board or enactment of legislation;

(3) That Applicant cause EABC to divest its offices in California within two years from the date as of which Applicant becomes a bank holding company;

(4) That EABC confine the activities of its Nassau branch to those permissible to EABC at its head office under this Order;

(5) That EABC not engage in the activities of underwriting, selling, or distributing securities, buying or selling coin and bullion, or acting as a financial agent of the United States Government or as a depositary of public moneys of the United States, or in any new activity in which New York Investment Companies by subsequent enactment may be empowered to engage, without the prior approval of the Board; and

(6) That Applicant's shareholders, and their parent and subsidiary organizations, will not, except through Applicant with the Board's approval under the Act, engage, as part of a group consisting of substantially the same companies as are shareholders of Applicant, in any additional banking or nonbanking activities or business ventures within the United States, other than normal banking transactions,[22] and that none of

approved Bank of Tokyo's application to acquire the same corporation as an Agreement Corporation subsidiary subject to the restrictions of section 25 of the Federal Reserve Act. Board letter of January 26, 1976, 62 Federal Reserve Bulletin 164. While Applicant is owned by foreign banks, it will not be a foreign bank holding company, and thus the issue presented in this case is whether a domestic bank holding company, irrespective of its ownership, should be allowed to use section 4(c)(8) of the Act to conduct a combination of domestic and international banking activities across State borders.

[18] The Board has considered Applicant submissions on this issue and believes the fact that EABC can engage in certain domestic activities not permissible to Edge Act or Agreement Corporations weighs in favor of denial rather than approval for the reasons cited in this Order.

[19] The Board notes that Regulation Y currently provides for the establishment of de novo branches under section 4(c)(8) in accordance with the procedures described in § 225.4(b)(1) of Regulation Y. These procedures, requiring local newspaper publication, are designed for domestic expansion of section 4(c)(8) offices; any bank holding company proposing to establish a branch of a section 4(c)(8) company outside of the United States should file a specific application to do so under § 225.4(b)(2). The Board has directed its staff to develop proposed procedures for the establishment of foreign offices of section 4(c)(8) companies to be published for public comment in the FEDERAL REGISTER.

[20] *Supra*, n. 14.

[21] The Board has imposed similar conditions in other circumstances where a bank is to be owned by several banking organizations. See Board Order of May 6, 1977 approving the amended application of SYB Corporation, Oklahoma City, Oklahoma, to become a bank holding company and Board letter of January 26, 1976, to Thomas L. Farmer, Esq. re UBAF Arab-American Bank, New York, New York.

[22] For the purpose of this condition, the exception for normal banking transactions is intended to permit several of Applicant's shareholders to participate independently in the same syndicated loan or other credit transaction, to maintain independently normal correspondent relationships with the same domestic bank, and to engage independently in other transactions of that character. The exception is not intended to permit the joint establishment of representative offices, branches, agencies, or the joint organization of or acquisition of voting shares in a United States organization by substantially the same shareholders as own Applicant.

Applicant's shareholders will sell, assign, or transfer any of its shares of Applicant unless it has obtained the agreement of any purchaser, assignee, or transferee to comply with this condition.

Subject to the conditions prescribed in this Order, the applications are hereby approved based on the record and for the reasons summarized above. The acquisition of Bank shall not be made before the thirtieth calendar day following the effective date of this Order; and the acquisition of Bank and EABC shall not be made later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of New York pursuant to delegated authority. The determination as to Applicant's operation of EABC is subject to the conditions set forth in this Order and in § 225.4(c) of Regulation Y, and to the Board's authority to require reports by and make examinations of bank holding companies and their subsidiaries, and to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's Orders and regulations issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,[2] effective May 10, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.77-14015 Filed 5-16-77;8:45 am]

FIRST CITY BANCORP. OF TEXAS, INC.

Request for Determination and Notice Providing Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)) ("the Act"), by First City Bancorporation of Texas, Inc., Houston, Texas ("First City"), for a determination that, with respect to a sale by First City (through its subsidiary, Texas Bank and Trust Company of Dallas and its affiliate, Texas Fiduciary Corporation, both located in Dallas, Texas) of First Bank & Trust Company, Cedar Hill, Texas ("First B&T"), to Mr. Patrick J. Leonard, First City is not, nor will be, in fact capable of controlling either First B&T or Patrick J. Leonard.

Section 2(g)(3) of the Act provides that shares transferred after January 1, 1966, by any bank holding company (or any company which but for such transfer, would be a bank holding company) directly or indirectly to any transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, shall be deemed to be indirectly owned or controlled by the transferor, unless the Board, after opportunity for hearing, determines that the transferor is not, in fact, capable of controlling the transferee.

Notice is hereby given, that, pursuant to section 2(g)(3) of the Act, an opportunity is provided for filing a request for oral hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than June 7, 1977. If a request for oral hearing is filed, each request should contain a statement of the nature of the requesting person's interest in the matter, his reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which such person wishes to give testimony. The Board subsequently will designate a time and place for any hearing it orders, and will give notice of such hearing to the transferor, the transferee, and all persons that have requested an oral hearing. In the absence of a request for an oral hearing, the Board will consider the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, May 10, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-14016 Filed 5-16-77;8:45 am]

WASHINGTON BANCORP.

Order Approving Formation of Bank Holding Company

Washington Bancorporation, Washington, Iowa ("Applicant"), has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 80 per cent (or more) of the voting shares of the successor by merger to The National Bank of Washington, Washington, Iowa ("Washington Bank"), and Ainsworth State Bank, Ainsworth, Iowa ("Ainsworth Bank"). The merger of The National Bank of Washington and Ainsworth State Bank was approved by the Comptroller of the Currency on February 1, 1977, under the charter and title of The National Bank of Washington ("Bank"). Upon consummation of the merger, the present office of Ainsworth State Bank would serve as a branch facility of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, a nonoperating corporation with no subsidiaries, was organized for the purpose of becoming a bank holding company through the acquisition of Bank. Consolidating figures from Washington Bank and Ainsworth Bank indicates that Bank would have deposits of $23.1 million[1] and be the largest of nine banks in the relevant market,[2] controlling approximately 23 per cent of the total deposits in commercial banks in the market. Upon acquisition of Bank, Applicant would control the 128th largest commercial bank in Iowa and .19 per cent of the total deposits in commercial banks in the State. Applicant presently has no subsidiaries and engages in no activities. Since the proposal is designed solely to place ownership of Bank into corporate form and Applicant has no subsidiaries, consummation of the proposal would neither eliminate significant existing or potential competition nor increase the concentration of banking resources in any relevant market. Accordingly, competitive considerations are consistent with approval of the application.

The financial and managerial resources of Washington Bank and Ainsworth Bank are generally satisfactory. The financial and managerial resources of Applicant and Bank, which will depend on the resources of Washington Bank and Ainsworth Bank, should also be generally satisfactory. Accordingly, considerations relating to the financial and managerial resources and future prospects of Applicant and Bank are consistent with approval of the application.

While it appears that no changes in services will be made as a result of Applicant's acquisition of Bank, it appears that consummation of the merger will improve and expand the services offered by Bank. Accordingly, considerations relating to the convenience and needs of the community to be served as they relate to this application are also regarded as consistent with approval. It is the Board's judgment that consummation of the proposed transaction would be consistent with the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors,[2] effective May 11, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-14017 Filed 5-16-77;8:45 am]

[2] Voting for this action: Governors Wallich, Coldwell, Jackson and Partee. Voting against this action: Governor Lilly. Absent and not voting: Chairman Burns and Governor Gardner.

Dissenting statement of Governor Lilly filed as part of the original document. Copies are available upon request from the Board of Governors of the Federal Reserve System, Washington, D.C. 20551, or the Federal Reserve Bank of New York.

[1] Deposits as of June 30, 1976.

[2] The Washington County banking market is approximated by all of Washington County.

WINNER BANSHARES, INC.

Formation of Bank Holding Company

Winner Banshares, Inc., Winner, South Dakota, which currently owns 2.9 per cent of the voting shares of Farmers State Bank, Winner, South Dakota ("Bank"), has applied for the Board's approval under 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of an additional 94.4 per cent of the voting shares of Bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than June 8, 1977.

Board of Governors of the Federal Reserve System, May 11, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Notice of Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on May 10, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FEA request are are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before June 6, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202–275–3532.

FEDERAL ENERGY ADMINISTRATION

FEA requests clearance of a new voluntary Form FEA–U537–S–0, Media Survey (Radio and Television). The FEA–U537–S–0 will be used to survey all Radio and Television stations throughout the United States to ascertain to what extent Educational Energy Conservation Tapes distributed by the FEA are being aired. FEA estimates respondents to this survey number approximately 1,625 (a 25 percent sample of 5,500 Radio stations and 1,000 Television stations) and that reporting burden averages 15 minutes per response.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

Food and Drug Administration

[Docket No. 77N–0162]

DRUGS FOR HUMAN USE; DRUG EFFICACY STUDY IMPLEMENTATION

Revocation of Exemption for Continued Marketing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is revoking the temporary exemptions under which certain drugs were allowed to remain on the market, labeled for their less-than-effective indications, beyond the time limit established for implementation of the Drug Efficacy Study. The drugs are azuresin, guanidine, and a combination containing dicyclomine hydrochloride, doxylamine succinate, and pyridoxine hydrochloride. The exemptions are no longer needed as the effectiveness classification of the drugs has now been resolved.

DATES: Effective date: May 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert H. Hahn, Administrative Compliance Branch (HFD–32), Bureau of Drugs, Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–4650.

SUPPLEMENTARY INFORMATION: In a notice published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623), FDA issued a list of drugs that had been evaluated under the Drug Efficacy Study and classified as less than effective for their labeled indications but, because of medical need, could remain on the market pending completion of scientific studies to determine their effectiveness. The temporary exemption applied to the listed products and to any similar, identical, or related products, provided studies were undertaken. Among those listed were Diagnex Blue (azuresin) and guanidine. The December 14, 1972 notice was amended by a notice published in the FEDERAL REGISTER of May 15, 1974 (39 FR 17343) granting an exemption for continued marketing of combination drug products containing dicyclomine hydrochloride, doxylamine succinate, and pyridoxine hydrochloride.

As a result of subsequent study of the drug products, the questions of their effectiveness have now been resolved. Azuresin was reclassified as effective in a notice (DESI 607) published in the FEDERAL REGISTER of September 18, 1973 (38 FR 26137). Guanidine was reclassified as effective in a notice (DESI 1546) published July 8, 1974 (39 FR 24933). The three-component combination was reclassified as lacking substantial evidence of effectiveness in a notice (DESI 10598) published January 28, 1977 (42 FR 5422).

Inasmuch as the temporary exemptions for the products are no longer relevant, they are hereby revoked. Accordingly, the December 14, 1972 notice, as amended by the May 15, 1974 notice, is further amended by deleting the following sections:

VI. Diagnostic Agents.
XII. Guanidine.
XVI. Antiemetic Combination Drug.

(Secs. 505, 701, 52 Stat. 1052–1053 as amended, 1055–1056 as amended (21 U.S.C. 355, 371) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1).)

Dated: May 6, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[Docket No. 76P–0429]

DEL MONTE CORP.

Tomato Juice Deviating From Identity Standard; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration has issued to the Del Monte Corp., as requested, a temporary permit to market test tomato juice made from concentrate prepared from tomato paste, water, and salt and in which the vitamin C content is raised to a level of 100 percent of the U.S. Recommended Daily Allowance (U.S. RDA) per 6-fluid-ounce serving. The finished product deviates from the standard of identity for tomato juice.

DATES: This permit is effective for a period of 15 months beginning no later than August 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Benjamin M. Gutterman, Bureau of Foods (HFF–402), 200 C St. SW., Washington, D.C. 20204 (202–245–1231).

SUPPLEMENTARY INFORMATION: In accordance with § 130.17 (21 CFR 130.17, formerly 21 CFR 10.5 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), concerning temporary permits to facilitate market testing of foods deviating from the requirements of the standards of identity promulgated pursuant to section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), notice is given that a temporary permit has been issued to Del Monte Corp., P.O. Box 3575, San Francisco, CA 94119. This permit covers interstate market testing of tomato juice that deviates from the standard of identity prescribed in § 156.145 (21 CFR 156.145, formerly §53.1 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)). This permit provides for the temporary marketing of 120,000 cases of twelve 46-ounce cans of the product to be distributed as follows:

1. In the States of Arkansas, Illinois, and Tennessee.

2. In the metropolitan areas of Indianapolis, Indiana; Louisville and Paducah, Kentucky; Detroit and Grand Rapids, Michigan; St. Louis, Missouri; and Dayton, Ohio.

The test product will be manufactured in the Del Monte plant in Frankfort, Indiana. The product to be temporarily marketed has been prepared from tomato paste that complies with the requirements of § 155.191(a)(1) (21 CFR 155.191(a)(1)), formerly 21 CFR 53.30(a)(1) prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), water, and salt. The finished product will be equivalent to a single-strength tomato juice normally found in the marketplace. In addition, ascorbic acid will be added in such quantity sufficient to raise the vitamin C level to 100 percent of the U.S. RDA in a 6-fluid-ounce serving.

The principal display panel of the labels will declare the product name as "Tomato Juice From Concentrate". The statement "enriched with vitamin C" will be prominently designated on the principal display panel. Each of the ingredients used, except for the tomato ingredient, will be declared on the label as required by the applicable sections of Part 101 (21 CFR Part 101, formerly 21 CFR Part 1 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)). The tomato ingredient complying with the requirements of § 155.191(a)(1) will be declared as "tomato concentrate".

This permit is effective for 15 months, beginning on the date the new food is introduced or caused to be introduced into interstate commerce, but no later than August 15, 1977.

Dated: May 11, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

HANOVER BRANDS, INC.

Tomato Juice Deviating From Identity Standard; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has issued to Hanover Brands, Inc., as requested, a temporary permit to market test tomato juice made from concentrate prepared from tomato paste, water, and salt. The finished product deviates from the standard of identity for tomato juice.

DATE: This permit is effective for a period of 15 months beginning no later than August 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Benjamin M. Gutterman, Bureau of Foods (HFF–402), 200 C St. SW., Washington, D.C. 20204, 202–245–1231.

SUPPLEMENTARY INFORMATION: In accordance with § 130.17 (21 CFR 130.17, formerly 21 CFR 10.5 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)) concerning temporary permits to facilitate market testing of foods deviating from the requirements of the standards of identity promulgated pursuant to section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), notice is given that a temporary permit has been issued to Hanover Brands, Inc., P.O. Box 334, Hanover, PA 17331. This permit covers interstate marketing tests of tomato juice that deviates from the standard of identity prescribed in § 156.145 (21 CFR 156.145, formerly § 53.1 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)). The permit provides for the temporary marketing of 15,000 cases of twenty-four 5½-ounce cans and 15,000 cases of twenty-four 12-ounce cans of the product to be distributed in the District of Columbia and the States of New York, New Jersey, Pennsylvania, Delaware, Maryland, and Virginia.

The test product will be manufactured in the Hanover Brands, Inc., plant located in Hanover, Pennsylvania. The product to be temporarily marketed has been prepared from tomato paste that complies with the requirements of § 155.191(a)(1) (21 CFR 155.191(a)(1), formerly 21 CFR 53.30(a)(1) prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), water, and salt. The finished product will be equivalent to a single-strength tomato juice normally found in the marketplace.

The principal display panel of the labels will declare the product name as "Tomato Juice From Concentrate." [FDA–225–77–4001]

REGULATORY INVESTIGATIONS INVOLVING DRUG, PESTICIDE, AND INDUSTRIAL CHEMICAL RESIDUES IN ANIMAL FEEDS AND IN MEAT AND POULTRY

Memorandum of Understanding With the Iowa State Department of Agriculture

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The agency is announcing that a memorandum of understanding has been executed with the Iowa State Department of Agriculture. The purpose of the memorandum is to establish an FDA/State cooperative program for inspections and related activities to ensure the safety of foods for humans and animals.

DATES: The memorandum of understanding became effective March 24, 1977.

FOR FURTHER INFORMATION CONTACT:

Gary Dykstra, Compliance Coordination and Policy Staff (HFC–13), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3470.

SUPPLEMENTARY INFORMATION: Pursuant to the notice published in the FEDERAL REGISTER of October 3, 1974 (39 FR 35697) stating that future memoranda of understanding between the Food and Drug Administration and others would be published in the FEDERAL REGISTER, the Commissioner of Food and Drugs is issuing the following memorandum of understanding:

MEMORANDUM OF UNDERSTANDING BETWEEN THE IOWA DEPARTMENT OF AGRICULTURE AND THE FOOD AND DRUG ADMINISTRATION

REGULATORY INVESTIGATIONS INVOLVING DRUG, PESTICIDE, AND INDUSTRIAL CHEMICAL RESIDUES IN ANIMAL FEEDS AND IN MEAT AND POULTRY

The Food and Drug Administration (FDA) of the Department of Health, Education, and Welfare is charged with the enforcement of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301). In fulfilling its responsibilities under the act, FDA directs its activities toward the protection of the public health of the nation by ensuring that foods for humans and animals are safe and wholesome and that animal feeds are free of illegal drug, pesticide, and industrial chemical residues. This is accomplished by inspecting the processing and distribution of animal feeds and examining samples thereof to assure compliance with the act.

The Iowa Department of Agriculture, under its state authorities, conducts investigations and related activities to assure the safety and wholesomeness of foods and feeds.

Meat and poultry may become contaminated with illegal drug, pesticide, or industrial chemical residues from several sources, including the misuse of animal drugs, the use of animal feeds containing illegal drugs, pesticides, and industrial chemicals, or from the environment. As a result, the State agency and FDA have certain related objectives in carrying out their respective regulatory and service activities. Therefore, it is desirable from the standpoint of public interest to set forth in this Memorandum of Understanding, the work-sharing program being adopted to enable each agency to discharge, as effectively as possible, its responsibilities relative to the problem of illegal drug, pesticide, and industrial chemical residues in meat and poultry and in feeds for food-producing animals. This Memorandum of Understanding will augment the agreement between FDA and the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture relative to their regulatory programs involving residues in animal feeds and in meat and poultry, which was published in the FEDERAL REGISTER of April 10, 1975 (40 FR 16228).

I. *Purpose.* It is the purpose of this understanding to establish an FDA/State cooperative program wherein the Iowa State Department of Agriculture (ISDA) will conduct followup inspections on Animal and Plant Health Inspection Service, U.S. Department of Agriculture (APHIS/USDA) residue findings and thus avoid duplicative inspections by the FDA Kansas City Field Office and ISDA.

II. *Background.* Under the FDA/APHIS cooperative program formalized in the April 10 Memorandum of Understanding, the FDA Kansas City Regional Office is notified when violative residue findings are encountered in meat and poultry tissues under the APHIS National Residue Monitoring Program. APHIS also notifies the ISDA Director of Agriculture, Meat and Poultry Division of the residues. By informal agreement Kansas City Regional Office undertook all followup inspections.

There has been an increase in the residue reports requiring followup in Iowa, and there is a need for more expeditious investigation and reporting. The Kansas City Regional FDA Office and the Iowa State Department of Agriculture expressed interest in a joint Kansas City Regional FDA Office and ISDA program, which would reduce travel time and avoid any duplication in investigations.

III. *Work-Sharing Program.* A. Goals and Responsibilities: The parties to this understanding will share the responsibility for the investigation of APHIS/USDA reports of illegal residues found in edible tissue samples of meat or poultry originating in the State of Iowa. Close liaison and communications will be maintained to assure that manpower is efficiently utilized and regulatory efforts are properly coordinated to achieve a high level of industry compliance.

B. The Food and Drug Administration, Region VII, Kansas City Regional Office, will:

1. Designate a coordinator to accomplish the goals of this Memorandum of Understanding.

2. Coordinate with ISDA to determine whether APHIS/USDA residue findings represent a first, second, or subsequent violation.

3. On a first violation report, reach agreement with ISDA on which agency shall undertake the investigation except that Kansas City Regional FDA Office shall conduct an investigation where it appears that regulatory action can be supported on a first violation.

4. Conduct all second and subsequent violation followups in all cases where the investigation on the first violation resulted in evidence adequate to support regulatory action.

5. Issue the warning letter in all cases where the FDA Kansas City Regional Office has been called in to complete the investigation for regulatory purposes.

6. Provide copies of all investigation reports, warning letters, and responses from establishments to ISDA.

7. Provide training for ISDA personnel

7. Provide training for ISDA personnel concerning the documentation of violations of the Federal Food, Drug, and Cosmetic Act to identify the probable cause and responsible individuals.

8. Be responsible for the analysis of samples collected during the investigation, and properly store the sample required under section 702(b) of the act (21 U.S.C. 372(b)) pending the outcome of the FDA or State investigations. This sample shall be retained for 3 years pending possible court action, unless the Kansas City regional FDA Office determines the culpability has not been established, or methology is not adequate to support a violation. In the latter event, the sample will be discarded.

C. The Iowa State Department of Agriculture will:

1. Upon the request of the Kansas City Regional FDA Office, conduct the investigation for the purpose of determining the probable cause of the violation and the culpable individual(s) and to promote voluntary compliance.

2. Immediately notify the Kansas City Regional FDA Office when their investigation identifies the probable cause and the responsible individual(s) and it appears that a regulatory action can be supported, so that FDA or joint inspection can be conducted to develop supporting evidence.

3. Where regulatory action cannot be supported, develop investigational reports, including an endorsement of proposed or actual followup, which shall be promptly submitted to the Kansas City Regional FDA Office. ISDA shall take the responsibility for forwarding copies of the reports to regional FDA offices.

4. At the request of Kansas City Regional FDA Office, conduct investigations of second incidents where the first investigation failed to disclose sufficient evidence to support regulatory action. This second investigation will be conducted under the same conditions as described under paragraphs C.1. and 2. above.

5. Bring any action that may be indicated under the State law, whether or not a case may or may not be brought by the Kansas City Regional FDA Office.

6. Notify the FDA Coordinator of actions being initiated and final results.

7. Keep the FDA Coordinator fully informed of pertinent details relating to this program, including copies of correspondence to producers, shippers, etc.

IV. *Term of Understanding.* A. This understanding will expire on March 24, 1978 unless renewed and signed by both cooperating agencies to continue it in effect for another year.

B. A new Memorandum of Understanding will be prepared each year with asterisks included to indicate revision.

C. This understanding in its entirety, or in part, may be revised by mutual consent or terminated upon 30 day advance written notice by either agency.

Approved and accepted for the Iowa State Department of Agriculture:

Dated: March 24, 1977.

R. H. Lorensberry, *Secretary, Iowa Department of Agriculture.*

Approved and accepted for the Food and Drug Administration:

Dated: March 24, 1977.

Lloyd R. Claiborne, *Regional Food and Drug Director, Food and Drug Administration, Kansas City, Regional Office.*

Effective date: This memorandum of understanding became effective March 24, 1977.

Dated: May 11, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[FR Doc.77–13994 Filed 5–16–77;8:45 am]

[Docket No. 77N–0086]

SOURCE PLASMA (HUMAN)

Extension of Effective Date for Shipment Without License; Availability of Guidelines

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document (1) extends to July 11, 1977, the time within which manufacturers may continue to ship Source Plasma (Human) in interstate commerce without a license, and (2) announces the availability of guidelines for Source Plasma (Human).

EFFECTIVE DATE: May 17, 1977.

ADDRESSES: Written comments and requests for copies of guidelines (identified with the FDA docket number in the

heading of this document) to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Al Rothschild, Bureau of Biologics (HFB–620), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, MD 20014 (301–443–1920).

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs issued a notice, published in the FEDERAL REGISTER of April 5, 1977 (42 FR 18129), advising manufacturers of Source Plasma (Human) that they would no longer be permitted to ship such plasma in interstate commerce, regardless of its intended use, unless they had received a license or an approved amendment of a license by May 11, 1977.

In response to the April 1977 notice, the Commissioner received a request from the American Blood Resources Association (ABRA) to publish a notice of availability of Food and Drug Administration (FDA) guidelines employed in evaluating license applications for Source Plasma (Human) and to extend by 120 days the effective date after which manufacturers could no longer ship Source Plasma (Human) in interstate commerce without a license. Because the guidelines were not formally made available to all applicants, ABRA contends, licenses or amendments should not be denied for noncompliance.

The Commissioner advises that presently most applications comply with all FDA standards. With the exception of specific guidelines for noninjectable use and for red blood cell immunization, these application criteria have been applied to Source Plasma (Human) since 1973; they were well distributed in the plasmapheresis community. Moreover, the Commissioner notes that any application processing delay due to deviations caused by the unavailability of guidelines would be resolved in less than 60 days if the appplicant responded within a reasonable period of time after FDA gave notice of the deviations. However, to assure that a delay resulting from the guidelines being unavailable does not unfairly preclude an applicant from continuing shipment of Source Plasma (Human) for noninjectable products, the Commissioner is extending the effective date for 60 days to July 11, 1977. In addition, the guidelines have been placed in the office of the Hearing Clerk (HFC–20), Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857 and are available upon request.

Concern was expressed by ABRA that some license application might be denied immediately before the deadline, thus precluding revision by the applicant to conform with FDA objections. The responsibility for filing approvable applications rests with the applicant. Several applications have been filed immediately prior to the deadline. Obviously, FDA cannot review and evaluate these applications within the remaining time. No extension of time would eliminate the problem of justified denial of applications coming close to the deadline for obtaining approval. The now extended July 11 date should eliminate all legitimate concerns about denials of inadequate applications.

Dated: May 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

Health Resources Administration

NATIONAL ADVISORY COUNCIL ON HEALTH PROFESSIONS EDUCATION

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of June 1977:

NAME: National Advisory Council on Health Professions Education.

DATE AND TIME: June 6–7, 1977, 8:30 a.m.

PLACE: Conference Room No. 6, Building 31, National Institutes of Health, 6th floor, C-Wing, 9000 Rockville Pike, Bethesda, Marylind 20014, Open for entire meeting.

PURPOSE: The Council advises the Secretary with respect to the preparation of general regulations and with respect to policy matters in the administration of programs of financial assistance for the health professions and makes recommendations based on its review of applications requesting such assistance.

AGENDA: The Council will meet in open session to review several drafts of program specifications prepared for use in the implementation of Pub. L. 94–484.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Ms. Lynn Stevens, Bureau of Health Manpower, Room 4–22, Federal Center Building No. 2, 3700 East West Highway, Hyattsville, Maryland 20782, Telephone (301) 436–6508.

Agenda items are subject to change as priorities dictate.

Dated: May 9, 1977.

JAMES A. WALSH,
Associate Administrator for Operations and Management.

Meeting

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Adult Education. The meeting shall be open to the public. This notice also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92–463, Section 10(a)(2)).

DATES: June 9, 1977, 1:00 p.m. to 10:00 p.m., Committee Meetings; June 10, 1977, 8:00 a.m. to 9:30 p.m.; June 11, 1977, 8:00 a.m. to Noon.

ADDRESS: The Mills Hyatt House, Meeting and Queen Streets, Charleston, South Carolina 29401.

FOR FURTHER INFORMATION CONTACT:

Dr. Gary A. Eyre, Executive Director, National Advisory Council on Adult Education, 425 13th St., N.W., Washington, D.C. 20004 (202/376–8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 311 of the Adult Education Act (80 Stat. 1216.20 U.S.C. 1201). The Council is directed to: Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Council shall be open to the public.

The proposed agenda includes: South Carolina Director's Report; Adult Education Act—Futures and Amendments; Lifelong Learning; USOE/RER Project; Committee Reports; Annual Report; FY–79 NACAE Budget; Election of Council Chairman and Vice Chairman, 4:00 p.m., June 10, 1977.

Records shall be kept of all Council proceedings, and shall be available for public inspection at the Office of the National Advisory Council on Adult Education, Room 323, Pennsylvania Bldg., 425 13th St., N.W., Washington, D.C., 20004.

Signed at Washington, D.C. on May 10, 1977.

GARY A. EYRE,
Executive Director, National Advisory Council on Adult Education.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Community Planning and Development

[Docket No. N–77–758]

DISCRETIONARY GRANTS IN BEHALF OF NEW COMMUNITIES

Dates for Submission of Applications for Fiscal Year 1977

AGENCY: Department of Housing and Urban Development.

ACTION: Notice.

SUMMARY: This notice sets the Fiscal Year 1977 deadline for requesting discretionary grants applicable to New Communities.

EFFECTIVE DATE: May 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Warner, Office of New Communities, Telephone: 202–755–7523.

SUPPLEMENTARY INFORMATION: One February 27, 1976 (41 FR 8612), the Secretary amended the Community Development Block Grant regulations to include, among other things, application dates for requesting discretionary grants applicable to New Communities during Fiscal Year 1976, 24 CFR Part 570.400 (c)(2)(iii)(A). This notice simply updates that deadline for Fiscal Year 1977. A finding of inapplicability of the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1. It is available for public inspection in the office of the Rules Docket Clerk, Room 10141, 451 7th Street SW., Washington, D.C., during normal business hours.

Accordingly, pursuant to this notice, applications for grants from the Secretary's Fund on behalf of New Communities under § 570.403 to be made from Fiscal Year 1977 funds will be accepted anytime during Fiscal Year 1977 (October 1, 1976 to close of business on September 30, 1977).

Issued at Washington, D.C., May 9, 1977.

ROBERT C. EMBRY, JR.,
Assistant Secretary for Community Planning and Development.

BONNEVILLE DAM INTEGRATING TRANSMISSION

Notice of Availability of Draft Supplement to Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Bonneville Power Administration has prepared a draft facility location supplement to its Fiscal Year 1978 Environmental Statement. This supplement covers the proposal for Bonneville Dam Integration Transmission.

Bonneville Dam Integrating Transmission involves the construction of transmission facilities to integrate the generation output of the second powerhouse at Bonneville Dam near the town of North Bonneville, Washington. The area under consideration lies in southwestern Washington in Clark and Skamania Counties.

Copies of the draft supplement are available for inspection in the library of the headquarters office of Bonneville Power Administration, 1002 NE. Holladay Street, Portland, Oregon 97232; the Washington, D.C., Office in the Interior Building, Room 5600; and at the Portland Area Office, Room 201, Lloyd Plaza Building, 919 NE. 19th Avenue, Portland, Oregon 97208.

Copies are also available at the following Government Depository Libraries:

Bureau of Land Management

ALASKA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

MAY 9, 1977.

The U.S. Department of Agriculture, Forest Service, filed application Serial No. AA-3060, on July 24, 1968, for a withdrawal in relation to the following described lands:

CHUGACH NATIONAL FOREST, SEWARD MERIDIAN ALASKA

RUSSIAN RIVER RECREATION AREA

T. 5 N., R. 4 W., Seward Meridian (Protracted)
Sec. 33: fractional part of N½ between Kenal River on the north and Russian River on the south; NE¼SE¼ lying east of Russian River.
Sec. 34: that part of SW¼NE¼, NW¼, N½SW¼, NW¼SE¼ lying south of Kenal River and east of Russian River.
Containing approximately 340 acres.

COOPER LAKE RECREATION AREA

T. 4 N., R. 3 W., Seward Meridian (Protracted)
Sec. 36: SW¼SE¼ (fractional).
T. 3 N. R. 3 W., Seward Meridian (Protracted)
Sec. 1: W½ (fractional), W½E½.
Sec. 12: NW¼NE¼, N½NW¼ (fractional).
Containing approximately 375 acres.

JUNEAU FALLS RECREATION AREA

T. 5 N., R. 4 W., Seward Meridian (Protracted)
Sec. 13: SE¼SW¼, SW¼SE¼.
Sec. 24: W½NE¼, E½NW¼, NE¼SW¼, NW¼SE¼.
Containing approximately 320 acres.

The applicant desires that the land be reserved for three recreation areas within the Chugach National Forest.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on February 20, 1976, Volume 41, No. 35, Page 7795, Document No. 76-4875.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501 on or before July 1, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before July 1, 1977.

The above-described lands are temporarily segregated from the operation of the public land laws, including the mining and mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Alaska State Office, Bureau of Land Management, Department of the Interior, 555 Cordova Street, Anchorage, Alaska 99501.

CURTIS V. MCVEE,
State Director.

ALASKA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The U.S. Department of the Interior, Bureau of Reclamation filed application Serial No. AA-502, on October 19, 1966, for a withdrawal in relation to the following described lands:

T. 15 N., R. 2 E., Seward Meridian, Alaska
Sec. 7, NE¼SE¼, SE¼NE¼;
containing 80 acres.

The applicant desires that the land be reserved for protection, maintenance and operation of the Eklutna Hydroelectric Project.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on March 8, 1967, 32 FR 3839, document No. 67-2538.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501 on or before June 15, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before June 15, 1977.

The above-described lands are temporarily segregated from the operation of the public land laws, including the mining and mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will be not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Alaska State Office, Bureau of Land Management, Department of the Interior, 555 Cordova Street, Anchorage, Alaska 99501.

CURTIS V. MCVEE,
State Director.

[OR 8844]

OREGON

Order Providing for Opening of Public Land

MAY 10, 1977.

1. In an exchange of lands made under the provisions of section 8 of the Act of June 28, 1934, 48 Stat. 1269, 1272, as amended and supplemented, 43 U.S.C. 315g (1964), the following land has been reconveyed to the United States.

WILLAMETTE MERIDIAN

T. 14 S., R. 44 E.,
Sec. 16, NE¼SW¼;
Sec. 22, S½NE¼;
Sec. 23, S½NW¼;
Sec. 27, SW¼NW¼ and NW¼SW¼;
Sec. 28, S½NE¼, SW¼SW¼, and SE¼;
Sec. 33, N½ and N¼SE¼;
Sec. 34, NW¼NW¼, S½NW¼, and NW¼SW¼.

The area described contains 1,120 acres in Baker County.

2. All minerals in the SW¼NW¼ and NW¼SW¼ of Sec. 27 and in the S½NE¼ and SE¼ of Sec. 28 were and continue to be in United States' ownership and open to operation of the mining laws (Ch. 2, Title 30 U.S.C.) and the mineral leasing laws.

3. The subject land is located in the southern portion of Baker County approximately 40 miles southeast of the City of Baker, Elevation ranges from 2,500 to 3,800 feet above sea level, and the topography is generally steep and rolling. Vegetation consists primarily of native grasses and sagebrush. In the past, the land has been for livestock grazing purposes, and it will be managed, together with adjoining national resource lands, for multiple use.

4. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the land described in paragraph 1 hereof is hereby open (except as already provided in paragraph 2 hereof) to operation of the public land laws, including the mining laws (Ch. 2, Title 30 U.S.C.) and the mineral leasing laws. All valid applications received at or prior to 10:00 a.m. June 15, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

5. Inquiries concerning the land should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

VIRGIL O. SEISER,
Acting Chief, Branch of Lands and Minerals Operations.

OREGON

Order Providing for Opening of Public Land

MAY 10, 1977.

1. In an exchange of lands made under the provisions of section 8 of the Act of June 28, 1934, 48 Stat. 1269, 1272, an amended and supplemented, 43 U.S.C. 315g (1970), the following land has been reconveyed to the United States:

WILLAMETTE MERIDIAN

T. 1 N., R. 19 E.,
Sec. 2, that portion of NW¼SW¼, containing 10 acres, more or less, located north of the centerline of the John Day River;
Sec. 3, that portion of the N½SE¼, containing 10 acres, more or less, located north of the centerline of the John Day River;
Sec. 13, NW¼NW¼;
Sec. 14, NE¼NE¼ and that portion of the NW¼NE¼, containing 35 acres, more or less, located east of the centerline of the John Day River.

The area described contains 135 acres in Gilliam County.

2. The subject land is located adjacent to the John Day River approximately 27 miles northwest of the Town of Condon. Elevation ranges from 400 to 1,000 feet above sea level, and the topography varies from generally flat near the river to very rough and steep. Vegetation consists primarily of native grasses and sagebrush with some willows and poplars. In the past, the land has been used for livestock grazing purposes, and portions nearest the river also have outdoor recreational values. The land will be managed, together with adjoining national resource lands, for multiple use.

3. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the land described in paragraph 1 hereof is hereby open to operation of the public land laws, including the mining laws (Ch. 2, Title 30 U.S.C.) and the mineral leasing laws. All valid applications received at or prior to 10 a.m. June 15, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

WILLAMETTE MERIDIAN

T. 10 N., R. 31 E.,
Sec. 1, S½S½.
T. 10 N., R. 32 E.,
Sec. 7, lots 1 and 2, NE¼, and E½NW¼.

The areas described aggregate 463.31 acres in Franklin County.

2. The subject lands are located in the area known as the Juniper Forest approximately 14 miles northeast of the City of Pasco. Elevation ranges from 800 to 1,060 feet above sea level, and the topography is generally flat to rolling. Vegetation consists primarily of sagebrush, native grasses, and some western juniper. In the past, the lands have been used for livestock grazing purposes. The lands also have outdoor recreational values, and they will be managed, together with adjoining national resource lands, for multiple use.

3. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the lands described in paragraph 1 hereof are hereby open to operation of the public land laws, including the mining laws (Ch. 2, Title 30 U.S.C.) and the mineral leasing laws. QUALIFIED JOINT BIDDERS

List; Amendment

According to the regulations 43 CFR 3302.3-2(a), any person who wishes to submit a joint bid for an oil and gas lease under the Outer Continental Shelf Lands Act (43 U.S.C. 1331-1343) during the six month bidding period which began on May 1, 1977, must have filed no later than 45 days before that date a sworn statement of production covering the prior production period of July 1, 1976, through December 31, 1976. In order for the person to bid jointly without restriction, his statement should attest to an average daily production during that time of no more than 1.6 million barrels a day of crude oil, natural gas and liquified petroleum products.

Since March 17, 1977, a number of companies who had not timely filed their statements of production have inquired as to whether an extension of time might be granted. It has now been determined that acceptance of statements of production up until the close of business on June 14, 1977, would be in the national interest and not incompatible with the purposes of the regulations. Therefore, any such sworn statements as to production of an average daily amount of less than 1.6 million barrels a day of crude oil, natural gas and liquified petroleum products during the applicable production period (July 1, 1976, through December 31, 1976) will be accepted by this office until the close of business on June 14, 1977, to qualify the person filing to bid jointly during the bidding period ending October 31, 1977.

GEORGE L. TURCOTT,
Acting Director,
Bureau of Land Management.

MAY 11, 1977.

MIDWEST REGION SUPERINTENDENTS, ET AL.

Delegation of Authority

SECTION 1. *Superintendents.* The National Park Service Superintendents of the Midwest Region, in the administration, operation, and development of the areas under their supervision, are authorized to exercise all of the authority now or hereafter delegated to the Regional Director, Midwest Region, by the Director, National Park Service, except with respect to the following:

(a) Approval of master plans.

(b) Acceptance of an offer in settlement of a timber trespass unless (1) the trespass is an innocent one, (2) the damages therefrom do not exceed $5,000, and (3) payment of the full amount of the damages is offered.

(c) Sales of timber pursuant to the Federal Property and Administrative Services Act of 1949, and the Federal Property Management Regulations when the fair market value of the timber involved in any single transaction exceeds $1,000.

(d) Approval of programs for destruction and disposition of wild animals which are damaging the land or its vegetative cover, and of permits to collect rare or endangered species.

(e) Acceptance of donations of personal property valued in excess of $10,000, and acceptance of donations of money in excess of $10,000.

(f) Authority to designate areas at which recreation fees will be charged, as specified by the Land and Water Conservation Fund Act of 1965 (78 Stat. 987), as amended.

(g) Authority to select from the fees established by 43 CFR Part 18 (38 FR 3385), specific fees to be charged at the designated areas in accordance with the Land and Water Conservation Fund Act of 1965 (78 Stat. 987), as amended.

(h) Authority to execute, approve, and administer contracts and to issue purchase orders for equipment, supplies, and services as follows:

(1) Superintendents of Indiana Dunes National Lakeshore, Jefferson National Expansion Memorial, Ozark National Scenic Riverways, and Isle Royal National Park—in excess of $100,000.

(2) Superintendents of Apostle Islands National Lakeshore, Lincoln Home National Historic Site, Voyageurs National Park, Sleeping Bear Dunes National Lakeshore, St. Croix National Scenic Riverway, and Cuyahoga Valley National Recreation Area—in excess of $50,000.

(3) All other Superintendents in Midwest Region—in excess of $10,000.

(i) Authority with respect to the preservation of historical and archeological data (including relics and specimens) which might otherwise be lost as a result of the construction of a dam

(j) Authority to approve land acquisition priorities.

(k) Authority to execute the land acquisition program, including contracting for acquisition of lands and related property, and options and offers to sell related thereto.

(l) Authority to issue revocable special use permits having a term of more than 10 years.

(m) Authority to hire, rent, or purchase personal property from employees.

(n) Authority to conduct archeological investigations and salvage activities.

SECTION 2. Delegation.

(a) *Associate Regional Director, Administration.* The Associate Regional Director, Administration, is authorized to exercise all the procurement and contracting authority now or hereafter vested in the Regional Director, Midwest Region, except authority to contract for acquisition of land and related property, and options and offers to sell related thereto.

(b) *Regional Chief, Contracting and Property Management Division.* The Regional Chief, Contracting and Property Management Division, is authorized to exercise all the procurement and contracting authority now or hereafter vested in the Regional Director, Midwest Region, except authority to contract for acquisition of land and related property, and options and offers to sell related thereto.

(c) *Regional General Supply Specialist.* The Regional General Supply Specialist may execute and approve purchase orders and contracts not in excess of $10,000.

(d) *Chief Archeologist, Midwest Archeological Center.* The Chief Archeologist, Midwest Archeological Center, may execute, approve, and administer contracts and issue purchase orders in amounts not to exceed $10,000 for equipment, supplies, and services, excluding archeological investigations and salvage activities, in conformity with applicable regulations and subject to the availability of appropriated funds.

(e) *Staff Curator (Museum Management).* The Staff Curator (Museum Management) may issue purchase orders not in excess of $1,000 for museum or exhibit specimens and historic house furnishings in conformity with applicable regulations and statutory authority and subject to availability of appropriated funds.

(f) *Chief, Division of Land Acquisition.* The Chief, Division of Land Acquisition, is authorized to:

(1) Approve and accept offers to sell to or exchange with the United States, lands or interests in lands, and to execute all necessary agreements and conveyances incident thereto.

(2) Accept deeds conveying to the United States lands or interests in lands.

(3) Approve on behalf of the National Park Service offers of settlement in condemnation cases.

(4) Approve claims for reimbursement under Public Law 91–646.

(g) *Field Land Acquisition Officers.* All Field Land Acquisition Officers are authorized to exercise authority with respect to the following:

(1) Approve and accept offers to sell to or exchange with the United States lands or interests in lands when the amount involved does not exceed $100,000.

(2) Accept deeds conveying to the United States lands or interests in lands.

(3) Approve claims for reimbursement under Public Law 91–646 when the amount involved does not exceed $5,000.

SECTION 3. *Redelegation.* The authority delegated in this order No. 6 may not be redelegated, except that a Superintendent may, in writing, redelegate to any officer or employee the authority delegated to him by this order and may authorize written redelegation of such authority. Each redelegation shall be published in the FEDERAL REGISTER.

SECTION 4. *Revocation.* This order supersedes Midwest Region Order No. 5, dated March 1, 1972, and published in 37 FR 6324–6325, as amended.

(National Park Service Order No. 77, 38 FR 7478 published March 22, 1973, as amended.)

Dated: February 25, 1977.

MERRILL D. BEAL,
Regional Director, Midwest Region.

[Order No. 5, Amdt. No. 6]

SUPERINTENDENTS, ET AL., SOUTHEAST REGION

Delegation of Authority

Order No. 5, approved March 17, 1972, and published in the FEDERAL REGISTER April 19, 1972 (37 FR 7721) as amended, sets forth limitations on redelegations of contracting and procurement authority. This amendment revises paragraphs (c), (d), and (e) of Section 2 and adds paragraphs (i) and (j) to Section 2 as follows:

(c) *Assistant Chief, Contracting and Property Management Division.* The Assistant Chief, Contracting and Property Management Division, may execute and approve contracts not in excess of $500,000 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to availability of appropriated funds. This authority may be exercised by the Assistant Chief in behalf of any area administered by the Chief, Contracting and Property Management Division.

(d) *Contracting Specialist, Contracting and Property Management Division.* The Contracting Specialist may execute and approve contracts not in excess of $500,000 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to the availability of appropriated funds. This authority may be exercised by the Contracting Specialist in behalf of any area administered by the Chief, Contracting and Property Management Division.

(e) *Procurement Agent, Contracting and Property Management Division.* The Procurement Agent may execute and approve contracts not in excess of $50,000 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to the availability of appropriated funds. This authority may be exercised by the Procurement Agent in behalf of any area administered by the Chief, Contracting and Property Management Division.

(i) *Procurement Clerk, Contracting and Property Management Division.* The Procurement Clerk may execute and approve contracts not in excess of $10,000 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to the availability of appropriated funds. This authority may be exercised by the Procurement Clerk in behalf of any area administered by the Chief, Contracting and Property Management Division.

(j) *Management Assistant, Contracting and Property Management Division.* The Management Assistant may execute and approve contracts not in excess of $25,000 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to the availability of appropriated funds. This authority may be exercised by the Management Assistant in behalf of any area administered by the Chief, Contracting and Property Management Division.

(National Park Service Order No. 77 (38 FR 7478), published March 22, 1973, as amended.)

DAVID G. WRIGHT,
Acting Regional Director, Southeast Region.

Dated: February 4, 1977.

[Investigation No. 337-TA-34]

NUMERICALLY CONTROLLED MACHINING CENTERS AND COMPONENTS THEREOF

Investigation

Notice is hereby given that a complaint was filed with the United States International Trade Commission on April 14, 1977, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337) on behalf of the Burgmaster Division, Houdaille Industries, Inc. (hereinafter "Burgmaster" or "complainant") 13900 South Broadway, Los Angeles, California 90061, alleging that unfair methods of competition and unfair acts exist in the importation of certain machining centers with automatic tool changers (hereinafter "Numerically Controlled Machining Centers") into the United States, or in their sale, by reason of (1) the alleged coverage by claims 1 and 2 of U.S. Letters Patent 3,891,910 of a tool offset feature in the numerical control unit for the numerically controlled machining centers, (2) the alleged unfair use of know-how and trade secrets relating to the machining center unit of said machining centers, and (3) the unfair use of Houdaille's trademark "BURGMASTER", in the promotion and sale of the numerically controlled machining centers. The complaint further alleges that the effect or tendency of each of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States. Complainant requests that the imports in question be both temporarily and permanently excluded from entry into the United States.

Having considered the complaint, the United States International Trade Commission, on May 11, 1977, determined that the complaint was properly filed and therefore has, that same day, Ordered—

(1) that, pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), an investigation be instituted to determine, under subsection (c), whether, on the basis of the allegations set forth in the complaint and the evidence adduced, there is a violation or reason to believe there is a violation of subsection (a) of this section in the importation of certain numerically controlled machining centers, and components thereof, including but not limited to—

(i) numerical control units for such numerically controlled machining centers, and,

(ii) machining centers units for such numerically controlled machining centers

into the United States, or in their sale, by reason of (A) a tool offset feature incorporated in the numerical control units allegedly being covered by claim 1 or 2 of U.S. Patent 3,891,910, (B) the alleged unfair use of know-how and trade secrets relating to the machining center units, and (C) the alleged deceptive practices used in the promotion and sale of the numerically controlled machining center such as unfair use of Houdaille's trademark "BURGMASTER," the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) That, for the purpose of the investigation so instituted the following persons, alleged to be involved in the unauthorized importation of such articles into the United States, or in their sale, are hereby named as respondents upon which the complaint and this notice are to be served:

FOREIGN MANUFACTURER

Yamazaki Machinery Works, Ltd., 1 Norifune, Oguchi-Cho, Niwa-Gun, Aichi-Pref., Japan.

DOMESTIC IMPORTER

Yamazaki Machinery Corporation, 8025 Production Drive, Florence, Kentucky 41042.

(3) That, for the purpose of the investigation so instituted, Judge Myron R. Renick, United States International Trade Commission, 701 E Street NW., Washington, D.C., 20436, is hereby appointed as Presiding Officer; and

(4) That, for the purpose of the investigation so instituted Steven D. Moskowitz, United States International Trade Commission, 701 E Street NW., Washington, D.C., 20436, is hereby named as Commission Investigative Attorney.

Responses must be submitted to the parties in accordance with section 210.21 of the Commission's Rules of Practice and Procedure, as amended (41 F.R. 17710, Apr. 27, 1976). Pursuant to sections 201.16(d) and 210.21(a) of the Rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good and sufficient cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and of this notice, and will authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both a recommended determination and a final determination, respectively, containing such findings.

The complaint, with the exception of confidential information referred to therein, is available for inspection by interested persons at the Office of the Secretary, United States International Trade Commission Building, Washington, D.C., and in the New York City office of the Commission, 6 World Trade Center.

Issued: May 12, 1977.

By order of the Commission:

KENNETH R. MASON,
Secretary.

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

ADVISORY COMMITTEE ON JOINT BOARD ACTUARIAL EXAMINATIONS

Meeting

Notice is hereby given that the Advisory Committee on Joint Board Actuarial Examinations will meet in the Continental Plaza Hotel, North Michigan at Delaware, Chicago, Illinois on June 9, 1977 at 9:00 a.m.

The purposes of the meeting are to discuss topics, syllabi and questions which may be recommended for inclusion in the Joint Board's examinations in actuarial mathematics and methodology referred to in Title 29 U.S. Code, section 1242(a)(1)(B); to review other actuarial examinations in order to make recommendations regarding such examinations' adequacy to demonstrate the education and training in actuarial mathematics and methodology required for enrollment by Title 29 U.S. Code, section 1242(a)(1); and to review college degree programs in order to make recommendations regarding such programs' equivalence to programs leading to degrees in actuarial mathematics within the meaning of Title 29 U.S. Code, section 1242(a)(1)(A).

A determination as required by section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) has been made that the portion of the meeting dealing with discussion of questions which may appear on the Joint Board's examinations will fall within the exceptions to the open meeting requirement set forth in Title 5 U.S. Code, section 552b(c)(9)(B), and that the public interest requires that such portion be closed to public participation.

The portion of the meeting dealing with examination topics and syllabi, other actuarial examinations, and college degree programs will commence at approximately 1:30 p.m. and will be open to the public as space is available. Time permitting, after discussion of agenda subjects by Committee members, interested persons may make statements germane to these subjects. Persons wishing to make oral statements should advise the Committee Management Officer in writing prior to the meeting to aid in scheduling the time available and should submit the written text, or, at a minimum, an outline of comments they propose to make orally. Such comments will be restricted to ten minutes in length. Any interested person may file a written statement for consideration by the Committee by sending it to Mr. Leslie S. Shapiro, Joint Board for the Enrollment of Actuaries, c/o U.S. Department of the Treasury, Washington, D.C. 20220.

LESLIE S. SHAPIRO,
Advisory Committee Management Officer, Joint Board for the Enrollment of Actuaries.

[FR Doc.77-14026 Filed 5-16-77;8:45 am]

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

M.D. PHARMACEUTICAL, INC.

Manufacture of Controlled Substances; Registration

By Notice dated February 4, 1977, and published in the FEDERAL REGISTER on February 11, 1977, (42 FR 8725), M.D. Pharmaceutical, Inc., 3501 West Garry Avenue, Santa Ana, California 92704, made application on January 17, 1977, to the Drug Enforcement Administration (DEA), to be registered as a bulk manufacturer of diphenoxylate and methylphenidate, each being a basic class of controlled substance listed in Schedule II.

By a letter dated March 14, 1977, counsel for Ciba-Geigy Corporation submitted the comments and objections of that company in response to the above notice. Ciba-Geigy objected to the registration of M.D. Pharmaceutical, Inc. for the reasons that:

1. M.D. Pharmaceutical does not hold a New Drug Application (NDA) approved by the Food and Drug Administration and thus lacks the authority to manufacture and market methylphenidate for interstate commerce, and in view of that deficiency, should not be granted a manufacturer's registration by DEA.

2. The policy of the Drug Enforcement Administration, at least regarding the registration of importers, is that it is unnecessary and administratively burdensome to presently register applicants as a contingency measure in the event they may possibly conduct controlled substances activities in the future, and therefore to register M.D. Pharmaceutical in advance of their ability to manufacture methylphenidate for marketing is to contravene DEA's own policy.

The first objection raised by Ciba-Geigy regarding no approved NDA has been previously considered by this agency in "In the Matter of MBH Chemical Corp.," Dk 73-17, 73-18, 30 FR 12364-65, April 5, 1974. That proceeding was a hearing before Administrative Law Judge William E. Brennan on an application submitted by MBH Chemical Corp. to become registered as a manufacturer of two Schedule II controlled substances, one of which was methylphenidate. The issue presented in that case was whether the Administrator may, pursuant to 21 U.S.C. 823, register an applicant to manufacture a Schedule II controlled substance where it is a New Drug under the Federal Food, Drug, and Cosmetic Act and the applicant does not hold an approved NDA as that Act requires.

Upon consideration of that issue, in his final order in the MBH matter the then Administrator of the Drug Enforcement Administration granted the application for registration recognizing that the agency had no regulation which made obtaining an approved NDA a condition precedent to the issuing of a registration to manufacture controlled substances, and he stated in that order that he was granting the registration even though it remained unclear to him what benefits could be gained by registering an applicant who lacked an approved NDA for the drug they sought to manufacture.

In the present matter, as in the MBH matter, the nature of the application, the objection raised, the issue presented, and even the objector and the drug involved, are identical. Moreover, there continues to be no DEA regulation requiring an applicant to hold an approved NDA as a condition precedent to it obtaining a registration to manufacture.

Therefore, the Administrator similarly regards M.D. Pharmaceutical's lack of an approved NDA for methyphenidate to be no bar to DEA granting their application as a bulk manufacturer of that drug.

Ciba-Geigy's second objection is that DEA has a policy against registering applicants as importers who do not presently engage in importing activities but who may wish to do so in the future. Ciba-Geigy suggests that this policy should be extended to preclude registering an applicant as a manufacturer where he cannot for lack of an approved NDA engage in that activity.

The policy as set forth in 40 FR 43745-46 (September 23, 1975) stated that 21 U.S.C. 958(h) permits an applicant for registration as an importer to be expeditiously registered by DEA without the customary publication or advance notice of its application or opportunity for a hearing, provided there is an emergency situation as described in 21 U.S.C. 952(a) concerning the domestic unavailability of controlled substances. In view of that, the then Acting Administrator made a determination in the September 23, 1975 policy statement that a "contingency reserve" of importer registrants is "unnecessary and administratively burdensome" because it is as to them only that the statute provides for expeditious registration in emergency situations concerning the domestic supply of controlled substances, and in doing so eliminates their need for anticipatory registration.

It is the absence of this or a similar statutory provision as to manufacturer applicants which preserves their need to register in anticipation of their ability to manufacture, and which precludes extending to them the DEA policy against anticipatory registration of importers.

For the foregoing reasons, the application submitted by M.D. Pharmaceutical, Inc. dated January 17, 1977 shall be granted.

No other comments or objections having been received and no hearings having been requested, and pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and 21 CFR 1301.54(e), the Administration hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of diphenoxylate and methylphenidate is granted.

Dated: May 11, 1977.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

[FR Doc.77-14020 Filed 5-16-77;8:45 am]

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

ALASKA STATE STANDARDS

Notice of Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On August 10, 1973, notice was published in the FEDERAL REGISTER (38 FR 21628) of the approval of the Alaska plan and the adoption of Subpart R to Part 1952 containing the decision.

The Alaska plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act. Section 1953.20 provides that "where any alteration in the Federal program could have an adverse impact on the 'at least as effective as' status of the State program, a program change supplement to a State plan shall be required."

In response to Federal standards changes, the State has submitted by letter dated November 10, 1976, from Edmund L. Orbeck, Commissioner, to

James W. Lake, Regional Administrator, and incorporated as part of the plan, State standards comparable to 29 CFR 1910.1001(l)(1), Asbestos Record keeping—Exposure Records, as published in the FEDERAL REGISTER, 36 FR 23207, dated December 7, 1971, and amendments to 29 CFR 1910.1001(l)(1), dated March 19, 1976, 41 FR 11505.

These State standards, which are contained in Subchapter 4 Alaska Occupational Safety and Health Code, were promulgated after public notice under authority vested by AS 18.60.020 by Edmund Orbeck, Commissioner, on September 29, 1976.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards and accordingly are approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003 Federal Office Building, 909 First Avenue, Seattle, Washington 98174; State of Alaska, Department of Labor, Office of the Commissioner, Juneau, Alaska 99801; and the Technical Data Center, Occupational Safety and Health Administration, New Department of Labor Building, Room N-3620 200 Constitution Avenue, Washington, D.C. 20210.

4. *Public participation.* Section 1953.2 (c) of this chapter provides that where State standards are identical to or "at least as effective" as comparable Federal standards and have been promulgated in accordance with State law, approval may be effective upon publication without an opportunity for further public participation. As the standards under consideration are identical to the Federal standards and have been promulgated in accordance with State law including an opportunity for public comment and/or a public hearing, they are approved without an opportunity for further public comment.

This decision is effective May 17, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Seattle, Washington this 9th day of March, 1977.

JAMES W. LAKE,
Regional Administrator, OSHA.

[FR Doc.77-14099 Filed 5-16-77;8:45 am]

NATIONAL COMMISSION ON THE OBSERVANCE OF INTERNATIONAL WOMEN'S YEAR

IDAHO WOMEN'S MEETING

Notice of Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C. App. 1), announcement is made of the Idaho Women's Meeting to be held on May 20-22, 1977, in Boise at Boise State University.

The purposes of the meeting are to:

(1) recognize the contributions of women to the development of our country;

(2) assess the progress that has been made to date by both the private and public sectors in promoting equality between men and women in all aspects of life in the United States;

(3) assess the role of women in economic, social, cultural, and political development;

(4) assess the participation of women in efforts aimed at the development of friendly relations and cooperation among nations and to the strengthening of world peace;

(5) identify the barriers that prevent women from participating fully and equally in all aspects of national life, and develop recommendations for means by which such barriers can be removed;

(6) make nominations for and elect 14 representatives to the National Women's Conference in accordance with regulations promulgated by the National Commission on the Observance of International Women's Year and consistent with the requirement that the National Women's Conference shall be composed of:

(a) representatives of local, State, regional, and national institutions, agencies, organizations, unions, associations, publications, and other groups which work to advance the rights of women; and

(b) members of the general public, with special emphasis on the representation of low-income women, members of diverse racial, ethnic, and religious groups, and women of all ages.

The meeting is scheduled to begin at 12 noon on May 20, 1977, and end at 1:15 p.m. on May 22, 1977.

Workshops and other discussions have been scheduled for 9:15 a.m. to 11:30 a.m., Saturday, May 21, 1977; 1:30 p.m. to 3:45 p.m., Saturday, May 21, 1977; and 8:45 a.m. to 11:00 p.m., Sunday, May 22, 1977.

Topics to be discussed during these periods include:

Rights of Homemakers, Rural Women, International Interdependence, Health, and other issues relating to the education, employment, welfare, and legal rights of women.

The election of delegates to the National Women's Conference is scheduled as follows:

Nominating Committee Report and Floor Nominations: 7:00 p.m. to 8:15 p.m., Friday, May 20, 1977.

Election of delegates: 12 noon to 8:30 p.m., Saturday, May 21, 1977.

This meeting is open to the public. All persons 16 years old or over who are residents of the State or enrollees at educational institutions in the State may register to participate in all activities. Participation in some activities may be limited by the available space.

Registration is premised upon a satisfactory showing of residency or educational institution enrollment and the payment of a nominal fee. All participants may vote on recommendations and delegates if they have registered before 12 noon Saturday, May 21, 1977.

All communications regarding this Meeting should be addressed to Hope Kading, Chairperson, International Women's Year Coordinating Committee, 1515 W. Franklin, Boise, Idaho 83702, or call (800) 632-5931.

General Notice of this meeting has been publicized in the media and the time available for organizing the details of the program schedule have made it necessary on an emergency basis to postpone publication of this notice until this time.

Dated: May 11, 1977.

LINDA COLVARD DORIAN,
General Counsel, National Commission on the Observance of International Women's Year.

[FR Doc.77-14046 Filed 5-16-77;8:45 am]

NATIONAL ENDOWMENT FOR THE ARTS AND THE HUMANITIES

COLLEGE LIBRARY PROGRAM PANEL ADVISORY COMMITTEE

Meeting

MAY 9, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463) notice is hereby given that a meeting of the College Library Program Panel will convene at 9:00 a.m. in room 1023 at 806 Fifteenth Street NW., Washington, D.C. on June 10, 1977.

The purpose of the meeting is to review College Library applications submitted to the National Endowment for the Humanities for grants to educational institutions and nonprofit organizations.

Because the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 Fifteenth Street N.W., Washington, D.C. 20506, or call area code 202-382-2031.

JOHN W. JORDAN,
Advisory Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

ADVISORY COUNCIL, TASK GROUP 2

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Task Group 2 of the NSF Advisory Council.
Place: Room 421, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.
Date: June 2-3, 1977.
Time: 9 a.m. each day.
Type of meeting: Open.
Contact person: Dr. R. Lynn Carroll, NSF Staff Liaison—Advisory Council, National Science Foundation, Room 527, Washington, D.C. 20550. Telephone: 202-632-7443.
Purpose of task group: The purpose of the Task Group, composed of members of the NSF Advisory Council, is to provide the full Council with a mechanism to consider numerous issues of interest to the Council that have been assigned by the National Science Foundation.
Summary minutes: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, Room 248, National Science Foundation, Washington, D.C. 20550.
Tentative agenda: June 20-21: To identify and review the ways non-scientists now participate in the formation of the nation's science policy, the present arrangements for involving the public in the development of Foundation policies, and suggest possible new approaches or improvements in NSF practices.

M. REBECCA WINKLER,
Acting Committee Management Officer.

MAY 11, 1977.

MINORITY PROGRAMS IN SCIENCE EDUCATION ADVISORY COMMITTEE

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Minority Programs in Science Education.
Date: June 2-3, 1977.
Time: 9:00 a.m. each day.
Place: Room 651, 5225 Wisconsin Avenue, NW., Washington, D.C.
Type of meeting: Open.
Contact person: Ms. Fran Watts, Staff Assistant, Science Education Directorate, National Science Foundation, Room W-600, Washington, D.C. 20550, Telephone 202-282-7930.
Summary minutes: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, National Science Foundation, Room 248, Washington, D.C. 20550.
Purpose of advisory committee: To assist in the evaluation and assessment of activities within the Minority Centers for Graduate Education Program and other ethnic minority-focused Foundation programs.

Agenda: *June 2*

Report on Grants for Minority Centers for Graduate Education in Science and Engineering.
Research Initiation in Minority Institutions Program.
NSF Graduate Fellowship Program and the Minority Fellowship Program.
State of the Art of Science and Engineering Education for Minorities.
Differential Approaches for Funding and Identification.

June 3

Workshop on Proposal Writing for Smaller Institutions.
Released Time for Minority Faculty in Science and Engineering.

M. REBECCA WINKLER,
Acting Committee Management Officer.

MAY 11, 1977.

RESEARCH IN SCIENCE EDUCATION (RISE) SUBPANEL

Meeting

Name: Subpanel for Research in Science Education (RISE) of the Advisory Panel for Science Education Projects.
Date and time: June 1 through June 7, 1977—9 a.m. to 6 p.m. each day.
Place: Sheraton Park Hotel and Motor Inn, 2660 Woodley Road, NW., Washington, D.C. 20008.
Type of meeting: Closed.
Contact person: Dr. Richard West, Program Director, RISE Program, Room W-648, National Science Foundation, Washington, D.C. 20550, telephone 202-282-7745.
Purpose of panel: To provide advice and recommendations concerning support for research in science education.
Agenda: To review and evaluate research proposals as part of the selection process for awards.
Reason for closing: Two proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

MAY 11, 1977.

VERY LARGE ARRAY AD HOC ADVISORY PANEL

Open Meeting

In accordance with the Federal Advisory Committee Act. Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Ad Hoc Advisory Panel for the Very Large Array.
Date: June 1-2, 1977.
Time: 9:30 a.m. each day.
Place: National Radio Astronomy Observatory, Very Large Array (VLA) Site, U.S. Highway 60 and State Highway 78, Socorro County, New Mexico, (52 miles west of Socorro, New Mexico).
Type of meeting: Open.
Contact person: Mr. Claud M. Kellett, Executive Secretary, Ad Hoc Advisory Panel for the Very Large Array, Room 618, National Science Foundation, Washington, D.C. 20550, Telephone (202) 632-7340. Anyone who plans to attend should notify Mr. Kellett prior to the meeting.
Summary minutes: May be obtained from the Committee Management Coordination Staff, Management Analysis Office, Room 248, National Science Foundation, Washington, D.C. 20550.
Purpose of advisory panel: To advise the Director of the National Science Foundation concerning the management and future planning of the Very Large Array (VLA) Project of the National Radio Astronomy Observatory.

SUMMARY AGENDA

Time	*June 1*
9:30 a.m.	Introductory Remarks.
9:45 a.m.	VLA Site Tour.
12:30 p.m.	Recess.
1:30 p.m.	Review of VLA Technical Design and Scientific Goals.
4:30 p.m.	Adjourn.
	June 2
9:30 a.m.	Discussion of Program Management Details.
10:45 a.m.	Break.
11 a.m.	Continued Discussion of Program Management.
12:30 p.m.	Recess.
1:30 p.m.	Long Range Planning.
4:30 p.m.	Adjourn.

M. REBECCA WINKLER,
Acting Committee Management Officer.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 9, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of management and Budget, Washington, D.C. 20503, (202–395–4529), or from the reviewer listed.

NEW FORMS

FEDERAL RESERVE SYSTEM

Registration Statement, Deregistration Statement, Annual Report, G–1, G–2, G–4, single time, persons who make stock secured loans, C. Louis Kincannon, 395–3211.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

National Center for Education Statistics, Oakland Unified School Mail-back Survey, Oakland Catholic Schools Mail-back Survey, ASE–1010–1 and 2, single time, parents of elementary-secondary students in Oakland, Calif., Sunderhauf, M. B., 395–6140.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Community Planning and Development, Evaluation of Housing Assistance Plans: Field Interview, Field Interview Guides, single time, local government agencies, Housing, Veterans, and Labor Division, C. Louis Kincannon, 395–3532.

DEPARTMENT OF LABOR

Employment and Training Administration, a Pilot Evaluation of the Impact of U.S. Employment Service, Single Time, ES applicants, Strasser, A., C. Louis Kincannon, 395–5867.

REVISIONS

VETERANS ADMINISTRATION

Application for Medical Benefits for Dependents or Survivors, VA 10–10D, on occasion, Ind. eligible for CHAMPVA or VA Specialized medical care benefits, Warren Topelius, 395–5872.

DEPARTMENT OF AGRICULTURE

Statistical Reporting Service, June Enumerative Survey, annually, farmers, Gaylord Worden, 395–4730.

Agricultural Stabilization and Conservation Service, Uniform Grain Storage Agreement, CCC–25 and 25–2, on occasion, warehousemen, Lowry, R. L., 395–3772.

Agricultural Stabilization and Conservation Service, Uniform Rice Storage Agreement, CCC–26–2, on occasion, warehousemen, Lowry, R. L., 395–3772.

Statistical Reporting Service, Telephone, Electric and L.P. Gas Service, none, annually, farmers, Gaylord Worden, 395–4730.

REVISIONS

Food and Nutrition Service:
Meal Service Application for Authorization to Participate, in the Food Stamp Program, FNS–252, FNS 252–1, through 252–4, on occasion, retail and wholesale food stores, and meal services, Warren Topelius, 395–5872.
Regulations—Special Supplemental Food Program for Women, Infants and Children (WIC), on occasion, State health department and local health or welfare agencies, Warren Topelius, 395–5872.

DEPARTMENT OF DEFENSE

Departmental and other Service Academies Precandidate Questionnaire, 1908, on occasion, prospective candidates to service academies, Warren Topelius, 395–5872.

DEPARTMENT OF LABOR

Bureau of Labor Statistics, Retail Prices: Rent Collection, Segment Listing; Tenure Screening, BLS 2921A, BLS 2921B, BLS 2921C, BLS 2921D, monthly, retail units, Strasser, A., 395–5867.

EXTENSIONS

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service, Sales Memorandum and Record of Peanuts Dried or Shelled for Producers, MQ70, on occasion, peanut buyers, dryers and shellers, Warren Topelius, 395–5872.

DEPARTMENT OF COMMERCE

Bureau of Census, Current Population Survey Questionnaire, CPS–1, monthly, CPS household respondents, George Hall, 395–6140.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration, Recordkeeping Requirements for Low-acid Canned Food Processors, on occasion, low-acid canned food processors, Warren Topelius, 395–5872.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Housing Management:
Temporary Housing Insurance Certification, HUD 9968, on occasion, victims of Presidentially declared disasters, Housing, Veterans and Labor Division, 395–3532.
Notice of Intent To Vacate, HUD–9974, on occasion, victims of Presidentially declared disasters, Housing, Veterans and Labor Division, 395–3532.
Preplacement Questionnaire—Temporary Housing Assistance, HUD 9961, on occasion, victims of Presidentially declared disasters, Housing, Veterans and Labor Division, 395–3532.

PHILLIP D. LARSEN,
Budget and Management Officer.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

ADVISORY GROUP ON SPACE SYSTEMS

Establishment

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), it is hereby determined that the establishment of the Advisory Group on Space Systems is necessary, appropriate, and in the public interest in connection with the performance of the duties imposed upon the Director, Office of Science and Technology Policy (OSTP) by the National Science and Technology Policy, Organization, and Priorities Act of 1976. This determination follows consultation with the Office of Management and Budget (OMB), pursuant to section 9(a)(2) of the Federal Advisory Committee Act and OMB Circular No. A–63, Revised.

1. Name of group. Advisory Group on Space Systems.

2. Purpose. The Office of Science and Technology Policy, in accordance with the statutory mandate to analyze and interpret significant developments and trends in science and technology and relate these to their impact on achievement of national goals and objectives will be identifying and evaluating the implications of technological advances such as the availability of the reusable space shuttle and other supporting systems on future space applications programs, specifically those related to national security.

The work of the Advisory Committee will be based upon inputs from the relevant departments and earlier work carried out by other organizations in the Executive Branch. The Advisory Committee will consider both the implications for policy and potential R&D opportunities and initiatives that may be appropriate to exploit advances that may be identified. The Committee will submit a report and briefing for appropriate officials in the Executive Branch upon completion of its activities.

3. Effective date of establishment and duration. The Advisory Committee is established to provide advice to the Director of the Office of Science and Technology Policy and is estbalished until October 1, 1977.

4. Membership. The membership of the Advisory Group on Space Systems shall be fairly balanced in the terms of the points of view represented and the group's function. Membership of the Advisory Group on Space Systems will consist of approximately eight members drawn from the private sector who are particularly knowledgeable in the areas of interest to the group.

5. Advisory group operation. The Advisory Group on Space Systems will operate in accordance with provisions of the Federal Advisory Committee Act (Pub. L. 92–463), OSTP policy and procedures, OMB Circular No. A–63, Revised, and other directives and instructions issued in implementation of the Act.

R. C. DREW,
Assistant Director.

ADVISORY COMMITTEE ON SPACE SYSTEMS

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the Office of Science and Technology Policy announces the following meeting:

NAME: Advisory Committee on Space Systems.

DATE: May 31 and June 1, 1977.
TIME: 9 a.m. to 4 p.m.

PLACE: Room 305, Executive Office Building, 17th and Pennsylvania Avenue NW., Washington, D.C.

TYPE OF MEETING: Closed.

CONTACT PERSON: Mr. William Montgomery, Executive Office of the President, Office of Science and Technology Policy, Washington, D.C. 20500, telephone 202–395–4692.

PURPOSE OF ADVISORY COMMITTEE: The Office of Science and Technology Policy, in accordance with the statutory mandate to analyze and interpret significant developments and trends in science and technology and relate these to their impact on achievement of national goals and objectives will be identifying and evaluating the implications of technological advances such as the availability of the reusable space shuttle and other supporting systems on future space applications programs, specifically those related to military systems.

AGENDA: 9 a.m. to 4 p.m.—classified discussion of draft materials prepared as part of the policy review process for the President and the National Security Council.

REASON FOR CLOSING: The committee will be reviewing sensitive classified national security information involving design and employment of space systems. These discussions come under exemption 1 of the Government in the Sunshine Act, section 552b(c), Title 5 U.S.C.

AUTHORITY FOR CLOSING: The Director, Office of Science and Technology Policy has determined that this meeting deals with matters classified for national security and therefore should be closed.

The Committee Management Secretariat, OMB, has waived the requirement of 15 days publication of notice of determination in the FEDERAL REGISTER prior to the groups' establishment.

WILLIAM MONTGOMERY,
Executive Officer.

[FR Doc.77–14210 Filed 5–16–77;8:45 am]

OFFICE OF TELECOMMUNICATIONS POLICY

FREQUENCY MANAGEMENT ADVISORY COUNCIL

Meeting

Notice is hereby given that the Frequency Management Advisory Council (FMAC) will meet at 9:30 a.m., at the Office of Telecommunications Policy, 1800 G Street NW., Washington, D.C. in Room 712 on June 1, 1977.

The principal agenda items will be (1) progress report on the ITU Conference preparations. (2) A proposed coordination process for mobile/transportable satellite earth terminals. (3) Naval electromagnetic compatibility analyses.

The meeting will be open to the public, except for (3) above. Any member of the public will be permitted to file a written statement with the Council, before or after the meeting.

Item (3) of the meeting will concern information covered by 5 U.S.C. 552 (b)(1), as such the meeting will be closed at that time pursuant to Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463).

Information pertaining to the meeting may be obtained from Mr. Jack E. Weatherford, Office of Telecommunications Policy, Washington, D.C. (Telephone: 202–395–5623.)

Dated: May 12, 1977.

L. D. O'NEILL,
Advisory Committee, Management Officer.

SMALL BUSINESS ADMINISTRATION

[License No. 04/05–0086]

MARKET CAPITAL CORP.

Filing of Application for Approval of Conflict of Interest Transaction

Notice is hereby given that Market Capital Corporation (MCC), 1102 N. 28th Street, P.O. Box 22667, Tampa, Florida 33622, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), has filed an application with the Small Business Administration (SBA) pursuant to section 312 of the Act and covered by § 107.1004 of the SBA rules and regulations, governing Small Business Investment Companies (13 CFR 107.1004 (1977)) for approval of Conflict of Interest Transaction falling within the scope of the above Section of the Act and Regulations.

Subject to such approval, MCC proposes to invest $86,000 in Futral Markets, Inc. (Futral), 205 N. Scenic Highway, Frostproof, Florida 33843, to retire sizeable short term obligations and increase its working capital.

The proposed financing is brought within the purview of § 107.1004 of the SBA Regulations since Mr. Robert Herman Futral, is a member of the Board of Directors of Affiliated of Florida, Inc., a retail grocery cooperative, the membership of which are the stockholders of MCC. Accordingly, Mr. Futral is considered by SBA to be an Associate of MCC.

Notice is hereby given that any interested person may, not later than May 27, 1977, submit written comments on the proposed transaction to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street N.W., Washington, D.C. 20416.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: April 25, 1977.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

DEPARTMENT OF STATE

Agency for International Development

AID PEST MANAGEMENT PROGRAM

Availability of Final Environmental Impact Statement

On September 30, 1976, the Agency for International Development (AID) published a notice of its issuance of a draft programmatic environmental impact statement concerning its pest management activities, including such activities conducted, supported or otherwise assisted by it for the procurement or use of pesticides. Public comment on the draft was solicited (41 FR 43202). The period for public comment on the draft statement ended on December 15, 1976.

The final environmental impact statement on AID's pest management program has been completed and copies were transmitted to the Council on Environmental Quality on May 13, 1977. A.I.D. will utilize the conclusions reached in this final EIS as a basis for the issuance of regulations which will govern A.I.D.'s future pest management activities.

Copies of the final statement are being sent to all government agencies and private organizations that made substantive comments on the draft statement, and to individuals who have previously requested copies. In addition, copies of the statement will be distributed to concerned international organizations and to foreign governments entitled to receive AID assistance.

Copies of the final statement are available for public inspection during regular working hours at the Agency for International Development, Room 409, Rosslyn Plaza C Building, 1601 North Kent Street, Arlington, Virginia; or single copies may be obtained upon request to A.I.D. Environmental Coordinator Albert Printz, Room 203B Rosslyn Plaza C, Agency for International Development, Washington, D.C. 20523.

Dated: May 13, 1977.

CURTIS FARRAR,
Assistant Administrator, Bureau for Technical Assistance.

[FR Doc.77–14200 Filed 5–16–77;8:45 am]

DEPARTMENT OF THE TREASURY

Office of the Secretary

INCOME TAX TREATY NEGOTIATIONS

The Treasury Department today announced the countries with which it is engaged in income tax treaty negotiations, released the text of its current "model" income tax treaty, and invited comments.

The Treasury Department has a general policy of announcing initial income tax treaty negotiations with particular countries, and giving an opportunity for comment. However, often negotiations are scheduled on short notice, making notice impractical, and often negotiations extend over a period of several years, so that earlier comments no longer reflect current problems. In order to give

better guidance and in order to obtain comments from interested persons, the Treasury Department today announced that negotiations are currently in process (or contemplated in the near future) with the following countries:

Bangladesh	India
Brazil	Italy
Canada	Kenya
Denmark	Netherlands
France	Singapore
Germany	Sri Lanka
Hungary	Yugoslavia

The Treasury Department would welcome amendments to previous comments, or new or supplemental comments concerning negotiations with those countries. Comments should be sent in writing to Laurence N. Woodworth, Assistant Secretary of the Treasury, U.S. Treasury Department, Washington, D.C. 20220. In addition, the Treasury Department always welcomes comments with respect to the advisability of entering into or revising income tax treaties with any country.

The Treasury Department also made available today the text of its current "model" income tax treaty. The Treasury Department is currently suggesting this model as a starting point for negotiations. The model conforms closely to the revised draft treaty which has been developed by the Organization for Economic Cooperation and Development and should be published later this year. Any comments on this model may also be sent to Laurence N. Woodworth.

The Treasury Department also announced today that the negotiations are virtually completed with the following countries:

Morocco
Republic of China (Taiwan)
Spain

Income tax treaties with Cyprus, Egypt, Israel, the Philippines, South Korea, and the United Kingdom have been signed and (except for Cyprus) submitted to the Senate for approval.

DAVID S. FOSTER,
International Tax Counsel.

[Public Debt Series—No. 12–77]

TREASURY NOTES OF MAY 31, 1979
Series Q–1979

MAY 12, 1977.

1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $1,500,000,000 of United States securities, designated Treasury Notes of May 31, 1979, Series Q–1979 (CUSIP No. 912827 GS 5). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated May 31, 1977, and will bear interest from that date, payable on a semiannual basis on November 30, 1977, and each subsequent 6 months on May 31 and November 30 until the principal becomes payable. They will mature May 31, 1979, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Wednesday, May 18, 1977. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, May 17, 1977.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $5,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5% of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full at the weighted average price (in three decimals) of accepted competitive tenders, and competitive tenders with the lowest yields will be accepted to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the weighted average price of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of

their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full or when the price is over par.

4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Tuesday, May 31, 1977, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Thursday, May 26, 1977, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Tuesday, May 24, 1977, if the check is drawn on a bank in another Federal Reserve District. Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities in full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

W. MICHAEL BLUMENTHAL,
Secretary of the Treasury.

VETERANS ADMINISTRATION

STATION COMMITTEE ON EDUCATIONAL ALLOWANCES

Continued Meeting

Notice is hereby given pursuant to Section V, Review Procedure and Hearing Rules, Station Committee on Educational Allowances, that the hearing noticed for, and commenced on, Thursday, May 5, 1977 at 10:00 A.M., was continued until Wednesday, June 8, 1977, at 9:00 A.M., at which time the Los Angeles Regional Office Station Committee on Educational Allowances shall in Room 7106, at 11000 Wilshire Blvd., Los Angeles, California, continue the conduct of a hearing to determine whether Veterans Administration benefits to all eligible persons enrolled in National Training College, 4300 Campus Drive, Newport Beach, Calif. 92660, should be discontinued, as provided in 38 C.F.R. 21.4134, because a requirement of law is not being met or a provision of law has been violated. All interested persons shall be permitted to attend, appear before, or file statements with the committee at that time and place.

Dated: May 9, 1977.

JOHN G. MILLER,
Director,
VA Regional Office.

INTERSTATE COMMERCE COMMISSION

[Notice No. 391]

ASSIGNMENT OF HEARINGS

MAY 12, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 142124 Sub 1, Package Delivery, Inc. now assigned June 6, 1977 at Charlotte, North Carolina is cancelled, application dismissed.

MC 134755 (Sub-80), Charter Express, Inc., now assigned June 14, 1977 at Omaha, Nebraska, is cancelled and the application is dismissed.

MC 117416 Sub 53, Newman & Pemberton Corp., now assigned June 7, 1977, at Columbia, Ohio, is cancelled and transfered to modified procedure.

ROBERT L. OSWALD,
Secretary.

FINANCE APPLICATIONS

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, of rail carriers or motor carriers pursuant to Sections 5(2) or 210a(b) of the Interstate Commerce Act.

An original and two copies of protests against the granting of the requested authority must be filed with the Commission on or before June 17, 1977. Such protest shall comply with Special Rules 240(c) or 240(d) of the Commission's General Rules of Practice (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

No. MC-F-11490. (Petition for modification) (CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE—POOLING — SILVER WHEEL FREIGHTLINES, INC.), published in the March 29, 1972, issue of the FEDERAL REGISTER. By petition filed September 9, 1976, Consolidated Freightways Corporation of Delaware and Silver Wheel Freightlines, Inc., seek modification of the order of February 12, 1973, as modified by order of February 15, 1973, which approved the pooling agreement in the above-entitled proceeding, in order to add eighteen points to the existing pooling agreement. The points to be added, all located in Oregon, are Adair Air Force Base, Adrian, Biggs Junction, Bonneville Dam, Brownlee, Draperville, Dufur, Enterprise, Gervis, Huntington, Jefferson, Maupin, Monmouth, Pilot Rock, Rickreall, Shedd, Tygh Valley, and Vale. Garrett Freightlines, Inc., which was authorized to participate in the pool to certain points by order of December 17, 1973, has not joined in the request to pool to the eighteen additional points.

ROBERT L. OSWALD,
Secretary.

[Notice No. 63]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relates. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 2025 (Sub-No. 1TA), filed April 22, 1977. Applicant: COLEMAN AMERICAN MOVING SERVICES, INC., P.O. Drawer 1568, Dothan, Ala. 36301. Applicant's representative: R. S. Richard, 57 Adams Avenue, Montgomery, Ala. 36103. 1

AGENCY HOLDING THE MEETING: National Mediation Board.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 22220, May 2, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m.; May 17, 1977.

CHANGES IN THE MEETING: Oral Argument in NMB Case No. R–4448 postponed until further notice.

Date of Notice: May 13, 1977.

[S–419–77 Filed 5–13–77;11:22 am]

2

AGENCY HOLDING THE MEETING: Consumer Product Safety Commission.

DATE AND TIME: May 13, 1977, 2:30 p.m.

LOCATION: 8th Floor Conference Room, 1111–18th St., NW., Washington, D.C.

STATUS: Closed.

MATTERS TO BE CONSIDERED: *CPSC Reorganization Plan.* The Commission will meet to continue its discussion of the reorganization plan proposed by Chairman Byington. In voting to hold the meeting and to close it to the public, the Commission also determined that Agency business required holding the meeting without seven days advance notice.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Sheldon D. Butts, Assistant Secretary, Office of the Secretary, Suite 300, 1111–18th St., NW., Washington, DC 20207, telephone (202) 634–7700.

[S–420–77 Filed 5–13–77;11:22 am]

3

AGENCY HOLDING THE MEETING: Consumer Product Safety Commission.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: May 3, 1977, 42 FR 22468.

PREVIOUSLY-ANNOUNCED TIME AND DATE OF MEETING: May 12, 1977, 9:30 a.m.

CHANGES IN THE MEETING: By majority vote, the Commission voted to add three items to its agenda, to delete one item, and to begin the meeting at 9:00 a.m. The added items are:

1. *CPSC Reorganization Plan* (Closed to the public) The Commission met to discuss the record of its action on reorganization plans which it discussed at a meeting on May 10.

2. *Congressional Testimony* (Open) This discussion concerned draft testimony for a hearing on Tris and a national carcinogen policy, which will be held May 16 by the Oversight and Investigation Subcommittee, House Committee on Interstate and Foreign Commerce.

3. *Tris Press Release* (Open) Before the Commission is a release on CPSC enforcement of its ban of Tris-treated products.

Deleted from the agenda:

Proposal to Seek a Consent Agreement and/or Notice of Enforcement: Flammable Fabrics Act Case (BCMI #6–548).

In voting to revise the agenda, the Commission determined that agency business required holding a meeting without seven days advance notice.

[S–421–77 Filed 5–13–77;11:22 am]

4

AGENCY HOLDING THE MEETING: Commodity Futures Trading Commission.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: FEDERAL REGISTER of May 16, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10:00 A.M., May 17, 1977.

CHANGES IN THE MEETING: Please add to the open section of the agenda—2. FY 1979 Planning and Report of the Task Group on Principal Management Objectives.

[S–418–77 Filed 5–12–77;4:37 pm]

5

AGENCY HOLDING THE MEETING: Federal Communications Commission.

TIME AND DATE: Approximately 10:45 a.m. (following the open meeting), Thursday, May 19, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Closed Commission Meeting.

MATTER TO BE CONSIDERED:

Agenda, Item No., and Subject

Hearing—1—Petitions for Reconsideration and related interlocutory pleadings in the George T. Hernreich (KAIT–TV), Jonesboro, Arkansas, television renewal proceeding (Docket No. 19292).

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone number (202) 632–7260.

Issued: May 12, 1977.

[S–413–77 Filed 5–12–77;3:49 pm]

6

AGENCY HOLDING THE MEETING: Federal Communications Commission.

TIME AND DATE: 9:30 a.m. Thursday, May 19, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Open Commission Meeting.

MATTERS TO BE CONSIDERED:

Agenda, Item No., and Subject

General—1—Amendment of Sections 1.46(b) and 1.415(e) dealing with granting of motions for extension of time for filing pleadings.

Common Carrier—1—Carpenter Radio Company's request to reopen Docket No. 18177, which was an inquiry into the terms and conditions of interconnection between Carpenter and Lima Telephone Company. United Telephone Company of Ohio has since purchased the Lima Telephone Company. Carpenter is also complaining about the quality of service it is obtaining from United.

Cable Television—1—Petition for Order to Show Cause (CSC–155) filed by WGAL Television, Inc., (WGAL–TV, NBC, Channel 8), Lancaster, Pennsylvania directed to Hamburg TV Cable, Inc.; and opposition filed by Hamburg TV Cable, Inc., and comments filed by Westinghouse Broadcasting, Inc.

Cable Television—2—Petition for Special Relief (CSR–948) filed by KVOS Television Corporation, licensee of Station KVOS–TV (CBS Channel 12), Bellingham, Washington.

Renewal—1—Application of Bob Jones University, Inc. for renewal of license for Station WMUU, Greenville, South Carolina (BR–2377).

Aural—1—Application for a construction permit for Montgomery City, Missouri, filed by Montgomery County Broadcasting Corporation (BPH–9844).

Aural—2—Request for an extension of authority to remain silent on behalf of Hex Country Radio, Inc., licensee of AM station WCLY, Columbia, Pennsylvania.

Television—1—Petition for Reconsideration by the Town of Oyster Bay, New York, directed against the Bureau action of July 1, 1975, granting the application of The Long Island Educational Television Council, Inc., to change the transmitter location of noncommercial educational broadcast station WLIW (TV), Garden City, New York.

Broadcast—1—Petition for Rule Making to require the broadcast licensee to annually broadcast and publish in a local newspaper its list of significant community problems (RM–2700).

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone number (202) 632–7260.

Issued: May 12, 1977.

[S–414–77 Filed 5–12–77;3:49 pm]

7

AGENCY HOLDING THE MEETING: Federal Communications Commission.

TIME AND DATE: 9:30 a.m., Wednesday, May 18, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Special Open Commission Meeting.

MATTER TO BE CONSIDERED:

Agenda, Item No., and Subject

General—1—Implementation of Zero-Based Budget for Fiscal Year 1979.

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone number (202) 632–7260.

Issued: May 11, 1977.

[S–415–77 Filed 5–12–77;3:49 pm]

8

AGENCY HOLDING THE MEETING: Federal Communications Commisison.

TIME AND DATE: Approximately 10 a.m. (following the special open meeting), Wednesday, May 18, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Special Closed Commission Meeting.

MATTERS TO BE CONSIDERED:

Agenda, Item No. and Subject:

Special—1: Continuation of discussion of the Fifth Notice of Inquiry relative to preparation for the 1979 World Administrative Radio Conference (Docket No. 20271).

Special—2: The Bilingual Coalition on Mass Media, Inc. v. FCC, Chinese for Affirmative Action v. FCC, and Black Broadcasting Coalition of Richmond v. FCC cases.

CONTACT PERSON FOR MORE INFORMATION:

10

AGENCY HOLDING THE MEETING: U.S. Commission on Civil Rights.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 24173, May 12, 1977.

PREVIOUS ANNOUNCED TIME AND DATE OF MEETING: May 12, 1977, 12 p.m.

CHANGES IN THE MEETING:

Meeting cancelled.

CONTACT PERSON FOR FURTHER INFORMATION:

Barbara Brooks, Public Affairs Unit (202–254–6697).

[S–412–77 Filed 5–12–77;3:38 pm]

11

HOLDING THE MEETING:

AGENCY: Federal Election Commission.

DATE AND TIME: Thursday, May 19, 1977, at 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C. 20463.

STATUS: Portions of this meeting will be open to the public and portions will be closed to the public.

MATTERS TO BE CONSIDERED:

Portion of meeting open to the public:

I. Future meetings.

II. Correction and approval of minutes.

III. Certification for presidential primary matching funds, Ellen McCormack.

IV. Request for copies of campaign contribution reports in public records.

V. Agency job classification actions.

Portion of meeting closed to the public:

VI. Executive session.

A. Presidential primary audit reports No. 3 and 4.
B. Compliance.
C. Personnel.

PERSON TO CONTACT FOR INFORMATION:

David Fiske, Press Officer, Telephone: 202–523–4065.

MARJORIE W. EMMONS,
Secretary to the Commission.

[S–411–77 Filed 5–13–77;2:57 pm]

12

AGENCY HOLDING MEETING: United States Parole Commission.

TIME AND DATE: Wednesday, May 25, 1977; 9 a.m. This meeting will be adjourned at close of business May 25, 1977 over May 26, 1977 and will resume at 9 a.m. on Friday, May 27, 1977.

PLACE: City Hall—501 Primrose Road, Burlingame, California (Burlingame, California is the location of the Western Regional Office of the Commission).

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. *Zero-based budgeting.* Report of the Executive Assistant to the Chairman on manner in which this method of budgeting now considered for government-wide operation will affect the Parole Commission.

2. *Guideline evaluation.* Report of Committee on Guideline Evaluation on a proposal or proposals to be considered by the Commission and, if approved, to be submitted for bids for an independent outside evaluation of the effectiveness of the Commission's guidelines. Additional future steps to implement this study will also be proposed.

3. *Changing reasons.* Changes to be effected by Regional Commissioners or Administrative Hearing Examiners.

4. *Report on Recent Case Law.*

5. *Hazardous duty.* Discussion of a Senate Bill (S–565) which provides certain benefits for hazardous duty employees.

6. *Recording preliminary interviews.* Consideration of whether or not to record such interviews and, if so, desired standard of record quality.

7. *Mandatory parole.* Suggested change in time allowed between ⅔ of sentence and hearing.

8. *Issues involving Bureau of Prisons.* Discussion with an Assistant Director, Bureau of Prisons, on recertification of Narcotic Addict Rehabilitation Act violators, file access, use of Bureau reports, and other matters of joint interest.

9. *New Appeal.* Provide for an appeal by any Commissioner to the Commission en banc for just cause.

10. *One-Third Hearings.* Problems raised by court decisions affecting possible elimination or reduction in the number of such hearings. Discussion of possible "contingency parole" procedures and their effect upon the one-third hearing. Consideration of related public comment.

11. *Proposed Guideline Revision.* Consideration of public comment received regarding proposed changes, certain modifications of the greatest severity category, and behavior patterns as affecting severity and predictability.

12. *Modification of Panel Recommendation.* Consideration of public comment received regarding Regional Commissioner's authority to extend panel recommendations to six months.

13. *Removal of limitation on Chairman's vote.* Consideration of public comment regarding procedures which allow Chairman to vote on all original jurisdiction appeals, where he formerly voted only when a Commissioner was absent.

14. *Committees.* Consideration of public comment on proposal that the Chairman appoint committees to study various subjects and make recommendations either to the Chairman or the Commission.

15. *Warrant Applications.* Timeliness of convictions used on warrant applications.

16. *Supplemental Warrants.* Proposal to discontinue sending applications for supplemental warrants to the F.B.I.

17. *Lists of intelligence personnel.* Proposal to exchange such lists for information purposes with Department of Justice.

18. *Original Jurisdiction references.* Proposal to contact Department of Justice when certain cases are referred, and to set up employee conferences with the Department.

19. *Waiver.* Proposal waiver of hearing at the ⅔ points in serving a sentence.

20. *Modification of sentence.* Consideration by the Commissioner as a new item of information.

21. *Modification of sentence.* Proposal to oppose any such modifications made after the 120 day period provided by Court Rules.

22. *Absence of Regional Commissioner.* Consideration of possible change in temporary replacement procedures.

23. *Notices of Action on Appeal.* Decide if copies should be sent to inmates' attorneys.

24. *Local Revocation Hearings.* Advise examiners concerning the announcement of decisions and reasons following such hearings.

25. *Summonses and Warrants.* Use of the above relating to preliminary interviews and revocation hearings.

26. *Improvement and Recording Hearings.* Report on improving recording equipment and methodology and consideration of alternatives to methods presently in use.

27. *Examiners.* Basis of disqualification of an examiner from holding certain hearings.

28. *Evaluations—Hearing Examiner Meetings.* Discussion of the evaluations made by examiners following the last Hearing Examiners Meeting.

29. *Guidelines—Community Program placement prior to hearings.* Discussion of Bureau of Prisons guidelines and memo on subject.

30. *Training.* Interregional work-training assignments for examiners.

31. *Forms Approval Procedure.* Proposal for circulation to Commissioners and staff using respective forms.

32. *Forms Modification.* Proposed revision of several forms.

33. *Appeal Criteria.* Proposal to increase present grounds for appeal to six and to indicate ground or grounds relied upon in documentation supporting appeal.

34. *Advisory Corrections Council Meeting.* Report by Acting Chairman Crawford of the activities at said meeting.

CONTACT PERSONS FOR MORE INFORMATION:

M. E. Malin Foehrkolb (Washington, D.C.), 202–724–3117.

Helen Moniz (Burlingame, California), 415–347–4737).

[S-405-77 Filed 5-12-77;12:59 pm]

13

AGENCY HOLDING MEETING: United States Parole Commission.

TIME AND DATE: Thursday, May 26, 1977; 9 a.m.

PLACE: City Hall—501 Primrose Road, Burlingame, California. (Burlingame, California, is the location of the Western Regional Office of the Commission.)

STATUS: Closed.

MATTERS TO BE CONSIDERED:

Appeals to the Commission of approximately 32 cases decided by National Commissioners pursuant to a reference under 28 CFR § 2.17 and appealed pursuant to 28 CFR § 2.27. These are all cases originally heard by examiner panels wherein inmates of Federal Prisons have applied for parole or are contesting revocation of parole or mandatory release.

CONTACT PERSON FOR MORE INFORMATION:

Daniel J. Capodanno, Case Analyst—(415)–347–4737.

[S-404-77 Filed 5-12-77;12:59 pm]

14

AGENCY HOLDING MEETING: United States Parole Commission.

TIME AND DATE: Friday, May 27, 1977 at 10:15 a.m.

PLACE: City Hall—501 Primrose Road, Burlingame, California. (Burlingame, California, is the location of the Western Regional Office of the Commission.)

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Report of Budget Committee for purpose of Commission approval of a fiscal year 1979 budget submission to Office of Management and Budget and the Congress; and for such other elements of fiscal planning and action as may be required.

2. Discussion of potential items for a fiscal year 1978 supplemental budget.

3. Legal Report—Discussion of strategy and steps taken and planned in litigation and precedents, statutes and regulations underlying such legal activity.

4. Report of Personnel and Training Committee for purposes of Commission action on location of examiners, filling certain positions, evaluation and problems involving specified employees, orientation of new personnel, and other internal personnel policies and practices.

5. Pending legislation—Formulation of the Commission's approach to S. 1437, H.R. 6862 and other legislation affecting its authority and/or structure.

CONTACT PERSONS FOR MORE INFORMATION:

M. E. Malin Foehrkolb (Washington, D.C.), 202–724–3117.

[S-403-77 Filed 5-12-77;12:59 pm]

15

AGENCY HOLDING MEETING: Federal Power Commission.

TIME AND DATE: May 18, 1977, 2 p.m.

PLACE: 825 North Capitol Street, Room 9306, Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: (Agenda), *Note-Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth F. Plumb, Secretary, Telephone (202) 275–4166.

This is a list of the matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda. However, all public documents may be examined in the Office of Public Information, Room 1000.

POWER AGENDA—7314TH MEETING, MAY 18, 1977, REGULAR MEETING, PART I (2 P.M.)

P-1—Docket No. ER77-313, Union Light Heat and Power Company.
P-2—Docket No. E-7453 (Jordan), Iowa-Illinois Electric Company.
P-3—Docket No. E-8927, Pennsylvania Power and Light Company.
P-4—Docket No. ER76-221, Potomac Edison Company.
P-5—Docket No. ER76-285, Public Service Company of New Hampshire.
P-6—Docket Nos. E-7631 and E-7633, *City of Cleveland, Ohio* v. *Cleveland Electric Illuminating Company*; Docket No. E-7713, City of Cleveland, Ohio.
P-7—Docket No. E-9306, Nevada Power Company.
P-8—Docket Nos. ER76-303 and ER76-399, Wisconsin Electric Power Company, Wisconsin Michigan Power Company.
P-9—Docket No. ER76-818, Northern States Power Company (Minnesota).
P-10—Docket No. ER76-739, Kentucky-Indiana Power Pool Agreement.
P-11—Docket No. E-7172, U.S. Department of the Interior Southwestern Power Administration.
P-12—Docket No. E-9581, Potomac Edison Company.
P-13—Docket No. E-9578, Texas Power & Light Company.
P-14—Docket Nos. E-8769, E-8770, E-9119, ER76-216, ER76-218 and ER76-219, Florida Power & Light Company.
P-15—Docket No. ES77-29, Iowa Electric Light and Power Company.
P-16—Project No. 2683, Crown Zellerbach Corporation.

MISCELLANEOUS AGENDA—7614TH MEETING, MAY 18, 1977, REGULAR MEETING, PART I

M-1—Docket No. RM76-29, policy statement concerning electric rate schedule filings and the requirement for filing of comparative rate information in certain situations.
M-2—Reserved.
M-3—Reserved.
M-4—Docket No. RM77-11, corrections, minor revisions, and clarifications to certain sections of title 18 of the Code of Federal Regulations.
M-5—Docket No. RM76-24, petition of certain utilities and others for amendment of 18 CFR § 1.4(d) to facilitate settlement or disposition of particular issues in proceedings before the Commission.
M-6—Docket No. RM76-17, research development and demonstration: Accounting: Advance approval of rate treatment.
M-7—Reserved.
M-8—Reserved.
M-9—Docket No. RM- , proposal by the Federal Power Commission relating to the incorporation of compensation provisions in curtailment plan.
M-10—Emergency supplies of natural gas to pipelines and distributors.
M-11—Carnegie Natural Gas Company.
M-12—Sabine Pipe Line Company.

GAS AGENDA—7614TH MEETING, MAY 18, 1977, REGULAR MEETING—PART I

G-1—Docket No. RP75-73, Texas Eastern Transmission Corporation.
G-2—Docket No. RP77-48, Transcontinental Gas Pipe Line Corporation.
G-3—Docket Nos. RP76-15 and RP76-98, Algonquin Gas Transmission Company.
G-4—Docket Nos. RP73-109 and RP74-95 (AP76-1), Northwest Pipeline Corporation.
G-5—Docket No. RP75-62, Cities Service Gas Company.
G-6—Docket No. RP76-38, *Arizona Electric Power Cooperative, Inc., and the City of Willcox, Arizona* v. *El Paso Natural Gas Company.*
G-7—Docket No. RP77-36, City of Philadelphia, Philadelphia Gas Works.
G-8—Docket No. RI77-24, George Heeter, d.b.a. Venture Gas Company.
G-9—FPC Gas Rate Schedule Nos. 554, 555, 556, 557, 559 and 560, Phillips Petroleum Company; FPC Gas Rate Schedule Nos. 537, 538, 539, 561, 562, 567, 569, 572, 576 and 577, Sun Oil Company.
G-10—Docket No. CS71-988, Damson Oil Corporation; Docket No. CS77-262, Ergon, Inc.; Docket No. CS73-208, H & L Operating Company; Docket No. CS72-912, Manana Gas Inc.; Docket No. CS71-22, Northern Pump Company.
G-11—FPC Gas Rate Schedule Nos. 47 and 202, Gulf Oil Corporation; FPC Gas Rate Schedule No. 50, Mesa Petroleum Company.
G-12—FPC Gas Rate Schedule Nos. 1, 3, 7 and 31, Aztec Oil & Gas Company; FPC Gas Rate Schedule No. 26, Union Texas Petroleum, a division of Allied Chemical Corporation.
G-13—Docket No. CI75-45 et al., Tenneco Oil Company.
G-14—Docket No. CI77-70, Getty Oil Company (formerly Skelly Oil Company).
G-15—Docket No. CI74-319, James M. Forgotson, operator for Gulf Coast Venture.
G-16—Docket No. CI76-743, Ladd Petroleum Corporation.
G-17—Docket No. CS71-631, Eason Oil Company; Docket No. CS76-842, Devon Corporation.
G-18—Docket Nos. CP74-289, CP73-334 and CP75-360, El Paso Natural Gas Company.
G-19—Docket No. CP74-299, Kansas-Nebraska Natural Gas Company, Inc.
G-20—Docket Nos. CP75-131 and CP76-129, Mountain Fuel Supply Corporation; Docket No. CP76-94, Phillips Petroleum Company.
G-21—Docket No. CP74-329, *Atlanta Gas Light Company, Applicant* v. *Southern Natural Gas Company, Respondent.*
G-22—Docket No. CP77-38, Tennessee Gas Pipeline, a division of Tenneco, Inc. and National Fuel Gas Supply Corporation.
G-23—Docket No. CP77-106, Mississippi River Transmission Company; Docket No. CP77-131, Natural Gas Pipeline Company of America.
G-24—Docket No. CP77-183, Columbia Gas Transmission Corporation.
G-25—Docket No. CP69-199, Transcontinental Gas Pipe Line Corporation; Docket No. CP77-107, Gas Gathering Corporation.
G-26—Docket No. CP76-511, Natural Gas Pipeline Company of America; Docket No. CP77-106, Mississippi River Transmission Corporation; Docket No. CP77-131, Natural Gas Pipeline Company of America.
G-27—Docket No. CP75-126, Northern Natural Gas Company.
G-28—Docket No. CP76-248, Sea Robin Pipeline Company.
G-29—Docket No. CP77-342, Tennessee Gas Pipeline Company.

POWER AGENDA—7614TH MEETING, MAY 18, 1977, REGULAR MEETING, PART II

CP-1—Docket No. ER77-221, Kentucky Utilities Company.
CP-2—Docket No. ER77-308, Louisville Gas & Electric Company.
CP-3—Docket No. ER77-266, Otter Tail Power Company.
CP-4—Docket No. ES77-5, Iowa Public Service Company.
CP-5—Docket No. ES77-27, Montana-Dakota Utilities Company.
CP-6—Docket No. ES77-28, Minnesota Power & Light Company.
CP-7—Docket No. E-9259, Long Island Lighting Company.
CP-8—Project No. 1989, Wisconsin Public Service Corporation.
CP-9—Project No. 2113, Wisconsin Valley Improvement Company.
CP-10—Project No. 2761, El Dorado County Water Agency.
CP-11—*Papago Tribal Utility Authority et al.* v. *F.P.C.*, D.C. Cir. No. 76-1937 (ER76-530).
CP-12—Project No. 2709, Monongahela Power Company, Potomac Edison Company, West Penn Power Company.

MISCELLANEOUS AGENDA—7614TH MEETING, MAY 18, 1977, REGULAR MEETING, PART II

CM-1—Upper White River Basin in Missouri and lower White River Basin in Missouri and Arkansas.
CM-2—Great Miami subregion portion of the Ohio River Basin Commission's comprehensive coordinated joint plan.
CM-3—Wabash subregion portion of the Ohio River Basin Commission's comprehensive coordinated joint plan.
CM-4—Reserved.
CM-5—Reserved.
CM-6—Blue Dolphin Pipe Line Company.
CM-7—Transwestern Pipeline Company.

GAS AGENDA—7614TH MEETING, MAY 18, 1977, REGULAR MEETING, PART II

CG-1—Docket No. RP74-100 (PGA Nos. 77-5 and 77-5A), National Fuel Gas Supply Corporation.
CG-2—Docket No. RP69-19 and RP72-157, Consolidated Gas Supply Corporation.
CG-3—Docket Nos. AR61-2, AR69-1 and RP74-41, Texas Eastern Transmission Corporation.
CG-4—Kerr-McGee Corporation, FPC Gas Rate Schedule No. 74.
CG-5—Docket No. CI76-268, Phillips Petroleum Company, Docket No. CI77-157, Amoco Production Company; Docket No. CI77-262, Union Oil Company of California.
CG-6—Docket No. CI60-466, et al., Cabot Corporation, et al.
CG-7—Docket No. CI62-1184, et al., Atlantic Richfield Company, et al.
CG-8—Docket No. G-7241, et al., Aztec Oil and Gas Company, et al.
CG-9—Docket No. CP77-184, Columbia Gas Transmission Corporation.
CG-10—Docket No. CP77-334, Trunkline Gas Company.
CG-11—Docket No. CP77-206, Texas Eastern Transmission Corporation.
CG-12—Docket No. CP76-168, Transcontinental Gas Pipe Line Corporation.
CG-13—Docket No. CP77-135, Natural Gas Pipeline Company of America; Docket No. CP77-260, Texas Eastern Transmission Corporation.
CG-14—Docket No. CP77-292, Florida Gas Tranmission Company.
CG-15—Docket No. CP77-233, El Paso Natural Gas Company.
CG-16—Docket No. CP77-228, United Gas Pipe Line Company, Arkansas Louisiana Gas Company.
CG-17—Docket No. CP76-396, Consolidated Gas Supply Corporation.
CG-18—Docket No. CP77-84, Northern Natural Gas Company, operating as Peoples Natural Gas Division, Docket No. CP77-169, Panhandle Eastern Pipe Line Company.
CG-19—Docket No. CP77-293, Tennessee Gas Pipeline Company, a Division of Tenneco Inc.
CG-20—Docket No. CP77-99, Northern Natural Gas Company.
CG-21—Docket No. CP76-311, Tennessee Gas Pipeline Company.
CG-22—Docket No. CP76-467, Michigan Wisconsin Pipeline Company.

CG-23—Docket Nos. CI75-173, CI77-131, CI77-149, CI77-199, CI77-255 and CI77-266, Gulf Oil Corporation.

KENNETH F. PLUMB,
Secretary.

[S-409-77 Filed 5-12-77; 12:08 pm]

16

AGENCY HOLDING THE MEETING: Occupational Safety and Health Review Commission.

TIME AND DATE: 9 a.m., May 16, 1977.

PLACE: Room 1101, 1825 K Street NW., Washington, D.C.

STATUS: This meeting is subject to being closed by a vote of the Commissioners taken at the beginning of the meeting.

MATTERS TO BE CONSIDERED:

Discussion of specific cases in the Commission adjudication process.

CONTACT PERSONS FOR MORE INFORMATION:

Mrs. Nori Heuberger or Ms. Lottie Richardson (202) 634-7970.

For the Commission.

Dated: May 12, 177.

PAUL R. WALLACE,
Counsel to the Commission.

[S-406-77 Filed 5-12-77;11:53 am]

17

AGENCY HOLDING MEETING: Federal Reserve System.

NOTICE OF CHANGE IN SUBJECT OF MEETING

The previously announced meeting of the Board of Governors of the Federal Reserve System on May 11, 1977, included additional items:

1. Extension of the delegation of administrative responsibility to the Chairman of the Board of Governors to include approval of intradivisional organizational changes.

2. Reorganization of staff and related reallocation of budgeted funds within the Board of Governors.

The business of the Board required that the items be added, and no earlier announcement of the change was possible.

These items were closed to public observation because the items fall under exemption(s) in the Government in the Sunshine Act (5 U.S.C. § 552b(c)).

The previously announced closed items were:

1. Possible amendments to Section 23A of the Federal Reserve Act to be submitted to the House and Senate Banking Committees.

2. Possible candidates for a position at a Federal Reserve Bank.

The meeting was held at 10 a.m. in the Board's offices at 20th Street and Constitution Avenue NW., Washington, D.C. Information may be obtained from Mr. Joseph R. Coyne, Assistant to the Board, at (202) 452-3204.

Board of Governors of the Federal Reserve System, May 11, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[S-407-77 Filed 5-12-77;11:53 am]

18

AGENCY HOLDING THE MEETING: Federal Reserve System.

ADDITION OF PREVIOUSLY ANNOUNCED AGENDA ITEM

The Board of Governors has previously announced a meeting to be held on Monday, May 16, 1977, which will be closed to public observation under exemption(s) of the Government in the Sunshine Act (5 U.S.C. § 552b(c)). One of the items announced for inclusion at that meeting was consideration of any agenda items carried forward from a previous meeting. The purpose of this announcement is to inform the public that the following such items, postponed from Wednesday, May 11, 1977, will be considered at this meeting:

1. Extension of the delegation of administrative responsibility to the Chairman of the Board of Governors to include approval of intradivisional organizational changes.

2. Reorganization of staff and related reallocation of budgeted funds within the Board of Governors.

The previously announced closed item is:

1. Possible amendments to Section 23A of the Federal Reserve Act to be submitted to the House and Senate Banking Committees.

The meeting will be held at 10 a.m. in the Board's offices at 20th Street and Constitution Avenue NW., Washington, D.C. Information may be obtained from Mr. Joseph R. Coyne, Assistant to the Board, at (202) 452-3204.

Board of Governors of the Federal Reserve System, May 11, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

PART II

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

NATIONAL FLOOD INSURANCE PROGRAM

Final and Proposed Flood Elevation Determinations

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-2604]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Town of Oroville, Okanogan County, Washington

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final Rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his final determinations of flood elevations for the Town of Oroville, Okanogan County, Washington, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917).

Final Base Flood Elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the lobby of the Town Hall, 1308 Ironwood, Oroville.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community. The effective date of the Flood Insurance Rate Maps will be published in the Federal Register under Part 1915.4.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above national geodetic vertical datum, 1929
Okanogan River	Burlington Northern R.R. Bridge.	917.6
	Cherry Street Bridge	918.0
Similkameen River	Downstream corporate limits (extended).	914.2
	Twelfth Avenue Bridge.	921.5

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4011-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: April 27, 1977.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[FR Doc.77-13642 Filed 5-16-77;8:45 am]

[Docket No. FI-2584]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Town of Brookneal, Campbell County, Virginia

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his final determinations of flood elevations for the Town of Brookneal, Campbell County, Virginia, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917).

Final Base Flood Elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Town Hall, Brookneal, Virginia.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community. The effective date of the Flood Insurance Rate Maps will be published in the Federal Register under Part 1915.4.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Roanoke River	Southwest corporate limits.	391
	North side of U.S. 501.	390
	Carolina Ave. (extended).	390
	Southeast corporate limits.	389
Falling River	North side of Va. 40	393
	820 ft north of Va. 40	393
	Southeast corporate limits.	392

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4011-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: April 27, 1977.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Town of Evans, Erie County, New York

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his final determinations of flood elevations for the Town of Evans, Erie County, New York, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917).

Final base flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the bulletin board in Evans Town Hall, 42 North Main Street, Angola.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Momence, Kankakee County, Illinois

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his final determinations of flood elevations for the City of Momence, Kankakee County, Illinois, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

Final Base Flood Elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the City Hall, 123 West River Street, Momence, Illinois.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, DC 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community. The effective date of the Flood Insurance Rate Maps will be published in the FEDERAL REGISTER under Part 1915.4.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Kankakee River	West corporate limits	615
	Elm St. (extended)	616
Kankakee River, main channel.	Dixie Highway, 100 ft downstream of Chicago & Eastern Illinois R.R.	617
	East corporate limits	620
Kankakee River, (north channel).	Dixie Highway	618
	Ash St. (extended)	619
	East corporate limits	620

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4011–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: April 27, 1977.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-2885]

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the Town of Lyndon, Vermont

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Lyndon, Vermont, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. Harold Dresser, Jr., Chairman, Board of Selectmen, Lyndonville, Vermont 05851.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Proposed base flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Town Hall, 24 Main Street, Lyndonville, Vermont 05851.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Passumpsic River	Railroad bridge	689
	U.S. 5	707
	Vermont 122	708
	At confluence with Millers Run.	709
	U.S. 5	709
	Vermont 114	711
	Railroad bridge	716
	Vermont 114	717
	TH 36	718
	TH 40	741
	Vermont 114	752
Calendar Brook	Route 5	734
Hawkins Brook	TH 69	686
	TH 6	706
Millers Run	Vermont 122	709
	I-91	714
	TH 31	718
Wheelock Branch	SA 10	708
	I-91	708
	TH 1	708
	TH 82	709

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 27, 1977.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the City of Georgetown, Georgetown County, South Carolina

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Georgetown, Georgetown County, South Carolina, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1969 (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify the Honorable Douglas L. Hinds, Mayor of Georgetown, Drawer 939, Georgetown, South Carolina 29440.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, DC 20410.

SUPPLEMENTARY INFORMATION: These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Proposed base flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the lobby of the Municipal Building, 1114 Front Street, Georgetown, South Carolina.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Atlantic Ocean (Winyah Bay, Sampit and Pee Dee Rivers).	Fogel St.	13
	Poplar St.	12
	Meeting St.	12
	Fraser St.	11
	Collins St.	11

Proposed Flood Elevation Determinations for City of Fayetteville, N.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Fayetteville, Cumberland County, North Carolina, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917. Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. William G. Thomas, City Manager, Fayetteville, North Carolina.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Proposed base flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the City Inspection Office, City Hall, Fayetteville, North Carolina.

The proposed 100-year Flood Eelevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Cape Fear River	Upstream corporate limits.	91
	Highway 301	84
	Person St	83
	Downstream corporate limits.	82
Locks Creek	Person St	83
	Interstate 95	83
Buzzards Branch	Clinton Rd	83
Cross Creek	Highway 301	84
	Upstream of Anderson St.	91
	Upstream of central business loop.	100
	Upstream of Langdon St.	118
	Upstream corporate limits.	133
Blounts Creek	Hawley Lane	84
	Upstream of Gillespie St.	93
	Upstream of Whitfield St.	112
	Downstream of Owen Dr.	146
Branson Creek	Upstream of Robeson St.	105
	Upstream of Raeford St.	130
	Upstream of Murray Hill Rd.	178
	Upstream of Cliffdale Rd.	196
Hybarts Branch	Upstream of Mirror Lake Dr.	144
	Upstream of Morganton Rd.	161
	Upstream of Skye Dr.	188
Dark Branch	Upstream of Village Dr.	150
Little Cross Creek	Upstream of Jackson Ave.	103
	Downstream of Pamalee Rd.	133
Eutaw Creek	Upstream of McGougan Rd.	130
	Downstream of Stamper Rd.	158
Cool Spring Branch	Upstream of Forest Hill Dr.	133
	Corporate limits	170
Country Club Branch	Upstream of Rosehill Rd.	125
	Upstream of Country Club Dr.	139
	Downstream of Hilliard Dr.	147
Cedar Falls Creek	Downstream of Highway 401.	108
	Upstream corporate limits.	145

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the Village of Nehawka, Nebr.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Nehawka, Nebraska, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234). 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917. Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Raymond Anderson, Nehawka, Nebraska 68413.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact strict requirements on its own, or pursuant to policies established by other Federal, state or regional entities. PART III

THE NATIONAL ARCHIVES OF THE UNITED STATES * 1934 *

FEDERAL ENERGY ADMINISTRATION

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Notice of Intention To Issue Construction Orders to Certain Major Fuel Burning Installations

FEDERAL ENERGY ADMINISTRATION

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Notice of Intention To Issue Construction Orders to Certain Major Fuel Burning Installations

The Federal Energy Administration (FEA) hereby gives notice of its intention to issue Construction Orders pursuant to section 2(c) of the Energy Supply and Environmental Coordination Act of 1974, as amended (ESECA), and Title 10, Code of Federal Regulations (10 CFR), Parts 303 and 307 to the following installations in the early planning process:

Docket No.	Owner	Installation	Number of units	Location
OCU-0540-2-1 OCU-0540-2-2	Anheuser-Busch, Inc.	Williamsburg Brewery	2	Williamsburg, Va.
OCU-0900-1-1	Supervisory committee of Bellefield boiler plant.	Bellefield boiler plant	1	Pittsburgh, Pa.
OCU-1050-1-1	Boeing Co.	Boeing Vertol	1	Ridley Township, Pa.

FEA hereby also gives notice of the opportunity for written and oral presentation of data, views and arguments by interested persons regarding these proposed Construction Orders.

The proposed orders would require the above-named installations in the early planning process to be designed and constructed to be capable of using coal as their primary energy source.

Prior to the issuance of a Construction Order to an installation, section 2(c) of ESECA and 10 CFR 303.46(b), 307.3(b), and 307.3(c) require that FEA find that the installation is in the early planning process. A Construction Order may not be issued if FEA finds that an adequate and reliable supply of coal and coal transportation facilities are not reasonably expected to be available. FEA's proposed findings, as well as its proposed conclusions and rationale with respect to these findings, for the installation are set out in Section I of the Appendix to this notice. These findings, conclusions and rationale may be amended as a result of comments received by FEA pursuant to this notice and other information available to FEA. The findings, conclusions and rationale will be included, with any amendments, in the Construction Order if it is issued.

In addition, section 2(c) of ESECA and 10 CFR 303.46(b) and 307.3(d) require that FEA consider certain other factors prior to issuance of a Construction Order. FEA's initial conclusions and a brief statement of the rationale for each, with respect to such considerations, are set out in Section II of the Appendix to this notice. The conclusions and rationale may be amended as a result of comments received by FEA pursuant to this notice and other information available to FEA. The conclusions and rationale will be included with any amendments, in the Construction Order if it is issued.

Upon completion of the proceeding described in this notice, FEA may determine to issue Construction Orders to some or all of the above-named installations. The Construction Orders will not become effective, however, until FEA has considered the environmental impact of each order, pursuant to 10 CFR 208.3(a)(4) and 307.7, and has served the affected installation with a Notice of Effectiveness, as provided in 10 CFR 303.10(b), 303.47(b) and 307.5. 10 CFR 307.7(c) required that, prior to the issuance of a Notice of Effectiveness to an installation, FEA shall perform an analysis of the environmental impact of the issuance of such notice of effectiveness. That analysis shall result in either 1) a declaration that the Construction Order will not, if made effective by a Notice of Effectiveness, be likely to have a significant impact on the quality of the human environment; or, 2) the preparation by FEA of an environmental impact statement covering the significant site-specific impacts that are likely to result from the Construction Order and that have not been adequately addressed in the Final Programmatic Environmental Impact Statement or in other official documents made publicly available. If FEA prepares an environmental impact statement covering significant site-specific impacts from the Construction Order, the statement shall be prepared and published for comment in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 prior to issuance of a notice of effectiveness. Interested persons may request a public hearing pursuant to 10 CFR 303.173 to comment on the contents of a draft environmental impact statement.

Public comment on the proposal to issue a Construction Order to the installation(s) listed above is invited in the form of written and oral presentation of data, views and arguments.

Comments should address (1) the adequacy and validity of each of the proposed findings and the conclusions and rationale in support of these findings, as well as the conclusions with respect to the other factors FEA must consider and rationale in support of these conclusions, (2) the environmental impact of the issuance of a notice making effective a Construction Order, including any site specific environmental impacts, and (3) any other aspects or impacts of the proposed Construction Order believed to be relevant.

Any installation issued a Construction Order will have to comply with applicable new source performance standards prescribed by the Environmental Protection Agency under the Clean Air Act, as amended (42 U.S.C. 1857, et seq.).

Pursuant to 10 CFR 303.173(a) and (d), FEA hereby announces that a public hearing to receive oral presentation of data, views and arguments from interested persons will be held beginning at 9:00 a.m. on June 1, 2 and 3, 1977, at the Federal Building, Conference Room 11B 1421 Cherry Street, Philadelphia, Pennsylvania 19102. Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request or a verbal request if confirmed in writing, for an opportunity to make an oral presentation. That request should be directed to Ed Gray, FEA Region III, Room 1001, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, (215) 597-3607. The request should be received before 4:30 p.m., Thursday, May 26, 1977. The request should describe the person's interest in the issue(s) involved; if appropriate, it should state why the person is an appropriate representative of the group or class of persons which has such an interest; it should give a concise summary of the proposed oral presentation and a phone number where the person may be contacted through May 31, 1977. Speakers should submit 10 copies of their oral presentation if possible, unless such presentation is less than five (5) pages, in which case only one copy is required, to Ed Gray, Federal Energy Administration, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, before 4:30 p.m., Monday, May 31, 1977. Speakers will be contacted by an FEA Representative before 4:30 p.m., Friday, May 27, 1977, to confirm receipt of the written request.

Detailed technical data, views and arguments should be contained in a written submission in support of the oral presentation. The oral presentation itself should be a summary of those written comments.

While FEA will endeavor to provide adequate opportunity to all who desire to speak, FEA reserves the right to limit the number of persons to be heard at the hearing, to schedule their respective presentation and to establish the procedures governing the conduct of the hearing. The length of time allocated to each presentation may be limited on the basis of the number of persons requesting to be heard. The FEA will prepare an agenda that shall provide, to the extent possible, for the presentation of all relevant data, views and arguments.

An FEA official will be designated to preside at the hearing, which will not be a judicial or evidentiary hearing. During oral presentations, only those conducting the hearing may ask questions. There will be no cross-examination. At the conclusion of all initial oral presentations, each person who has made an oral statement will be given the opportunity, if she or he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit written questions to the presiding officer to be asked of any person making an oral presentation. The presiding officer will determine whether to ask the question, having first determined whether the question is relevant, and whether adequate time may be afforded for an answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and it, together with any written comments submitted in the course of the hearing, will be retained by the FEA and make available for inspection and copying at the Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue, NW., Washington D.C., and the FEA Regional Office, Room 1001, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, between the hours of 8 a.m and 4:30 p.m., Monday through Friday. Anyone may purchase a copy of the transcript from the reporter.

Interested persons are invited to submit written comments consisting of data, views, or arguments with respect to the proposed Construction Orders to Executive Communications, Federal Energy Administration, Federal Building, Room 3317, Box MK, Washington, D.C. 20461.

Comments and other documents submitted to FEA Executive Communications should be identified on the outside of the envelope in which they are transmitted and on the document itself with the designation "Proposed Construction Order for the _____ Installation." Fifteen copies should be submitted.

All written comments received by 4:30 p.m., Tuesday, June 14, 1977, all oral presentations, and all other relevant information submitted to or otherwise available to FEA will be considered by FEA prior to issuance of a Construction Order.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it in accordance with that determination.

Copies of the regulations implementing Section 2 of ESECA (10 CFR Parts 303 and 307) are available from the FEA Regional Offices:

MFBI CONSTRUCTION ORDER CANDIDATE IDENTIFICATION AND SELECTION METHODOLOGY

FEA has conducted a two part process in which it first identified the potential universe of major fuel burning installations (MFBI's) that were in the early planning process in order to determine which MFBI's might be subject to Construction Orders requiring that the MFBI be designed and constructed to be capable of using coal as its primary energy source. FEA then performed a detailed analysis of individual potential order recipients to determine whether the facts would warrant publication of a Notice of Intention (NOI) to Issue a Construction Order to any of the potential order recipients.

I. *Determination of candidate universe.*

On February 3, 1977, FEA published in the FEDERAL REGISTER (42 FR 6621) a notice requiring owners of MFBI's in the early planning process to complete Schedules A-1 and A-2 of Form FEA C-607-S-0, entitled "Major Fuel Burning Installation Early Planning Process Identification Report." (An MFBI has entered the early planning process by completing its preliminary feasibility study.) Respondents were required to complete these schedules if the MFBI's were planned with at least the minimum required design firing rate (generally 100 MM BTU per hour).

Schedule A-1 contained basic identifying data for a particular MFBI. Schedule A-2 is designed to provide FEA with information on combustor capacity, combustor use, the primary energy source, and the design and construction schedule, including the processing status of any required government permits.

After receiving the information on Schedules A-1 and A-2, FEA first determined which MFBI's were no longer in the early planning process according to § 307.2 of the FEA regulations, which states that the early planning process terminates when the MFBI "can no longer be ordered, to be designed and constructed so as to be capable of burning coal as its primary energy source without suffering significant financial or operational detriment due to the impairment of prior commitments."

In addition, FEA deferred from further consideration certain other MFBI's based on the information contained in Schedules A-1 and A-2. To date, consideration of the following types of MFBI's has been deferred:

(a) Those planning to use exclusively non-fossil fuels as their primary energy source, usually wood waste, bagasse or electricity;

(b) Those planned so as to be capable of using only coal as their primary energy source;

(c) Those planning to construct units that will be used exclusively for process uses that require utilization of natural gas or petroleum products (process use is defined in § 303.2 of the FEA regulations (10 CFR 303.2) as that fuel use for which alternate fuels are not technically feasible);

(d) Those planning exclusively to use waste gas that would not be added to the nationwide pipeline supply, or petroleum by-products that are not suitable for general commercial uses (typically these fuels are waste gases or petroleum by-products generated by refinery processes and are used in refinery steam generators).

Issuing orders to the first category of MFBI's, above, would not contribute to the saving of any oil or natural gas. Burning of non-fossil fuels, furthermore, contributes to the purpose of ESECA to aid in meeting the essential needs of the United States for fuels in the same manner as does the increased burning of coal.

In addition, FEA has exercised its administrative discretion to defer consideration of MFBI's currently planning to burn coal as their only energy source because of programmatic necessity to establish reasonable priorities. Should either units planning to use a non-fossil fuel, or units planning to burn only coal change their current plans they are to amend their response to Form FEA C-607-S-0.

FEA has applied its administrative discretion and technical expertise to determine that certain types of facilities should be covered by the "process use" exemption referred to in subparagraph (c) above. Certain of these processes reflect uses for which the burning of coal is not technically feasible. The following types of facilities have been included to date in the "process use" exemption:

(1) refinery heaters and furnaces;
(2) copper refining and melting furnaces;
(3) chemical plant process heaters and recovery furnaces;
(4) oxygen blown steelmaking vessels;
(5) primary float glass tanks; and
(6) direct fired kilns and dryer burners (producing low alkaline products).

FEA has also determined that deferring issuance of NOI's to those MFBI's that use waste gas or petroleum by-products not suitable for other commercial uses would best serve the purposes of ESECA. The uses to which these waste fuels are currently put represent efficient use of national resources. Prohibiting the use of these waste fuels would not significantly conserve national supplies of scarce fuels.

MFBI's deferred on the basis of the above criteria are notified by letter that they will not be required to submit further information at this time. All

other MFBI's in the early planning process are required by FEA to complete Schedule A–3 of Form FEA C–607–S–0. Schedule A–3 is designed to elicit detailed financial information about the MFBI owner's estimate of capital costs that would be associated with the construction of a coal capable unit. Comparative fuel costs and the net operating cost differential resulting from burning coal are also elicited by Schedule A–3. The owner's financial history and information on coal availability are also obtained.

After receipt of the information contained in Schedule A–3, FEA analyzes the capability of the owner of the MFBI to recover any increase in projected capital investment costs required as a result of a Construction Order. An owner of an MFBI is capable of recovering any increase in projected capital investment that might be required as a result of a Construction Order if the MFBI is able to make the original investment planned (prior to issuance of a Construction Order) plus any increase required as a result of a Construction Order and continue in business in at least a financially breakeven posture over the long run. FEA presumes that an MFBI owner's capability to recover capital is confirmed when that owner can both raise the necessary capital for construction of an MFBI with coal burning capability and can show an historical profit profile. Factors used in analyzing that presumption include the size of the additional capital investment necessary to comply with a Construction Order, net property and plant assets, historical construction expenditures and total equity of the owner. FEA also considers any loss of revenue resulting from a delay caused by a Construction Order. Such losses, if any, are considered in terms of increased or additional costs which an MFBI incurs for goods or services, including power, which must be purchased by the MFBI to replace those goods or services which the MFBI would have produced for itself but for the issuance of a Construction Order. Such costs will be limited to the difference between the anticipated cost of production of the goods or services at the MFBI, and the cost of purchasing replacement goods or services.

In addition, section 2(c) of ESECA indicates that FEA may not issue Construction Order NOI's to an MFBI if it determines that an adequate and reliable supply of coal is not expected to be available. To meet this statutory requirement, FEA considers the availability nationwide of total tonnages of coal, based upon the presumption that an MFBI in the early planning process can be designed and constructed to use a wide range of coal types available.

FEA also considers, prior to issuance of an MFBI Construction Order NOI, the existence and effects of any contractual commitment for the construction of the MFBI upon the owner's capability to recover any increase in capital investment required as a result of a Construction Order.

It is to be noted that much of the information used by FEA to make its practicability findings is arguably confidential under 18 U.S.C. 1905. Therefore, such information has not appeared in the Appendix to the NOI. The calculations have been explained in each case and the data are available to the representatives of the owner of the MFBI.

Any questions regarding this Notice should be directed to the FEA National Office as follows: Federal Energy Administration, Code OCU (Construction Order: ---------- Installation), Washington, D.C. 20461, 202–566–7941.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 et seq.), as amended by Pub. L. 94–163; Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.), as amended by Pub. L. 94–385; E.O. 11790 (39 FR 23185).)

Issued in Washington, D.C., May 9, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

APPENDIX

PROPOSED FINDINGS AND RATIONALE FOR NOTICE OF INTENTION TO ISSUE A CONSTRUCTION ORDER

ESECA and the FEA regulations require FEA to make certain findings and determinations and to consider certain factors before issuing a Construction Order to a Major Fuel Burning Installation (MFBI). FEA's proposed findings, as well as its proposed conclusions with respect to the factors FEA has considered, are set out below with respect to the MFBI's named below. Supporting rationale and conclusions are also set forth.

Docket No.	Owner	Installation	Unit	Location
OCU–0540–2–1 OCU–0540–2–2	Anheuser-Busch, Inc.	Williamsburg brewery	28–310–5 28–310–4	Williamsburg, Va.

These findings, determinations and considerations, which are now proposed by FEA, are based on the information that has been provided to and developed by FEA prior to the issuance of this Notice of Intention (NOI) to issue a Construction Order.

Anheuser-Busch, Incorporated shall be referred to as the "owner". Williamsburg Brewery Units 28–310–5 and 28–310–4 shall be referred to as the "MFBI's".

I. *Proposed findings.*—A. *The MFBI's are in the early planning process.* Based on an analysis of the information submitted to FEA by the owner on Form FEA C–607–S–0 and information provided by the owner in response to subsequent inquiry to assure the continued applicability and currency of such information, including, as appropriate, an on-site inspection visit, FEA proposes to find that the MFBI's are in the early planning process. This proposed finding is based on the facts, assumptions and reasoning referenced below:

1. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the preliminary feasibility study was completed.

2. Information supplied by the owner or otherwise acquired by FEA indicates that the early planning process for these MFBI's has not terminated.

3. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the MFBI's meet the minimum design firing rate requirement.

B. *Within the terms of ESECA, FEA has been unable to determine that an adequate and reliable supply of coal is not expected to be available.* This proposed determination is based upon the facts, interpretations and assumptions stated below:

1. *Coal availability.*—(a) *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the future. United States Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 billion tons, over half of which is currently technically and economically recoverable (Demonstrated Coal Reserve Base of the United States, by Sulfur Category, on January 1, 1974, Bureau of Mines (May 1975) (hereafter "BOM Survey")). Within these recoverable reserves approximately 200 billion tons contain 1 percent or less sulfur by weight. To determine when certain quantities of these reserves are expected to be available, FEA has examined several studies referenced herein, which together provide the best current evidence as to coal availability.

(b) *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned coal production (derived from responses to a survey of coal producing companies) shows that there should be sufficient production of coal to meet the total national demand through 1980. Beyond 1980, plans for new production are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future; however, the projected total planned national coal production for 1985 already meets over 99% of the total U.S. demand expected in 1985. With time, more potential mine developments will become firm plans, thus increasing the planned production.

(1) *National Coal production.* It is conservatively estimated that it will be practicable to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1977	732.3
1978	791.6
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.6

The figures shown above are derived from FEA's Coal Mine Expansion Study (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential.

An FEA study, Coal Availability Report, April 1977, (hereafter "Availability Report"), indicates current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	396.2
1984	475.5
1985	544.9

(2) *National demand exclusive of ESECA prohibition order demand.* The estimated national demand, excluding any increased demand resulting from FEA action under the authority of Section 2(a) of ESECA, is as follows (FEA 1976 National Energy Outlook):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

(3) *National ESECA prohibition order demand.* The estimated potential demand for coal resulting from all Notices of Intention to issue Prohibition Orders to date and from all outstanding Prohibition Orders issued to date under Section 2(a) of ESECA is no more than the following ("Availability Report"):

Year:	*Demand (million tons)*
1978	11.0
1979	22.4
1980	32.5
1981	35.8
1982	57.4
1983	59.8
1984	59.8

(c) *State or local laws.* FEA has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to FEA's attention.

(d) *Conclusion.* Potential coal demand from these MFBI's and from all other MFBI's which are currently under consideration to receive Notices of Intention to issue Construction Orders under authority of Section 2(c) of ESECA is not included in the total national demand stated in paragraph 1.(b)(2), above. Coal demand from such MFBI's is also not calculated in currently projected ESECA generated demand since it is infeasible to anticipate specific quality characteristics for the coal that will be required by these MFBI's so far in advance of their actual construction.

As noted previously, plans for new coal production beyond 1980 are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future. The projection for national coal production potential in 1985 cited in paragraph 2.(a), above, tends to underestimate actual production potential.

FEA has considered these facts and the fact that the potential annual demand for coal will increase once these MFBI's and others become operational. FEA expects, however, (based on an analysis of the "BOM Survey," the Coal Mine Expansion Study, the FEA 1976 National Energy Outlook, and the "Availability Report," cited above) that national coal production potential will substantially exceed the total national demand for coal in amounts sufficient in any year to meet the estimated potential additional demand for coal if all MFBI's currently under consideration were to receive Construction Orders under section 2(c) of ESECA. Within the terms of ESECA, FEA has been unable to determine that coal is not expected to be available for these MFBI's once they become operational. The best available evidence suggests that coal production potential will, in fact, considerably exceed all demand for the years pertinent to this proposed order.

The coal for these MFBI's will probably be bought from producers according to regional supply/demand relationships related to the MFBI's location. FEA observes, however, that the MFBI's could purchase coal in other markets as such production becomes available. (The Feasibility of Considering Expanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond, School of Engineering, University of Pennsylvania, November 7, 1975.)

(e) *Coal transportation.* FEA has considered the availability of national coal transportation facilities. Generally, FEA considers construction lead times pertinent to MFBI's in the early-planning process to be sufficient to allow owners to secure appropriate coal transportation and coal transportation facilities prior to becoming operational.

II. *Factors which ESECA requires FEA to consider.*—A. *The existence and effects of any contractual commitment for the construction of the MFBI's.* FEA has considered the existence and effects of any contractual commitment for the construction of the MFBI's which the owner has reported to FEA in a Schedule of Plan Change Costs attachment to a Form FEA C–607–S–0 Schedule A–3, or otherwise. FEA has considered the additional costs which would be incurred in connection with existing contractual commitments should FEA require that the MFBI's be designed and constructed to be capable of using coal as their primary energy source. Accordingly, FEA has included these costs in its consideration of the capability of the owner to recover any increase in capital investment required as a result of a Construction Order.

B. *The capability of the owner to recover any increase in projected capital investment required as a result of a construction order.* FEA has considered, in the manner described below, the capability of the owner to raise and to recover the increased capital investment expected to result from the issuance of a Construction Order.

1. *Increased capital investment required as a result of a construction order.* FEA has evaluated the additional capital investment costs required in order to design and construct the MFBI's to be capable of burning coal as their primary energy source. This calculation is based on existing FEA information and analysis, as well as information filed with FEA by the owner concerning the cost of equipment and facilities that would have to be acquired. Approximate costs to comply with applicable environmental protection requirements have also been considered, including the cost of compliance with the air pollution control requirements of the Clean Air Act.

2. *Capability of the owner to raise the increased capital investment.* This analysis is based upon an evaluation of the owner's current financial position as reported in the Dun and Bradstreet Reference Book, (March 1977). Where necessary, FEA has performed an independent analysis of the owner's financial capability. In those cases in which an independent analysis of the owner's ability to recover the additional capital investment we performed, FEA related the additional capital investment costs discussed in paragraph B.1., above, and the plan change costs discussed in paragraph II. A., above, to the owner's net property and plant assets, the owner's reported recent construction expenditures and the owner's equity.

In considering the owner's ability to recover the increased capital investment costs, FEA has compared these increased costs, the demonstrated ability of the owner to raise the additional capital, any loss of revenue resulting from a delay, if any, in the commencement of operations of the MFBI's resulting from a Construction Order, the owner's historical profit profile, and a presumed useful life of the MFBI's after construction of 40 years.

In light of such considerations, FEA presumes that the owner's capability to recover any increase in capital is confirmed since the owner can both raise the necessary additional capital for construction with coal burning capability and has historically shown a profit profile.

APPENDIX

PROPOSED FINDINGS AND RATIONALE FOR NOTICE OF INTENTION TO ISSUE A CONSTRUCTION ORDER

ESECA and the FEA regulations require FEA to make certain findings and determinations and to consider certain factors before issuing a Construction Order to a Major Fuel Burning Installation (MFBI). FEA's proposed findings, as well as its proposed conclusions with respect to the factors FEA has considered, are set out below with respect to the MFBI's named below. Supporting rationale and conclusions are also set forth.

Docket No.	Owner	Installation	Unit	Location
OCU–0900–1–1	Supervisory committee of Bellefield boiler plant.	Bellefield boiler plant	Replacement 3.	Pittsburgh, Pa.

These findings, determinations and considerations, which are now proposed by FEA, are based on the information that has been provided to and developed by FEA prior to the issuance of this Notice of Intention (NOI) to issue a Construction Order.

Supervisory Committee of Bellefield Boiler Plant shall be referred to as the "owner". Bellefield Boiler Plant Replacement 3 shall be referred to as the "MFBI".

I. *Proposed findings.*

A. *The MFBI is in the early planning process.* Based on an analysis of the information submitted to FEA by the owner on Form FEA C–607–S–0 and information provided by the owner in response to subsequent inquiry to assure the continued applicability and currency of such information, including, as appropriate, an on-site inspection visit, FEA proposes to find that the MFBI is in the early planning process. This proposed finding is based on the facts, assumptions and reasoning referenced below:

1. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the preliminary feasibility study was completed.

2. Information supplied by the owner or otherwise acquired by FEA indicates that the early planning process for this MFBI has not terminated.

3. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the MFBI meets the minimum design firing rate requirement.

B. *Within the terms of ESECA, FEA has been unable to determine that an adequate and reliable supply of coal is not expected to be available.* This proposed determination is based upon the facts, interpretations and assumptions stated below:

1. *Coal availability.*—(a) *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the future. United States Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 billion tons, over half of which is currently technically and economically recoverable (Demonstrated Coal Reserve Base of the United States, by Sulfur Category, on January 1, 1974, Bureau of Mines (May 1975) [hereafter "BOM Survey"]). Within these recoverable reserves approximately 200 billion tons contain 1 percent or less sulfur by weight. To determine when certain quantities of these reserves are expected to be

available, FEA has examined several studies referenced herein, which together provide the best current evidence as to coal availability.

(b) *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned coal production (derived from responses to a survey of coal producing companies) shows that there should be sufficient production of coal to meet the total national demand through 1980. Beyond 1980, plans for new production are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future; however, the projected total planned national coal production for 1985 already meets over 99 percent of the total U.S. demand expected in 1985. With time, more potential mine developments will become firm plans, thus increasing the planned production.

(1) *National coal production.* It is conservatively estimated that it will be practicable to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1977	732.3
1978	791.6
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.6

The figures shown above are derived from FEA's Coal Mine Expansion Study (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential.

An FEA study, Coal Availability Report, April 1977 (hereafter "Availability Report"), indicates current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	396.2
1984	475.5
1985	544.9

(2) *National demand exclusive of ESECA prohibition order demand.* The estimated national demand, excluding any increased demand resulting from FEA action under the authority of Section 2(a) of ESECA is as follows (FEA 1976 National Energy Outlook):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

(3) *National ESECA prohibition order demand.* The estimated potential demand for coal resulting from all Notices of Intention to issue Prohibition Orders to date and from all outstanding Prohibition Orders issued to date under Section 2(a) of ESECA is no more than the following ("Availability Report"):

Year:	*Demand (million tons)*
1978	11.0
1979	22.4
1980	32.5
1981	35.8
1982	57.4
1983	59.8
1984	59.8

(c) *State or local laws.* FEA has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to FEA's attention.

(d) *Conclusion.* Potential coal demand from this MFBI and from all other MFBI's which are currently under consideration to receive Notices of Intention to issue Construction Orders under authority of section 2(c) of ESECA is not included in the total national demand stated in paragraph 1.(b)(2), above. Coal demand from such MFBI's is also not calculated in currently projected ESECA generated demand since it is infeasible to anticipate specific quality characteristics for the coal that will be required by these MFBI's so far in advance of their actual construction.

As noted previously, plans for new coal production beyond 1980 are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future. The projection for national coal production potential in 1985 cited in paragraph 2.(a), above, tends to underestimate actual production potential.

FEA has considered these facts and the fact that the potential annual demand for coal will increase once this MFBI and others become operational.

FEA expects, however, (based on an analysis of the "BOM Survey", the Coal Mine Expansion Study, the FEA 1976 National Energy Outlook, and the "Availability Report", cited above) that national coal production potential will substantially exceed the total national demand for coal in amounts sufficient in any year to meet the estimated potential additional demand for coal if all MFBI's currently under consideration were to receive Construction Orders under Section 2(c) of ESECA. Within the terms of ESECA, FEA has been unable to determine that coal is not expected to be available for this MFBI once it becomes operational. The best available evidence suggests that coal production potential will, in fact, considerably exceed all demand for the years pertinent to this proposed order.

The coal for this MFBI will probably be bought from producers according to regional supply/demand relationships related to the MFBI's location. FEA observes, however, that the MFBI could purchase coal in other markets as such production becomes available. (The Feasibility of Considering Expanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond, School of Engineering, University of Pennsylvania, November 7, 1975).

(e) *Coal transportation.* FEA has considered the availability of national coal transportation facilities. Generally, FEA considers construction lead times pertinent to MFBI's in the early-planning process to be sufficient to allow owners to secure appropriate coal transportation and coal transportation facilities prior to becoming operational.

II. *Factors which ESECA requires FEA to consider.* A. *The existence and effects of any contractual commitment for the construction of the MFBI.* FEA has considered the existence and effects of any contractual commitment for the construction of the MFBI which the owner has reported to FEA in a Schedule of Plan Change Costs attachment to a Form FEA C-607-S-0 Schedule A-3, or otherwise. FEA has considered the additional costs which would be incurred in connection with existing contractual commitments should FEA require that the MFBI be designed and constructed to be capable of using coal as its primary energy source. Accordingly, FEA has included these costs in its consideration of the capability of the owner to recover any increase in capital investment required as a result of a Construction Order.

B. *The capability of the owner to recover any increase in projected capital investment required as a result of a construction order.* In the response to Form FEA C-607-S-0, the owner indicated that the MFBI would be designed and constructed to be capable of using coal as its primary energy source. FEA concludes, therefore, that the FEA requirement that the MFBI be designed and constructed to be capable of burning coal as its primary energy source will not require any increase in projected capital investment, nor result in a delay in the commencement of operations of the MFBI. FEA further concludes that since no increase in projected capital investment is required, and no delay in the commencement of operations will result, FEA is not required to consider the capability of the owner to recover any increase in projected capital investment.

Appendix

Proposed findings and rationale for notice of intention to issue a construction order

ESECA and the FEA regulations require FEA to make certain findings and determinations and to consider certain factors before issuing a Construction Order to a Major Fuel Burning Installation (MFBI). FEA's proposed findings, as well as its proposed conclusions with respect to the factors FEA has considered, are set out below with respect to the MFBI named below. Supporting rationale and conclusions are also set forth.

Docket No.	Owner	Installation	Unit	Location
OCU-1050-1-1	Boeing Co.	Boeing Vertol	Unassigned	Ridley Township, Pa.

These findings, determinations and considerations, which are now proposed by FEA, are based on the information that has been provided to and developed by FEA prior to the issuance of this Notice of Intention (NOI) to issue a Construction Order.

Boeing Company shall be referred to as the "owner". Boeing Vertol Unassigned Unit shall be referred as to the "MFBI".

I. *Proposed findings.*—A. *The MFBI is in the early planning process.* Based on an analysis of the information submitted to FEA by the owner on Form FEA C-607-S-0 and information provided by the owner in response to subsequent inquiry to assure the continued applicability and currency of such information, including, as appropriate, an on-site inspection visit, FEA proposes to find that the MFBI is in the early planning process. This proposed finding is based on the facts, assumptions and reasoning referenced below:

1. Schedule A-2 of Form FEA C-607-S-0 submitted by the owner shows that the preliminary feasibility study was completed.

2. Information supplied by the owner or otherwise acquired by FEA indicates that the early planning process for this MFBI has not terminated.

3. Schedule A-2 of From FEA C-607-S-0 submitted by the owner shows that the MFBI meets the minimum design firing rate requirement.

B. *Within the terms of ESECA, FEA has been unable to determine that an adequate and reliable supply of coal is not expected to be available.* This proposed determination is based upon the facts, interpretations and assumptions stated below:

1. *Coal availability.*—(a) *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the future. United States Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 billion tons, over half of which is currently technically and economically recoverable (Demonstrated Coal Reserve Base of the United States, by Sulfur Category, on January 1, 1974, Bureau of Mines (May 1975) (hereafter "BOM Survey")). Within these recoverable reserves approximately 200 billion tons contain 1% or less sulfur by weight. To determine when certain quantities of these reserves are expected to be available, FEA has examined several studies referenced herein, which together provide the best current evidence as to coal availability.

(b) *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned coal production (derived from responses to a survey of coal producing companies) shows that there should be sufficient production of coal to meet the total national demand through 1980. Beyond 1980, plans for new production are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future; however, the projected total planned national coal production for 1985 already meets over 99% of the total U.S. demand expected in 1985. With time, more potential mine developments will become firm plans, thus increasing the planned production.

(1) *National coal production.* It is conservatively estimated that it will be practicable to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1977	732.3
1978	791.6
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.6

The figures shown above are derived from FEA's Coal Mine Expansion Study (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential.

An FEA study, Coal Availability Report, April 1977, (hereafter "Availability Report"), indicates current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	396.2
1984	475.5
1985	544.9

(2) *National demand exclusive of ESECA prohibition order demand.* The estimated national demand, excluding any increased demand resulting from FEA action under the authority of section 2(a) of ESECA, is as follows (FEA 1976 National Energy Outlook):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

(3) *National ESECA prohibition order demand.* The estimated potential demand for coal resulting from all Notices of Intention to issue Prohibition Orders to date and from all outstanding Prohibition Orders issued to date under Section 2(a) of ESECA is no more than the following ("Availability Report"):

Year:	*Demand (million tons)*
1978	11.0
1979	22.4
1980	32.5
1981	35.8
1982	57.4
1983	59.8
1984	59.8

(c) *State or local laws.* FEA has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to FEA's attention.

(d) *Conclusion.* Potential coal demand from this MFBI and from all other MFBI's which are currently under consideration to receive Notices of Intention to issue Construction Orders under authority of section 2(c) of ESECA is not included in the total national demand stated in paragraph 1.(b)(2), above. Coal demand from such MFBI's is also not calculated in currently projected ESECA generated demand since it is infeasible to anticipate specific quality characteristics for the coal that will be required by these MFBI's so far in advance of their actual construction.

As noted previously, plans for new coal production beyond 1980 are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future. The projection for national coal production potential in 1985 cited in paragraph 2.(a), above, tends to underestimate actual production potential.

FEA has considered these facts and the fact that the potential annual demand for coal will increase once this MFBI and others become operational. FEA expects, however, (based on an analysis of the "BOM Survey", the Coal Mine Expansion Study, the FEA 1976 National Energy Outlook, and the "Availability Report", cited above) that national coal production potential will substantially exceed the total national demand for coal in amounts sufficient in any year to meet the estimated potential additional demand for coal if all MFBI's currently under consideration were to receive Construction Orders under Section 2(c) of ESECA. Within the terms of ESECA, FEA has been unable to determine that coal is not expected to be available for this MFBI once it becomes operational. The best available evidence suggests that coal production potential will, in fact, considerably exceed all demand for the years pertinent to this proposed order.

The coal for this MFBI will probably be bought from producers according to regional supply/demand relationships related to the MFBI's location. FEA observes, however, that the MFBI could purchase coal in other markets as such production becomes available. (The Feasibility of Considering Expanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond, School of Engineering, University of Pennsylvania, November 7, 1975.)

(e) *Coal transportation.* FEA has considered the availability of national coal transportation facilities. Generally FEA considers construction lead times pertinent to MFBI's in the early-planning process to be sufficient to allow owners to secure appropriate coal transportation and coal transportation facilities prior to becoming operational.

II. *Factors which ESECA requires FEA to consider.*—A. *The existence and effects of any contractual commitment for the construction of the MFBI.* FEA has considered the existence and effects of any contractual commitment for the construction of the MFBI which the owner has reported to FEA in a Schedule of Plan Change Costs attachment to a Form FEA C-607-S-0 Schedule A-3, or otherwise. FEA has considered the additional costs which would be incurred in connection with existing contractual commitments should FEA require that the MFBI be designed and constructed to be capable of using coal as its primary energy source. Accordingly, FEA has included these costs in its consideration of the capability of the owner to recover any increase in capital investment required as a result of a Construction Order.

B. *The capability of the owner to recover any increase in projected capital investment required as a result of a construction order.* FEA has considered, in the manner described below, the capability of the owner to raise and to recover the increased capital investment expected to result from the issuance of a Construction Order.

1. *Increased capital investment required as a result of a construction order.* FEA has evaluated the additional capital investment costs required in order to design and construct the MFBI to be capable of burning coal as its primary energy source. This calculation is based on existing FEA information and analysis, as well as information filed with FEA by the owner concerning the cost of equipment and facilities that would have to be acquired. Approximate costs to comply with applicable environmental protection requirements have also been considered, including the cost of compliance with the air pollution control requirements of the Clean Air Act.

2. *Capability of the owner to raise the increased capital investment.* This analysis is based upon an evaluation of the owner's current financial position as reported in the Dun and Bradstreet Reference Book (March 1977). Where necessary, FEA has performed an independent analysis of the owner's financial capability. In those cases in which an independent analysis of the owner's ability to recover the additional capital investment was performed, FEA related the additional capital investment costs discussed in paragraph B.1., above, and the plan change costs discussed in paragraph II.A., above, to the owner's net property and plant assets,

the owner's reported recent construction expenditures and the owner's equity.

In considering the owner's ability to recover the increased capital investment costs, FEA has compared these increased costs, the demonstrated ability of the owner to raise the additional capital, any loss of revenue resulting from a delay, if any, in the commencement of operations of the MFBI resulting from a Construction Order, the owner's historical profit profile, and a presumed useful life of the MFBI after construction of 40 years.

In light of such considerations, FEA presumes that the owner's capability to recover any increase in capital is confirmed since the owner can both raise the necessary additional capital for construction with coal burning capability and has historically shown a profit profile.

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Notice of Intention To Issue Construction Orders to Certain Major Fuel Burning Installations

The Federal Energy Administration (FEA) hereby gives notice of its intention to issue Construction Orders pursuant to section 2(c) of the Energy Supply and Environmental Coordination Act of 1974, as amended (ESECA), and Title 10, Code of Federal Regulations (10 CFR), Parts 303 and 307 to the following installations in the early planning process:

Docket No.	Owner	Installation	Number of units	Location
OCU-6650-3-1	Shell Oil Co.	Petrolia plant	2	Fellows, Calif.
OCU-6650-3-2				
OCU-6650-1-1	do	Pricewell plant	2	Bakersfield, Calif.
OCU-6650-1-2				
OCU-6650-2-1	do	Marco plant	2	Do.
OCU-6650-2-2				
OCU-8830-2-1	Standard Oil Co. of California/ Chevron, U.S.A., Inc.	NCD Cymric area, sec. 97	2	Oildale, Calif.
OCU-8830-2-2				
OCU-8830-1-1	do	NCD Bakersfield area, sec. 27, Kern front.	2	Bakersfield, Calif.
OCU-8830-1-2				

FEA hereby also gives notice of the opportunity for written and oral presentation of data, views and arguments by interested persons regarding these proposed Construction Orders.

The proposed orders would require the above-named installations in the early planning process to be designed and constructed to be capable of using coal as their primary energy source.

Prior to the issuance of a Construction Order to an installation, section (c) of ESECA and 10 CFR 303.46(b), 307.3(b), and 307.3(c) require that FEA find that the installation is in the early planning process. A Construction Order may not be issued if FEA finds that an adequate and reliable supply of coal and coal transportation facilities are not reasonably expected to be available. FEA's proposed findings, as well as its proposed conclusions and rationale with respect to these findings, for the installation are set out in Section I of the Appendix to this notice. These findings, conclusions and rationale may be amended as a result of comments received by FEA pursuant to this notice and other information available to FEA. The findings, conclusions and rationale will be included, with any amendments, in the Construction Order if it is issued.

In addition, section 2(c) of ESECA and 10 CFR 303.46(b) and 307.3(d) require that FEA consider certain other factors prior to issuance of a Construction Order. FEA's initial conclusions and a brief statement of the rationale for each, with respect to such considerations, are set out in Section II of the Appendix to this notice. The conclusions and rationale may be amended as a result of comments received by FEA pursuant to this notice and other information available to FEA. The conclusions and rationale will be included, with any amendments, in the Construction Order if it is issued.

Upon completion of the proceeding described in this notice, FEA may determine to issue Construction Orders to some or all of the above-named installations. The Construction Orders will not become effective, however, until FEA has considered the environmental impact of each order, pursuant to 10 CFR 208.3(a)(4) and 307.7, and has served the affected installation with a Notice of Effectiveness, as provided in 10 CFR 303.10(b), 303.47(b), and 307.5. 10 CFR 307.7(c) requires that, prior to the issuance of a Notice of Effectiveness to an installation, FEA shall perform an analysis of the environmental impact of the issuance of such Notice of Effectiveness. That analysis shall result in either 1) a declaration that the Construction Order will not, if made effective by a Notice of Effectiveness, be likely to have a significant impact on the quality of the human environment; or, 2) the preparation by FEA of an environmental impact statement covering the significant site-specific impacts that are likely to result from the Construction Order and that have not been adequately addressed in the Final Programmatic Environmental Impact Statement or in other official documents made publicly available. If FEA prepares an environmental impact statement covering significant site-specific impacts from the Construction Order, the statement shall be prepared and published for comment in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 prior to issuance of a Notice of Effectiveness. Interested persons may request a public hearing pursuant to 10 CFR 303.173 to comment on the contents of a draft environmental impact statement.

Public comment on the proposal to issue a Construction Order to the installations listed above is invited in the form of written and oral presentation of data, views and arguments.

Comments should address: (1) The adequacy and validity of each of the proposed findings and the conclusions and rationale in support of these findings, as well as the conclusions with respect to the other factors FEA must consider and rationale in support of these conclusions, (2) the environmental impact of the issuance of a notice making effective a Construction Order, including any site-specific environmental impacts, and (3) any other aspects or impacts of the proposed Construction Order believed to be relevant.

Any installation issued a Construction Order will have to comply with applicable new source performance standards prescribed by the Environmental Protection Agency under the Clean Air Act, as amended (42 U.S.C. 1857 et seq.).

Pursuant to 10 CFR 303.173 (a) and (d), FEA hereby announces that a public hearing to receive oral presentation of data, views and arguments from interested persons will be held beginning at 9:00 a.m. on May 27, 1977, at the Holiday Inn, 1500 Van Ness, San Francisco, California 94109. Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request or a verbal request if confirmed in writing, for an opportunity to make an oral presentation. That request should be directed to Eugene Stanley, FEA Region IX, 111 Pine Street, San Francisco, California 94109. The request should be received before 4:30 p.m., Friday, May 20, 1977. The request should describe the person's interest in the issue(s) involved; if appropriate, it should state why the person is an appropriate representative of the group or class of persons which has such an interest; it should give a concise summary of the proposed oral presentation and a phone number where the person may be contacted through May 26, 1977. Speakers should submit 10 copies of their oral presentation if possible, unless such presentation is less than five (5) pages, in which case only one copy is required, to William Arntz, Regional Administrator, Federal Energy Administration, 111 Pine Street, San Francisco, California 94111, before 4:30 p.m., Thursday, May 26, 1977. Speakers will be contacted by an FEA Representative before 4:30 p.m., Tuesday, May 24, 1977, to confirm receipt of the written request.

Detailed technical data, views and arguments should be contained in a written submission in support of the oral presentation. The oral presentation itself should be a summary of those written comments.

While FEA will endeavor to provide adequate opportunity to all who desire to speak, FEA reserves the right to limit the number of persons to be heard at the hearing, to schedule their respective presentation and to establish the procedures governing the conduct of the hearing. The length of time allocated to each presentation may be limited on the basis of the number of persons requesting to be heard. The FEA will prepare an agenda that shall provide, to the extent possible, for the presentation of all relevant data, views, and arguments.

An FEA official will be designated to preside at the hearing, which will not be a judicial or evidentary hearing. During oral presentations, only those conducting the hearing may ask questions. There will be no cross-examination. At the conclusion of all initial oral presentations, each person who has made an oral statement will be given the opportunity, if she or he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit written questions to the presiding officer to be asked of any person making an oral presentation. The presiding officer will determine whether to ask the question, having first determined whether the question is relevant, and whether adequate time may be afforded for an answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and it, together with any written comments submitted in the course of the hearing, will be retained by the FEA and made available for inspection and copying at the Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., and the FEA Regional Office, 111 Pine Street, San Francisco, California 94111, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Anyone may purchase a copy of the transcript from the reporter.

Interested persons are invited to submit written comments consisting of data, views, or arguments with respect to the proposed Construction Orders to Executive Communications, Federal Energy Administration, Federal Building, Room 3317, Box MK, Washington, D.C. 20461.

Comments and other documents submitted to FEA Executive Communications should be identified on the outside of the envelope in which they are transmitted and on the document itself with the designation "Proposed Construction Order for the _____ Installation." Fifteen copies should be submitted.

All written comments received by 4:30 p.m., Tuesday, June 14, 1977, all oral presentations, and all other relevant information submitted to or otherwise available to FEA will be considered by FEA prior to issuance of a Construction Order.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it in accordance with that determination.

Copies of the regulations implementing Section 2 of ESECA (10 CFR Parts 303 and 307) are available from the FEA Regional Offices:

MFBI CONSTRUCTION ORDER CANDIDATE IDENTIFICATION AND SELECTION METHODOLOGY

FEA has conducted a two part process in which it first identified the potential universe of major fuel burning installations (MFBI's) that were in the early planning process in order to determine which MFBI's might be subject to Construction Orders requiring that the MFBI be designed and constructed to be capable of using coal as its primary energy source. FEA then performed a detailed analysis of individual potential order recipients to determine whether the facts would warrant publication of a Notice of Intention (NOI) to Issue a Construction Order to any of the potential order recipients.

I. *Determination of candidate universe.*—On February 3, 1977, FEA published in the FEDERAL REGISTER (42 FR 6621) a notice requiring owners of MFBI's in the early planning process to complete Schedules A-1 and A-2 of Form FEA C-607-S-0, entitled "Major Fuel Burning Installation Early Planning Process Identification Report." (An MFBI has entered the early planning process by completing its preliminary feasibility study.) Respondents were required to complete these schedules if the MFBI's were planned with at least the minimum required design firing rate (generally 100 MM Btu per hour).

Schedule A-1 contained basic identifying data for a particular MFBI. Schedule A-2 is designed to provide FEA with information on combustor capacity, combustor use, the primary energy source, and the design and construction schedule, including the processing status of any required government permits.

After receiving the information on Schedules A-1 and A-2, FEA first determined which MFBI's were no longer in the early planning process according to § 307.2 of the FEA regulations, which states that the early planning process terminates when the MFBI "can no longer be ordered, to be designed and constructed so as to be capable of burning coal as its primary energy source without suffering significant financial or operational detriment due to the impairment of prior commitments."

In addition, FEA deferred from further consideration certain other MFBI's based on the information contained in Schedules A-1 and A-2. To date, consideration of the following types of MFBI's has been deferred:

(a) Those planning to use exclusively non-fossil fuels as their primary energy source, usually wood waste, bagasse or electricity;

(b) Those planned so as to be capable of using only coal as their primary energy source;

(c) Those planning to construct units that will be used exclusively for process uses that require utilization of natural gas or petroleum products (process use is defined in § 303.2 of the FEA regulations (10 CFR § 303.2) as that fuel use for which alternate fuels are not technically feasible);

(d) Those planning exclusively to use waste gas that would not be added to the nationwide pipeline supply, or petroleum by-products that are not suitable for general commercial uses (typically these fuels are waste gases or petroleum by-products generated by refinery processes and are used in refinery steam generators).

Issuing orders to the first category of MFBI's, above, would not contribute to the saving of any oil or natural gas. Burning on non-fossil fuels, furthermore, contributes to the purpose of ESECA to aid in meeting the essential needs of the United States for fuels in the same manner as does the increased burning of coal.

In addition, FEA has exercised its administrative discretion to defer consideration of MFBI's currently planning to burn coal as their only energy source because of programmatic necessity to establish reasonable priorities. Should either units planning to use a non-fossil fuel, or units planning to burn only coal change their current plans they are to amend their response to Form FEA C-607-S-0.

FEA has applied its administrative discretion and technical expertise to determine that certain types of facilities should be covered by the "process use" exemption referred to in subparagraph (c) above. Certain of these processes reflect uses for which the burning of coal is not technically feasible. The following types of facilities have been included to date in the "process use" exemption:

(1) Refinery heaters and furnaces;
(2) Copper refining and melting furnaces;
(3) Chemical plant process heaters and recovery furnaces;
(4) Oxygen blown steelmaking vessels;
(5) Primary float glass tanks;
(6) Direct fired kilns and dryer burners (producing low alkaline products).

FEA has also determined that deferring issuance of NOI's to those

MFBI's that use waste gas or petroleum by-products not suitable for other commercial uses would best serve the purposes of ESECA. The uses to which these waste fuels are currently put represent efficient use of national resources. Prohibhiting the use of these waste fuels would not significantly conserve national supplies of scarce fuels.

MFBI's deferred on the basis of the above criteria are notified by letter that they will not be required to submit further information at this time. All other MFBI's in the early planning process are required by FEA to complete Schedule A–3 of Form FEA C–607–S–O. Schedule A–3 is designed to elicit detailed financial information about the MFBI owner's estimate of capital costs that would be associated with the construction of a coal capable unit. Comparative fuel costs and the net operating cost differential resulting from burning coal are also elicited by Schedule A–3. The owner's financial history and information on coal availability are also obtained.

After receipt of the information contained in Schedule A–3, FEA analyzes the capability of the owner of the MFBI to recover any increase in projected capital investment costs required as a result of a Construction Order. An owner of an MFBI is capable of recovering any increase in projected capital investment that might be required as a result of a Construction Order if the MFBI is able to make the original investment planned (prior to issuance of a Construction Order) plus any increase required as a result of a Construction Order and continue in business in at least a financially breakeven posture over the long run. FEA presumes that an MFBI owner's capability to recover capital is confirmed when that owner can both raise the necessary capital for construction of an MFBI with coal burning capability and can show a historical profit profile. Factors used in analyzing that presumption include the size of the additional capital investment necessary to comply with a Construction Order, net property and plant assets, historical construction expenditures and total equity of the owner. FEA also considers any loss of revenue resulting from a delay caused by a Construction Order. Such losses, if any, are considered in terms of increased or additional costs which an MFBI incurs for goods or services, including power, which must be purchased by the MFBI to replace those goods or services which the MFBI would have produced for itself but for the issuance of a Construction Order. Such costs will be limited to the difference between the anticipated cost of production of the goods or services at the MFBI, and the cost of purchasing replacement goods or services.

In addition, section 2(c) of ESECA indicates that FEA may not issue Construction Order NOI's to an MFBI if it determines that an adequate and reliable supply of coal is not expected to be available. To meet this statutory requirement, FEA considers the availability nationwide of total tonnages of coal, based upon the presumption that an MFBI in the early planning process can be designed and constructed to use a wide range of coal types available.

FEA also considers, prior to issuance of an MFBI Construction Order NOI, the existence and effects of any contractual commitment for the construction of the MFBI upon the owner's capability to recover any increase in capital investment required as a result of a Construction Order.

It is to be noted that much of the information used by FEA to make its practicability findings is arguably confidential under 18 U.S.C. 1905. Therefore, such information has not appeared in the Appendix to the NOI. The calculations have been explained in each case and the data are available to the representatives of the owner of the MFBI.

Any questions regarding this Notice should be directed to the FEA National Office as follows: Federal Energy Administration, Code OCU (Construction Order: _____ Installation), Washington, D.C. 20461.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 et seq.), as amended by Pub. L. 94–163; Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.), as amended by Pub. L. 94–385; E.O. 11790 (39 FR 23185).)

Issued in Washington, D.C., May 9, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

APPENDIX

PROPOSED FINDINGS AND RATIONALE FOR NOTICE OF INTENTION TO ISSUE A CONSTRUCTION ORDER

ESECA and the FEA regulations require FEA to make certain findings and determinations and to consider certain factors before issuing a Construction Order to a Major Fuel Burning Installation (MFBI). FEA's proposed findings, as well as its proposed conclusions with respect to the factors FEA has considered, are set out below with respect to the MFBI's named below. Supporting rationale and conclusions are also set forth.

Docket No.	Owner	Installation	Unit	Location
OCU–6650–3–1 OCU–6650–3–2	Shell Oil Co.	Petrolia plant	E. & P. 4 E. & P. 5	Fellows, Calif.

These findings, determinations and considerations, which are now proposed by FEA, are based on the information that has been provided to and developed by FEA prior to the issuance of this Notice of Intention (NOI) to issue a Construction Order.

Shell Oil Company shall be referred to as the "owner". Petrolia Plant E & P 4 and E & P 5 shall be referred to as the "MFBI's".

I. *Proposed findings.*—A. *The MFBI's are in the early planning process.* Based on an analysis of the information submitted to FEA by the owner on Form FEA C–607–S–0 and information provided by the owner in response to subsequent inquiry to assure the continued applicability and currency of such information, including, as appropriate, an on-site inspection visit, FEA proposes to find that the MFBI's are in the early planning process. This proposed finding is based on the facts, assumptions and reasoning referenced below:

1. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the preliminary feasibility study was completed.

2. Information supplied by the owner or otherwise acquired by FEA indicates that the early planning process for these MFBI's has not terminated.

3. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the MFBI's meet the minimum design firing rate requirement.

B. *Within the terms of ESECA, FEA has been unable to determine that an adequate and reliable supply of coal is not expected to be available.* This proposed determination is based upon the facts, interpretations and assumptions stated below:

1. *Coal availability.*—(a) *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the future. United States Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 billion tons, over half of which is currently technically and economically recoverable (Demonstrated Coal Reserve Base of the United States, by Sulfur Category, on January 1, 1974, Bureau of Mines (May 1975) (hereafter "BOM Survey")). Within these recoverable reserves approximately 200 billion tons contain 1 percent or less sulfur by weight. To determine when certain quantities of these reserves are expected to be available, FEA has examined several studies referenced herein, which together provide the best current evidence as to coal availability.

(b) *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned coal production (derived from responses to a survey of coal producing companies) shows that there should be sufficient production of coal to meet the total national demand through 1980. Beyond 1980, plans for new production are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future; however, the projected total planned national coal production for 1985 already meets over 99 percent of the total U.S. demand expected in 1985. With time, more potential mine developments will become firm plans, thus increasing the planned production.

(1) *National coal production.*—It is conservatively estimated that it will be practicable to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1977	732.3
1978	791.6
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.6

The figures shown above are derived from FEA's Coal Mine Expansion Study (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential.

An FEA study, Coal Availability Report, April 1977, (hereafter "Availability Report"), indicates current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	398.2
1984	475.5
1985	544.9

(2) *National demand exclusive of ESECA prohibition order demand.*—The estimated national demand, excluding any increased demand resulting from FEA action under the authority of Section 2(a) of ESECA, is as follows FEA 1976 National Energy Outlook):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

(3) *National ESECA prohibition order demand.*—The estimated potential demand for coal resulting from all Notices of Intention to issue Prohibition Orders to date and from all outstanding Prohibition Orders issued to date under Section 2(a) of ESECA is no more than the following ("Availability Report"):

Year:	*Demand (million tons)*
1978	11.0
1979	22.4
1980	32.5
1981	35.8
1982	57.4
1983	59.8
1984	59.8

(c) *State or local laws.*—FEA has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to FEA's attention.

(d) *Conclusion.*—Potential coal demand from these MFBI's and from all other MFBI's which are currently under consideration to receive Notices of Intention to issue Construction Orders under authority of Section 2(c) of ESECA is not included in the total national demand stated in paragraph 1.(b)(2), above. Coal demand from such MFBI's is also not calculated in currently projected ESECA generated demand since it is infeasible to anticipate specific quality characteristics for the coal that will be required by these MFBI's so far in advance of their actual construction.

As noted previously, plans for new coal production beyond 1980 are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future. The projection for national coal production potential in 1985 cited in paragraph 2.(a), above, tends to underestimate actual production potential.

FEA has considered these facts and the fact that the potential annual demand for coal will increase once these MFBI's and others become operational. FEA expects, however, (based on an analysis of the "BOM Survey", the Coal Mine Expansion Study, the FEA 1976 National Energy Outlook, and the "Availability Report", cited above) that national coal production potential will substantially exceed the total national demand for coal in amounts sufficient in any year to meet the estimated potential additional demand for coal if all MFBI's currently under consideration were to receive Construction Orders under Section 2(c) of ESECA. Within the terms of ESECA, FEA has been unable to determine that coal is not expected to be available for these MFBI's once they become operational. The best available evidence suggests that coal production potential will, in fact, considerably exceed all demand for the years pertinent to this proposed order.

The coal for these MFBI's will probably be bought from producers according to regional supply/demand relationships related to the MFBIs' location. FEA observes, however, that the MFBI's could purchase coal in other markets as such production becomes available. (The Feasibility of Considering Expanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond, School of Engineering, University of Pennsylvania, November 7, 1975.)

(e) *Coal transportation.*—FEA has considered the availability of national coal transportation facilities. Generally, FEA considers construction lead times pertinent to MFBI's in the early-planning process to be sufficient to allow owners to secure appropriate coal transportation and coal transportation facilities prior to becoming operational.

II. *Factors which ESECA requires FEA to consider.*—A. *The existence and effects of any contractual commitment for the construction of the MFBI's.* FEA has considered the existence and effects of any contractual commitment for the construction of the MFBI's which the owner has reported to FEA in a Schedule of Plan Change Costs attachment to a Form FEA C–607–S–O Schedule A–3, or otherwise. FEA has considered the additional costs which would be incurred in connection with existing contractual commitments should FEA require that the MFBI's be designed and constructed to be capable of using coal as their primary energy source. Accordingly, FEA has included these costs in its consideration of the capability of the owner to recover any increase in capital investment required as a result of a Construction Order.

B. *The capability of the owner to recover any increase in projected capital investment required as a result of a construction order.* FEA has considered, in the manner described below, the capability of the owner to raise and to recover the increased capital investment expected to result from the issuance of a Construction Order.

1. *Increased capital investment required as a result of a construction order.*—FEA has evaluated the additional capital investment costs required in order to design and construct the MFBI's to be capable of burning coal as their primary energy source. This calculation is based on existing FEA information and analysis, as well as information filed with FEA by the owner concerning the cost of equipment and facilities that would have to be acquired. Approximate costs to comply with applicable environmental protection requirements have also been considered, including the cost of compliance with the air pollution control requirements of the Clean Air Act.

2. *Capability of the owner to raise the increased capital investment.*—This analysis is based upon an evaluation of the owner's current financial position as reported in the Dun and Bradstreet Reference Book (March 1977). Where necessary, FEA has performed an independent analysis of the owner's financial capability. In those cases in which an independent analysis of the owner's ability to recover the additional capital investment was performed, FEA related the additional capital investment costs discussed in paragraph B.1., above, and the plan change costs discussed in paragraph II.A., above, to the owner's net property and plant assets, the owner's reported recent construction expenditures and the owner's equity.

In considering the owner's ability to recover the increased capital investment costs, FEA has compared these increased costs, the demonstrated ability of the owner to raise the additional capital, any loss of revenue resulting from a delay, if any, in the commencement of operations of the MFBI's resulting from a Construction Order, the owner's historical profit profile, and a presumed useful life of the MFBI's after construction of 40 years.

In light of such considerations, FEA presumes that the owner's capability to recover any increase in capital is confirmed since the owner can both raise the necessary additional capital for construction with coal burning capability and has historically shown a profit profile.

APPENDIX

PROPOSED FINDINGS AND RATIONALE FOR NOTICE OF INTENTION TO ISSUE A CONSTRUCTION ORDER

ESECA and the FEA regulations require FEA to make certain findings and determinations and to consider certain factors before issuing a Construction Order to a Major Fuel Burning Installation (MFBI). FEA's proposed findings, as well as its proposed conclusions with respect to the factors FEA has considered, are set out below with respect to the MFBI's named below. Supporting rationale and conclusions are also set forth.

Docket No.	Owner	Installation	Unit	Location
OCU–6650–1–1 OCU–6650–1–2	Shell Oil Co.	Pricewell plant	E. & P. 4 E. & P. 5	Bakersfield, Calif.

These findings, determinations, and considerations, which are now proposed by FEA, are based on the information that has been provided to and developed by FEA prior to the issuance of this Notice of Intention (NOI) to issue a Construction Order.

Shell Oil Company shall be referred to as the "owner." Pricewell Plant E & P 4 and E & P 5 shall be referred to as the "MFBI's."

I. *Proposed findings.*—A. *The MFBI's are in the early planning process.* Based on an analysis of the information submitted to FEA by the owner on Form FEA C–607–S–0 and information provided by the owner in response to subsequent inquiry to assure the continued applicability and currency of such information, including, as appropriate, an on-site inspection visit, FEA proposes to find that the MFBI's are in the early planning process. This proposed finding is based on the facts, assumptions and reasoning referenced below:

1. Schedule A-2 of Form FEA C-607-S-0 submitted by the owner shows that the preliminary feasibility study was completed.

2. Information supplied by the owner or otherwise acquired by FEA indicates that the early planning process for these MFBI's has not terminated.

3. Schedule A-2 of Form FEA C-607-S-0 submitted by the owner shows that the MFBI's meet the minimum design firing rate requirement.

B. *Within the terms of ESECA, FEA has been unable to determine that an adequate and reliable supply of coal is not expected to be available.* This proposed determination is based upon the facts, interpretations and assumptions stated below:

1. *Coal availability.*—(a) *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the future. United States Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 billion tons, over half of which is currently technically and economically recoverable (Demonstrated Coal Reserve Base of the United States, by Sulfur Category, on January 1, 1974, Bureau of Mines (May 1975) (hereafter "BOM Survey")). Within these recoverable reserves approximately 200 billion tons contain 1 percent or less sulfur by weight. To determine when certain quantities of these reserves are expected to be available, FEA has examined several studies referenced herein, which together provide the best current evidence as to coal availability.

(b) *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned coal production (derived from responses to a survey of coal producing companies), shows that there should be sufficient production of coal to meet the total national demand through 1980. Beyond 1980, plans for new production are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future; however, the projected total planned national coal production for 1985 already meets over 99% of the total U.S. demand expected in 1985. With time, more potential mine developments will become firm plans, thus increasing the planned production.

(1) *National coal production.*—It is conservatively estimated that it will be practicable to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1977	732.3
1978	791.6
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.6

The figures shown above are derived from FEA's Coal Mine Expansion Study (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential.

An FEA study, Coal Availability Report, April 1977, (hereafter "Availability Report"), indicates current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	396.2
1984	475.5
1985	544.9

(2) *National demand exclusive of ESECA prohibition order demand.*—The estimated national demand, excluding any increased demand resulting from FEA action under the authority of Section 2(a) of ESECA, is as follows (FEA 1976 National Energy Outlook):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

(3) *National ESECA prohibition order demand.*—The estimated potential demand for coal resulting from all Notices of Intention to issue Prohibition Orders to date and from all outstanding Prohibition Orders issued to date under Section 2(a) of ESECA is no more than the following ("Availability Report"):

Year:	*Demand (million tons)*
1978	11.0
1979	22.4
1980	32.5
1981	35.8
1982	57.4
1983	59.8
1984	59.8

(c) *State or local laws.* FEA has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to FEA's attention.

(d) *Conclusion.* Potential coal demand from these MFBI's and from all other MFBI's which are currently under consideration to receive Notices of Intention to issue Construction Orders under authority of section 2(c) of ESECA is not included in the total national demand stated in paragraph 1.(b)(2), above. Coal demand from such MFBI's is also not calculated in currently projected ESECA generated demand since it is infeasible to anticipate specific quality characteristics for the coal that will be required by these MFBI's so far in advance of their actual construction.

As noted previously, plans for new coal production beyond 1980 are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future. The projection for national coal production potential in 1985 cited in paragraph 2.(a), above, tends to underestimate actual production potential.

FEA has considered these facts and the fact that the potential annual demand for coal will increase once these MFBI's and others become operational. FEA expects, however, (based on an analysis of the "BOM Survey", the Coal Mine Expansion Study, the FEA 1976 National Energy Outlook, and the "Availability Report", cited above) that national coal production potential will substantially exceed the total national demand for coal in amounts sufficient in any year to meet the estimated potential additional demand for coal if all MFBI's currently under consideration were to receive Construction Orders under Section 2(c) of ESECA. Within the terms of ESECA, FEA has been unable to determine that coal is not expected to be available for these MFBI's once they become operational. The best available evidence suggests that coal production potential will, in fact, considerably exceed all demand for the years pertinent to this proposed order.

The coal for these MFBI's will probably be bought from producers according to regional supply/demand relationships related to the MFBI's location. FEA observes, however, that the MFBI's could purchase coal in other markets as such production becomes available. (The Feasibility of Considering Expanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond, School of Engineering, University of Pennsylvania, November 7, 1975.)

(e) *Coal transportation.* FEA has considered the availability of national coal transportation facilities. Generally, FEA considers construction lead times pertinent to MFBI's in the early-planning process to be sufficient to allow owners to secure appropriate coal transportation and coal transportation facilities prior to becoming operational.

II. *Factors which ESECA requires FEA to consider.*—A. *The existence and effects of any contractual commitments for the construction of the MFBI's.* FEA has considered the existence and effects of any contractual commitment for the construction of the MFBI's which the owner has reported to FEA in a Schedule of Plan Change Costs attachment to a Form FEA C-607-S-0 Schedule A-3, or otherwise. FEA has considered the additional costs which would be incurred in connection with existing contractual commitments should FEA require that the MFBI's be designed and constructed to be capable of using coal as their primary energy source. Accordingly, FEA has included these costs in its consideration of the capability of the owner to recover any increase in capital investment required as a result of a Construction Order.

B. *The capability of the owner to recover any increase in projected capital investment required as a result of a construction order.* FEA has considered, in the manner described below, the capability of the owner to raise and to recover the increased capital investment expected to result from the issuance of a Construction Order.

1. *Increased capital investment required as a result of a construction order.*—FEA has evaluated the additional capital investment costs required in order to design and construct the MFBI's to be capable of burning coal as their primary energy source. This calculation is based on existing FEA information and analysis, as well as information filed with FEA by the owner concerning the cost of equipment and facilities that would have to be acquired. Approximate costs to comply with applicable environmental protection requirements have also been considered, including the cost of compliance with the air pollution control requirements of the Clean Air Act.

2. *Capability of the owner to raise the increased capital investment.*—This analysis is based upon an evaluation of the owner's current financial position as reported in the Dun and Bradstreet Reference Book (March 1977). Where necessary, FEA has performed an independent analysis of the owner's financial capability. In those cases in which an independent analysis of the owner's ability to recover the additional capital investment was performed, FEA related the additional capital investment costs discussed in paragraph B.1., above, and the plan change costs discussed in paragraph II.A., above, to the owner's net property and plant assets, the owner's reported recent construction expenditures and the owner's equity.

In considering the owner's ability to recover the increased capital investment costs, FEA has compared these increased costs, the demonstrated ability of the owner to raise the additional capital, any loss of revenue resulting from a delay, if any, in the commencement of operations of the MFBI's resulting from a Construction Order, the owner's historical profit profile, and a presumed useful life of the MFBI's after construction of 40 years. In light of such considerations, FEA presumes that the owner's capability to recover any increase in capital is confirmed since the owner can both raise the necessary additional capital for construction with coal burning capability and has historically shown a profit profile.

APPENDIX

PROPOSED FINDINGS AND RATIONALE FOR NOTICE OF INTENTION TO ISSUE A CONSTRUCTION ORDER

ESECA and the FEA regulations require FEA to make certain findings and determinations and to consider certain factors before issuing a Construction Order to a Major Fuel Burning Installation (MFBI). FEA's proposed findings, as well as its proposed conclusions with respect to the factors FEA has considered, are set out below with respect to the MFBI's named below. Supporting rationale and conclusions are also set forth.

Docket No.	Owner	Installation	Unit	Location
OCU-6650-2-1 OCU-6650-2-2	Shell Oil Co.	Marco plant	E. & P. 3 E. & P. 4	Bakersfield, Calif.

These findings, determinations, and considerations, which are now proposed by FEA, are based on the information that has been provided to and developed by FEA prior to the issuance of this Notice of Intention (NOI) to issue a Construction Order.

Shell Oil Company shall be referred to as the "owner". The Marco Plant E & P 3 and E & P 4 shall be referred to as the "MFBI's".

I. *Proposed findings.—A. The MFBI's are in the early planning process.* Based on an analysis of the information submitted to FEA by the owner on Form FEA C-607-S-0 and information provided by the owner in response to subsequent inquiry to assure the continued applicability and currency of such information, including, as appropriate, an on-site inspection visit, FEA proposes to find that the MFBI's are in the early planning process. This proposed finding is based on the facts, assumptions and reasoning referenced below:

1. Schedule A-2 of Form FEA C-607-S-O submitted by the owner shows that the preliminary feasibility study was completed.

2. Information supplied by the owner or otherwise acquired by FEA indicates that the early planning process for these MFBI's has not terminated.

3. Schedule A-2 of Form FEA C-607-S-0 submitted by the owner shows that the MFBI's meet the minimum design firing rate requirement.

B. *Within the terms of ESECA, FEA has been unable to determine that an adequate and reliable supply of coal is not expected to be available.* This proposed determination is based upon the facts, interpretations and assumptions stated below:

1. *Coal availability.*— (a) *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the future. United States Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 billion tons, over half of which is currently technically and economically recoverable (Demonstrated Coal Reserve Base of the United States, by Sulfur Category, on January 1, 1974, Bureau of Mines (May 1975) (hereafter "BOM Survey")). Within these recoverable reserves approximately 200 billion tons contain 1% or less sulfur by weight. To determine when certain quantities of these reserves are expected to be available, FEA has examined several studies referenced herein, which together provide the best current evidence as to coal availability.

(b) *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned coal production (derived from responses to a survey of coal producing companies) shows that there should be sufficient production of coal to meet the the total national demand through 1980. Beyond 1980, plans for new production are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future; however, the projected total planned national coal production for 1985 already meets over 99% of the total U.S. demand expected in 1985. With time, more potential mine developments will become firm plans, thus increasing the planned production.

(1) *National coal production.*—It is conservatively estimated that it will be practicable to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1977	732.3
1978	791.6
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.6

The figures shown above are derived from FEA's Coal Mine Expansion Study (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential.

An FEA study, Coal Availability Report, April 1977, (hereafter "Availability Report"), indicates current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	396.2
1984	475.5
1985	544.9

(2) *National demand exclusive of ESECA prohibition order demand.*—The estimated national demand, excluding any increased demand resulting from FEA action under the authority of Section 2(a) of ESECA, is as follows (FEA 1976 National Energy Outlook):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

(3) *National ESECA prohibition order demand.*—The estimated potential demand for coal resulting from all Notices of Intention to issue Prohibition Orders to date and from all outstanding Prohibition Orders issued to date under Section 2(a) of ESECA is no more than the following ("Availability Report"):

Year:	*Demand (million tons)*
1978	11.0
1979	22.4
1980	32.5
1981	35.8
1982	57.4
1983	59.8
1984	59.8

(c) *State or local laws.* FEA has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to FEA's attention.

(d) *Conclusion.* Potential coal demand from these MFBI's and from all other MFBI's which are currently under consideration to receive Notices of Intention to issue Construction Orders under authority of Section 2(c) of ESECA is not included in the total national demand tsated in paragraph 1.(b)(2), above. Coal demand from such MFBI's is also not calculated in currently projected ESECA generated demand since it is infeasible to anticipate specific quality characteristics for the coal that will be required by these MFBI's so far in advance of their actual construction.

As noted previously, plans for new coal production beyond 1980 are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future. The projection for national coal production potential in 1985 cited in paragraph 2.(a), above, tends to underestimate actual production potential.

FEA has considered these facts and the fact that the potential annual demand for coal will increase once these MFBI's and others become operational. FEA expects, however, (based on an analysis of the "BOM Survey", the Coal Mine Expansion Study, the FEA 1976 National Energy Outlook, and the "Availability Report", cited above) that national coal production potential will substantially exceed the total national demand for coal in amounts sufficient in any year to meet the estimated potential additional demand for coal if all MFBI's currently under consideration were to receive Construction Orders under Section 2(c) of ESECA. Within the terms of ESECA, FEA has been unable to determine that coal is not expected to be available for these MFBI's once they become operational. The best available evidence suggests that coal production potential will, in fact, considerably exceed all demand for the years pertinent to this proposed order.

The coal for these MFBI's will probably be bought from producers according to regional supply/demand relationships related to the MFBI's location. FEA observes, however, that the MFBI's could purchase coal in other markets as such production becomes available. (The Feasibility of Considering Expanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond, School of Engineer-

ing, University of Pennsylvania, November 7, 1975.)

(e) *Coal transportation.* FEA has considered the availability of national coal transportation facilities. Generally, FEA considers construction lead times pertinent to MFBI's in the early-planning process to be sufficient to allow owners to secure appropriate coal transportation and coal transportation facilities prior to becoming operational.

II. *Factors which ESECA requires FEA to consider.*—A. *The existence and effects of any contractual commitment for the construction of the MFBI's.* FEA has considered the existence and effects of any contractual commitment for the construction of the MFBI's which the owner has reported to FEA in a Schedule of Plan Change Costs attachment to a Form FEA C–607–S–0 Schedule A–3, or otherwise. FEA has considered the additional costs which would be incurred in connection with existing contractual commitments should FEA require that the MFBI's be designed and constructed to be capable of using coal as their primary energy source. Accordingly, FEA has included these costs in its consideration of the capability of the owner to recover any increase in capital investment required as a result of a Construction Order.

B. *The capability of the owner to recover any increase in projected capital investment required as a result of a construction order.* FEA has considered, in the manner described below, the capability of the owner to raise and to recover the increased capital investment expected to result from the issuance of a Construction Order.

1. *Increased capital investment required as a result of a construction order.*—FEA has evaluated the additional capital investment costs required in order to design and construct the MFBI's to be capable of burning coal as their primary energy source. This calculation is based on existing FEA information and analysis, as well as information filed with FEA by the onwer concerning the cost of equipment and facilities that would have to be acquired. Approximate costs to comply with applicable environmental protection requirements have also been considered, including the cost of compliance with the air pollution control requirements of the Clean Air Act.

2. *Capability of the owner to raise the increased capital investment.*—This analysis is based upon an evaluation of the owner's current financial position as reported in the Dun and Bradstreet Reference Book (March 1977). Where necessary, FEA has performed an independent analysis of the owner's financial capability. In those cases in which an independent analysis of the owner's ability to recover the additional capital investment was performed, FEA related the additional capital investment costs discussed in paragraph B.1., above, and the plan change costs discussed in paragraph II.A., above, to the owner's net property and plant assets, the owner's reported recent construction expenditures and the owner's equity.

In considering the owner's ability to recover the increased capital investment costs, FEA has compared these increased costs, the demonstrated ability of the owner to raise the additional capital, any loss of revenue resulting from a delay, if any, in the commencement of operations of the MFBI's resulting from a Construction Order, the owner's historical profit profile, and a presumed useful life of the MFBI's after construction of 40 years. In light of such considerations, FEA presumes that the owner's capability to recover any increase in capital is confirmed since the owner can both raise the necessary additional capital for construction with coal burning capability and has historically shown a profit profile.

Appendix [1]

PROPOSED FINDINGS AND RATIONALE FOR NOTICE OF INTENTION TO ISSUE A CONSTRUCTION ORDER

ESECA and the FEA regulations require FEA to make certain findings and determinations and to consider certain factors before issuing a Construction Order to a Major Fuel Burning Installation (MFBI). FEA's proposed findings, as well as its proposed conclusions with respect to the factors FEA has considered, are set out below with respect to the MFBI's named below. Supporting rationale and conclusions are also set forth.

Docket No.	Owner	Installation	Unit	Location
OCU–8330–2 1 OCU–8340–2 2	Standard Oil Co. of California/ Chevron, U.S.A., Inc.	NCD Cymric area, sec. 97.	Undesignated.	Oildale, Calif.

[1] Attached to this Appendix is FEA's MFBI Construction Order Candidate Identification and Selection Methodology.

These findings, determinations and considerations, which are now proposed by FEA, are based on the information that has been provided to and developed by FEA prior to the issuance of this Notice of Intention (NOI) to issue a Construction Order.

Standard Oil Company of California/Chevron, U.S.A., Incorporated shall be referred to as the "owner." NCD Cymric Area, Section 97, Undesignated Units shall be referred to as the "MFBI's."

I. *Proposed findings.*

A. *The MFBI's are in the early planning process.* Based on an analysis of the information submitted to FEA by the owner on Form FEA C–607–S–0 and information provided by the owner in response to subsequent inquiry to assure the continued applicability and currency of such information, including, as appropriate, an on-site inspection visit, FEA proposes to find that the MFBI's are in the early planning process. This proposed finding is based on the facts, assumptions and reasoning referenced below:

1. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the preliminary feasibility study was completed.

2. Information supplied by the owner or otherwise acquired by FEA indicates that the early planning process for these MFBI's has not terminated.

3. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the MFBI's meet the minimum design firing rate requirement.

B. *Within the terms of ESECA, FEA has been unable to determine that an adequate and reliable supply of coal is not expected to be available.* This proposed determination is based upon the facts, interpretations and assumptions stated below:

1. *Coal availability.*—(a) *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the future. United States Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 billion tons, over half of which is currently technically and economically recoverable (Demonstrated Coal Reserve Base of the United Stats, by Sulfur Category, on January 1, 1974, Bureau of Mines (May 1975) [hereafter "BOM Survey"]). Within these recoverable reserves approximately 200 billion tons contain 1 percent or less sulfur by weight. To determine when certain quantities of these reserves are expected to be available, FEA has examined several studies referenced herein, which together provide the best current evidence as to coal availability.

(b) *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned coal production (derived from responses to a survey of coal producing companies) shows that there should be sufficient production of coal to meet the total national demand through 1980. Beyond 1980, plans for new production are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future; however, the projected total planned national coal production for 1985 already meets over 99 percent of the total U.S. demand expected in 1985. With time, more potentional mine developments will become firm plans, thus increasing the planned production.

(1) *National coal production.* It is conservatively estimated that it will be practicable to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1977	732.3
1978	791.6
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.6

The figures shown above are derived from FEA's Coal Mine Expansion Study (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential.

An FEA study Coal Availability Report, April 1977 (hereafter "Availability Report"), indicates current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	396.2
1984	475.5
1985	544.9

(2) *National demand exclusive of ESECA prohibition order demand.* The estimated national demand, excluding any increased demand resulting from FEA action under the authority of Section 2(a) of ESECA, is as follows (FEA 1976 National Energy Outlook):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

(3) *National ESECA prohibition order demand.* The estimated potential demand for coal resulting from all Notices of Intention to issue prohibition orders to date and from all outstanding Prohibition Orders issued to date under Section 2(a) of ESECA is no more than the following ("Availability Report"):

Year:	*Demand (million tons)*
1978	11.0
1979	22.4
1980	32.5
1981	35.8
1982	57.4
1983	59.8
1984	59.8

(c) *State or local laws.* FEA has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to FEA's attention.

(d) *Conclusion.* Potential coal demand from these MFBI's and from all other MFBI's which are currently under consideration to receive Notices of Intention to issue Construction Orders under authority of section 2(c) of ESECA is not included in the total national demand stated in paragraph 1.(b)(2), above. Coal demand from such MFBI's is also not calculated in currently projected ESECA generated demand since it is infeasible to anticipate specific quality characteristics for the coal that will be required by these MFBI's so far in advance of their actual construction.

As noted previously, plans for new coal production beyond 1980 are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future. The projection for national coal production potential in 1985 cited in paragraph 2.(a), above, tends to underestimate actual production potential.

FEA has considered these facts and the fact that the potential annual demand for coal will increase once these MFBI's and others become operational.

FEA expects, however, (based on an analysis of the "BOM Survey", the Coal Mine Expansion Study, the FEA 1976 National Energy Outlook, and the "Availability Report", cited above) that national coal production potential will substantially exceed the total national demand for coal in amounts sufficient in any year to meet the estimated potential additional demand for coal if all MFBI's currently under consideration were to receive Construction Orders under section 2(c) of ESECA. Within the terms of ESECA, FEA has been unable to determine that coal is not expected to be available for these MFBI's once they become operational. The best available evidence suggests that coal production potential will, in fact, considerably exceed all demand for the years pertinent to this proposed order.

The coal for these MFBI's will probably be bought from producers according to regional supply/demand relationships related to the MFBIs' location. FEA observes, however, that the MFBI's could purchase coal in other markets as such production becomes available. (The Feasibility of Considering Expanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond, School of Engineering, University of Pennsylvania, November 7, 1975.)

[2] (e) *Coal transportation.* FEA has considered the availability of national coal transportation facilities. Generally, FEA considers construction lead times pertinent to MFBI's in the early-planning process to be sufficient to allow owners to secure appropriate coal transportation and coal transportation facilities prior to becoming operational.

II. *Factors which ESECA requires FEA to consider.*

A. *The existence and effects of any contractual commitment for the construction of the MFBI's.* FEA has considered the existence and effects of any contractual commitment for the construction of the MFBI's which the owner has reported to FEA in a Schedule of Plan Change Costs attachment to a Form FEA C–607–S–0 Schedule A–3, or otherwise. FEA has considered the additional costs which would be incurred in connection with existing contractual commitments should FEA require that the MFBI's be designed and constructed to be capable of using coal as their primary energy source. Accordingly, FEA has included these costs in its consideration of the capability of the owner to recover any increase in capital investment required as a result of a Construction Order.

B. *The capability of the owner to recover any increase in projected capital investment required as a result of a construction order.* FEA has considered, in the manner described below, the capability of the owner to raise and to recover the increased capital investment expected to result from the issuance of a Construction Order.

1. *Increased capital investment required as a result of a construction order.* FEA has evaluated the additional capital investment costs required in order to design and construct the MFBI's to be capable of burning coal as their primary energy source. This calculation is based on existing FEA information and analysis, as well as information filed with FEA by the owner concerning the cost of equipment and facilities that would have to be acquired. Approximate costs to comply with applicable environmental protection requirements have also been considered, including the cost of compliance with the air pollution control requirements of the Clean Air Act.

2. *Capability of the owner to raise the increased capital investment.* This analysis is based upon an evaluation of the owner's current financial position as reported in the Dun and Bradstreet Reference Book (March 1977). Where necessary, FEA has performed an independent analysis of the owner's financial capability. In those cases in which an independent analysis of the owner's ability to recover the additional capital investment was performed, FEA related the additional capital investment costs discussed in paragraph B.1., above, and the plan change costs discussed in paragraph II. A., above to the owner's net property and plant assets, the owner's reported recent construction expenditures and the owner's equity.

In considering the owner's ability to recover the increased capital investment costs, FEA has compared these increased costs, the demonstrated ability of the owner to raise the additional capital, any loss of revenue resulting from a delay, if any, in the commencement of operations of the MFBI's resulting from a Construction Order, the owner's historical profit profile, and a presumed useful life of the MFBI's after construction of 40 years.

In light of such considerations, FEA presumes that the owner's capability to recover any increase in capital is confirmed since the owner can both raise the necessary additional capital for construction with coal burning capability and has historically shown a profit profile.

Appendix [2]

PROPOSED FINDINGS AND RATIONALE FOR NOTICE OF INTENTION TO ISSUE A CONSTRUCTION ORDER

ESECA and the FEA regulations require FEA to make certain findings and determinations and to consider certain factors before issuing a Construction Order to a Major Fuel Burning Installation (MFBI). FEA's proposed findings, as well as its proposed conclusions with respect to the factors FEA has considered, are set out below with respect to the MFBI's named below. Supporting rationale and conclusions are also set forth.

Docket No.	Owner	Installation	Unit	Location
OCU–8330–1–1 OCU–8330–1–2	Standard Oil Co. of California/ Chevron, U.S.A., Inc.	NCD Bakersfield area, sec. 27, Kern front.	Undesignated.	Bakersfield, Calif.

[2] Attached to this Appendix is FEA's MFBI Construction Order Candidate Identification and Selection Methodology.

These findings, determinations, and considerations, which are now proposed by FEA, are based on the information that has been provided to and developed by FEA prior to the issuance of this Notice of Intention (NOI) to issue a Construction Order.

Standard Oil Company of California/Chevron, U.S.A., Incorporated shall be referred to as the "owner". NCD Bakersfield Area, Section 27, Kern Front Undesignated Units shall be referred to as the "MFBI's".

I. *Proposed findings.*—A. *The MFBI's are in the early planning process.* Based on an analysis of the information submitted to FEA by the owner on Form FEA C–607–S–0 and information provided by the owner in response to subsequent inquiry to assure the continued applicability and currency of such information, including, as appropriate, an on-site inspection visit, FEA proposes to find that the MFBI's are in the early planning process. This proposed finding is based on the facts, assumptions and reasoning referenced below:

1. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the preliminary feasibility study was completed.

2. Information supplied by the owner or otherwise acquired by FEA indicates that the early planning process for these MFBI's has not terminated.

3. Schedule A–2 of Form FEA C–607–S–0 submitted by the owner shows that the MFBI's meet the minimum design firing rate requirement.

B. *Within the terms of ESECA, FEA has been unable to determine that an adequate and reliable supply of coal is not expected to be available.* This proposed determination is based upon the facts, interpretations and assumptions stated below:

1. *Coal availability.*—(a) *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the future. United States Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 billion tons, over half of which is currently technically and economically recoverable (Demonstrated Coal Reserve Base of the United States, by Sulfur Category, on January 1, 1974, Bureau of Mines (May 1975) (hereafter "BOM Survey")). Within these recoverable reserves approximately 200 billion tons contain 1% or less sulfur by weight. To determine when certain quantities of these reserves are expected to be available, FEA has examined several studies referenced herein, which together provide the best current evidence as to coal availability.

(b) *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned coal production (derived from responses to a survey of coal producing com-

panies) shows that there should be sufficient production of coal to meet the total national demand through 1980. Beyond 1980, plans for new production are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future; however, the projected total planned national coal production for 1985 already meets over 99 percent of the total U.S. demand expected in 1985. With time, more potential mine developments will become firm plans, thus increasing the planned production.

(1) *National coal production.*—It is conservatively estimated that it will be practicable to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1977	732.3
1978	791.6
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.6

The figures shown above are derived from FEA's Coal Mine Expansion Study (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential.

An FEA study, Coal Availability Report, April 1977 (hereafter "Availability Report"), indicates current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	396.2
1984	475.5
1985	544.9

(2) *National demand exclusive of ESECA prohibition order demand.*—The estimated national demand, excluding any increased demand resulting from FEA action under the authority of Section 2(a) of ESECA, is as follows (FEA, 1976 National Energy Outlook):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

(3) *National ESECA prohibition order demand.*—The estimated potential demand for coal resulting from all Notices of Intention to issue Prohibition Orders to date and from all outstanding Prohibition Orders issued to date under Section 2(a) of ESECA is no more than the following ("Availability Report"):

Year:	*Demand (million tons)*
1978	11.0
1979	22.4
1980	32.5
1981	35.8
1982	57.4
1983	59.8
1984	59.8

(c) *State or local laws.* FEA has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to FEA's attention.

(d) *Conclusion.* Potential coal demand from these MFBI's and from all other MFBI's which are currently under consideration to receive Notices of Intention to issue Construction Orders under authority of Section 2(c) of ESECA is not included in the total national demand stated in paragraph 1.(b)(2), above. Coal demand from such MFBI's is also not calculated in currently projected ESECA generated demand since it is infeasible to anticipate specific quality characteristics for the coal that will be required by these MFBI's so far in advance of their actual construction.

As noted previously, plans for new coal production beyond 1980 are not yet fully developed because few coal producers have firm expansion plans that extend that far into the future. The projection for national coal production potential in 1985 cited in paragraph 2.(a), above, tends to underestimate actual production potential.

FEA has considered these facts and the fact that the potential annual demand for coal will increase once these MFBI's and others become operational. FEA expects, however, (based on an analysis of the "BOM Survey", the Coal Mine Expansion Study, the FEA 1976 National Energy Outlook, and the "Availability Report", cited above) that national coal production potential will substantially exceed the total national demand for coal in amounts sufficient in any year to meet the estimated potential additional demand for coal if all MFBI's currently under consideration were to receive Construction Orders under Section 2(c) of ESECA. Within the terms of ESECA, FEA has been unable to determine that coal is not expected to be available for these MFBI's once they become operational. The best available evidence suggests that coal production potential will, in fact, considerably exceed all demand for the years pertinent to this proposed order.

The coal for these MFBI's will probably be bought from producers according to regional supply/demand relationships related to the MFBI's location. FEA observes, however, that the MFBI's could purchase coal in other markets as such production becomes available. (The Feasibility of Considering Expanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond, School of Engineering, University of Pennsylvania, November 7, 1975.)

(e) *Coal transportation.* FEA has considered the availability of national coal transportation facilities. Generally, FEA considers construction lead times pertinent to MFBI's in the early-planning process to be sufficient to allow owners to secure appropriate coal transportation and coal transportation facilities prior to becoming operational.

II. *Factors which ESECA requires FEA to consider.*—A. *The existence and effects of any contractual commitment for the construction of the MFBI's.* FEA has considered the existence and effects of any contractual commitment for the construction of the MFBI's which the owner has reported to FEA in a Schedule of Plan Change Costs attachment to a Form FEA C–607–S–0 Schedule A–3, or otherwise. FEA has considered the additional costs which would be incurred in connection with existing contractual commitments should FEA require that the MFBI's be designed and constructed to be capable of using coal as their primary energy source. Accordingly, FEA has included these costs in its consideration of the capability of the owner to recover any increase in capital investment required as a result of a Construction Order.

B. *The capability of the owner to recover any increase in projected capital investment required as a result of a construction order.* FEA has considered, in the manner described below, the capability of the owner to raise and to recover the increased capital investment expected to result from the issuance of a Construction Order.

1. *Increased capital investment required as a result of a construction order.*— FEA has evaluated the additional capital investment costs required in order to design and construct the MFBI's to be capable of burning coal as their primary energy source. This calculation is based on existing FEA information and analysis, as well as information filed with FEA by the owner concerning the cost of equipment and facilities that would have to be acquired. Approximate costs to comply with applicable environmental protection requirements have also been considered, including the cost of compliance with the air pollution control requirements of the Clean Air Act.

2. *Capability of the owner to raise the increased capital investment.*—This analysis is based upon an evaluation of the owner's current financial position as reported in the Dun and Bradstreet Reference Book, (March 1977). Where necessary, FEA has performed an independent analysis of the owner's financial capability. In those cases in which an independent analysis of the owner's ability to recover the additional capital investment was performed, FEA related the additional capital investment costs discussed in paragraph B.1, above, and the plan change costs discussed in paragraph II. A., above, to the owner's net property and plant assets, the owner's reported recent construction expenditures and the owner's equity.

In considering the owner's ability to recover the increased capital investment costs, FEA has compared these increased costs, the demonstrated ability of the owner to raise the additional capital, any loss of revenue resulting from a delay, if any, in the commencement of operations of the MFBI's resulting from a Construction Order, the owner's historical profit profile, and a presumed useful life of the MFBI's after construction of 40 years. In light of such considerations, FEA presumes that the owner's capability to recover any increase in capital is confirmed since the owner can both raise the necessary additional capital for construction with coal burning capability and has historically shown a profit profile.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

SURFACE MINING REGULATIONS

Competitive Coal Leasing; Correction

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

SUBCHAPTER C—MINERALS MANAGEMENT (3000)

[Circular No. 2418]

PART 3040—ENVIRONMENT AND SAFETY

PART 3500—LEASING OF MINERALS OTHER THAN OIL AND GAS, GENERAL

PART 3520—PREFERENCE RIGHT AND COMPETITIVE LEASES

Competitive Coal Leasing Surface Mining Regulations: Coal; Correction

AGENCY: Land Management Bureau, Interior.

ACTION: Correction.

SUMMARY: This document corrects a final rule that appeared at page 4442 in the FEDERAL REGISTER of Tuesday, January 23, 1977 (FR Doc. 77-2256). Several minor errors were made in the text of the rulemaking document and the numbering system used in the document is not consistent with the numbering system used throughout Title 43. This document corrects the errors in the text and changes the numbering to conform with the numbering system used in Title 43.

EFFECTIVE DATE: May 17, 1977.

SUPPLEMENTARY INFORMATION: The final rulemaking document amended Parts 3040, 3500, and 3520 of Title 43 of the Code of Federal Regulations. Several minor errors were made in the text of the rulemaking document and the numbering system used in the document is not consistent with the numbering system used throughout Title 43. This document corrects the errors in the text and changes the numbering to conform with the numbering system used in Title 43. In connection with the renumbering process, sections of the rulemaking are rearranged to place them in proper sequence. No substantive changes are made in the final rulemaking; therefore, rulemaking procedures and public participation are not considered necessary.

FOR FURTHER INFORMATION CONTACT:

Billy R. Templeton, 202-343-8735.

Final rulemaking published on pages 4442 through 4457 of the FEDERAL REGISTER of January 25, 1977, is hereby corrected to read as follows:

PART 3040—ENVIRONMENT AND SAFETY

1. Subpart 3041, in Title 43, Part 3040 is revised as follows:

Subpart 3041—Surface Management and Protection

Sec.

3041.0-1 Purpose.
3041.0-3 Authorities.
3041.0-4 Responsibilities.
3041.0-5 Definitions.
3041.0-7 Applicability.
3041.1 Use of Surface.
3401.2 Technical examination/environmental assessment.
3041.2-1 Technical examination/environmental assessment report.
3041.2-2 Obligations and standards of performance.
3041.3 Compliance or performance bond.
3041.4 Procedures and public participation.
3041.5 Completion of operations and abandonment.
3041.6 Reports.
3041.7 Notice of noncompliance: Revocation.
3041.8 Variances.

§ 3041.0-1 Purpose.

(a) The purpose of this subpart is to establish rules and regulations to be followed in the management of the federally-owned coal estate consistent with the policies, goals, and objectives established by the Acts cited in § 3041.0-3 of this Subpart, regardless of surface ownership, to ensure effective and reasonable regulation of surface coal mining operations in accordance with the requirements hereof, as an appropriate and necessary means to minimize so far as practicable the adverse social, economic and environmental effects of such operations.

§ 3041.0-3 Authorities.

The regulations contained in this Subpart are issued pursuant to the Mineral Leasing Act of February 25, 1920, as amended (30 U.S.C. 181-287), and the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351-359), and in accordance with the policies set forth in the National Environmental Policy Act of 1969, as amended, (42 U.S.C 4321-47). Regulations governing the issuance of Federal coal leases and licenses are found in 43 CFR 3500 of this Chapter. Regulations governing operations conducted on lands subject to lease, permit, or license are found in 30 CFR 211. Regulations setting forth the general and basic policies for disposal and management of the public lands are found in 43 CFR 1725 of this Chapter.

§ 3041.0-4 Responsibilities.

(a) The Bureau of Land Management (BLM) exercises at the Bureau level the Secretary's discretionary authority to determine whether or not mineral leases and licenses are to be issued in accordance with 43 CFR Part 3500. The BLM is responsible for issuing coal leases and licenses, and is the office of record in mineral leasing matters.

(b) The Geological Survey (GS) exercises the Secretary's authority regarding operations conducted within the area of operations by permittees, lessees, and licensees and determines the action to be taken by them from the standpoint of the development, conservation, and management of mineral resources under the jurisdiction of the Department. The Geological Survey is responsible for all geologic, engineering, and economic value determinations for the Department's mineral leasing program. These determinations include: the mineral characteristics of lease and permit areas; parceling; appropriate resource evaluation; reserves; investments, diligent development, and minimum production requirements; and all other terms and conditions relating to mineral operations under leases and licenses.

(c) The BLM or other Federal surface managing agency, in consultation with the GS and the surface owner if other than the United States, formulates the requirements to be incorporated in leases and licenses for the protection of the surface and nonmineral resources and for reclamation, using the reclamation obligations and standards of performance contained in § 3041.2-2 of these regulations and in 30 CFR Part 211.40.

(d) The GS reviews and approves exploration and mining plans, and authorizes the abandonment of operations, in consultation with the BLM or other appropriate Federal surface managing agency, and the surface owner, if other than the United States, on the adequacy of the surface use, environmental protection, and reclamation aspects of such plans and will not grant approval if inconsistent with the BLM's or other Federal surface managing agency's recommendations without further discussions and referrals for resolution pursuant to 30 CFR Part 211.

(e) As to the lands outside of the area of operations, the authorized officer of the BLM or other appropriate Federal surface managing agency is responsible for conducting compliance examinations and for assuring compliance by the lessee or licensee with the requirements of this Subpart, and the terms and conditions of a lease or license and for reporting noncompliance to the Mining Supervisor for appropriate action. As to the lands inside the area of operations the GS examines operations to ensure compliance by the lessee or licensee with the terms and conditions set forth in the provisions of any lease or license or any approved mining or exploration plan. GS refers to BLM any instance of noncompliance with lease terms which may require cancellation action, and BLM may initiate such action. With respect to approval of access roads, pipelines, utility routes and other surface uses outside the area of operations, the BLM, or other Federal surface managing agency, has the primary responsibility but obtains the recommendations of the GS before taking final actions. Except as may be expressly provided for in § 3041.7 of this Subpart and 30 CFR Part 211.72, orders to operators for any remedial action are the exclusive responsibility of the Geological Survey.

(f) Subject to the supervisory authority of the Secretary, the regulations in this Subpart shall be administered by the Director, Bureau of Land Management through the authorized officers having jurisdiction over the lands subject to these regulations and authorized to perform the duties described. Prior to issuance of any coal lease or license, the authorized officer shall consult with and accept and consider recommendations from the Mining Supervisor, the Federal surface managing agency when other than the BLM, or the surface owner, as to the terms and conditions required to

achieve the purpose of this Subpart. Any disagreements that cannot be resolved between the GS and BLM arising in connection with any such issuance of a lease or license will be referred for resolution to the appropriate Assistant Secretaries or to the Under Secretary of the Department of the Interior. Leases issued for lands, the surface of which is under the jurisdiction of any Federal agency other than the Department of the Interior, shall contain the terms and conditions prescribed by that agency with respect to the use and protection of the nonmineral interests in those lands.

§ 3041.0-5 Definitions.

As used in this Subpart, the following terms shall have the following meanings:

(a) *"Acid or toxic producing materials"* means natural or disturbed earth materials having chemical and physical characteristics that, under mining or postmining conditions of drainage, exposure, or other processes, may produce effluents that contain chemical constituents, such as acids, bases, or metallic compounds, in sufficient concentration to individually or in combination adversely affect the environment.

(b) *"Affected lands"* means any lands affected or to be affected by exploration, development, and mining operations and the construction of facilities necessary and related to such operations.

(c) *"Approximate original contour"* means the surface configuration achieved by backfilling and grading of the mined area so that it closely resembles the surface configuration of the land prior to mining (although not necessarily the original elevation) and blends into and complements the drainage pattern and topography of the surrounding terrain.

(d) *"Area of operations"* means that area of the leased or licensed lands which is required for exploration, development, producing, and processing operations, including all related surface structures and facilities, and which is delineated on a map or plat that is made a part of the approved exploration or mining plan.

(e) *"Authorized officer"* means any officer designated by any Federal surface managing agency to exercise its authority in matters relating to coal leases and licenses and to the provisions of this Subpart.

(f) *"Coal"* includes coal of all ranks from lignite to anthracite.

(g) *"Compaction"* means the reduction of porous spaces among the particles of soil and rock generally caused by running heavy equipment over the earth materials, as in the process of leveling the overburden material on strip mine spoil piles or banks, for the purpose of increasing the bearing capacity and stability of the earth materials.

(h) *"Contemporaneously as practicable"* means with respect to reclamation of mined or otherwise disturbed areas, the commencement, conduct and completion of reclamation activity as soon after disturbance as possible, without undue physical interference with ongoing operations, leaving a minimum of land unreclaimed, consistent with the objectives of environmental protection set forth in this Subpart.

(i) *"Daylighting"* is a term used to define the surface mining procedure for exposing an underground mined area to remove remaining coal.

(j) *"Director"* means the Director of the Bureau of Land Management, U.S. Department of the Interior.

(k) *"Exploration"* means the detailed investigation and acquisition of data pertaining to a mineral deposit, including activities for identifying regions or specific areas in which deposits are most likely to occur, and activities used to establish the nature of a coal deposit preparatory to mining.

(l) *"Exploration plan"* means a detailed plan submitted to the Mining Supervisor for approval before exploration operations commence showing the location and type of exploration work to be conducted, environmental protection procedures, roads, and reclamation procedures to be followed upon completion of such operations.

(m) *"General Coal Mining Order"* means a formal numbered order issued by the Mining Supervisor, with the prior approval of the Division Chief, and published, after opportunity for public comment, in the FEDERAL REGISTER, which implements the regulations in this Part and applies to coal mining and related operations in a specified geographic area.

(n) *"Impoundment"* means an artificially built, dammed, or excavated place for the retention of water or sediments. A permanent impoundment is one that is intended to remain after final abandonment of the operation, and shall be identified as such in approved plan.

(o) *"Leased lands, leased premises, or leased tract"* means lands embraced within a coal lease and subject to the regulations in this Subpart.

(p) *"Lessee"* means any person or persons, partnership, association, corporation, public body or governmental entity to whom a coal lease is issued, subject to the regulations in this Subpart, or an assignee of such lease under an approved assignment.

(q) *"Licensee"* means any individual, association or individuals, or municipality to whom a coal license is issued pursuant to the provisions of Section 208 of Title 30 of the United States Code, or any person, association, corporation, public body or governmental entity to whom an exploration license is granted under section 201(b) of Title 30 of the United States Code.

(r) *"Logical mining unit"* means an area of land designated as such by the Geological Survey pursuant to applicable Departmental regulations.

(s) *"Methods of operation"* means the method and manner by which any activities are performed by the operator, as described in an exploration or mining plan.

(t) *"Mine"* means an underground or surface excavation and the surface or underground support facilities that contribute directly or indirectly to coal mining, preparation, and handling.

(u) *"Mining plan"* means a detailed plan for development of the coal resource submitted to the Mining Supervisor for approval prior to commencement of any mining operation, showing the proposed location, method, and extent of mining and all related activities necessary and incidental to such operation, including steps to be taken to reclaim disturbed areas, to mitigate adverse impacts, and to otherwise meet the performance standards and requirements set forth in this Subpart.

(v) *"Mining Supervisor"* means the Area Mining Supervisor, Conservation Division, Geological Survey, or District Mining Supervisor or other subordinate acting under his direction.

(w) *"Notice of Availability"* means a formal notification, by the appropriate Federal officer, to appropriate Federal, state and local agencies and interested individuals or groups of individuals, of the availability for inspection of information, data, proposed plans or modifications thereof, pending decisions and other documents subject to such notice. Any such notice shall include the nature of the information, data, plan or modification, decision or other document involved; the name and mailing address of any applicant; the nature, location (county, township, range and section), duration and brief description of any proposed operations; the date upon which any proposed action might be taken; and, when appropriate, a specific time limit for public review, comment or request for any departmental action, including the holding of any public meeting. For the purpose of ensuring appropriate distribution of such notices, there shall be maintained at each office of a Mining Supervisor or authorized officer of the Department of the Interior a mailing list which shall consist of the names and mailing addresses of all appropriate Federal, state or local agencies and any individuals or groups of individuals who have requested in writing to be included on such lists. All notices of availability shall be mailed to such agencies, individuals or groups at the addresses indicated on such lists.

(x) *"Notice of noncompliance"* means a written notice of operator noncompliance issued pursuant to Section 211.72 of 30 CFR Part 211.

(y) *"Operator"* means a lessee or licensee or one conducting operations on lands under the authority of the lessee or licensee.

(z) *"Overburden"* means the earth, soil, rock, and other natural materials which lie above the coal being mined.

(aa) *"Permanent abandonment"* means the cessation of exploration or mining or other operations set forth in an approved plan on all or any portion of lands covered by a lease or license and subject to the provisions of this Subpart, where it is the intent of the operator not to continue operations at the mine or portion thereof.

(bb) [Omitted].

(cc) [Omitted].

(dd) *"Pollution"* means man-made or man-induced adverse alteration of the

chemical, physical, biological, and radiological integrity of land, water or air, which reduces, or has the potential of reducing the beneficial uses of these resources.

(ee) *"Post mining land use"* means that use which will be made of affected lands after mining and reclamation is completed and which is specified in a mining or exploration plan approved pursuant to 30 CFR 211.

(ff) *"Preliminary data"* means data, consisting of maps and text, submitted by an applicant for a lease or license to the authorized officer of the BLM, which describes the applicant's proposal in the detail necessary to allow the authorized officer to conduct a technical examination and environmental analysis as described in § 3041.2.

(gg) *"Preparation"* means any crushing, sizing, cleaning, drying, mixing or other processing of coal to prepare it for market which is conducted on lands subject to this Subpart.

(hh) *"Reclamation"* means the process of returning affected lands to a stable condition and form consistent with their premining productivity and use, or other approved post mining land use.

(ii) *"Road"* means any open way for passage or travel upon which to transport people, equipment, materials, or coal, which is constructed, improved or maintained by the operator and which is used to service the pit, bench, underground mine workings, loading facilities or exploration activities.

(jj) *"Secretary"* means the Secretary of the Interior.

(kk) *"Significant vegetation"* means farm crops, including grasses and forbs, that are integral parts of agriculture or ranching operations and the natural vegetation of forests or meadows with significant recreational, watershed, agricultural, or wildlife habitat value.

(ll) *"Spoil"* means soil, rock, and other earth materials that are broken, moved, dumped, or otherwise significantly disturbed during surface coal mining operations subject to this Subpart.

(mm) *"Subsidence"* means a lowering of surface elevations over an underground mine caused by loss of support and subsequent caving of strata lying above the mine.

(nn) *"Surface owner"* means an entryman, or a person or persons who hold legal title to the land surface.

(oo) *"Topsoil"* means natural earth materials at or vertically adjacent to the land surface with physical and chemical characteristics suitable for support of vegetation.

(pp) *"Valley floors"* means the channelways, floodplains, and adjacent low terraces of streams that are flooded during periods of high flow and that are underlain by unconsolidated stream-laid deposits. Excluded are higher terraces and slopes underlain by colluvial and other surficial deposits normally occurring along valley margins.

(qq) *"Waste"* means solid or liquid refuse, rubbish, or other valueless material which is produced by or in connection with coal mining operations, including exploration, production, development, preparation and other related activities, and which has no useful purpose in connection with any remaining operations.

§ 3041.0–7 Applicability.

(a) This Subpart sets forth regulations governing reclamation standards, use of surface, bond requirements, and reports relating to leases and licenses issued by the BLM with respect to Federal coal deposits located on public domain and acquired lands of the United States and reserved Federal coal deposits underlying lands the surface of which is privately owned. These regulations do not govern the leasing or development of coal deposits owned by Indians and subject to the Trust protection of the United States, which are controlled by regulations found in 25 CFR Chapter 1.

(b) The provisions of this Subpart shall become effective upon May 17, 1976 except as hereinafter provided.

(1) Existing operations.

(i) On and after 180 days from the effective date of this Subpart, the provisions of § 3041.2–2(f) shall apply to all existing operations with respect to lands from which the overburden has not previously been removed, provided, however, that this subparagraph shall not be deemed or construed so as to apply the requirements of subparagraphs 3041.2–2(f) (1) and (2), hereof to any operation for which a mining plan has been approved on or before the effective date of this Subpart and for which a variance pursuant to the provisions of subparagraph 3041.2–2(f)(2) would be required.

(ii) On or before 18 months from the effective date of this Subpart, the operator of each existing operation shall have submitted and shall have obtained the approval of a plan or modification thereof which shall comply with all applicable provisions of this Subpart, provided, however, that if the Director of the GS determines that a proposed new plan or modification of an existing plan was prepared and submitted in timely fashion, taking into account the complexity of the operation and of the plan or modification involved, but that administrative delay thereafter has prevented approval within the time specified, the time for compliance with this paragraph may be extended by order of the Director of the GS for an amount of time equal to the duration of such delay.

(iii) For the purpose of this paragraph, the term "existing operation" shall mean:

(A) All operations for which a plan has been approved on or before the effective date of this Subpart, and

(B) All operations with respect to which a proposed plan has been submitted to the Department on or before the effective date of this Subpart, and with respect to which proposed plan the Department has on that date either completed its environmental assessment and determined that no environmental statement under Section 102(2)(C) of the National Environmental Policy Act is necessary, or has determined that such a statement is necessary and has commenced, and expended substantial resources of the Department in the preparation or completion of, such a statement.

(iv) On or before 90 days from the effective date of this Subpart, the Director of the Geological Survey shall review all proposed plans which have been submitted to the Department on or before the effective date of this Subpart and, after consultation with appropriate Federal surface managing agencies, publish in the FEDERAL REGISTER a list which shall identify each such proposed plan and whether it will be considered to cover an existing operation.

(2) All operations or proposed operations not included in the definition of "existing operation" in the preceding paragraph shall be considered to be new operations, and shall be subject to the provisions of this Subpart upon the effective date hereof.

(3) The provisions of § 3041.7(c) of this Subpart shall apply immediately upon the effective date of this Subpart.

(c) To the maximum extent possible, all environmental statements and all approvals of plans covering existing operations which are pending before the Department on the effective date of this Subpart shall take into account and shall reflect and implement the provisions and purposes hereof; provided, however, that nothing in this subparagraph shall be construed to relieve any operator of the obligation imposed by subparagraph (b)(1)(i) of this section.

(d) Nothing in this Subpart shall be deemed or construed as increasing or diminishing any rights not in conflict with Federal law held by any person, including any surface owner or entryman, arising under the laws of any State and relating to the giving or withholding of consent to, or consultation in connection with, entry to any land for the purpose of conducting operations subject to this Subpart.

§ 3041.1 Use of surface.

(a) The operator shall be entitled to use only so much of the surface of the lands subject to a lease or license as is deemed necessary and has been designated in an approved plan. This Subpart shall not be construed to authorize any use of the Federal lands for a power generation plant or a commercial or industrial facility. Separate permits for such uses must be obtained from the appropriate agency. The operator shall not be entitled to use any mineral materials subject to the Materials Act except as provided by Part 3600 of this Chapter.

(b) Operations conducted in connection with other authorized uses on the same lands shall not unreasonably interfere with or endanger operations conducted in connection with uses authorized under this Chapter, nor shall operations authorized and conducted pursuant to this Chapter unreasonably interfere with or endanger operations under any lease, permit, license, or other use authorized pursuant to the provisions of any other Act.

§ 3041.2 Technical examination/environmental assessment.

The appropriate authorized officer, with the assistance of the Mining Supervisor, shall make a technical examination and environmental assessment of the area covered by a competitive coal lease application or on Bureau motion, pursuant to the provisions of this section.

(a) The technical examination shall include:

(1) An examination of the technical aspects of the proposed operations set forth in any preliminary data and information; and

(2) An evaluation of the impacts of such operations or, if on BLM motion, the effect of coal leasing and development, on other land uses, resources, or land management programs on or adjacent to the area.

(b) The environmental assessment shall include an analysis of the impact of the proposed operations set forth in any preliminary data and information and of alternatives thereto, or, if on BLM motion, the impacts of coal leasing and development on the living and nonliving components of the environment.

§ 3041.2–1 Technical examination/environmental assessment report.

(a) Following completion of the technical examination and environmental assessment described in the preceding Section, the authorized officer shall prepare a report which sets forth recommendations as to (1) land which should be excluded from any lease or license in order to avoid mining where reclamation is not attainable or assured, or in recognition of other exclusive land use management priorities; (2) measures required to comply with the reclamation and performance standards set forth in this Subpart; (3) necessary conditions and amounts of bonds to cover estimated reclamation costs for areas that will be disturbed during the initial 5-year period of the lease, permit, of license; (4) any additional, more stringent requirements needed in the lease or license pursuant to § 3041.1(e) of this Subpart.

(b) If it is recommended that a specific area within the applied for lands be excluded from a lease or license, or modification thereof, the report shall set forth with reasonable specificity the facts upon which such recommendation is based.

§ 3041.2–2 Obligations and standards of performance.

(a) Any operator who accepts a coal lease or license shall comply with, and be bound by, the general obligations and standards of performance set forth in this section and such additional and more stringent specific requirements as may be contained in the terms and conditions of such lease or license.

(b) If the appropriate authorized officer of the BLM determines that an approved exploration or mining plan should be required to be revised or supplemented to adjust to changed conditions or to correct oversights, he may propose such revision or supplement to the Mining Supervisor for action pursuant to the provisions of 30 CFR Part 211 relating to changes in plans.

(c) Surface coal mining operations shall be conducted so as to assure the extraction of the coal resource to the maximum extent possible, taking into account existing technology, commercially available equipment, the cost of production, and the quality and quantity of the coal resource, so that future environmental disturbance through the resumption of mining will be minimized.

(d) The operator shall, in accordance with the terms and conditions of the lease or license (1) take visual resources identified by the Federal surface managing agency into account in the planning, design, location, and construction of facilities on the affected lands; and (2) take such action as may be needed to minimize, control, or prevent damage to the recreational, cultural, scientific, historical and known or suspected archeological and paleontological values of the land contained therein.

(e) The following performance standards shall be applicable to the surface effects of underground mining.

(1) Each operator of an underground coal mine shall adopt measures consistent with feasible known technology in order to prevent or, in those instances where the mining method used requires planned subsidence in a predictable and controlled manner, control subsidence; maximize mine stability; and maintain the value and use of surface lands.

(2) Where pillars or panels are not removed and controlled subsidence is not part of the mining plan, pillars or panels of adequate dimensions shall be left to assure stability giving due consideration of the thickness and strength characteristics of the coal beds and of the strata above and immediately below the coal bed.

(f) The following performance standards shall be applicable to all coal exploration, development, mining, preparation, handling, and reclamation operations on the surface of lands subject to this Subpart except as otherwise provided by the action of the Secretary under 30 CFR 211.75(a):

(1) The operator shall reclaim affected lands pursuant to his approved plan, as contemporaneously as practicable with operations, to a condition capable of supporting all practicable uses which such lands were capable of supporting immediately prior to any exploration or mining, or equal or better uses that have been approved in accordance with this Subpart.

(2) The operator shall replace overburden and waste materials in the mined area by backfilling (compacting, where necessary, to ensure stability or to prevent leaching of toxic materials), grading or other means, so as to cover all acid-forming or other toxic materials and eliminate highwalls and spoil piles and restore the approximate original contour. Where the thickness of the coal deposits relative to the volume of overburden is large and where the overburden and other spoil and waste materials are either insufficient or more than sufficient to restore the approximate original contour, the operator shall, in order to provide adequate drainage, backfill, grade, and where necessary, compact, using all available overburden or spoil material, to obtain the lowest practicable grade, which shall in any event be less than the angle of repose. Excess overburden or other spoil material shall be fully reclaimed in accordance with the requirements of this Subpart. Variance from the requirements of subparagraphs (1) and (2) of this paragraph may be allowed in an approved mining plan if the Director of the Geological Survey, with the concurrence of the Director of the Bureau of Land Management or the comparable appropriate authorized officer, determines that unusual physical conditions at the site, such as steeply dipping coal beds or multiple seam mining, exist, and such conditions make backfilling pursuant to such requirements impracticable as a result of the volume of material excavated or environmentally undesirable as a result of the duration of the operation.

(3) The operator shall stabilize and protect all surface areas, including spoil piles, affected by the coal mining and reclamation operation, to effectively control slides, erosion, subsidence, and attendant air and water pollution.

(4) The operator shall remove topsoil separately, for replacement on the backfill area, and if not so utilized immediately, segregate it in a separate pile from other spoil. When topsoil is not to be replaced on a backfill area within a time short enough to avoid deterioration, the operator shall establish and maintain an approved quick growing vegetative cover or employ other approved measures so that the topsoil is protected from wind and water erosion and establishment of noxious plant species, and is in a condition for sustaining vegetation when used during reclamation. If topsoil is of insufficient quantity or of poor quality for sustaining vegetation, and if other excavated materials can be shown to be more suitable for revegetation, then the operator may be authorized in the approved plan to remove, segregate, protect, and utilize in a like manner such other materials.

(5) The operator shall ensure that water impoundments, water retention facilities, dams, or settling ponds have been set forth in an approved plan, and ensure that:

(i) Any such facility is adequate for its intended purposes and the quality and quantity of impounded water will be suitable for its intended use.

(ii) Any such facility is designed, located, built, used, and maintained in accordance with sound engineering standards and practices and applicable Federal and State laws and regulations, to ensure that such facilities will have necessary stability with an adequate margin of safety.

(iii) Final grading will provide adequate safety and access for proposed or reasonably anticipated water users.

(iv) Such facilities will not have a significant adverse impact on the water resources utilized by adjacent or surrounding landowners for agricultural, industrial, recreational, or domestic uses, provided, however, that this subparagraph shall not be deemed or construed to increase or diminish any property rights to any water held by any person.

(v) No mine or processing waste is used in the construction of such facilities unless authorized in the approved plan.

(6) The operator shall cover or plug all auger mine holes with noncombustible and, where necessary to minimize control or prevent harmful drainage, impervious material.

(7) The operator shall utilize the best practicable commercially available technology to minimize, control or prevent disturbances of the prevailing quality, quantity and flow of water in surface and ground water systems, and of the prevailing erosion and deposition conditions at the mine site and in affected offsite areas, both during and after coal mining operations and reclamation, by:

(i) Controlling acid or toxic drainage and the adverse consequences thereof by such measures as, but not limited to, diverting surface runoff water away from disturbed areas; excluding oxygen from, or restricting the flow of water through acid or toxic-producing minerals; treating drainage to reduce acid or toxic content which adversely affects downstream water upon being released to water courses; and casing, sealing, or otherwise treating drill holes, shafts, and wells to keep acid or toxic drainage from entering ground and surface waters.

(ii) Conducting surface mining operations so as to minimize, control, or prevent (A) contributions of suspended solids to streamflow or runoff outside the mining site above natural levels under seasonal flow conditions as measured for a period and at sites determined by the Mining Supervisor, in consultation with the appropriate authorized officer, and (B) except where specifically authorized in an approved plan, deepening or enlarging of stream channels where operations include the discharge of water from mines.

(iii) Removing or modifying siltation structures after disturbed areas are revegetated and stabilized unless otherwise authorized by the Mining Supervisor in an approved plan, with the concurrence of the appropriate authorized officer, provided, however, that any siltation structure retaining water shall, in any event, be subject to the requirements of § 3041.-2–2(f)(5) of this Subpart.

(iv) Protecting the quality, quantity and flow, including depth of flow, of upstream and downstream surface and ground water resources of those valley floors which provide water sources that support significant vegetation or supply significant quantities of water for other purposes, by such measures as, but not limited to, relocating and maintaining the gradients of stream, avoiding mining installing, reestablishing or replacing aquifers or acquicludes, and replacing soils, provided, however, that this subparagraph shall not be deemed or construed to increase or diminish any property rights to any water held by any person.

(8) The operator shall: (i) Treat or dispose of all rubbish and noxious substances in a manner designed to minimize, control or prevent air and water pollution and the hazards of ignition and combustion.

(ii) Dispose of all waste resulting from the mining and preparation of coal in a manner designed to minimize, control or prevent air and water pollution and hazards of ignition and combustion. Where surface disposal of solid wastes in areas other than the mine workings or other excavations has been authorized in the approved plan, stabilize such waste including, where necessary, constructing waste piles in compacted layers with the use of incombustible and impervious materials; shape waste piles to be compatible with the natural surroundings and terrain; cover with topsoil or other suitable material in accordance with subparagraph (f)(4) of this section; and revegetate in accordance with subparagraph (f)(13) of this section. All impoundments of liquid wastes shall comply with the requirements of subparagraph (f)(5) of this Section. Waste containing coal in such quantity that it may be later separated from the waste by washing or other means shall be stored separately.

(9) Except as provided herein, the operator shall not conduct excavation, drilling, or blasting operations within 200 feet of an active or abandoned underground mine. Where it can be established by certified maps or inspection of such an underground mine that such activities may be conducted without danger of interference with, or penetration of, an underground mine, they may be authorized in an approved plan to be conducted up to but not less than 25 feet from such underground mine provided that nothing in this paragraph shall preclude daylighting or similar surface coal mining activities intended to improve resource recovery, abate water pollution, or eliminate public hazards resulting from such underground mines.

(10) To prevent personal injury or damage to public and private property, the operator shall use explosives only in accordance with all applicable Federal and State laws and an approved plan and shall:

(i) Provide adequate advance written notice, by publication and/or posting of planned blasting schedules, to local governments and to residents who might be affected by the use of such explosives, and maintain a log of the magnitudes and times of blasts for a period of at least two years.

(ii) Limit the size, timing, and frequency of blasts, as determined by the physical conditions of the site.

(11) The operator shall design to applicable standards, construct, maintain and, when no longer necessary and unless otherwise authorized in an approved plan, remove, all roads, pipelines, powerlines and similar utility access facilities and associated bridges, culverts and ditches, into and across the site of operations, in a manner that will minimize control or prevent erosion and siltation, fugitive dust, pollution of water, damage to fish or wildlife or their habitat and public or public property.

(12) (i) Roads shall not be surfaced with any acid or toxic producing material. No access roads will be constructed unless (A) the operator shall have first submitted a surveyed profile accompanied by typical cross-sections of the road and ditches, showing pipe, entrance, exit channels and sediment control structures and other structures or configurations to be used on the road to meet performance standards and (B) the location shall have been marked and inspected, and approved by the Mining Supervisor, in consultation with the appropriate authorized officer and the surface owner, if other than the United States.

(ii) No access road shall be constructed in a stream, nor shall any stream or stream bed be used as an access road. Insofar as possible, all roads shall be located on benches, ridges, and flatter slopes to enhance stability and minimize disturbance. Stream fordings shall be avoided and the normal seasonal flow and the normal seasonal sediment load shall not be detrimentally affected by access roads in a continuous fashion that results in harm to the aquatic ecosystem. Provided, however, that nothing in this subparagraph shall be construed to prohibit relocation or alteration of such beds or channels pursuant to the provisions of this Subpart and as set forth in an approved plan.

(iii) For the purpose of paragraph (f)(12)(1), of this section, "access roads" shall not include temporary roads constructed within a working pit for the purpose of use by equipment and personnel for access to the coal being mined.

(13) (i) The operator shall, except where other reclamation based upon post-mining land use and not requiring revegetation pursuant to the requirements of this section is expressly provided for in an approved plan, establish on regarded areas and all other affected lands a diverse vegetative cover, native to the area and capable of regeneration and plan succession at least equal in density and permanence to the natural vegetation provided, however, that the Mining Supervisor, with the concurrence of the appropriate authorized officer may allow the use of approved mixtures of introduced or native species where preferable to achieve quick cover or assure successful revegetation. In approving such mixture, preference will be given to non-toxious species.

(ii) The operator's responsibility and liability under his performance bond for revegetation of each planting area shall extend until such time as the appropriate authorized officer, in consultation with the Mining Supervisor and the surface owner, if other than the United States, determines that successful revegetation in compliance with subparagraph (i) of this subsection has occurred, provided, however, that this period shall extend for

a minimum of five full years after the first planting, and for a total period of liability not to exceed 10 years from the original planting; and further provided that,

(A) Where the appropriate officer, in consultation with the Mining Supervisor, determines that natural conditions such as annual precipitation, soil characteristics and native vegetation are stable and favor rapid revegetation, and that revegetation pursuant to subparagraph (i) of this subsection is likely to occur before the expiration of such minimum period, he may specify in the lease, permit, or license that such minimum period will not apply with respect to some or all of the lands included in such lease, permit or license; and

(B) Where during any such minimum period such authorized officer, in consultation with the Mining Supervisor and the surface owner, if other than the United States, determines that natural conditions such as annual precipitation and soil characteristics are sufficiently unstable so as to favor only slow and uncertain revegetation, he may recommend to the Mining Supervisor that the liability of the operator be extended for a period of up to five years beyond the period initially established, if the financial liability that would be incurred by the operator as a result is reasonably commensurate with the increased probability of successful revegetation.

(iii) During the relevant period of liability, the Mining Supervisor and the appropriate authorized officer shall jointly inspect and evaluate the revegetated areas pursuant to subparagraph 3041.6 (b)(2) hereof.

(14) The operator shall: (i) Except as provided in subparagraph (ii) hereof, allow public access to and upon Federal lands subject to his lease, permit, or license for all lawful and proper purposes, except where such access would unduly interfere with his authorized use.

(ii) Regulate public access, vehicular traffic, and wildlife or livestock grazing in all areas of active operations, including lands undergoing reclamation, in order to protect the public, wildlife and livestock from hazards associated with such operations, and to protect revegetated areas from unplanned and uncontrolled grazing. For this purpose, the operator shall provide warning signs, fencing, flagmen, barricades, and other safety and protective measures as may be necessary.

(15) Coal storage areas shall be designed and maintained so as to eliminate fire hazards from spontaneous combustion and other accidential ignition. If a coal seam exposed by surface mining or an accumulation of slack coal or combustible waste becomes ignited during the term of a lease, the operator shall immediately take all necessary steps to extinguish the fire.

(16) Upon completion or temporary or permanent abandonment of mining operations in all or any part of a strip pit, the face of the coal shall be covered with noncombustible material that will effectively protect the coal bed from becoming ignited.

(17) The driving of any underground openings by auger or other methods from any strip pit shall not be undertaken except as specifically approved by the Mining Supervisor, in an approved plan.

§ 3041.3 Compliance or performance bond.

(a) The provisions of Subpart 3504 of this Chapter are hereby made applicable to this subpart. In addition each compliance bond will be conditioned upon faithful compliance with the regulations in this subpart and any additional terms and conditions of the lease or license.

(b) Prior to issuing a lease or license, the authorized officer, after consultation with the Mining Supervisor, shall ensure that the amount of the compliance bond or bonds to be furnished is sufficient to ensure reclamation in accordance with the performance and reclamation standards in § 3041.2–2, and with the terms and conditions of the lease or license.

(c) An application for a lease or license may be denied any applicant or offeror who has previously forfeited a bond because of failure to comply with an approved plan unless the affected lands covered by such plan have been reclaimed without cost to the Federal Government. Nothing in this subparagraph shall be deemed to modify or limit any discretionary authority of the authorized officer of the BLM otherwise to deny for cause any application for a lease or license.

(d) Once a lease or license has been issued the authorized officer, after consulting with and receiving the recommendation to increase or to release in whole or in part any compliance bond or bonds so that the amount of the compliance bond or bonds will at all times be sufficient to cover the estimated costs of completion of the remaining reclamation requirements of the approved plan and of the terms and conditions of the lease or license.

§ 3041.4 Procedures and public participation.

Written findings. Except as may be otherwise expressly set forth in this Subpart, decisions and determinations of any appropriate authorized officer acting pursuant to this Subpart or to 30 CFR Part 211 with respect to issuance of leases, approval of mining plans or modifications thereof, and abandonment of operations shall be in writing, shall set forth with reasonable specificity the facts and the rationale upon which such decisions or determinations are based, and shall be available for public inspection during normal business hours at the offices of such officer.

§ 3041.5 Completion of operations and abandonment.

(a) *Grading and backfilling.* Upon completion of backfilling and grading as required by the approved plan and prior to replacing topsoil and revegetation, the operator shall submit a report thereon, in duplicate, to the Mining Supervisor and request inspection for approval. Whenever it is determined by such inspection that the backfilling and grading has met the requirements of the approved plan, the Mining Supervisor shall recommend to the appropriate authorized officer release of an appropriate amount of the compliance bond for the area satisfactorily backfilled and graded.

(b) *Temporary abandonment.* In areas in which there are no current operations, but operations are to be resumed under an approved plan, the operator shall substantially backfill, fence, protect, or otherwise effectively close all surface openings, auger holes, areas prone to subsidence, and surface facilities or workings which are a hazard to people or animals. Conspicuous signs shall be posted prohibiting entrance of unauthorized persons. All such protective measures shall be maintained in a secure condition until such operations are resumed or permanently abandoned.

(c) *Permanent abandonment.* Before permanent abandonment of exploration or mining operations, all openings and excavations, including water discharge points, shall be closed or backfilled, or otherwise permanently dealt with in accordance with sound engineering practices and according to the approved plan. Drill holes, trenches, and other excavations for exploration, development or prospecting shall be abandoned in such a manner as to protect the surface and not to endanger any present or future underground operations or any deposit of oil, gas, other mineral resources, or ground water. Methods of abandonment shall be approved in advance by the Mining Supervisor in an approved plan, and may include backfilling, regrading, revegetation, cementing, and capped casing, or combinations of these, or other methods. Reclamation and clean-up of surface areas around and near permanently abandoned underground or surface mines, including, except where otherwise expressly provided in an approved plan, removal of equipment and structures related to the mining operation, shall commence without delay following cessation of mining operations. Areas affected by access roads will be graded, drained, and revegetated in accordance with the approved Mining Plan and therein approved post mining land use prior to bond release. In the event that access or haul roads are intended to remain after abandonment of the operation, pursuant to § 3041.2–2(f)(11) of this Subpart, they must be designed and constructed so as to be permanently stabilized using adequate drains, water barriers, and other practices.

(d) *Notice of abandonments release of bond.* (1) Not less than 30 days prior to cessation or abandonment of operations, the operator shall submit to the Mining Supervisor, in duplicate, a notice of his intention to cease or abandon operations, together with a statement of the exact number of acres affected by his operations, the extent and kind of reclamation accomplished, and a statement as to the structures and other facilities that are to be removed from or remain on the leased or licensed lands.

(2) Upon receipt of such notice, the Mining Supervisor and the appropriate authorized officer or officers shall promptly make a joint inspection to determine whether all operations have been completed in accordance with the terms and conditions of all leases, permits, and licenses, and with the requirements of approved operating plan. Where the operator has compiled with all such terms, conditions and requirements and the regulations of this Subpart the Mining Supervisor shall recommend to the appropriate authorized officer that the appropriate period of bonded liability be terminated.

(3) When the surface of lands in a lease permit or license is not owned by the United States the Mining Supervisor shall notify the surface owner and solicit and take into account his comments before recommending to the appropriate authorized officer that the period of such bond liability be terminated.

§ 3041.6 Reports.

(a) *Operations.* The operator shall file with the Mining Supervisor within 30 days after the end of each calendar year, and within 30 days after any temporary or permanent abandonment of operations, a report, in duplicate, containing the following with respect to his operations or the operations subject to such abandonment.

(1) Serial number of the lease, permit, or license and a description of the lands affected by operations.

(2) The number of acres disturbed and the number of acres reclaimed, including areas on which revegetation is being conducted.

(3) A description of the reclamation work remaining to be done on lands disturbed.

(b) *Revegetation.* (1) The operator shall file a report, in duplicate with the Mining Supervisor within 30 days after each planting is completed. The report shall: (i) Identify the lease or license; (ii) Show the types of planting or seeding, including mixtures and amounts; (iii) Show the date of planting or seeding; (iv) Identify or describe the planted or seeded lands; (v) Describe any surface manipulation, mulching, fertilization, and irrigation procedures, if any, and contain such other information as may be considered relevant.

(2) The Mining Supervisor and the authorized officer of the Federal surface managing agency shall, as soon as possible after each full growing season, jointly inspect and evaluate the revegetated areas to determine, in consultation with the surface owned if other than the United States, whether satisfactory vegetative growth has been established, or whether additional revegetation efforts should be ordered pursuant to 30 CFR 211.62(b)(2).

§ 3041.7 Notice of noncompliance: Revocation.

(a) The appropriate authorized officer and the Mining Supervisor shall have the right to enter upon the lands subject to this Subpart under lease or license, at any reasonable time.

(b) If an appropriate authorized officer discovers that an operator is conducting on lands subject to this subpart activities which are not in compliance with the requirements of a least or license, applicable regulations, or an approved plan and such activities do not threaten immediate and serious damage to the environment, resources, or the health and safety of the public, such authorized officer shall or, in the case of an appropriate authorized officer of any Federal surface managing agency not in the Department of the Interior, may refer the matter to the Mining Supervisor for remedial action pursuant to 30 CFR 211.72(a).

(c) If an appropriate authorized officer discovers that an operator is conducting on lands subject to this subpart activities which are not in compliance with the requirements of a lease or license, applicable regulations or an approved plan and such activities threaten immediate and serious damage to the environment, resources, or the health and safety of the public, and the Mining Supervisor is not available for appropriate remedial action pursuant to 30 CFR 211.72(c), such authorized officer may order the immediate cessation of such activities and shall promptly notify the Mining Supervisor. Upon such notification, the Mining Supervisor shall order immediate remedial action pursuant to 30 CFR 211.72(c).

(d) Failure of the operator to take action in accordance with an order for cessation of activities issued pursuant to paragraph (c) of this section, or with a written notice of noncompliance issued by the Mining Supervisor in accordance with the provisions of 30 CFR 211.72 shall be grounds for suspension of the operation and for possible cancellation of the lease, permit, or license in accordance with the regulations in 43 CFR 3500 of this Chapter.

§ 3041.8 Variances.

(a) Variances from compliance with the performance standards set forth in this subpart may be allowed as part of an approved mining plan under either of the following circumstances:

(1) Where an applicant states in a proposed plan or modification thereof that he cannot meet a performance standard specified in subparagraphs 3041.2–2(f) (2), (4), (6), (11), (12) or (13) of this subpart, he may request a variance from such performance standard where such variance would be compatible with the approved post mining land use, and shall support his request with appropriate information demonstrating the need therefor. The Mining Supervisor, after consultation with the appropriate authorized officer and the surface owner, if other than the United States, may approve or disapprove such variance, and shall advise the applicant and approve or disapprove the proposed plan or modification accordingly;

(2) Where an applicant proposes a post-mining land use that is substantially different from the land use immediately prior to any exploration and mining, the Mining Supervisor, with the concurrence of the appropriate authorized officer and after consultation with the surface owner, if other than the United States, may approve a mining plan containing variances from the performance standards of 30 CFR 211 and § 3041.2–2(f) hereof, provided that:

(A) After consultation with the appropriate land use planning agencies, if any, the proposed development is deemed to constitute an equal or better economic or public use of the affected land, as compared with the premining use.

(B) The granting of such variance is essential to achieving the proposed post mining land use.

(C) The applicant presents specific plans for the proposed post mining land use and appropriate assurances that such use will be: (i) Compatible with adjacent land uses; (ii) Supported by commitments and assured of investment from public agencies where appropriate; (iii) Practicable with respect to private financial capability for completion of the proposed development; (iv) Planned pursuant to a schedule made part of the proposed mining plan so as to integrate the mining operation and reclamation with the post mining land use; (v) Designed by qualified personnel in conformance with professional standards in order to assure the stability, drainage, and configuration necessary for the intended use of the site.

(D) To the degree possible and taking into account the subjective nature of the assessment, the applicant has considered the impact of the proposed land use on the aesthetic character of the area by consulting with inhabitants of the area, and utilizing expertise in the landscape and geomorphologic fields.

(b) Any application for a variance pursuant to paragraph (a) of this section shall demonstrate that any proposed disturbance of land above a highwall will facilitate compliance with the environmental protection and performance standards set forth in this subpart.

(c) Any application for variance pursuant to paragraph (a) of this section which proposes to place spoil or other material on the downslope below the bench used to mine an area classed as "steep slope," shall demonstrate to the satisfaction of Mining Supervisor that the permanent or temporary sediment loads in the receiving drainages and reclamation to the post-mining land use will not have significant adverse effects upon the aesthetics of the area.

(d) All variances granted pursuant to this section shall be reviewed by the Mining Supervisor and the appropriate authorized officer not more than three years after granting of the variance and incorporation in the mining plan, to ensure that the development is proceeding in accordance with the terms of the approved plan and the terms and conditions of any lease, permit, or license.

(e) An operator may apply for a variance pursuant to the provisions of paragraph (a) of this section only by submitting a new or revised mining plan to the Mining Supervisor for approval pursuant to the provisions of 30 CFR 211. Minor changes of operations which do not involve violations of the performance standards set forth in this subpart, and the granting of a variance pursuant to the description in § 3041.2–2(a)(2) of this subpart, will not be deemed to be subject to or require compliance with, the provisions of this section.

(f) If the Director of the GS determines that a decision to grant a variance would constitute a major Federal action significantly affecting the quality of the human environment, and that an environmental impact statement as required by Section 102(2)(C) of the National Environmental Policy Act has not been prepared with respect thereto, such a statement shall be prepared. If the Mining Supervisor grants a variance pursuant to this Section, he shall notify the appropriate land managing agency or land planning agency for the purpose of determining whether any changes may, as a result of such variance, be required in any land use plan.

PART 3500—LEASING OF MINERALS OTHER THAN OIL AND GAS: GENERAL

2. Section 3500.0–5 of 43 CFR is amended by revising paragraphs (h) and (i) as follows:

§ 3500.0–5 Definitions.

• • • • • •

(h) *Public Bodies.* Public bodies are Federal and State agencies, municipalities, and rural electric cooperatives and similar types of organizations, and nonprofit corporations controlled by any of foregoing entities.

(i) *Government entities.* Governmental entities are Federal and State agencies, municipalities and subdivisions thereof, including any corporation primarily acting as an agency or instrumentality of a State, which produces electrical energy for sale to the public.

3. 43 CFR 3501.1–4 paragraphs (b)(1)(i) and (ii) are revised to read as follows:

§ 3501.1–4 Acreage limitations.

• • • • • •

(b) • • •

(1) *Coal.* (i) No person, association, or corporation, or any subsidiary, affiliate, or persons controlled by or under common control with such person, association, or corporation shall take, hold, own or control at one time Federal coal leases or permits on an aggregate of more than 46,080 acres in any one State, and in no case on an aggregate of more than 100,000 acres in the United States.

(ii) No person, association, or corporation holding, owning or controlling Federal coal leases or permits (by itself or through any subsidiary, affiliate, or person under common control with it) on an aggregate of more than 100,000 acres in the United States on August 4, 1976, shall be required to relinquish any lease or permit which it held on that date, but it shall not be permitted to take, hold, own or control any further Federal coal leases or permits until such time as its holding, ownership, or control of Federal leases or permits has been reduced below an aggregate of one hundred thousand acres within the United States.

• • • • • •

4. 43 CFR 3501.1–5 is revised to read as follows:

§ 3501.1–5 Exceptions.

(a) *All leaseable minerals except coal.* No lands within the boundaries of the following areas in the public domain shall be leased under the provisions of this Part:

(1) National parks and monuments.

(2) Indian reservations.

(3) Incorporated cities, towns, and villages.

(4) Naval petroleum and oil shale reserves.

(5) Lands acquired under the act of March 1, 1911 (36 Stat. 961; 16 U.S.C. 513–519) known as the Appalachian Forest Reserve Act, or other acquired lands.

(b) *Coal.* No coal leasing shall be permitted on the public domain within the areas set forth in 43 CFR 3535.4.

5. 43 CFR 3501.2–1 is revised to read as follows:

§ 3501.2 Acquired lands.

§ 3501.2–1 Lands and deposits not subject to leasing.

(a) *All leaseable minerals except coal.* The following acquired lands are not subject to leasing:

(1) Lands acquired for the development of their mineral deposits;

(2) Lands acquired by foreclosure or otherwise for resale;

(3) Lands acquired as surplus under the Surplus Property Act of October 3, 1944 (58 Stat. 765; 50 U.S.C. 1611, et seq.);

(4) Lands in incorporated cities, towns, and villages;

(5) Lands in national parks and monuments; and

(6) Lands which are tide lands or submerged coastal lands within the Continental Shelf adjacent or littoral to any part of land within the jurisdiction of the United States.

(7) Lands in Naval Petroleum Reserves, The National Petroleum Reserve in Alaska, and oil shale reserves.

(b) *Coal.* No coal leasing shall be permitted on acquired lands within the areas set forth in 43 CFR 3525.4.

6. 43 CFR 3502.9 is amended to read as follows:

§ 3502.9 Public Bodies.

§ 3502.9–1 Coal.

(a) To obtain a coal lease on a tract set aside pursuant to 30 U.S.C. 201(a) a public body must submit:

(1) Evidence of the manner in which it is organized;

(2) Evidence that it is authorized to hold a lease or permit;

(3) Evidence that the action proposed has been duly authorized by its governing body; and

(4) A definite plan to produce energy solely for its own use or for sale to its members or customers (except for short-term sales to others).

(b) To obtain a license to mine coal pursuant to 30 U.S.C. 208, a municipality must submit:

(1) Evidence of the manner in which it is organized;

(2) Evidence that it is authorized to hold a license; and

(3) Evidence that the action proposed has been duly authorized by its governing body.

(c) To obtain a coal lease pursuant to 30 U.S.C. 352 on a tract of acquired lands set apart for military or naval purposes, a governmental entity must submit:

(1) Evidence of the manner in which it is organized, including the state in which it is located;

(2) Evidence that it is authorized to hold a lease;

(3) Evidence that the action proposed has been duly authorized by its governing body; and

(4) Evidence that it is producing electricity for sale to the public in the state where the lands to be leased is located.

(d) Where the material required in paragraphs (a), (b) and (c) of this section has previously been filed, a reference by serial number of the record in which it has been filed, together with a statement as to any amendments, will be accepted.

7. 43 CFR Subpart 3503 is amended by adding a new § 3503.3–3 to read as follows:

§ 3503.3–3 Coal.

(a) A coal lease shall require payment of a royalty of not less than 12½ per centum of the value of the coal removed from a surface mine.

(b) A coal lease shall require payment of a royalty of not less than 8 per centum of the value of the coal removed from an underground mine, except that the authorized officer may determine a lesser amount if conditions warrant.

(c) The value of coal removed from a mine is defined for royalty purposes in 30 CFR 211.63.

8. 43 CFR § 3503.3–1(b) is amended by revising paragraph (1) to read as follows:

§ 3503.3–1 General statement rentals.

• • • • • •

(b) *Leases*—(1) *Coal.* Annual rental per acre or fraction thereof for coal leases shall not be less than 25 cents for the first year, not less than 50 cents for the second through fifth years and not less than $_____ for each and every year thereafter during the continuance of the lease.

(i) *Leases issued before August 4, 1976.* The rental paid for any year shall be credited against the royalties for that year until the lease is readjusted.

(ii) *Leases issued or adjusted after August 4, 1976.* Rental payments may not be credited against royalties.

§§ 3505.1–1, 3505.2–1 through 3505.2–4 [Reserved]

9. 43 CFR Subpart 3505 is amended by revoking and reserving §§ 3505.1–1, 3505.2, 3505.2–1, 3505.2–2, 3505.2–3, and 3505.2–4.

§§ 3511.2–1 and 3511.2–2 [Amended]

10. 43 CFR Subpart 3511 is amended by revoking and reserving paragraph (b) (1) of § 3511.2–1(b) (1) and § 3511.2–2.

PART 3520—PREFERENCE RIGHT AND COMPETITIVE LEASES

11. Section 3520.0–3 is revised as follows:

§ 3520.0–3 Authorities.

(a) *Public domain and acquired lands.* The Secretary is authorized to divide into leasing units and award leases of mineral lands and mineral deposits owned by the United States as set forth in § 3500.1–1 subject to the provisions of the Mineral Leasing Act, as amended and supplemented, and the Mineral Leasing Act for Acquired Lands as set forth in § 3500.0–3. Coal leasing is governed by the application procedures in 43 CFR Subpart 3525. Other leaseable minerals are covered by the procedures in 43 CFR Subpart 3521.

14. Section 3521.2–1 is revised as follows:

§ 3521.2–1 Application or Bureau motion.

(a) *Application.* (1) *Forms.* (i) Where filed and copies. An application for a lease must be filed in duplicate in the proper office. No specific form is required. Competitive-coal lease applications will be accepted only as authorized by 43 CFR Subpart 3525. The application should include the information set forth in (ii) to (v) of this subparagraph.

(ii) The applicant's name and address.

(iii) State of citizenship and qualifications.

(iv) A complete and accurate description of the lands for which the lease is desired. See § 3501.1–3.

(v) Evidence that the land is valuable for the mineral for which application is made, with a statement as to the character, extent and mode of occurrence of the deposit.

(2) *Additional Statements Required.* The contemplated investment for the development and purchase of equipment of a producing mine of a stated average daily output. Phosphate. To the extent such information is known to the applicant, a description of the phosphate and associated or related mineral deposits in the land based upon such actual examination as can be effected without an injury to the land or deposits (such examination shall not be deemed a trespass), giving nature and extent of the deposits; an outline in general terms of the proposed method of mining and processing the same; the proposed investment in mining operations thereon, and processing facilities therefor.

(3) Evidence showing in sufficient detail that:

(i) The amount of phosphate lands, Federal and non-Federal, held by him, together with the lands described in the application are necessary for his proposed development plan.

(ii) He intends to explore, mine and develop the property in good faith.

(iii) His proposed operations of the property will be in accordance with good conservation practice and this additional development is needed in order to supply an existing demand which cannot otherwise be reasonably met.

12. Section 3521.2–2 is revised as follows:

§ 3521.2–2 Qualifications.

(a) Compliance with Subpart 3502 is required.

(b) Bureau motion. (1) Bureau of Land Management responsibility.

(2) Geological Survey responsibility.

(c) *Leasing Units.* (1) *Phosphate.* If the authorized officer shall determine, after consultation with the Mining Supervisor of the Geological Survey that specific lands or deposits, not under an outstanding permit or application for preference right lease, which constitute an acceptable leasing unit are subject to phosphate lease, they will be offered for such lease on the terms and conditions to be specified in the notice of lease offer to the qualified person who offers the highest bonus by competitive bidding equal to the fair market value of the mineral deposit either at public auction or by sealed bids as provided in the notice of lease offer.

(2) *Solid (hardrock) minerals.* Any qualified person may file an application for the competitive offering of such deposits. Leasing units may not exceed, in reasonably compact form, 2,560 acres of land described in the manner required by this section. The authorized officer may prescribe a lesser area for any mineral deposit if the Geological Survey reports that such lesser area is adequate for a logical leasing unit.

(i) *Exception.* (a) *Phosphate.* In a notice for a phosphate lease, the detailed statement will set forth that the terms of minimum production will not be reduced or waived at the lessee's request as provided in § 3503.3–2(b)(3), (d), (e), or upon a satisfactory showing that market conditions are such that the lessee cannot operate except at a loss.

(b) *Asphalt.* All leases will be issued through competitive bidding only in the same manner as that provided for in Subpart 3120.

(c) *Publication.* Notice of offer of lands or deposits for lease by competitive bidding will be by publication once a week, or for such other period as may be deemed available, in a newspaper of general circulation in the county in which lands are situated.

13. The following sections are repealed and reserved: 43 CFR § 3520.0–4, 43 CFR § 3520.1–2, 43 CFR § 3520.1–3.

14. Title 43 CFR § 3520.2–1 is amended to read as follows:

§ 3520.2–1 Duration of Leases.

Leases shall be issued for indeterminate periods subject to readjustment or renewal at the end of the first 20-year period upon such terms and conditions as may be incorporated in each lease or prescribed in general regulations issued by the Secretary of the Interior, including covenants relative to mining methods, waste, period of preliminary development and minimum production (a) *Exceptions.* (1) *Asphalt.* Asphalt leases are issued for 10 years and so long thereafter as the lessee complies with the terms and conditions of the lease.

(2) *Solid (hardrock) minerals.* The lease will be issued for a period not exceeding 20 years the term to be determined upon the advice of the agency having jurisdiction over the surface and the U.S. Geological Survey.

(3) *Coal leases issued or readjusted after August 4, 1976.* The term of the lease shall be twenty years, and as long thereafter as the lessee is producing coal annually in commercial quantities.

§ 3524.1–1 [Reserved]

15. 43 CFR Subpart 3524 is amended by revoking and reserving § 3524.1–1.

16. 43 CFR 3524.2–1 is amended to read as follows:

§ 3524.2–1 Coal.

(a) *Application.* A lessee may obtain modification of his lease to include coal lands or coal deposits contiguous to those embraced in his lease if the authorized officer determines that it would be in the interest of the United States to do so. In no event shall the total area added by such modifications to an existing coal lease exceed one hundred sixty acres or the same number of acres as that in the original lease, whichever is less. The lessee shall file his application for modification in duplicate in the proper land office, describing the additional lands desired, and the needs and reasons for and the advantage to the lessee of such modification.

(b) *Availability*—(1) *Noncompetitive.* Upon determination by the authorized officer that the modification is justified and that the interest of the United States is protected, the lease will be modified without competitive bidding to include such part of the land or deposits as he shall prescribe.

(2) *Competitive.* If it is determined that the additional lands or deposits can be developed as part of an independent operation or that there is a competitive interest in them, they will be offered as provided in Subpart 3525.

(c) *Terms and conditions.* The authorized officer shall require changes in the terms and conditions of the original lease to make them consistent with the modified lease. Before a lease is modified under paragraph (a) or (b) of this section, the lessee shall file his written acceptance of the conditions imposed in the modified lease and the written consent of the surety under the bond covering the original lease to the modification of the lease and to extension of the bond to cover the additional land.

17. Subpart 3525—Energy Minerals Activity Recommendation System (EMARS) is renumbered, reorganized, and corrected to read as follows:

Subpart 3525—Energy Minerals Activity Recommendation System (EMARS)

Sec.
3525.0–2 Objectives.
3525.0–3 Authority.
3525.0–6 Policy.
3525.1 Competitive leases.
3525.2 Lands subject to leasing.
3525.2–1 Special leasing opportunities.
3525.2–2 Request for information on areas of interest.
3525.3 Applications; Short-term sales.
3525.3–1 Conditions of acceptance.
3525.3–2 Preliminary date required.
3525.4 Land Use Plans.
3525.5 Consent to leasing.
3525.5–1 Consultation with Federal surface managing agency.
3526.5–2 Consultation with Governors.
3525.6 Notice of lease sale.
3525.7 Consultation with Attorney General.
3525.8 Award of leases.
3525.9 Documentation.

Subpart 3525—Energy Minerals Activity Recommendation System (EMARS)

3525.0–2 Objectives.

The objectives of the Department's coal leasing process called Energy Minerals Activity Recommendation System (EMARS), include: the orderly and timely development of federally-owned coal; appropriate uses of the resources; effective environmental protection; and a fair market return to the public for the resources sold. The program consists of three principal elements: nominations; multiple resource land-use planning; and environmental assessment. Nominations provide the first indication of tracts which should or should not be leased. The nominations received are then compared with resource values through the Bureau's land-use planning process, including Management Framework Plans. From these phases, proposed tract recommendations will be made and environmental assessment will be undertaken on the proposed coal lease tracts. The integration of these three elements, i.e., nominations, multiple resource land-use planning, and environmental assessment—each of which will be undertaken with State and public participation—will produce specific coal lease recommendations for Secretarial decision.

§ 3525.0–3 Authority.

(a) *Acts.* (1) The Act of February 25, 1920, 41 Stat. 437, as amended by the Act of June 3, 1948, 62 Stat. 248, the Act of September 9, 1959, 73 Stat. 490, the Act of August 31, 1964, 78 Stat. 710, and the Act of August 4, 1976, 90 Stat. 1083, 30 U.S.C. 201(a).

(2) The Act of August 7, 1947, 61 Stat. 913, and the Act of August 4, 1976, 90 Stat. 1090, 30 U.S.C. 352.

§ 3525.0–6 Policy.

It is the policy of the Department to encourage the development of Federally-owned coal, where such development is authorized, through a program that will provide for the protection, orderly development and conservation of Federal mineral and nonmineral resources in a manner that will avoid, minimize or correct adverse impacts on society and the environment resulting from coal development, without undue duplication or administrative delay by Federal officers. It is also the policy of the Department to issue leases for coal only where reclamation of the affected lands to the standards set forth in 43 CFR Part 3040 is attainable and assured and a reclamation program will be undertaken as contemporaneously as practicable with operations.

§ 3525.1 Competitive leases: Procedures.

(a) *Establishment of leasing tracts.* General coal land or deposits shall be divided into suitable leasing tracts and leased competitively. The Energy Minerals Activity Recommendation System (EMARS) shall be used to identify tracts suitable for leasing through nominations and multiple-use land management planning. All competitive lease sales, except those that qualify under the short-term leasing criteria, will be on Bureau motion.

(b) *Selection of proposed tracts.* (1) *Bureau Motion.* Proposed tracts will be selected by the Bureau of Land Management and United States Geological Survey field offices, with participation from affected State governments, and other surface management agencies, if other than the Bureau of Land Management, based upon relevant information including information from the appropriate land-use plan, from nominations and from competitive coal lease applications on file.

(2) *Selection of Proposed Tracts: Short-term Sale.* Proposed tracts for short-term sales will be selected using the same criteria as Bureau motion tracts. Prior to selecting a proposed short-term tract the Bureau must determine that the application meets the short-term leasing criteria.

(3) No lands may be included in a proposed tract unless: (i) the land is included in a completed land-use plan and leasing is compatible with the plan; (ii) the lands have been included in a known recoverable coal resource area (KRCRA);

(iii) the lands have been included in a nomination or have been identified by BLM as potential leasing tracts or included in a short-term lease application.

(4) *Tract Selection Factors.* The selection of proposed lease tracts will include consideration of such factors as: depth, quality, thickness and extent of the coal resource; water resource availability; relationship to existing communities; potential impacts on economic structure (e.g., employment, available services, etc.); service and access corridors; aesthetic qualities such as scenic, cultural, Wildlife, and vegetative values; rehabilitation potential and Coal Resources Regulations Guideline No. 1 (41 FR 43722).

(c) *Compliance with NEPA.* The National Environmental Policy Act will be complied with as follows: If several proposed leasing units have significant related characteristics and would sustain similar or related environmental impacts, as determined by the Secretary, they may be covered by a single regional environmental impact statement. Where leasing actions are adequately covered in a regional impact statement, no additional impact statement need be prepared. A public hearing will be held after publication of a draft regional environmental impact statement. An environmental assessment record or an impact statement, as appropriate, will be prepared for proposed leasing actions not included in a regional impact statement. The Department will provide public notice and an opportunity for a public meeting on an environmental assessment record for a coal leasing proposal that indicates that an environmental impact statement is not required.

(d) *Technical examinations.* A technical examination in accordance with the procedures in 43 CFR 3041.2 and 3041.2–1 will be completed on each unit after completion of the final environmental impact statement or environmental assessment to identify specific reclamation requirements and tracts requiring special environmental consideration and to prepare bonding requirements and stipulations to minimize impacts upon the environment and other resources, lands uses, or programs. Reclamation requirements will be imposed in accordance with 43 CFR 3041. The technical examination will include an evaluation of the proposed leasing unit to balance the value of the coal against the cost of mining, the cost of mitigation of environmental damage, and the significance of unmitigable damages. The Bureau will obtain from the Geological Survey an evaluation and comparison of the effects of recovering coal by deep mining, by surface mining, and by other methods to determine which method or methods achieves the maximum economic recovery of the proposed tract.

(e) *Recommendation of tentative coal lease tracts.* (1) After the BLM has completed the actions required by paragraphs (a)–(d) of this section, after State government and surface management agency consultation, and after holding a public hearing, on the record, in the area which may be affected by the proposed coal lease sale, the State Director will recommend suitable tentative coal lease tracts to the Director. The Director will consolidate approved field recommendations into a proposed Coal Lease Sale Schedule for review and approval by the Secretary.

(2) The Director's recommendation, and the Secretary's final approval, shall include a written synopsis of earlier analyses which evaluates and compares:

(i) The effects of recovering coal by deep mining, by surface mining and by any other method to determine which method or methods or sequence of methods achieves the maximum economic recovery of the coal within the proposed leasing tract, and

(ii) The effects which mining the proposed lease might have on an impacted community or area, including impacts on the environment, on agriculture and other activities, and on public services.

(f) Qualified applicants. Leases may be issued to qualified applicants listed in Subpart 3502 of this chapter unless:

(1) The qualified applicant, or any subsidiary, affiliate, or person controlled by or under the common control of the qualified applicant holds a lease or leases to coal deposits issued by the United States and has held the lease for 10 years and is not producing coal in commercial quantities.

Exceptions. A lessee is not disqualified from holding a lease if either production is interrupted by strikes, the elements, or casualties not attributable to the lessee, or the Secretary has suspended the requirement of continued operation upon payment of advance royalties.

(i) The 10-year period referred to in paragraph (a) of this section shall begin on August 4, 1976, or the date the lease is issued, whichever is later.

(ii) For the purpose of this paragraph, production of coal in commercial quantities means production adequate to meet the requirement for continuous operation as defined in § 3500.0–5(g) of this chapter; or

(2) The qualified applicant holds or controls more than 46,080 acres of Federal coal leases in any one state or 100,000 acres of Federal coal leases in the entire United States.

§ 3525.2 Lands subject to leasing.

(a) The Secretary may issue coal leases on all lands owned by the United States except lands in the:

(1) National Park System;
(2) National Wildlife Refuge System;
(3) National Wilderness Preservation System;
(4) National System of Trails;
(5) Wild and Scenic Rivers System, including study rivers designated under section 5(a) of the Wild and Scenic Rivers Act;
(6) Incorporated cities, towns and villages; and
(7) Tide lands, submerged coastal lands within the Continental Shelf adjacent or littoral to any part of land within the jurisdiction of the United States.
(8) Lands acquired by the United States for the development of mineral deposits, for foreclosure or otherwise for resale, or reported as surplus property pursuant to the provisions of the Surplus Property Act of 1944.
(9) Naval Petroleum Reserves, The National Petroleum Reserve in Alaska, and oil shale reserves.

(b) (1) The Secretary may issue coal leases with the consent of the Secretary of Defense on acquired lands set apart for military or naval purposes only if the leases are issued to a governmental entity, including any corporation primarily acting as an agency or instrumentality of a State, which

(i) Produces electrical energy for sale to the public; and
(ii) Is located in the State in which the leased lands are located.

(2) A government entity is located in a State if its production facilities are in that State, and the coal produced from the lease will be used in the State.

(c) The regulations in Subpart 3525 of Title 43 CFR do not apply to the leasing and development of coal deposits owned by Indians and subject to the trust protection of the United States. Regulations governing those deposits are found in 25 CFR Chapter I.

§ 3525.2–1 Special leasing opportunities.

(a) The Secretary shall, under the procedures established under this subpart, reserve and offer a reasonable number of coal lease tracts within competitive lease sales each year as special leasing opportunities. Except for the limitation on bidding contained in paragraph (b) of this section, all of the requirements of this subpart apply to special leasing opportunities including the requirement that the coal be leased at its fair-market value.

(b) Only public bodies, including Federal agencies, rural electric cooperatives, or non-profit corporations controlled by any of these entities which have a definite plan to produce energy for their own use or for sale of their members or customers will be eligible to bid for leases designated as special leasing opportunities. Evidence of qualification to bid for leases designated as special leasing opportunities must be filed with the Department at least 60 days prior to a sale.

(c) The Secretary may designate certain coal lease tracts as special leasing opportunities only if a public body has requested, in the nomination process or elsewhere, that the procedures of this section apply.

(d) Leases issued under this Section may be assigned only to another public body.

§ 3525.2–2 Request for information on areas of interest.

(a) *Purpose.* This section establishes a procedure by which industry, the general public, and State and local governments can inform the Department of the Interior of their views on coal leasing in particular areas. The Department will incorporate the information it receives into its internal planning processes for Federal coal leasing tract selections. Except for short-term leasing applications, nominations are the primary source of information on the need for additional coal leasing.

(b) *Description of process.* The Director will request information on an annual basis, or as necessary. Any person may file with the Bureau, a statement with supporting information, asking the Director to make a request for nominations. The Bureau is not required to act on the statement. The Request for Information on Areas of Interest will consist of two types.

(1) *Industry nominations.* Nominations from industry of tracts of land that the Department should or should not make available for coal leasing including, as appropriate, statements describing why the tracts should or should not be leased.

(2) *Areas of public concern.* Concurrently with Industry Nominations, State and local governments and the general public are requested to submit Areas of Public Concern covering tracts of land that the Department should or should not make available for coal leasing including, as appropriate, statements describing why the tracts should or should not be leased.

(c) *Use of nominations.* Information obtained through the nominations process will be analyzed and compared with multiple resource opportunities identified in the land-use planning process. Proposed coal lease tracts will then be developed on the basis of nominations and multiple resource information.

(d) *Description of nominations.* All nominations or statements of information for or opposed to leasing shall: (1) (i) Describe the lands by legal subdivisions, section, township, and range; or in the case of land covered only by protracted surveys, by section, township, and range according to an approved protraction diagram; or

(ii) Use the Bureau of Land Management's Surface/Minerals Management Quads (minerals ownership maps) to indicate nominated areas. A readily discernible line on these maps conforming to legal subdivision and section lines will be accepted as the description required in paragraph (d) (1) (i) of this section. The maps are available for sale at BLM State and most District Offices.

(2) Describe reasonably compact areas, which will be assumed to include all Federal coal within the boundaries described, and may not exceed 25,000 acres.

(e) *Multiple nominations.* If a person submits two or more nominations for leasing or two or more nominations against leasing, choices shall be ranked in order of importance and shall be numbered consecutively. Nominations should be ranked on a nationwide basis.

(f) *Inspection and copying.* The procedures in 43 CFR Part 2 govern the public inspection and copying of information submitted under this section.

(g) *Notice of requests for nominations on areas of interest.* (1) Notice of each Request for Information on Areas of Interest will be published in the FEDERAL REGISTER and in a newspaper(s) of general circulation in the State affected and will specify the area or areas covered by the call, the size and ranking of nominations, the period of time within which to submit nominations, and the addresses to which the nominations are to be submitted.

(2) *Lands Eligible for Nominations.* Nominations will be accepted only for those lands that are eligible for coal leasing. Lands not subject to leasing include (i) lands listed in § 3525.5; (ii) lands withdrawn from coal leasing or otherwise not subject to the provisions of the Mineral Leasing Act; (iii) land subject to a coal lease, permit or preference right lease application; and (iv) areas designated by BLM as primitive areas.

(h) *Areas nominated in national forest system.* The authorized officer will notify the Secretary of Agriculture of all lands nominated for leasing that are in the National Forest System.

(i) *Meeting on Nominations.* Prior to the selection of proposed tracts, the Bureau will hold a public meeting on nominations if the public has not had an opportunity to comment on the nominations in the land-use planning process.

§ 3525.3 Applications: Short-term sales.

§ 3525.3–1 Conditions of acceptance.

Applications for coal leases will be accepted only if the applicant shows that (a) the coal is needed to maintain an existing mining operation, or (b) the coal is needed as a reserve for production in the near future.

§ 3525.3–2 Preliminary data.

(a) Any application for coal lease filed pursuant to the regulations in this Chapter shall contain preliminary data to assist the authorized officer in making a technical evaluation and environmental assessment as described in § 3041.2.

(b) Such preliminary data shall include: (1) Such map, or maps, as may be available from State or Federal sources, on which shall be shown the topography of the land applied for, and on which the applicant shall show physical features and natural drainage patterns and existing roads, vehicular trails, and utility systems; the location of any proposed exploration operations, including seismic lines, drill holes, to the extent known, the location of any proposed mining operations and facilities, trenches, access roads or trails, and support facilities incidental thereto, including the approximate location and aerial extent of the areas to be used for pits, overburden, and tailings; and the location of water sources or other resources which may be used in the proposed operations or facilities incidental thereto.

(2) A narrative statement, including: (i) The anticipated scope, method, and schedule of exploration operations, including the types of exploration equipment to be used.

(ii) The method of mining anticipated, including the best available estimate of the mining sequence and production rate to be followed.

(iii) The relationship, if any, between the mining operations anticipated on the lands applied for and existing or planned mining operations, or facilities incidental thereto, on adjacent Federal or non-Federal lands.

(iv) A brief description, including suitable maps or aerial photographs as appropriate, of the existing land use within and adjacent to the lands applied for; and of known geologic, visual, cultural, or archaeological features; and the known habitat of fish and wildlife, particularly threatened and endangered species, that may be affected by the proposed or reasonably anticipated exploration or mining operations.

(v) A brief description of the proposed measures to be taken to maximize, control, or prevent fire, soil erosion, pollution of surface and ground water, damage to fish and wildlife or other natural resources, air and noise pollution, and hazards to public health and safety; to reclaim the surface; and to otherwise meet applicable laws and regulations, which the applicant wishes to have considered by the authorized officer.

(c) The applicant shall not enter upon the land for any operational purpose, except for casual use, without prior authorization. Casual use, as used in this section, means activities which do not cause significant surface disturbance or damage to lands, resources, and improvements, such as activities which do not include (1) the use of heavy equipment or explosives, or (2) vehicular movement off established roads and trails which causes such disturbance.

(d) The authorized officer, after reviewing the preliminary data contained in an application, and at any time during a technical examination and environmental assessment, may request additional information from the applicant.

§ 3525.4 Land-use plans.

(a) *Preparation of a land-use plan.* The Secretary may not issue a lease for coal deposits unless the lands containing coal deposits have been included in a comprehensive land-use plan and the sale is compatible with the plan. A comprehensive land-use plan shall:

(1) Use and observe the principles of multiple use and sustained yield set forth in the Federal Land Policy and Management Act of 1976;

(2) Use a systematic interdisciplinary approach to achieve integrated consideration of physical, biological, economic, and other sciences;

(3) Give priority to the designation and protection of areas of critical environmental concern;

(4) Rely, to the extent it is available, on the inventory of the public lands, their resources, and other values;

(5) Consider present and potential uses of the public lands;

(6) Consider the relative scarcity of the values involved and the availability of alternative means (including recycling) and sites for realization of those values;

(7) Weigh long-term benefits to the public against short-term benefits;

(8) Provide for compliance with applicable pollution control laws, including State and Federal air, water, noise, or other pollution standards or implementation plans; and

(9) Assess the amount of coal deposits contained in the land and shall, based on available information, identify the amount of coal that is recoverable by deep mining operations and the amount that is recoverable by surface mining operations.

(b) Planning responsibilities.

(1) The Bureau of Land Management will prepare plans for land under its jurisdiction in accordance with its procedures.

(2) The Department of Agriculture and other federal agencies with jurisdiction over lands where there is interest in coal mining will prepare land-use plans for those lands.

(3) If the Secretary finds that because of non-Federal interest in the surface, or because the coal resources are insufficient to justify the costs of a Federal comprehensive land use-plan, in an area, he may lease lands in that area if the lands containing the coal deposits have been included in either a comprehensive land-use plan prepared by the State within which the lands are located, or a land-use analysis prepared by the Secretary of the Interior.

(c) *Consultation and public hearing.* A plan will not be adequate for the purposes of this section unless the agency that prepares the plan has:

(1) Consulted appropriate State and local governments and the general public during the preparation of a plan; and

(2) Provided an opportunity for a public hearing on a proposed plan prior to its adoption if requested by any person who may be adversely affected by the adoption of the plan.

(d) *Hearing Requirements.* The agency that conducts the hearing shall: (1) Publish a notice of the hearing in a newspaper of general circulation at least once in each of two consecutive weeks in the affected geographical area;

(2) Provide an opportunity for testimony by anyone who desires to do so;

(3) Compile a complete transcript of the hearing if a request for a transcript is filed, in writing, at least 10 days prior to the hearing;

(4) Plans adopted prior to August 4, 1976 will be considered adequate if the public had an adequate opportunity to comment on the plan prior to its adoption, even if a formal hearing was not held.

(e) Availability of land use plans. The Bureau's land-use plan and multiple land-use management plans of other Federal agencies, as appropriate, will be available for inspection at the appropriate Bureau or agency office. Upon the request of the Governor of a State affected by coal lease actions, the State Director will make available for his review the land-use plans for that State, and, as appropriate, adjacent States.

§ 3525.5 Consent to leasing.

§ 3525.5–1 Consultation with Federal surface managing agency.

(a) The Secretary may not issue leases for lands the surface of which is under the jurisdiction of any agency other than the Department of the Interior unless the Federal agency has consented to the issuance of the lease, but any lease shall contain terms and conditions as the head of the agency may prescribe for the use and protection of the nonmineral interests in those lands.

(b) The Secretary must accept the conditions prescribed by the surface managing agency, but may prescribe additional terms and conditions that are consistant with the terms proposed by the surface managing agency to protect the interests of the United States and to safeguard the public welfare.

§ 3525.5–2 Consultation with Governors.

(a) *General consultation.* Prior to offering a coal lease for competitive sale, the Secretary shall consult the Governor of the State in which the land to be leased is located.

(b) *Consultation for surface mining proposals in national forest.* (1) Prior to offering a coal lease in a National Forest where the method of mining which achieves maximum economic recovery of the coal resources is surface mining, the Secretary shall submit the lease pro-

posal to the Governor of the State in which the coal deposits are found.

(2) The Secretary may not issue a lease in a National Forest for a lease which the method of mining that achieves maximum economic recovery is surface mining until at least 60 days after he notifies the Governor of the lease proposal.

(3) If the Governor fails to object to the lease proposal in 60 days, the Secretary may issue the lease. If within the sixty-day period the Governor notifies the Secretary, in writing, that he objects to the lease proposal, the Secretary may not approve the lease for six months from the date the Governor objects to the lease.

(4) The Governor may, during this six-month period, submit a written statement of reasons why the lease should not be issued, and the Secretary shall, on the basis of this statement, reconsider the lease proposal.

§3525.6 Notice of lease sale.

(a) *Notice of lease sale.* (1) Publication. Prior to the lease sale, the Authorized Officer shall publish in the FEDERAL REGISTER and in a newspaper(s) of general circulation in the county affected by the sale a notice of the proposed sale. The newspaper notice shall be published once a week for three consecutive weeks.

(2) The notice will show the time and place of sale whether the sale will be at public auction or by sealed bids, the description of the land, and the place where a detailed statement of the terms and conditions of the lease offer and the obligations of the successful bidder to pay for publication of that notice may be obtained.

(3) It will also contain a statement that sealed bids may not be modified or withdrawn unless the modifications or withdrawals are received prior to the time fixed for opening of the bids.

(4) The detailed statement will set forth the terms and conditions of the sale, including the manner in which the bids may be submitted.

(5) The detailed statement will also contain a warning to all bidders against violation of 18 U.S.C. 1860, which prohibits unlawful combination or intimidation of bidders.

(6) The detailed statement will specify that the Government reserves the right to reject any and all bids. If the sale is by public auction, the statement of terms and conditions of the sale will also specify that sealed bids may be submitted. If any bid be rejected, the deposit will be returned.

(7) The detailed statement will also contain a request for comments on the fair market value of the tracts to be sold. The notice shall state the address to where the comments on fair market value should be submitted.

§ 3525.7 Consultation with Attorney General.

(a) Subsequent to a lease sale, but prior to issuing a lease, the Secretary shall notify the Attorney General of the proposed lease issuance, the proposed lessee, normally the high bidder in a sale, and other relevant information. The Secretary may not issue a lease until 30 days after he notifies the Attorney General.

(b) The Secretary shall not issue the lease to the proposed lessee if, during this 30-day period, the Attorney General notifies the Secretary that the proposed lease issuance would create or maintain a situation inconsistent with the antitrust laws, which means:

(1) The Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890 (15 U.S.C. 1 et seq.), as amended;

(2) The Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (15 U.S.C., et seq.), as amended;

(3) The Federal Trade Commission Act (15 U.S.C. 41, et seq.), as amended;

(4) Sections 73 and 74 of the Act entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," approved August 27, 1894 (15 U.S.C. 8 and 9), as amended; or

(5) The Act of June 19, 1936, chapter 592 (15 U.S.C. 13, 13a, 13b, and 21a)."

(c) If the Attorney General notifies the Secretary that a lease should not be issued the Secretary may:

(1) Reject all other bids or may request the Attorney General in accordance with paragraph (a) of this section to consider the issuance of the proposed lease to the next qualified high bidder; or

(2) Issue the lease if, after he conducts a public hearing on the record in accordance with the Administrative Procedures Act, he determines that: (i) Issuance of the lease is necessary to carry out the purposes of the Federal Coal Leasing Amendments Act of 1975; (ii) Issuance of the lease is consistent with the public interest; and (iii) There are no reasonable alternatives to the issuance of the lease that are consistent with the Federal Coal Leasing Amendments Act of 1975, the antitrust laws and the public interest.

(d) If the Attorney General does not give a written reply to the notification in paragraph (a) of this section within 30 days, the Secretary may issue a lease without waiting for the advice of the Attorney General.

§ 3525.8 Award of leases.

(a) *Pre-sale evaluation.* Before the lease sale, the U.S. Geological Survey, considering public comments on fair market value and available geotechnical, engineering and economic data, shall make a coal resource economic evaluation of each tract to be sold and shall submit it to the authorized officer.

(b) *Notification of award.* Bids will be received only until the hour on the date specified in the notice of competitive leasing. All bids submitted after the hour will be rejected. The authorized officer will read all sealed bids. If the procedure calls for sealed bids followed by oral bids the oral bidding will begin at the level of the highest sealed bid received. After the oral bidding has ceased, the highest bid will be announced. The high bidder will be required to comply with 43 CFR § 3521.2–4 and 43 CFR § 3521.4–2. No decision to accept or reject any bid will be made at this time. The sale will be adjourned and the sale panel will convene to determine if the bid adequately reflects fair market value considering, among other factors, comments on fair market value. The recommendations of the panel will be sent to the authorized officer who, after the Department complies with § 3525.8 of this subpart, will make the final decision to accept a bid or reject all bids, as soon as possible after the sale date. The successful bidder will be notified in writing. The Department reserves the right to reject any and all bids but will not accept any bids which are less than the fair market value of the tract. The Department also reserves the right to offer a lease to the second high bidder if the successful bidder fails to execute the lease.

(c) *Intertract competition.* The use of bidding competition between tracts (intertract bidding) is hereby authorized when and if the Bureau of Land Management and the U.S. Geological Survey determine it is needed in the public interest. The authorization to utilize intertract competition does not preclude the use of any other form of competitive bidding procedure.

(d) *Compliance with notice of competitive lease offer.* (1) *Action by successful bidder.* Four copies of the lease will be sent to the successful bidder, who will be required not later than the 15th day after receipt thereof, or the 30th day after the date of the sale, whichever is later, to execute them, pay the balance of the bonus bid or the first payment of the deferred bonus payment on the first year's rental, and file a bond as required by Subpart 3504.

(2) *Death of bidder.* If the bidder dies before the lease is issued, there must be compliance with § 3502.8 of this chapter.

(e) *Deferred Bonus Payment Policy.* All competitive coal lease sales shall be held on a deferred bonus payment basis. In a deferred bonus payment the lessee shall pay the bonus payment in five (5) equal installments: The first installment shall be made as required by § 3525.8(d)(1). The balance shall be paid in equal annual installments due and payable on the first four anniversary dates of the lease. If a lease is relinquished or otherwise terminated, the unpaid remainder of the bid shall be immediately payable to the United States.

§ 3525.9 Documentation.

(a) *Preparation of documents.* Except as may be otherwise expressly set forth in this subpart, decisions and determinations of any appropriate authorized officer acting pursuant to this subpart with respect to issuance of leases, shall be in writing, shall set forth with reasonable specificity the facts and the rationale upon which such decisions or determinations are based, and shall be available for public inspection during normal business hours at the offices of such officer.

(b) *Availability of documents.* Except for documents which are subject to withholding under the Freedom of Information Act, any application for a lease, together with the proposed terms, conditions, and special stipulations and any preliminary data submitted under this subpart shall be available for public inspection in the appropriate BLM office. To allow for such public inspection, a notice of the availability of any such documents shall be prepared by the appropriate officer of the BLM and promptly posted at his office and mailed to the surface owner, if other than the United States, to appropriate Federal and State agencies, and to the clerk or other appropriate officer in the county in which the proposed operation is located for posting or publication in accordance with the procedures of that office. No final action with respect to such documents shall be taken for a period of 30 days after such posting and mailing. A copy of such notice shall be published by the applicant in a local newspaper of general circulation in the locality of the proposed operation at least once a week for four consecutive weeks.

(c) *Transcript of hearings.* Where a hearing under this subpart has been held on the record, a complete transcript, of the hearing, including any written comments submitted for the record, shall be kept and maintained available to the public during normal business hours at the appropriate Federal office under whose auspices such meeting is conducted, and shall be furnished at cost to any interested party.

GUY R. MARTIN,
Assistant Secretary of the Interior.

PART V

ENVIRONMENTAL PROTECTION AGENCY

■

AQUACULTURE PROJECTS

Requirements for Approval of Discharges

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 415-2]

SUBCHAPTER D—WATER PROGRAMS

PART 115—AQUACULTURE PROJECTS

Requirements for Approval of Discharges

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: Section 318(a) of the Federal Water Pollution Control Act (Pub. L. 92-500) authorizes the Administrator to permit, after public hearings, the discharge of pollutants to navigable waters associated with an approved aquaculture project under Federal or State supervision. The regulations provide the mechanism by which discharge of pollutants to navigable waters from an aquaculture project and a point source can be permitted. The regulations provide a means for beneficially utilizing nutrient and other specified pollutants for the growth, maintenance, or propagation of aquatic organisms. Crops which can be grown include both plant and animal species which can be used for human food directly or when processed used as an animal fodder.

DATE: The regulations shall be effective June 16, 1977.

FOR FURTHER INFORMATION CONTACT:

Kenneth M. Mackenthun, Director, Criteria and Standards Division (WH-585), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, 202-755-0100.

SUPPLEMENTARY INFORMATION: On June 13, 1974, Notice was published in the FEDERAL REGISTER (39 FR 20770) that the Environmental Protection Agency (EPA or Agency) was proposing regulations to permit the discharge of pollutants (as defined in the Federal Water Pollution Control Act, Pub. L. 92-500, section 502) to navigable waters in association with approved aquaculture projects, and the procedures for approval of the aquaculture projects. A complete description of the regulations was given in the June 13, 1974, Notice.

Only those aquaculture projects, as defined herein, conducted in navigable waters and receiving a discharge from a point source (as defined in section 502 of the Act) are to be permitted under section 318 permits. Aquaculture activities not covered by these regulations are those facilities operated in ponds, silos, and other structures not within navigable waters, and those facilities operated in navigable waters not receiving a discharge of a pollutant.

EPA received numerous comments on the proposed regulations and procedures which can be grouped as follows. The Agency responses to the comments, including modifications of the proposed regulations, are also set forth below.

1. A general concern was that the application fee of $1,000 as proposed was too high especially in light of the application fee for the National Pollutant Discharge Elimination System (NPDES) permit fee of $100 and the size of most aquaculture operations.

The Agency agrees and accordingly has set the fee for a section 318 permit application at $100.

2. There was general confusion regarding the applicability of a section 318 permit and what operations would be covered under an aquaculture permit.

It may be helpful to clarify the relationship between this program and the NPDES program provided for under section 402 of the Act. The NPDES program is administered either by the Federal government pursuant to the regulations contained in Part 125 of this subchapter or by States pursuant to the requirement of Part 124 of this subchapter. This program is not, in contrast to the program under section 402, one which may be administered by the States; all aquaculture permits are to be issued by the Federal Government.

In many instances both the NPDES permit and the aquaculture permit under this part will be required. For example, a discharger of heat in Maine to a lobster cultivation project will require a permit under this program for the discharge of heat to the project area during the winter months and will also require an NPDES permit during the summer period if the discharge is returned directly into navigable waters rather than to the project area. Also, many projects will currently have NPDES permits. In addition to applying for permits under this program the supplier of the pollutant may have to request modification or termination of his NPDES permit or give notification to the State or EPA Regional Office of the proposed changes to the discharge as required in §§ 124.45(a) and 125.22(a)(1) of this title. Failure to comply with the requirements of an aquaculture permit constitutes a violation of section 301 of the Act, and subjects the violator or violators to enforcement procedures set forth in section 309 of the Act.

New wording has been included in § 115.2(d) outlining which types of projects are subject to these regulations.

3. The adequacy of the public hearing procedures in the regulations was questioned. Some commenters felt that a public hearing is mandatory when issuing a section 318 permit and that such hearing must be held as an adjudicatory-type hearing.

The regulations, as proposed, require that a public hearing be held if an individual alleges that there will be an adverse impact resulting from the proposed project. No changes have been made in this section. Further, since the permit issuance action is not required by the statute to be "on the record," no adjudicatory hearing is required by the Administrative Procedures Act (5 U.S.C. 551 *et seq.*).

4. Since the permit program under section 318 will be Federally operated, certain commenters expressed a concern that State sovereignty will be contravened when designating siting of aquaculture projects. At issue is State designation of the water uses.

While section 401 is not applicable to discharges into the approved project, these (State certification) regulations provide that the State certifying agency, under section 401, will be asked to certify that additions of pollutants to navigable waters outside of the project area will not exceed permissible levels established under sections 301, 302, 306, and 307 of the Act that would be applicable if the designated project area were itself a point source.

5. Monitoring requirements imposed upon the aquaculture operator and pollutant supplier were alleged to be too stringent.

Monitoring requirements in the regulations are essentially identical for both the NPDES program and the section 318 permit system and, like NPDES monitoring, will be adapted to meet individual requirements.

6. The requirements for joint application and permitting procedures in the regulations were considered to be too cumbersome and would discourage aquaculture development.

Aquaculture projects using pollutants within navigable waters will be unique since discharges in excess of those permitted pursuant to effluent limitations are to be allowed within the project area. Therefore, in order to define, monitor, and control both the pollutants added to the project and those migrating or being discharged from the project area, it is necessary that both the supplier of pollutants and the aquaculture operator must apply for a joint permit and each be responsible for their discharges to navigable waters. As discussed in §§ 115.10(f) and 115.12, effluent limitations apply to both the discharges to the aquaculture area and to those pollutants discharged or migrating from the aquaculture area.

No Inflationary Impact Statement is required by Executive Order 11821 for these proposed regulations since the economic effects will not exceed the criteria established by EPA and approved by the Office of Management and Budget for the preparation of such statements.

In consideration of the foregoing, 40 CFR, Chapter 1, Subchapter D is hereby amended to add a new Part 115, "Requirements for Approval of Discharges to Aquaculture Projects," and is to read as set forth below.

The regulations shall be effective June 16, 1977.

Dated: April 25, 1977.

DOUGLAS M. COSTLE,
Administrator.

Subpart A—General

Sec.
115.1 Definitions.
115.2 Purpose and scope.
115.3 Approval of discharges to aquaculture projects.
115.4 Delegation of authority.

Subpart B—Processing of Permits

115.5 General provisions.
115.6 Application for a permit.

Sec.
115.7 Access to facilities and further information during evaluation of the application.
115.8 Distribution of application and permit.
115.9 State certification.

Subpart C—Criteria, Terms and Conditions of Permits

115.10 Criteria for issuance of permits.
115.11 Terms and conditions of permits.
115.12 Effluent limitations in permits.
115.13 Monitoring, recording and reporting.

Subpart D—Notice and Public Participation

115.14 Formulation of tentative determinations and draft permits.
115.15 Public notice.
115.16 Public hearings.
115.17 Public access to information.

AUTHORITY: Secs. 318, 501, Federal Water Pollution Control Act, as amended (33 U.S.C. 1328, 1361); Pub.L. 92-500.

Subpart A—General

§ 115.1 Definitions.

(a) All terms used in this part but not defined herein shall have the meaning given them in section 502 of the Act.

(b) The term "Act" means the Federal Water Pollution Control Act, as amended; 33 U.S.C. 1251, et seq.

(c) The term "discharge of pollutants associated with an aquaculture project" means the addition or discharge of specific pollutants in a controlled manner from a point source to an aquaculture project to enhance the growth or propagation of the species under culture.

(d) The term "aquaculture project" means a defined managed water area which uses discharges of pollutants into the designated project area for the maintenance, propagation and/or production of harvestable freshwater, estuarine, or marine plant or animal species.

(e) The term "designated project area" means those portions of the navigable waters within which the applicant for a permit pursuant to this part proposes to confine the cultivated species, utilizing a method or plan of operation (including, but not limited to, physical confinement) which, on the basis of reliable scientific evidence, is expected to ensure that specific individual organisms comprising an aquaculture crop will enjoy increased growth attributable to the discharge of pollutants permitted under this part, and suffer harvesting within a defined geographic area.

(f) The term "Administrator" means the Administrator of the U.S. Environmental Protection Agency.

(g) The term "Regional Administrator" means one of the ten Regional Administrators of the U.S. Environmental Protection Agency.

(h) The term "applicant" means an applicant for a permit for a discharge of pollutants to an aquaculture project and the operation of the aquaculture project.

(i) The term "operator" means the person or persons operating the aquaculture project in the designated project area.

(j) The term "supplier of the pollutant" means the person or persons operating the point source from which the discharge of pollutants associated with an aquaculture project are made.

(k) The term "permit" means any permit or equivalent document or requirement issued to regulate the discharge of pollutants to an aquaculture project.

§ 115.2 Purpose and scope.

(a) The regulations in this part establish the procedures and guidelines for approval of an aquaculture project and for approval of any discharge of pollutants associated with an aquaculture project.

(b) The regulations are intended to authorize, on a selective basis, controlled discharges which would otherwise be unlawful under the Act in order to determine, in a carefully supervised manner, the existing and potential feasibility of utilizing pollutants to grow aquatic organisms which can be harvested and used beneficially, and to encourage such projects, while at the same time protecting other beneficial uses of the waters.

(c) The regulations in this part do not apply to those aquaculture facilities such as fish hatcheries, fish farms and similar projects which do not utilize discharges of wastes from a separate industrial or municipal point source for the maintenance, propagation and/or production of harvestable freshmater, marine or estuarine organisms. Such projects are regulated under Title IV of the Act.

(d) The regulations pertain only to those projects which are located in navigable waters and into which there is a discharge of pollutants as defined in section 502 of the Act.

§ 115.3 Approval of discharges to aquaculture projects.

(a) The Regional Administrator shall grant a permit authorizing a discharge if he determines that:

(1) Such discharge is associated with an aquaculture project, and

(2) The discharge and the aquaculture project meet the requirements of the Act and of this part.

(b) The granting of a permit for a discharge pursuant to this part will mean that the aquaculture project with which the discharge is associated is an approved aquaculture project within the meaning of section 318(a) of the Act.

(c) All discharges of pollutants or combinations of pollutants from all point sources into the navigable waters, the waters of the contiguous zone or the ocean are unlawful and subject to the penalties provided by the Act, unless the discharger:

(1) Has a permit issued pursuant to this part, part 125 of this chapter, or by a State which has an approved National Pollutant Discharge Elimination System program pursuant to part 124 of this chapter, or

(2) Is specifically relieved by law or regulation from the obligation of obtaining a permit.

§ 115.4 Delegation of authority.

(a) The authority to issue and condition permits, to deny applications for permits, or to revoke permits for discharges pursuant to this part and section 318 of the Act is hereby delegated to each of the Regional Administrators for the area which he administers.

(b) The delegation of authority at 40 CFR 125.5 as relating to section 308 (a) and (b) of the Act shall be applicable to this Part.

Subpart B—Processing of Permits

§ 115.5 General provisions.

(a) The decision whether to issue a permit authorizing a discharge or what conditions should be placed on any such permit shall be based upon an evaluation of how such discharge will meet applicable requirements under the Act and this part.

(b) The expected impact of a proposed discharge or the present impact of an existing discharge, in connection with an aquaculture project on the quality and uses of the receiving body of water, also shall be considered. The objections of any State or interstate agency whose waters may be affected by the discharge shall be duly considered when making any permit decision, whereas pursuant to § 115.9 of this subpart State certification of discharges from the designated project area is provided for.

§ 115.6 Application for a permit.

(a) An application for a permit shall be prepared in accordance with the application form prescribed therefor by the Administrator as in effect on the date of filing of the application.

(b) An applicant for a permit may secure the required application forms from the Regional Administrator. The original and six copies of the application forms must be filed with the Regional Administrator of the EPA Region which includes the State in which the aquaculture project is operating or will operate.

(c) An application submitted by a corporation must be signed by a principal executive officer of at least the level of vice president, or his duly authorized representative, if such representative is responsible for the overall operation of the facility from which the discharge described in the application form originates, or the aquaculture project. In the case of a partnership or a sole proprietorship, the application must be signed by a general partner or the proprietor, respectively. In the case of a municipality, State, Federal or other public entity, the application must be signed by either a principal executive officer, ranking elected official, or other duly authorized employee.

(d) Application for a permit or renewal of a permit shall be accompanied by a payment of $100.00 to cover the cost of processing the application and project surveillance.

(1) Checks and money orders shall be payable to the Environmental Protection Agency.

(2) Agencies or instrumentalities of Federal, State or local governments will not be required to pay the fee provided for in this paragraph.

(e) The application for approval of a discharge to an aquaculture project shall be made jointly by both the supplier of

the pollutant and by the operator. The supplier and the operator may be one person. Any permit issued shall be issued jointly.

(f) Applications for discharges to aquaculture projects presently in existence shall be made within 180 days after the date of promulgation of these regulations.

(g) Any person who plans to begin a discharge to an aquaculture project or plans to establish an aquaculture project shall apply for a permit no later than 180 days in advance of the date on which the discharge or the project is to be commenced unless permission for a later application date has been granted by the Regional Administrator.

(h) In addition to the information expressly required to be included in the application, there shall be added any other information the applicant believes necessary to provide a complete description of the project.

(i) Information required need be given only insofar as it is known or reasonably available. In the even any required information is omitted, the applicant shall provide the information that it does have or could reasonably obtain and an explanation of the efforts made to obtain such information.

(j) An application for a permit shall include, at a minimum, the identification of the kind and quantity of pollutants to be used in the aquaculture project.

§ 115.7 Access to facilities and further information during evaluation of the application.

Permit application forms are designed to fit the normal situation for most aquaculture projects in the United States. In many cases, however, further information and site visits may be necessary in order to evaluate the project completely and accurately. When the Regional Administrator determines that either further information or a site visit is necessary in order for the Environmental Protection Agency to evaluate the aquaculture project, he shall so notify the applicant setting forth a date, which is no later than 60 days from the date of notification by which arrangements must be made for receipt of the requested information and/or scheduling of the site visit. In the event that a satisfactory response is not received, the permit may be denied and the applicant so notified.

§ 115.8 Distribution of application and permit.

(a) When an application for a permit is received, the Regional Administrator shall determine if the applicant has provided all of the information required by the application form and by this part.

(b) In order to ensure that the Secretary of the Army, acting through the Chief of Engineers, has adequate time to evaluate the impact of the proposed discharge on anchorage and navigation, the Regional Administrator will forward to the District Engineer in the appropriate district one copy of the application form immediately upon its receipt in the Regional Office in completed form. Accompanying the application will be notice that the District Engineer has a stated number of days to evaluate the impact of granting such permit upon anchorage and navigation and to advise the Regional Administrator of his evaluation. District Engineers of the Corps of Engineers will normally be given thirty days for such evaluation. Where the Regional Administrator finds that less time should be allowed, he shall so advise the District Engineer of such lesser period of time and specify his reasons. Failure of the District Engineer to answer within the allotted period of time will be deemed to be a statement that the District Engineer does not choose to comment on the application. Where the District Engineer advises the Regional Administrator that anchorage and navigation of any of the navigable waters would be substantially impaired by the granting of a permit, such permit will be denied and the applicant shall be so notified. Where the District Engineer advises the Regional Administrator that the imposition of specified conditions upon the permit is necessary to avoid any substantial impairment of any of the navigable waters, the Regional Administrator shall include in the permit the conditions so specified by the District Engineer. Where the District Engineer notifies the Regional Administrator that additional time is needed for his evaluation, such additional time shall be granted where the Regional Administrator determines that the public interest warrants the extension of time to comment.

(c) Complete copies of all applications for discharge of pollutants in association with an aquaculture project filed with the Environmental Protection Agency subsequent to final promulgation of these regulations shall be furnished to the Department of Interior, Department of Commerce, Department of Health, Education, and Welfare, and the Food and Drug Administration for comment, provided that these agencies may waive their right to receive any such applications. The Regional Administrator shall meet with appropriate officials of the Department of Interior and Department of Commerce, Department of Health, Education and Welfare, and the Food and Drug Administration in order to reach agreement as to which existing application forms those agencies are to receive. When an application is transmitted to these agencies, the Regional Administrator shall notify the agencies that they have a stated number of days in which to evaluate the impact of granting such permit upon the fish, shellfish, wildlife resources or food resources of the State in which the discharge will occur, and to advise the Regional Administrator of such evaluations. The normal period of time for such evaluation will be 60 days. Failure of such agencies to advise the Regional Administrator of their evaluation within the allotted period of time will be deemed to be a statement that the agencies do not choose to comment on the application. Where the agencies advise the Regional Administrator that the imposition of specified conditions upon the permit is necessary to avoid substantial impairment of fish, shellfish, wildlife resources or food resources, the Regional Administrator may include in the permit the conditions specified by the agencies. Where such agencies request additional time for evaluation, such additional time will be granted where the Regional Administrator determines that the public interest warrants the extension of time to comment.

(d) Upon receipt of an application from a Federal agency or instrumentality, the Regional Administrator shall make one copy of the application form available to the State water pollution control agency for the State in which the aquaculture project will operate. The State may comment on whether a permit for such aquaculture project shall be granted or if any conditions should be applied to any permit that might be issued. The State shall indicate conditions it believes are necessary in order that the aquaculture project will comply with sections 301, 302, 306 and 307 of the Act. Such comments shall be received within thirty days from receipt of the application form unless the Regional Administrator allows additional time.

(e) The Regional Administrator shall assist applicants for permits in coordinating the requirements of the Act and this part with those of appropriate public health agencies.

(f) If a permit is issued, a copy of the permit and, if not previously transmitted, a copy of the application form shall be transmitted to the State in which the discharge is located. Copies of these documents shall be available for inspection and reproduction by the public in the appropriate Regional Office of the Environmental Protection Agency.

§ 115.9 State certification.

(a) No permit shall be granted until a State certification has been obtained, or has been waived, that discharges from the designated project area would meet the requirements of sections 301, 302, 306 and 307 as if the designated project area were a point source. Pursuant to State certification required by this subsection a statement indicating that the project will be in compliance with State regulations on wildlife and on the introduction or management of wildlife or other biological material is required. A waiver occurs when the certifying agency fails or refuses to act on a request for certification within a reasonable period of time (which shall not exceed one year) after receipt of such request. Three months shall generally be considered to be a reasonable period of time. If, however, special circumstances require that action on a permit application be taken within a more limited period of time, the Regional Administrator may specify a lesser period of time which he determines to be reasonable. He shall then advise the certifying agency of the need for action by a particular date, and that if certification is not received by the

date established, it will be considered that the requirement for certification has been waived. Similarly, if it appears that circumstances may reasonably require a period of time longer than three months, the Regional Administrator may afford the certifying agency up to one year to provide the required certification before determining that a waiver has occurred. Where such extension of time is made at the request of the certifying agency, the request must be in writing and must include the reasons for the request.

(b) Upon receipt of an application which does not include a State certification, the Regional Administrator will make available one copy of the application form to the State water pollution control agency for the State in which the aquaculture project operates or will operate. The Regional Administrator shall advise the State agency that the State must:

(1) Certify that the aquaculture project will comply with the applicable provisions of sections 301, 302, 306, and 307; or

(2) Certify that there are no applicable limitations under sections 301, 302, 306 and 307; or

(3) Deny such certification; or

(4) Waive its right to certify.

The Regional Administrator shall specify a reasonable period of time within which such certification or denial must be received or a waiver will be deemed to have occurred.

Subpart C—Criteria, Terms and Conditions of Permits

§ 115.10 Criteria for issuance of permits.

(a) No permit shall be issued unless:

(1) The Regional Administrator determines that the aquaculture project:

(i) Is intended by the project operator to produce a crop which has commercial value or will be used as food or otherwise in the development of a harvestable crop in the designated project area having commercial value (or is intended to be operated for research into possible production of such a crop); and

(ii) Does not occupy a designated project area which is larger than can be economically operated for the crop under cultivation;

(2) The applicant has demonstrated, to the satisfaction of the Regional Administrator, that the use of the pollutant to be discharged to the acquaculture project will result in an increased harvest of the organisms under culture over what would naturally occur in the area;

(3) The applicant has demonstrated to the satisfaction of the Regional Administrator that, if the species to be cultivated in the aquaculture project is not indigenous to the immediate geographical area, there will be minimal deleterious effects on the flora and fauna which are indigenous to the area, that the total commercial value of the introduced species is at least equal to that of the displaced or affected indigenous species (or is intended to research into possible production of such a crop), and that there is minimal probability that the introduced species will serve as a carrier or vector of disease to man or to indigenous flora or fauna;

(4) The Regional Administrator determines that the crop will not have a significant potential for human health hazards resulting from its consumption;

(5) The Regional Administrator determines that migration of pollutants from the designated project area to water outside of the aquaculture project will not violate water quality standards or violate effluent limitations applicable to the supplier of the pollutant established pursuant to sections 301, 302, 306, and 307 of the Act as if the aquaculture project were itself a point source. The approval of an aquaculture project shall not result in the enlargement of a pre-existing mixing zone area beyond that which had been designated by the State for the original discharge.

(b) No permit shall be issued for any aquaculture project in conflict with a plan or an amendment to a plan approved pursuant to section 208(b) of the Act.

(c) No permit shall be issued for any aquaculture project located in the territorial sea, the waters of the contiguous zone, or the oceans, except in conformity with guidelines issued under section 403(c) of the Act.

(d) Designated project areas shall in no event include a portion of a body of water such that a substantial portion of the biota indigenous thereto will be exposed to the conditions obtained within the designated project area. For example, the designated project area shall not include the entire width of a watercourse, since all organisms indigenous to that watercourse might be subjected to discharges of pollutants that would, except for the provisions of section 318 of the Act, violate section 301 of the Act.

(e) Any modifications caused by the construction or creation of a reef, barrier or containment structure shall not unduly alter the tidal regimen of an estuary or interfere with migrations of unconfined aquatic species.

(f) Any pollutants not required by or beneficial to the aquaculture crop shall not exceed effluent limitations established for such pollutants pursuant to the Act when entering the designated project area.

§ 115.11 Terms and conditions of permits.

Pursuant to § 125.22 of this chapter, the Regional Administrator shall ensure that the terms and conditions of the permit are identical to those which would be placed in a permit issued pursuant to section 402 of the Act; and, in addition, the Regional Administrator shall ensure that the terms and conditions provide for and ensure:

(a) The right of the Regional Administrator or his designee to sample, and inspect, at reasonable times, the crop being grown in the designated project area;

(b) Permits are subject to periodic review and if the project is not in compliance with these regulations, the permit may be suspended. Permits will not be issued for a period of more than five years, which may be renewed;

(c) The issuance of a permit to discharge pollutants in association with an aquaculture project shall not relieve the permittee from any public or private liability associated with the aquaculture project.

§ 115.12 Effluent limitations in permits.

In the application of effluent standards and limitations, water quality standards, and other applicable requirements, the Regional Administrator shall specify for each permit the average and maximum daily quantitative limitations for the level of pollutants in the authorized discharge in terms of weights and concentrations, or in the case of pH, temperature, radiation, and any other pollutants not appropriately expressed by weight, by an appropriate unit of measure based upon usual scientific practice. The effluent limitations proposed by the Regional Administrator shall apply to both the discharger of pollutants to the project and to the discharge of pollutants from the aquaculture area.

§ 115.13 Monitoring, recording, and reporting.

Any permit shall be subject to such monitoring requirements as may be reasonably required by the Regional Administrator, including the installation, use, and maintenance of monitoring equipment or methods (including, where appropriate, biological monitoring methods). Such monitoring, recording and reporting requirements shall be the same as those that would be required pursuant to § 125.27 b (2), and (3); and, (c), (d), and (e) of this chapter for permits issued pursuant to section 402 of the Act.

Subpart D—Notice and Public Participation

§ 115.14 Formulation of tentative determinations and draft permits.

(a) The Regional Administrator shall formulate and prepare tentative determinations with respect to a permit in advance of public notice of the proposed issuance or denial of the permit. Such tentative determinations shall include at least the following:

(1) A proposed determination to issue or deny a permit for the discharge to and from the aquaculture project described in the application; and,

(2) If the determination proposed in paragraph (a)(1) of this section is to issue the permit, the following additional tentative determinations should be included:

(i) Proposed effluent limitations for those pollutants to be utilized.

(ii) A brief description of any other proposed special conditions which will have a significant impact upon the discharge from the aquaculture project described in the application, and

(iii) Proposed effluent limitations on all other pollutants to be discharged from the point source.

(b) The Regional Administrator shall organize the tentative determinations prepared pursuant to paragraph (a) of this section into a draft permit.

§ 115.15 Public notice.

Public notice of every complete application for a permit shall be circulated in a manner designated to inform interested and potentially interested persons of the aquaculture project and of the proposed determination to issue or to deny a permit, or the intention to hold a hearing on the matter. Procedures for the circulation of public notice shall include at least the following:

(1) Notice shall be circulated within the geographical area of the proposed aquaculture project. Such circulation shall include at least one of the following:

(i) Posting in the post office and public places of the municipality nearest the premises of the applicant in which the aquaculture project is located; or

(ii) Posting near the entrance to the applicant's premises; or

(iii) Publishing in local newspapers and periodicals, or if appropriate, in a daily newspaper of general circulation; except that public notice of hearings shall be published in at least one newspaper of general circulation within the geographical area of the discharge in all cases.

(2) Notice shall be mailed to the applicant and to any person or group upon request.

(3) The Regional Administrator shall place the name of any persons or group upon request on a mailing list to receive copies of notices for all applications within the State or within a certain geographical area.

(4) The Regional Administrator shall notify Federal and State fish, shellfish, and wildlife resource agencies and other appropriate government agencies of each completed application for a permit and of hearings and shall provide such agencies an opportunity to submit their written views and recommendations on each completed application.

(b)(1) Where notice is given of an application for a permit, the Regional Administrator shall provide a period of not less than thirty days following the date of the public notice during which interested persons may submit their written views concerning the tentative determinations or may request that a hearing be held. All written comments submitted during the thirty-day comment period shall be retained by the Regional Administrator and considered in the formulation of his final determinations with respect to the application. Extensions of time for the receipt of comments following the end of the comment period may be granted by the Regional Administrator when the public interest warrants.

(2) Where notice is given of a hearing, the Regional Administrator shall provide a period of not less than thirty days following the date of the public notice during which interested persons may prepare themselves for the hearing.

(c) The contents of public notice of an application shall include at least the following:

(1) The name, address, and telephone number of the Regional Office issuing the public notice;

(2) The name and address of each applicant;

(3) A brief description of each applicant's activities or operations which utilize the discharge described in the application including a statement of whether the application will result in a violation of water quality standard outside of the project area;

(4) The name of the waterway in which the aquaculture project is to be constructed;

(5) A brief description of the procedures to be followed in the formulation of final determinations, including thirty-day comment period required by paragraph (b) of this section and any other means by which interested persons may influence or comment upon those determinations;

(6) A statement of the tentative determination made pursuant to § 115.14 of this part; and

(7) A comparison of the discharges to be permitted and those limitations which would otherwise apply.

(d) The contents of public notices of any hearing shall include at least the following:

(1) The name, address, and telephone number of the Regional Office holding the hearing;

(2) The name and address of each applicant whose application will be considered at the hearing;

(3) The name of the waterway and a short description of the location where the aquaculture project is or will be located;

(4) A brief reference to the public notice issued for each application, including the Standard Industrial Code (SIC) number of the discharge source, if applicable, and the date of the public notice of the application;

(5) Information regarding the time and location for the hearing;

(6) The purpose of the hearing;

(7) The address and telephone number of premises at which interested persons may obtain further information, request a copy of each draft permit prepared pursuant to section 115.14 of this part, and inspect and copy forms and related documents; and

(8) Where applicable, a statement that confidential information deemed confidential under 5 U.S.C. 552(b)(4) or 33 U.S.C. 1318 has been received may be used to determine some of the conditions for the permit.

(e) The Regional Administrator, at his discretion, may include in any notice of application for a permit under paragraph (c) of this section a notice of hearing in accordance with paragraph (d) of this section, whether or not any request for such hearing shall have been submitted to him.

(f) If individual States, in connection with applications for certification required by § 115.9 of this part, wish to enter into agreement for joint Federal-State public notice concerning permits, the Regional Administrator may, after consulting with the headquarters of the Environmental Protection Agency, approve mutually satisfactory agreements consistent with this section.

§ 115.16 Public hearings.

(a) Any applicable affected person may, within thirty days of compliance by the Regional Administrator with the provisions of § 115.15, object to the issuance of the permit described in the public notice, and may request a public hearing.

(b) Within 10 days of receipt of any request for a public hearing under paragraph (a) of this section by any person who alleges facts which, if true, would be relevant to the decision to grant or deny the permit, the Regional Administrator shall call a public hearing, to be held as near as practicable to the location of the proposed aquaculture project. Notice of any such hearing shall be given under § 115.15 and shall be given not less than 10 working days prior to the time scheduled for the hearing. The Regional Administrator may convene a public hearing in any other case in which he determines there is substantial public interest in, or opposition to, the proposed permit, including any case in which his tentative determination is to deny the permit.

(c) Hearings convened pursuant to paragraph (b) of this section shall be conducted before a presiding officer to be designated by the Regional Administrator. The presiding officer shall have the authority to limit the introduction of irrelevant or repetitious evidence, and to limit cross-examination. Following the conclusion of the hearing, the presiding officer shall, within 15 working days, submit written findings and recommendations as to whether the tentative determination of the Regional Administrator should be adhered to, or modified in any respect.

§ 115.17 Public access to information.

Certifications issued pursuant to § 115.9, the comments of all governmental agencies on a permit application, and all information and data provided by an applicant or permittee identifying the nature of the aquaculture project shall be available to the public in accordance with the requirements of section 308(b) of the Act.

COMMODITY FUTURES TRADING COMMISSION

■

REPORTS—GENERAL PROVISIONS

Adoption of Amendments to the Reporting Requirements

Title 17—Commodity and Securities Exchanges

CHAPTER I—COMMODITY FUTURES TRADING COMMISSION

PART 15—REPORTS—GENERAL PROVISIONS

Adoption of Amendments to the Reporting Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission ("the Commission") has found that the growth in trading volume and open interest in certain markets has resulted in the filing of an ever increasing number of reports that are not necessary to the Commission's market surveillance program.

The Commission has therefore adopted amendments to its reporting regulations under the Commodity Exchange Act, as amended ("Act"), to raise the position levels in certain commodities at which series '03 reports must be filed by traders and series '01 reports must be filed by futures commission merchants ("FCM's") and foreign brokers.

The intended effect of this action is to alleviate an unnecessary reporting burden on the public and to reduce the amount of paperwork processed by the Commission.

EFFECTIVE DATE: June 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Lamont L. Reese, Office of the Chief Economist, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, 202–254–7406.

SUPPLEMENTARY INFORMATION: Reporting levels are set in various commodities to ensure that the Commission receives adequate information to carry out its market surveillance programs, which include detection and prevention of market congestion and price manipulation and enforcement of Commission and exchange imposed speculative limits on trading and net positions.[1] Generally, the reporting levels refer to the number of open positions in a commodity futures contract on any one contract market owned or controlled by a trader that require the trader and the FCM or foreign broker of which he is a customer to file reports with the Commission. The FCM or foreign broker identifies the trader on a Form 102 and reports on the series '01 reports all positions carried for the trader that equal or exceed the reporting level in any community. The trader, if his position is equal to or in excess of the reporting level, is required to report on a series '03 report all positions he owns or controls as well as trades and deliveries in the subject commodity.

Upon review of the information it currently collects, the Commission has found that the growth in trading volume and open interest in certain markets has resulted in the filing of an ever increasing number of reports that are not necessary to the Commission's market surveillance program. Accordingly, the Commission has determined that reporting levels should be raised for the following commodities: in wheat, corn and soybeans, from 200,000 bushels to 500,000 bushels; in silver bullion, from 50 contracts to 100 contracts; in soybean oil, soybean meal, cattle, hogs, sugar, copper, gold and silver coins, from 25 contracts to 50 contracts;[2] reporting levels in all other commodities are not changed. In selecting the new levels, the Commission has considered its current information requirements for surveillance purposes and its anticipated requirements if the series '03 reports are eliminated as the Commission has proposed.[3] Reporting levels at which merchandisers, processors, and dealers in certain commodities must file series '04 reports are unaffected by these amendments. Regulation 15.03(b), as amended, 41 FR 4811 (November 2, 1976).

In consideration of the foregoing, the Commission, pursuant to its authority under sections 4g(1), 4i, and 8a(5) of the Act, 7 U.S.C. 6g(1), 6i and 12a(5) (Supp. V, 1975), hereby amends Part 15 of the Code of Federal Regulations as follows:

§ 15.03 Quantities fixed for reporting.

(a) The quantities fixed for the purpose of reports filed under Parts 17, 18 and § 19.02 of this Chapter are as follows:

Commodity:	
Wheat (bushel)	500,000
Corn (bushel)	500,000
Soybeans (bushel)	500,000
Oats (bushel)	200,000
Rye (bushel)	200,000
Barley (bushel)	200,000
Flaxseed (bushel)	200,000
Soybean oil (contract)	50
Soybean meal (contract)	50
Live cattle (contract)	50
Hogs (contract)	50
Sugar (contract)	50
Copper (contract)	50
Gold (contract)	50
Silver coins (contract)	50
Silver bullion (contract)	100
Cotton (bales)	5,000
All other commodities (contracts)	25

* * * * *

The foregoing amendment is adopted effective June 1, 1977. The Commission finds that the foregoing action relieves a burden heretofore imposed and, therefore, that the notice and other public procedures called for by 5 U.S.C. 553 are not required.

Issued in Washington, D.C., on May 12, 1977.

By the Commission.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

[FR Doc.77-14024 Filed 5-16-77;8:45 am]

[1] The following commodities are those for which Commission speculative limits are in effect: wheat, grains (including oats, barley and flaxseed), corn, soybeans, rye, eggs, cotton, and potatoes. 17 CFR Part 150 (1976), as amended, 41 FR 35060 (August 19, 1976).

[2] Soybean oil, soybean meal, cattle, hogs, sugar, copper, gold and silver coins were, prior to this amendment, included in the "all other commodities" category in § 15.03(a).

[3] See 41 FR 3050 (July 23, 1976).

"THE FEDERAL REGISTER—WHAT IT IS AND HOW TO USE IT"

Reservations for July are being accepted for the free Wednesday workshops on how to use the FEDERAL REGISTER. The sessions are held at 1100 L St. N.W., Washington, D.C. in Room 9409, from 9 to 11:30 a.m.

Each session includes a brief history of the FEDERAL REGISTER, the difference between legislation and regulations, the relationship of the FEDERAL REGISTER to the Code of Federal Regulations, the elements of a typical FEDERAL REGISTER document, and an introduction to the finding aids.

FOR RESERVATIONS call: Dean Smith, 202–523–5282.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

Executive Order 11985 • May 13, 1977

United States Foreign Intelligence Activities

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including the National Security Act of 1947, as amended, and as President of the United States of America, in order to reflect certain organizational changes for the control and direction of intelligence activities, it is hereby ordered as follows:

SECTION 1. The Table of Contents of Executive Order No. 11905 of February 18, 1976, is amended by deleting "Committee on Foreign Intelligence" and "Operations Advisory Group" and substituting therefor "NSC Policy Review Committee" and "NSC Special Coordination Committee" respectively.

SEC. 2. Section 2(d) of Executive Order No. 11905 is amended by deleting "Committee on Foreign Intelligence" and substituting therefor "NSC Policy Review Committee".

SEC. 3. Section 3(a) of Executive Order No. 11905 is amended by adding thereto the following new paragraph:

"(4) The National Security Council Policy Review Committee and the National Security Council Special Coordination Committee assist the National Security Council in the performance of its functions. Membership on each committee includes, in addition to the National Security Council, such members as the President may direct. In addition to the performance of policy development and coordination responsibilities which may be assigned by the President, these committees are responsible for those duties specified by this Order.".

SEC. 4. Section 3(b) of Executive Order No. 11905 is amended as follows:

(a) In the title, delete *"Committee on Foreign Intelligence"* and substitute therefor *"NSC Policy Review Committee"*.

(b) Delete paragraph (1) and substitute the following new paragraph:

"(1) Whenever the NSC Policy Review Committee, hereinafter referred to as the PRC, performs the functions assigned in this Order, the PRC shall be chaired by the Director of Central Intelligence, hereinafter referred to as the DCI, and include as members the Deputy Secretary of Defense, the Deputy Assistant to the President for National Security Affairs, and a senior representative of the Secretary of State.".

(c) In paragraphs (2) through (5), delete "CFI" wherever it occurs and substitute therefor "PRC".

(d) Insert in paragraph (3) immediately after the word "supported" the words "in its functions under this Order".

(e) Insert in paragraph (4) immediately after the last word the words "under this Order".

(f) Insert in paragraph (5) immediately before the word "may" the words "under this Order".

SEC. 5. Section 3(c) of Executive Order No. 11905 is amended as follows:

(a) In the title, delete "*The Operations Advisory Group*" and substitute therefor "*NSC Special Coordination Committee*".

(b) Delete paragraph (1) and substitute therefor the following new paragraph:

"(1) Whenever the NSC Special Coordination Committee, hereinafter referred to as the SCC, meets to perform the functions assigned in this Order, the SCC shall be chaired by the Assistant to the President for National Security Affairs and include the Secretary of State, Secretary of Defense, Director of Central Intelligence and Chairman of the Joint Chiefs of Staff, as members, and the Attorney General and Director of the Office of Management and Budget, as observers.".

(c) In paragraphs (2) through (4), delete "Operations Group" wherever it occurs and substitute therefor "SCC".

SEC. 6. Section 6 of Executive Order No. 11905 is amended as follows:

(a) In paragraph (1) of subsection (a), delete "The members of the Oversight Board may also serve on the President's Foreign Intelligence Advisory Board (Executive Order No. 11460 of March 20, 1969).".

(b) Delete subsection (f).

SEC. 7. Section 8(a) of Executive Order No. 11905 is amended by deleting the words "Committee on Foreign Intelligence" and substituting therefor "PRC".

Jimmy Carter

THE WHITE HOUSE,

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg Z; FC-0060, FC-0061, FC-0062, FC-0063, FC-0064, and FC-0065]

PART 226—TRUTH IN LENDING

Official Staff Interpretations

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Official Staff Interpretation(s).

SUMMARY: The Board is publishing the following official staff interpretations of Regulation Z, issued by a duly authorized official of the Division of Consumer Affairs.

EFFECTIVE DATE: May 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. Edwin Schmelzer, Chief, Fair Credit Practices Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-2412).

SUPPLEMENTARY INFORMATION: (1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitation stated in 12 CFR Part 261.6.

(2) Official staff interpretations may be reconsidered upon request of interested parties and in accordance with 12 CFR Part 226.1(d)(2). Every request for reconsideration should clearly identify the number of the official staff interpretation in question, and should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

§ 226.4(c) and § 226.401—Immediate termination of service is not required as a sine qua non for preserving the characterization of a charge as being one for late payment.

APRIL 4, 1977.

This is in response to your letter of • • •, wherein you requested an official staff interpretation of § 226.4(c) of Regulation Z. Your client retails residential fuel oil, and some of his customers are on account with payment due upon receipt of the invoice. Of those customers, there are a few who are slow to pay their bills, and your client wishes to impose a late charge in order to insure prompt payment. Your client does not want the imposition of a late charge to be construed as a finance charge under § 226.4 of the regulation.

In your letter, and in subsequent telephone conversations with staff, you express concern that a literal reading of Board Interpretation of § 226.401 would require your client in all cases to terminate service to customers who are intermittently delinquent in paying their bills. Since your client provides fuel oil for home heating, he views such a requirement as particularly harsh in its effect.

Public Information Letters 797 and 838 discuss application of § 226.4(c) to situations where there is a credit plan already in effect. There staff advised that if a creditor continues to assess late payment charges without treating an account as being delinquent and the customer as being in default on an obligation, then that creditor is imposing a finance and not a late payment charge.

Because the distinction between "late payment" and "finance" charge depends upon the unique interplay of facts in each individual case, staff cannot provide an exhaustive list of factual criteria. Two generalized statements, however, can be made. A charge assessed for late payment is distinguishable from a finance charge in that it is imposed for an actual and unanticipated event; and the ultimate evidence of the nature of a charge imposed is an objective viewing of the course of conduct between your client and each of his customers.

Insofar as the particular requirements of Interpretation § 226.401 are concerned, staff is of the opinion that the interpretation does not require termination of your client's service to his intermittently delinquent customers as a sine qua non to meeting the test set forth in § 226.4(c). On the other hand, continued imposition of late charges on a delinquent account, without taking positive action to collect the account, including eventual termination of additional credit privileges, would result in viewing such late charges as finance charges.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited in its application to the facts outlined herein. We trust that it will be of assistance to you.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC-0061]

§ 226.6(a)—The term "finance charge" must be more conspicuous only if it is required to be used, but it is permissible to make it more conspicuous whenever it appears.

APRIL 4, 1977.

This is in reply to your letter of • • •, requesting two official staff interpretations of Regulation Z. Staff can issue an official interpretation only on the first question you raised since its views on the second question are not such as might be relied upon by a creditor. An unofficial staff interpretation will be issued on your second question and sent to you separately.

Your question concerns the requirement in § 226.6(a) that the term "finance charge" be printed more conspicuously than other required terminology. You point out that the words "finance charge" are frequently used in several different parts of a disclosure statement, e.g., when stating the amount of the total finance charge, in describing the components of the finance charge, in the phrase "prepaid finance charge," and in stating the date on which the finance charge begins to accrue. You ask whether Regulation Z requires that the words "finance charge" be printed more conspicuously whenever they appear anywhere on the disclosure statement.

It is staff's opinion that this is not necessary. Section 226.6(a) states that the term "finance charge" must appear more conspicuously than other required terminology only when that specific term is required to be used by the regulation. Consequently, the "more conspicuous" requirement does not apply whenever the words "finance charge" are used, but only where this term is required to be used. On the other hand, it is staff's position that it is permissible to make the words "finance charge" more conspicuous whenever they appear in a disclosure statement if the creditor so desires.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited to the facts as presented herein. It appears that your client may be a creditor subject to the law of the State of Connecticut and not the Federal law. Since that State has been granted an exemption under the relevant portion of the Truth in Lending Act you may wish to contact the office of the State Banking Commissioner for their views.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC-0062]

§ 226.4(a) and § 226.7(b)—Creditor may exclude checking account service charge in computing finance charge on customer's overdraft credit line unless specified minimum balance is so small that service charge is imposed primarily on credit customers.

APRIL 11, 1977.

This is in response to your letter of • • •, in which you request an official staff interpretation of Regulation Z, Truth in Lending, regarding treatment of a checking account service charge for purposes of §§ 226.4(a)(2) and 226.7(b)(1)(iv).

Your client, a bank, currently imposes a service charge on a checking account if the customer's balance falls below a specified minimum ($100 at present) at any time during the monthly cycle. This service charge consists of a flat maintenance charge component plus a charge for each item handled during that cycle.

The bank proposes to offer customers a credit line or cash reserve feature in the nature of an overdraft account in connection with their checking accounts. Under this plan, an extension of credit to the customer's overdraft account will be triggered when the customer overdraws the account. (The fi-

nance charge to be imposed with respect to the credit line will be appropriately disclosed and is not the subject of your inquiry.)

You explain that a transaction which overdraws an account, and thereby activates the overdraft feature, will be subject to the checking account service charge, since in an overdraft situation the customer's account will be under the specified $100 minimum balance. Such a transaction, however, may or may not be the one that caused the account to drop below the specified minimum.

The illustrations you give indicate that, in any event, imposition and computation of the checking account service charge will be on the same basis whether or not an account has the cash reserve feature, and whether or not that feature is utilized.

Sections 226.4(a)(2) and 226.7(b)(1)(iv) of the regulation require that service charges be included in the finance charge to the extent that they exceed any charges the customer is required to pay when a checking account is not being used to extend credit. It is the staff's opinion that, on the facts described, the checking account service charge is not a finance charge and that the bank may properly exclude it in calculating the finance charge on the overdraft account pursuant to footnote 2 under § 226.4(a)(2) and footnote 9 under § 226.7(b)(1)(iv). In our view, the fact that a particular transaction that activates the credit line is subject to a checking account service charge and that it may have caused the account to fall below the specified minimum balance is irrelevant for the purpose of determining whether the charge is part of the finance charge.

This is an official staff interpretation of Regulation Z issued in accordance with § 226.1(d)(3) of the regulation. It is limited in its application to the facts outlined above, and, in this connection, staff would caution that if, in a situation such as you describe, the specified minimum balance is so small as to result in the imposition of a checking account service charge primarily on credit customers who utilize the overdraft feature, such a charge could be considered a finance charge. Under such circumstances, failure to disclose it as such could be considered an attempt to circumvent or evade the requirements of the Act and Regulation Z.

I note that your client is a creditor subject to the laws of the State of Connecticut and not the Federal law. Since that State has been granted an exemption under the relevant portion of the Truth in Lending Act, I suggest that you contact the office of Mr. Lawrence Connell, Jr., Bank Commissioner of the State of Connecticut, for his views.

I trust this letter is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC–0063]

§ 226.7(b)—Cumulative daily posting of amounts of transactions and payments on an overdraft checking plan is permissible. No reference to a particular check or portion of a check causing the extension of credit or payment need be made.

APRIL 14, 1977.

This is in reply to your letter of • • •, in which you requested staff's opinion with respect to certain disclosure requirements under Regulation Z in connection with an ovedraft checking plan offered by your client.

The plan involves the use of a combined checking and overdraft account statement. A running balance is kept on a cumulative basis and shown for each date that it changes in a column labeled "Balance." If a customer's checking account is overdrawn, the balance will be shown in conjunction with the designation "OD." If the account is not overdrawn, then the balance will not have that designation following it, which will indicate that the balance in the account is the customer's own funds rather than funds which were generated by an extension of credit. Other columns on the face of the statement show (1) the "Date," (2) "Deposits," and (3) "Checks and Credit Transactions." Any checks written on the account are first attributed to drawing down any of the customer's own funds which may currently be in the account. If such funds are insufficient, the transactions will be debited to the account in a fashion so that the "Balance" column will reflect an overdraft credit balance. Conversely, any deposits to the customer's account are credited first as payment of any overdraft balance in the "Balance" column. Any amount of any deposit in excess of the amount of the overdraft balance is treated as a normal deposit to the checking account.

Each check drawn on the account is reflected by its posting date and amount. Whenever one or more checks are posted to the account on any given day and the cumulative total of the check(s) results in the account being overdrawn or in an increase of a previous overdraft balance, the statement reflects the total credit extended that day by a separate designation of the amount of the increase in the overdraft balance labeled as a "credit advance." This is done on a cumulative daily basis rather than by attempting to attribute any particular portion of the credit advance to any portion of any individual instrument which is entered on that day. Likewise, any portion of a deposit which pays an overdraft balance, in part or in whole, is separately itemized as to amount and labeled as a "payment" without reference to the instrument by which the deposit is made.

For example, if on day 1 the "Balance" column shows a $50 overdraft and on day 2 the customer, without writing any other checks on the account, deposits $150 in the account, the entire deposit will be shown as $150. In addition, a separate itemization of a $50 "payment" would be shown without reference to the instrument by which the deposit is made, and the balance column would reflect the fact that the account now contains $100 of the customer's own funds. If, on the other hand, the balance in the account on day 1 were to be shown as $100 and on day 2 checks for $75, $50, and $25 were entered in the account, each of those checks would be itemized and a separate listing of a $50 "credit advance" would be shown along with an adjustment in the balance column to reflect a $50 overdraft. However, no attempt is made to apportion the credit advance to any particular one of the three checks or to any particular portion of all three checks.

You ask whether this method of disclosing payments and credit transactions on a daily cumulative basis, rather than by reference to the particular instruments entered on any particular day, is sufficient for purposes of § 226.7(b)(1)(iii) and § 226.7(k)(3)(ii). You are concerned that our earlier Public Information Letter 1091 infers that those sections require that the credit advances and payments be referenced to a particular check or instrument.

In staff's view, Public Information Letter 1091 was not intended to mean that reflecting payments and credit transactions for overdraft checking accounts, such as the one described in your letter, by reference to a particular document or instrument is the only way of complying with § 226.7(b)(1)(iii) and § 226.7(k)(3)(ii). That letter only reflected the provisions of Regulation Z requiring that payments and transactions on an open end credit account be itemized and identified with respect to their amounts. In staff's view, the system that you propose, which contemplates a cumulative debiting of credit advances and crediting of payments on a daily basis, when, in conjunction with the date, the amount of the payment or extension of credit is separately stated and labeled as a "payment" or "credit advance," is sufficient for compliance with these sections.

It should be noted, however, that this opinion should not be read to indicate staff's approval or disapproval of such a system of disclosing and identifying transactions and payments for any type of open end credit system other than the overdraft plan discussed herein.

This is an official staff interpretation issued under § 226.1(d)(3) of Regulation Z and limited in its application to the facts outlined herein. We trust that this is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC–0064]

§ 226.9(a) and § 226.902—Although a customer in a credit transaction that is secured by property in a decedent's estate may later inherit real property from the estate and use it as a principal residence, the right of rescission is inapplicable because, for purposes of § 226.9, that customer does not own the property when the transaction is consummated.

APRIL 14, 1977.

This will respond to your letter of • • •, in which you request an official staff interpretation of § 226.9 of Regulation Z. You ask whether the rescission provisions of § 226.9 apply when a customer, who may have an interest in a decedent's estate and expect to use real property in the estate as a primary residence, contracts for funeral services for a deceased. You explain that under the law of your State the estate property, including the real property, is subject to a claim for funeral expenses that may be perfected by a judgment lien without a due process hearing.

Section 226.9 of Regulation Z requires the delivery of the notice of opportunity to rescind: • • • in the case of any credit transaction in which a security interest is or will be retained in any real property which is used or is expected to be used as the principal residence of the customer • • •

In order to be entitled to exercise the right to rescind a person must be both an owner of the property and a party to the transaction (see Interpretation § 226.902 of Regulation Z). Accordingly, if the property to be used as a primary residence is held by the estate, the customer is not entitled to rescind the transaction under § 226.9 since the property is not owned by the customer when the transaction is consummated.

On the other hand, if the property has passed to the customer without having passed through the estate (e.g., by right of survivorship), we assume no lien attaches since the property is not part of the decedent's estate. The right of rescission is therefore not applicable to this situation.

A third possible situation arises when the property was co-owned with the deceased, so that part of the property is owned by the customer and part is in the estate when the transaction is consummated. Under these circumstances we assume the lien attaches only to the interest in the property formerly held by the deceased. The customer is not entitled to rescind this transaction under § 226.9 as the lien does not apply to the customer's interest in the property.

This is an official staff interpretation of Regulation Z, issued in accordance with

§ 226.1(d)(3) of the regulation and limited in its application to the facts set forth herein. I trust it is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC–0065]

§ 226.7(f)—Change of name of credit card and addition of check guarantee feature to card do not constitute changes in terms which would require giving of notice under § 226.7(f) to current cardholders or to applicant who applies for card with one name and no check guarantee but is issued card with another name with check guarantee.

Terms referred to in § 226.7(f) are those terms required to be disclosed in open end credit accounts pursuant to § 226.7(a).

§ 226.13(a)—Issuance of a credit card bearing one name and having a check guarantee feature in response to an application for a credit card bearing another name and having no check guarantee feature does not constitute issuance of an unsolicited credit card in violation of § 226.13(a)(1).

APRIL 14, 1977.

This is in response to your letter of • • •, requesting an official staff interpretation of Regulation Z. Your questions concern the application of § 226.7 (a) and (f) and § 226.13 (a) to a course of action which [the Bank] proposes to follow with regard to the issuance of credit cards with a check guarantee feature.

Your letter indicates that the Bank proposes to issue to all of its cardholders a new card under [a new] name [ ] in substitution for their existing [cards]. The new [ ] card will have all of the features of the old [card]. Additionally, it is proposed that the [new] card will have a check guarantee feature not available on the [old card]. The new [ ] cards will contain a logo [ ] which will indicate the check guarantee feature. The check guarantee program would permit a merchant who honors the [check guarantee] feature of the card to have any check presented by a [new] cardholder guaranteed by communicating with the Bank and obtaining an authorization number. The bank would ascertain whether the customer was a current cardholder in good standing. No verification as to the amount of funds in the customer's checking, savings or other account would be made. In the event that the check was later returned to the merchant unpaid, the merchant would be permitted to return the check to the Bank, and the Bank would pay it and debit the amount of the check to the customer's credit card account. The debit would appear as a cash advance on the customer's credit card periodic statement, and the usual finance charge would be applied.

In addition to issuing the new [ ] cards with the check guarantee feature to the Bank's present [ ] cardholders, you propose to issue [new] cards with the [ ] check guarantee feature to all qualified individuals who apply for a credit card. Although your are supplying your [old card] merchants with [new card] application forms and instructing them to destroy the old [ ] applications, you believe that the Bank will continue to receive [the old card] applications for a period of time. You indicate that the [old card] applications contain the required Truth in Lending disclosures in the [old card] Agreement printed on a tear-off panel at the bottom of the application. You further state that this portion of the application is being changed to reflect the [new] name and the addition of the [ ] check guarantee feature. Of course, these changes do not appear on the old [ ] applications.

You first ask whether changes in the cardholder agreement reflecting the [ ] name change and addition of the check guarantee feature constitute a "change in terms" so as to trigger the 15-day notice requirement of § 226.7(f) with respect to the Bank's current [card] customers. It is staff's position that the "terms" referred to in § 226.7(f) are those terms required to be disclosed in open end credit accounts pursuant to § 226.7(a). Since neither the name under which a credit card is issued nor the addition of the check guarantee feature of the [new] card, as you describe it, are disclosures required by § 226.7(a), neither a change in the name of your card nor the addition of the check guarantee feature to the card necessitate the change in terms disclosure specified by § 226.7(f).

Secondly, you ask whether the disclosure of a change in terms required by § 226.7(f) must be sent to individuals who apply for a new credit card using an obsolete [ ] application which makes no mention of the [new] name or the [ ] check guarantee feature of the [new] card. Inasmuch as neither the change of name of your credit card from [the old name] to [new name] nor the addition of the check guarantee feature to the card constitutes a change in terms within the meaning of § 226.7(f), no disclosure of these factors to new credit card applicants is necessary under § 226.7(f). However, you suggest that you could mail a revised credit card agreement detailing these features at the time the [new] card is sent to the new cardholder. While such a procedure is not required by the regulation when disclosure of all relevant terms is made with the application, staff believes that it would be beneficial for a new customer who has inadvertently submitted [an old card] application to receive an explanation of why a [new] card is being issued to him or her and a description of the check guarantee feature of the [new] card.

Your final question is whether the issuance of a [new] card with the [ ] check guarantee feature to persons who submit obsolete [ ] applications containing no mention of the check guarantee capacity of the card constitutes an unsolicited issuance of a credit card in violation of § 226.13(a)(1). In Official Staff Interpretation FC–0012, staff took the position that the issuance of a new [ ] card with the [ ] check guarantee feature to current [ ] cardholders in substitution for their [old cards] which do not have the check guarantee capacity would not constitute an unsolicited issuance of a credit card as prohibited by § 226.13(a)(2). Similarly, staff is of the opinion that the issuance of a [new] card with the check guarantee feature, in response to an application for an [old card], which makes no mention of a check guarantee feature, does not constitute the issuance of an unsolicited credit card in violation of § 226.13(a)(1). The fact that the card actually issued has an additional feature not available on the card for which the customer applied does not render the card an unsolicited credit card. Of course, § 226.7(a) requires that, before the first transaction is made on the new account, the Bank must provide the cardholder with a disclosure of all the terms applicable to any credit plan which that feature may access.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited to the facts as stated herein. I trust that it is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

Board of Governors of the Federal Reserve System, May 9, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

Official Staff Interpretations

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Official Staff Interpretation(s).

SUMMARY: The Board is publishing the following official staff interpretations of Regulation Z, issued by a duly authorized official of the Division of Consumer Affairs.

EFFECTIVE DATE: May 11, 1977.

FOR FURTHER INFORMATION CONTACT:

D. Edwin Schmelzer, Chief, Fair Credit Practices Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–2412).

SUPPLEMENTARY INFORMATION: (1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitations stated in 12 CFR Part 261.6.

(2) Official staff interpretations may be reconsidered upon request of interested parties and in accordance with 12 CFR Part 226.1(d)(2). Every request for reconsideration should clearly identify the number of the official staff interpretation in question, and should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

(3) 15 U.S.C. 1640(f).

[FC–0066]

§ 226.6(c) and § 226.15(b)—Separate schedule of depreciation values for leased vehicle is not required to be disclosed, but may be disclosed as additional information.

§ 226.6(f) and § 226.15(b)(15)—Disclosure of wholesale value as estimated value of vehicle in both purchase option and nonpurchase option leases is permissible; disclosure of lower value is permissible only in purchase option leases, unless lower value complies with § 226.6(f) requirements.

§ 226.15(b)(15)—Lessor must make disclosures required by § 226.15(b)(15)(i) only for "basic term" of lease; "minimum term" disclosures would be those for early termination. Excess mileage charge should not be included in excess liability calculations subject to rebuttable presumptions under § 226.15(b)(15)(ii).

§ 226.15(c)—Lease consummated before March 23, 1977, and extended after that date for more than 6 months on a month-to-month basis or otherwise becomes subject to lease disclosure requirements.

APRIL 15, 1977.

This is in response to your letter of • • •, in which you posed seven questions with respect to the amendments to Regulation Z implementing the Consumer Leasing Act of 1976. While your questions deal with a number of issues, they are all concerned with the open end vehicle leasing program engaged in by your client.

It is the staff's opinion that an official staff interpretation is an appropriate response to only some of your questions. An official interpretation under § 226.1(d) of Regulation Z would be inappropriate for the remaining questions and they will be dealt with in an unofficial staff interpretation which will be sent to you separately. This letter will respond to the following five questions. For convenience, each question will be stated and followed by the staff's response.

1. Will disiosure statements be required after March 23, 1977, for extensions of existing leases not now subject to the Act?

Section 226.15(c) states, "If any existing lease is renegotiated or extended, such renegotiation or extension shall be considered a new lease subject to the disclosure requirements of this Part." It is the staff's opinion that if a lease consummated before March 23, 1977, is extended after the end of the original term for more than six months on a month-to-month basis or otherwise, it would become a "consumer lease" for which disclosures would have to be made. As an extension of more than six months on a month-to-month basis or otherwise requires new disclosures under § 226.15 (c)(2), it is the staff's opinion that a lease which is extended in this manner must be treated as a new lease subject to the disclosure requirements of Regulation Z.

While the disclosures with respect to the lessee's end-term liability may be somewhat more difficult to make in an open end automobile lease where the calculations of the lessee's liability at the end of the original term were made prior to the imposition of the limitations on that liability contained in Section 183(a) of the Act, it is the staff's opinion that such calculations can and should be provided to the lessee in the situation where the lease has become subject to the regulation's requirements.

2. Does § 226.6(f), which permits lessors to underestimate the value of the leased property at the end of the lease term in purchase option leases, permit lessors to use the "wholesale blue book price (or a lower value)" in estimating the value of the leased property at the end of the term?

It is the staff's opinion that the lessor may disclose the wholesale value of the vehicle as the estimated value in both purchase option and non-purchase option leases. There is no requirement in the Act or Regulation Z that the estimated residual value assigned to the vehicle be a retail value. Staff believes that an estimate of the value of the property at the end of the lease term which is based upon the wholesale blue book figure would be reasonable and based upon the best information available to the lessor, as required by § 226.6(f), if the lessor intends to assign a wholesale value to the vehicle at the end of the term.

Use of a lower value than that indicated by the best information available to the lessor, whether blue book or otherwise, as suggested in your letter, would be impermissible in non-purchase option leases, except where the lessor could demonstrate that use of the lower value was based on objective experience in the used motor vehicle market.

3. Should a charge assessed by the lessor at the end of the lease term on mileage driven in excess of a stated number of miles be included in the calculation of the excess liability subject to the rebuttable presumptions of unreasonableness and bad faith under Section 183(a) of the Act and § 226.15(b)(15)(ii) of Regulation Z?

It is the staff's opinion that a charge for excess mileage should not be included in the calculation of excess liability subject to those rebuttable presumptions. Such excess mileage charges may be disclosed by the lessor in conjunction with a standard for determining excessive wear or use of the leased vehicle and could affect the determination of lessee's liability for excessive use and, to some extent, the realized value of the vehicle. However, such charges should not be considered as a portion of the liability of the lessee which is based on the difference between the estimated and realized values.

4. Must your client make the disclosures required by § 226.15(b)(15)(i) not only for the "basic term" but also for the "minimum term" of the lease?

Your client's present open end lease agreement specifies the "basic term" of the lease contemplated by the parties at the inception of the lease, usually a term of 24 or 36 months. The agreement also provides that the lessee may terminate the lease prior to the expiration of the basic term at any time after a "minimum term" of 12 months. The same method is used for determining the lessee's liability upon early termination (after expiration of the "minimum term") or at the end of the lease (the "basic term"). You inquire whether your client must make disclosures for each such lease as though there were two leases, one for the "basic term" and one for the "minimum term," i.e., must the lessor disclose the total lease obligation, the estimated value of the vehicle at the end of the lease term, and the difference between them, for both the "basic term" and "minimum term."

It is the staff's opinion that the lessor is required to disclose those terms listed above, as required by § 226.15(b)(15)(i), only for the "basic term," as this is the lease term contemplated by the parties and the term upon which the calculations of depreciation of the vehicle's value are based. There are required disclosures concerning the lessee's liability and rights at early termination, which would be used in making the disclosures concerning the "minimum term," but they do not involve making the disclosures required by § 226.15(b)(15)(i).

5. May your client continue its present practice of incorporating by reference into the lease contract a separate schedule of depreciation values (usually in the form of a computer printout) which sets forth on a monthly basis the estimated value of the vehicle from the inception of the lease through the end of the maximum holdover term, or must your client include the schedule in the disclosure statement required by Regulation Z?

It is the staff's opinion that such a separate schedule of residual values need not be made part of the required disclosures. Regulation Z does not require disclosure of the estimated residual value of the vehicle at every point during the lease term, although the actual and estimated values of the vehicle must be disclosed at consummation and at the end of the term, respectively, in accordance with § 226.15(b)(15)(i). The schedule of residual values may be disclosed as additional information pursuant to § 226.6(c).

As indicated above, we believe that your remaining questions are inappropriate for an official staff interpretation. Therefore, they will be dealt with in a separate letter to you which does not have official status.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d) of the regulation and limited to the facts stated herein.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC–0067]

§ 226.15(c)—A lease extended month-to-month for more than 6 months requires new disclosures; disclosures should be made for a month-to-month lease. New disclosures are required at 6-month intervals thereafter.

APRIL 15, 1977.

This is in response to your letter of • • •, in which you raised several questions concerning the Consumer Leasing Act and the amendments to Regulation Z which implement it. Staff believes that two of your questions would be appropriately answered by an official staff interpretation of Regulation Z, while the responses to your other questions would be more appropriately addressed in an unofficial staff interpretation. Therefore, this letter, an official interpretation, will respond only to your questions on renegotiations and extensions.

You inquire what disclosures must be made for a lease which, after the expiration of the initial term, has been extended on a month-to-month basis for six months. Although § 226.15(c) states that an existing lease which is renegotiated or extended shall be considered a new lease, § 226.15(c)(2) states that a lease which is extended for not more than six months, on a month-to-month basis or otherwise, shall not be considered a new lease subject to the disclosure requirements of Regulation Z. Thus, although an existing lease which is extended for not more than six months on a month-to-month basis does not require new disclosures, a lease which is extended for more than six months on a month-to-month basis becomes subject to disclosure requirements. You inquire what lease term should be used in determining the disclosures at the time new disclosures are required.

It is the staff's opinion that disclosures made for a month-to-month extension of a consumer lease should be based on the fact that it is a month-to-month lease. As noted in your letter, the total length of the lease extension cannot be determined at that point and, consequently, the required disclosures cannot be made with any certainty for any period of time longer than one month. Obviously, some of the disclosures would be inapplicable to such a lease disclosure.

Your second question is, "If the lease extends beyond the seventh month on the same month-to-month basis will disclosures then be required again, at the beginning of the eight month, or only at every six month interval during the extension of this month-to-month lease?" It is the staff's opinion that a lease which has been extended after six months on a continuing month-to-month basis (and for which disclosures have been made at the commencement of the seventh month) would not require new disclosures at the beginning of every month thereafter. Staff believes that new disclosures would only be required at the end of the next six-month interval and any additional six-month interval thereafter during which the lease continues in effect. It would be an unnecessary burden on both lessees and lessors to require that new disclosures be given every month after the first six-month extension of a lease beyond its original term.

This is an official staff interpretation issued in accordance with § 226.1(d)(3) of Regulation Z and is limited solely to the facts stated herein. Your other questions will be dealt with in a separated unofficial staff interpretation. I trust this is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC–0068]

§ 226.13(a)—Where bank intends to issue a new credit card under a new name in substitution for an existing credit card, the requirement that the existing card be taken out of circulation or voided in some manner can be satisfied by mailing the new card together with a notification that the existing card is no longer valid and should be destroyed immediately

APRIL 19, 1977.

This is in response to your letter of • • •, requesting an official staff interpretation of § 226.13(a) of Regulation Z concerning the issuance of credit cards in substitution for previously issued credit cards.

You indicate in your letter that banks within the United States intend to issue new credit cards under [a] new name [ ] in substitution for the existing [cards]. A new application will not be obtained, but accompanying the new credit card will be a notification explaining the conversion from [the old card] to [the new card] and advising the cardholder that his or her existing [card] is no longer valid and should be destroyed immediately.

You state that staff indicated in official staff interpretation FC–0012 that the issuance by a bank of a [new] card incorporating a check guarantee feature would not prevent the [new] card from being considered a card issued in substitution for an accepted credit card in accordance with § 226.13(a)(2) of Regulation Z. You question the meaning of the following statement which appeared in FC–0012:

"We should point out, however, that this position is based on the assumption that the [credit card] which is currently held by your bank's customers will be taken out of circulation or voided in some manner."

You state that some banks have construed this statement as requiring either the expiration of the existing [card] or the actual return of the outstanding card to the bank as a condition precedent to the issuance of a substitute [new] card without a new application.

You ask whether such a construction was intended by the staff, or whether mailing the [new] cards together with a notification advising that the existing [cards] are no longer valid and should be destroyed immediately can be considered the issuance of a card in substitution for an accepted credit card.

Staff's statement in FC–0012 that the outstanding [cards] "be taken out of circulation or voided in some manner" does not necessarily contemplate requiring either expiration of the [the old card] prior to issuance of the [new] card or the actual return to the bank of the outstanding [card]. Staff agrees with your suggestion that the requirement that existing [cards] be taken out of circulation or voided in some manner can be satisfied by mailing the [new] cards together with a notification advising that the existing [cards] are no longer valid and should be destroyed immediately.

This is an official staff interpretation issued in accordance with § 226.1(d)(3) of Regulation Z and is limited solely to the facts and issues presented herein. I trust that it is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC–0069]

§ 226.8(j)—When the only change in the terms of an existing extension of credit is a reduction in APR accompanied by a reduction in the periodic payment or shortening of the maturity of the obligation necessary to reflect the lower rate, no new disclosures are required.

APRIL 19, 1977.

This is in response to your letter of • • •, in which you request an official staff interpretation of Regulation Z with regard to § 226.8(j) of the regulation and Official Board Interpretation § 226.817.

You ask whether a mortgage lender who has given a borrower proper Truth in Lending disclosures at the inception of a loan is required to give new disclosures if, during the life of the loan, the lender elects to reduce the annual percentage rate. You point out that a reduction in the annual percentage rate will necessarily result in either a reduction of the periodic payments to be made by the borrower or a shortening of the original maturity of the loan. You inquire whether the reduction of the annual percentage rate of a mortgage loan with the concomitant lowering of the periodic payment or shortening of the maturity of the loan constitutes a refinancing under § 226.8 (j) and thereby necessitates giving new disclosures under the Truth in Lending Act and Regulation Z.

As your letter points out, Board Interpretation § 226.817 provides, "When no other credit terms are changed, a reduction in the annual percentage rate applicable to an existing extension of credit does not constitute a refinancing under § 226.8(j), and no disclosures are required." It is staff's position that, when the only change in the terms of an existing extension of credit is a reduction in the annual percentage rate accompanied by the lowering of the periodic payment or the shortening of the maturity of the obligation necessary to reflect the lower rate, Board Interpretation § 226.817 is applicable and the creditor need make no new disclosures.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited to the facts and issues discussed herein. I trust that this interpretation is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC–0070]

§ 226.2(m) and § 226.13(a)—Where spouse A requests the opening of a "family credit card account" or an account for which spouses A and B may be authorized users, credit cards sent to spouse A will be viewed as properly solicited; provided that only spouse A is the cardholder, regardless of the name(s) in which the cards are issued, and that no primary contractual liability on the credit card account is imposed upon spouse B merely by issuing a card at the request of spouse A.

Spouse A may request a credit card in the name of spouse B only if, under State agency law, spouse A is empowered to make such a request where spouse B will, through spouse A's request, become a cardholder. (Distinguish 642 and 700.)

Spouse A as cardholder can authorize the issuance of a credit card to spouse B as an authorized user in either spouse's name, even in the absence of a request from Spouse B.

A card issuer may renew properly issued credit card either in the name of a cardholder or in the name of an authorized user. A card issuer may also substitute a user's name on a renewal card where cardholder's name appeared on the previously issued card. The mere issuance of such renewal cards will not render the authorized user(s) contractually liable on the account. (Supersedes 1138 and part of 1129.)

APRIL 21, 1977.

This is in response to your request for an official staff interpretation of § 226.13 of Regulation Z regarding the solicitation of credit cards and the mailing of renewal cards. As reflected in your letters of • • •, and in your oral representations to staff on • • •, you first request the staff to verify that: Spouse A may request the opening of a "family account" or an account for which spouses A and B may be authorized users; and, in response thereto the credit card issuer may issue credit cards in the name(s) of either or both spouse(s) and that such credit cards will not be deemed to be unsolicited within the meaning of Regulation Z.

Staff is of the view that credit cards sent to spouse A in response to such a request will be viewed as properly solicited; provided that only the requesting spouse (spouse A) is the cardholder, as contemplated by § 226.2(m), regardless of the name(s) in which the cards are issued, and that no primary contractual liability on the credit card account is imposed upon the other spouse (spouse B) merely by issuing a card at the request of spouse A. Staff believes that this practice is consistent with the requirements of § 226.13 of Regulation Z and sections 132 and 133 of the Truth in Lending Act, all of which contemplate that card issuers may issue cards to authorized users (who are not contractually liable on the account) at the behest of a cardholder. As evidence of this, it should be noted that § 133(a) of the Act and § 226.13(c) of Regulation Z specifically require the card issuer to provide a means of identifying each user, if the cardholder is to be held liable for unauthorized use to the $50 maximum.

Credit card issuers should be mindful, however, that Regulation B (Equal Credit Opportunity) requires that both spouses have an equal opportunity to have an individual account. So, for example, a policy of responding to a wife's request by requiring the husband to become the cardholder, regardless of the credit worthiness of the wife, would violate Regulation B. Subject to this caveat, staff believes either spouse may authorize the opening of an account for which both spouses will be users and for which the requesting spouse will be contractually liable.

This interpretation is to be distinguished from the opinions stated in Public Information Letters 642 and 700. In those letters staff took the position that spouse A may request a credit card in the name of spouse B only if, under State agency law, spouse A is empowered to make such a request. Staff maintains this position where spouse B will, through spouse A's request, become a cardholder. Where only spouse A will become the cardholder, no authorization under State agency law is necessary to permit spouse A to request a credit card in the name of spouse B as an authorized user.

Similarly, staff maintains the position stated in Public Information Letter 690 that a cardholder's request for additional "user" cards would be sufficient to authorize the issuance of such cards under § 226.13(b). Read together, Public Information Letters 642, 690 and 700 express the opinion that one spouse (spouse A) can authorize the issuance of a credit card to the other spouse (spouse B) in either spouse's name, even in the absence of a request from spouse B.

Essentially, the same rationale applies to the issue raised in your second letter dealing with renewal credit cards. Staff is of the

opinion that it is permissible for a card issuer to renew cards that have previously been properly issued, either in the name of a cardholder or in the name of an authorized card user. It is also permissible in such cases to substitute a card user's name on a renewal card where a cardholder's name appeared on the card which was previously issued. It should be noted, however, that the mere issuance of such renewal cards will not render the authorized user(s) contractually liable on the account.

In light of staff's statements in the preceding paragraph, Public Information Letter 1138 appears to have no further independent justification. Since that letter, which was intended to correct Public Information Letter 1129, contains a technical conflict with this letter in that the distinction between a cardholder and an authorized user is not clearly maintained, and since all issues addressed therein are covered by the preceding paragraph, letter 1138 and the first sentence of the third paragraph of letter 1129 are superseded. The positions articulated in this letter should be applied to letter 1129.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited solely to the facts and issues presented herein. I regret our delay in responding and trust that this is responsive to your inquiry.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

[FC–0071]

§ 226.8(b)—Permissible method of disclosure when security interest is taken in a series of sales, where State law requires release of the security interest in items for which the creditor has been fully compensated.

APRIL 28, 1977.

This will respond to your letter of * * *, in which you request a formal Board interpretation of § 226.8(b)(5) of Regulation Z.

Your client engages in closed end credit sale transactions secured by the items purchased. The specific items being purchased in which a security interest is retained are described in the disclosure statement provided in connection with each transaction. All transactions between the same creditor and customer are consolidated with all previous ones, and the latest transaction retains a security interest in all items purchased in the previous transactions. You appear to have no difficulty identifying the property purchased in the latest transaction as being covered by the security interest taken in that transaction. You inquire as to what must be done to identify the property covered by the security interest, as required by § 226.8(b)(5), with respect to property purchased in earlier transactions.

Your question is asked within the context of a North Carolina law which, you indicate, requires in such situations that a security interest be released as the creditor becomes fully paid for any particular item. Because of the provisions of that law, a notice informing the customer making, for example, a third purchase that a security interest is retained in items purchased in the present transaction, as well as those purchased in the previous two, may not be accurate if the creditor has been fully paid for some of the items purchased in the previous transactions. If such were the case, the security interest, under State law, would not apply to some of the items purchased in the previous transactions.

You wish to know if under Regulation Z you may properly describe the property in which a security interest is retained without making the determination as to which items from earlier transactions have been released from the security interest pursuant to State law.

Creditors are required by § 226.8(b)(5) to identify the type of security interest retained and provide a clear identification of the property to which the security interest relates. If identification of the property on the disclosure statement is not possible due to its length, the note, other instrument evidencing the obligation, or separate disclosure statement must contain a reference to another document evidencing the security interest. A copy of this document must be furnished to the customer as promptly as practicable.

The staff is of the opinion that it is permissible to provide the customer with a description of all items in which a security interest is retained, supplemented to indicate that some items may not be subject to the security interest because of the State law requiring release of items for which the seller has been fully paid. Accordingly, your client may comply with the provisions of § 226.8(b)(5) by: (1) providing a disclosure that refers to items, directly or by contract number or other reference, in which a security interest has been retained in the latest transaction and the previous transactions which are currently outstanding, (2) limiting the application of the security interest by explaining that it does not apply to items for which the creditor has been fully paid, and (3) giving the customer, as promptly as practicable, a copy of the security agreements or other documents containing a clear identification of the items purchased under the present or previous transaction.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited in its application to the facts and issues outlined herein.

We hope this response has been helpful If we may be of further assistance, please do not hesitate to contact us.

Sincerely,

JERAULD C. KLUCKMAN,
Associate Director.

Board of Governors of the Federal Reserve System, May 9, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.77–14094 Filed 5–17–77;8:45 am]

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

PART 1021—ENVIRONMENTAL REVIEW

Interim Rule

AGENCY: Consumer Product Safety Commission.

ACTION: Interim rule on which comment is solicited.

SUMMARY: This notice proposes and issues as interim rules procedures to be followed by the Consumer Product Safety Commission in carrying out its responsibilities under the National Environmental Policy Act (NEPA). The procedures issued here provide for identification of CPSC actions which require environmental impact statements, designate officials who will be responsible for the statements, describe the content and review process for necessary documents, and, provide for obtaining information and comment from public agencies and interested persons.

DATE: The rules will be effective, on an interim basis, immediately on May 18, 1977. Comments must be received in the Office of the Secretary of the Commission no later than July 5, 1977.

ADDRESS: Comments to: Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT:

Jeanette Wiltse, General Law Division, Office of the General Counsel, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207 (202–634–7770).

SUPPLEMENTARY INFORMATION: In this notice, the Consumer Product Safety Commission (CPSC) issues, as interim rules, procedures to carry out its responsibilities under the National Environmental Policy Act (NEPA) (42 U.S.C. 4321–4347 as amended by Pub. L. 94–83, August 8, 1975). NEPA, implemented by Executive Order 11514 of March 5, 1970, and the Council on Environmental Quality's Guidelines of August 1, 1973, (40 CFR Part 1500) requires that all agencies of the Federal Government prepare detailed environmental impact statements on proposals for legislation and other major Federal actions significantly affecting the quality of the environment. NEPA requires that agencies include in their decisionmaking process an appropriate and careful consideration of all environmental aspects of proposed actions and their alternatives, of ways to avoid or minimize adverse effects of proposed actions, and ways to restore or enhance environmental quality.

The Consumer Product Safety Commission (CPSC) administers and enforces the Consumer Product Safety Act (15 U.S.C. 2051, et seq.), the Flammable Fabrics Act (15 U.S.C. 1191, et seq.), the Federal Hazardous Substances Act (15 U.S.C. 1261, et seq.), the Poison Prevention Packaging Act of 1970 (15 U.S.C. 1471, et seq.) and the Refrigerator Safety Act (15 U.S.C. 1211, et seq.). These laws confer authority upon CPSC to investigate risks of injury associated with various consumer products, to regulate products to reduce or eliminate certain risks of injury associated with them, and to enforce the laws. In accord with the explicit requirements and criteria of the several laws, Commission action may take any of several forms including: Safety performance standards, bans on the sale of products in interstate commerce, orders requiring recall and/or correction of products, requirements for cautionary labeling of products, and requirements for safety packaging of products.

The CPSC will follow the procedures required by the regulatory statutes it administers in making findings and decisions regarding product safety regulatory actions. The environmental review procedures issued herein will be reserved for analysis and findings concerning the effects regulatory action may have uoon the environment. The CPSC will base its substantive decisions regarding regulatory action on consideration of the results of environmental review in addition to the considerations required by CPSC's regulatory statutes. (See "EDF v. Mathews", 410 F. Supp. 336 (1976).)

The procedures issued here provide for identification of CPSC actions which require environmental impact statements, designate officials who will be responsible for the statements, describe the content and review process for necessary documents, and, provide for obtaining information and comment from public agencies and interested persons.

The procedures generally follow the guidelines of the Council on Environmental Quality for preparation of environmental impact statements, but represent a different approach for identifying actions likely to require environmental statements and actions likely not to require environmental statements than the Council has suggested. In 40 CFR 1500.6(c), the Council has suggested that agencies identify three categories of action: Types of actions which normally do require statements, types of actions which normally do not, and types of actions which may require statements, depending on the circumstances. These procedures adopt a different approach which is more easily tailored to CPSC actions. In this approach, CPSC actions are classified to those which are normally "major Federal actions" and those which are normally not "major Federal actions" in terms of importance and of Federal resources required. The procedures prescribe an environmental assessment report to be followed by an impact statement or a negative declaration, for any CPSC action of a type classified as "major." These documents are required for non-major actions only as circumstances dictate. It is expected that this approach will be effective in allowing both the CPSC and the public to identify actions which will require impact statements. Comments are solicited on this approach and on the identification of major and non-major actions in § 1021.5.

Federal agencies wishing comment by CPSC on their impact statements should be aware that the CPSC has special expertise in analyzing chemical and mechanical hazards and also fire hazards which derive from them. Federal agencies should send their impact statements to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (202) 634–7700.

Because this document contains rules of agency procedure or practice, the relevant provisions of the Administrative Procedure Act (APA, 5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date are not applicable. In addition, even if it were to be found that these procedures of the APA apply, the agency for good cause finds that notice and public procedure and delayed effective date are unnecessary because the procedures do not affect anyone's substantive rights and it is in the public interest to have these regulations in effect as soon as possible.

In accordance with Commission policy to solicit public participation and comment whenever practicable, interested persons are invited to submit written comments on these procedures (preferably in five copies) to the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207 until July 5, 1977. Late-received comments will be considered to the extent practicable. The Commission may make changes in the procedures as a result of comments received or experience with the interim procedures. After reviewing all timely comments, the Commission will publish in the FEDERAL REGISTER, a notice describing what action it will take regarding the procedures.

Accordingly, pursuant to provisions of the National Environmental Policy Act (Pub. L. 91–190, 42 U.S.C. 4321–4347, as amended by Pub. L. 94–83, August 9, 1975) and Guidelines issued by the President's Council on Environmental Quality (40 CFR Part 1500 et seq., 38 FR 20550–20562, August 1, 1975), the Consumer Product Safety Commission proposes the following new Part 1021 of Title 16, Chapter II, Subchapter A. (Until final action is taken on comments received, these procedures will serve as interim guidelines effective for CPSC actions commenced after publication of this document in the FEDERAL REGISTER.)

Subpart A—General

Sec.
1021.1 Purpose.
1021.2 Policy.
1021.3 Definitions.
1021.4 Overview of environmental review process for major CPSC actions.
1021.5 CPSC actions subject to environmental review.
1021.6 Criteria for determining whether an EIS will be prepared.

Subpart B—Procedures

1021.7 Responsible official.
1021.8 Coordination of environmental review with CPSC regulatory procedures.
1021.9 Public hearing on draft EIS.
1021.10 Legislative proposals.
1021.11 Public participation—notice and comment.

Subpart C—Contents of Environmental Review Documents

1021.12 Environmental assessment report.
1021.13 Negative declaration.
1021.14 Environmental impact statement.

AUTHORITY: National Environmental Policy Act (Pub. L. 91–190, 83 Stat. 852, 42 U.S.C. 4321–4347, as amended by Pub. L. 94–83, August 9, 1975) and Guidelines issued by the President's Council on Environmental Quality (40 CFR; Part 1500 et seq. 38 FR 20550–20562, August 1, 1975).

Subpart A—General

§ 1021.1 Purpose.

This part contains Consumer Product Safety Commission procedures for review of environmental effects of proposed major Consumer Product Safety Commission actions and for preparation of environmental impact statements and related documents. These procedures supercede any other procedures that might have previously been applicable. The procedures provide for identification of effects on the environment; for assessment of their significance; for consideration of the effects, whether significant or not, at all stages of the Consumer Product Safety Commission's decisionmaking process; and for preparation of environmental impact statements for major actions significantly affecting the environment, in accord with the Council on Environmental Quality's Guidelines of August 1, 1973 (40 CFR Part 1500, et seq.). In order that the public can understand and participate in this environmental review process, these procedures include provisions for appropriate notices to the public, for public hearings, and for public availability of environmental review documents.

§ 1021.2 Policy.

It is the policy of the Consumer Product Safety Commission to weigh and consider the effects upon the environment of proposed major actions as it does product safety effects of the actions. All major actions will be designed to avoid or minimize adverse effects upon the environment wherever possible.

§ 1021.3 Definitions as used in this part.

(a) The term "Commission" means the five Commissioners of the Consumer Product Safety Commission;

(b) The term "CPSC" means the entire organization which bears the title Consumer Product Safety Commission";

(c) "Environmental assessment" is an analysis of environmental effects of a proposed major action which is undertaken concurrently with technical and economic studies of the proposed action. The analysis of environmental effects is developed and considered by CPSC during development of the proposed action, as are technical and economic studies.

(d) "Environmental assessment report" is the final, written report of the results of the environmental assessment. Together with any other pertinent information, the environmental assessment report serves as a basis for deciding whether an environmental impact statement is needed.

(e) "Draft environmental impact statement" ("draft EIS") is a comprehensive written report that identifies and analyzes the anticipated environmental impact of a proposed major CPSC action.

(f) "Final environmental impact statement" ("final EIS") is the final written report on the anticipated environmental impact of a major CPSC action. It includes and addresses substantive comments submitted by all persons who respond to publication of the draft environmental impact statement.

(g) "Negative declaration" is a written statement that gives the reasons for a determination, based on an evaluation of the environmental assessment report and other pertinent information, that an environmetal impact statement need not be prepared.

(h) "Summary sheet" is a document, prepared in accordance with 40 CFR 1500.8(d) of the CEQ guidelines, that accompanies each draft and final environmental impact statement.

(i) "Major action" is a CPSC action of considerable importance involving substantial CPSC planning, time, resources, or expenditures.

§ 1021.4 Overview of environmental review process for major CPSC actions.

The environmental review process begins when CPSC resources are committed to development of a proposal for major CPSC action and progresses through the following steps:

(a) *Environmental assessment.* This assessment is initiated when the proposal and realistic alternatives are defined. Its purpose is to identify and describe foreseeable effects, if any, of the action and its alternatives on the environment. Sources of information for assessment include CPSC staff studies and research reports, information gathered at hearings or meetings held to obtain the views of the public on the proposed action, and other information received from members of the public and from governmental entities. The assessment culminates in a written report. This environmental assessment report generally contains analysis of the same categories of information as would an EIS, but in a much less detailed fashion. It contains sufficient information to form a basis for deciding whether effects on the environment are likely to be significant. (See §§ 1021.5 and 1021.12) The report will suggest any methods or approaches identified which would avoid or minimize adverse effects on the environment.

(b) *Decision as to significance of effects on the environment.* This decision is made by the Executive Director of the CPSC, and is based upon the results of the environment assessment as well as any other pertinent information. Considerations involved in determining significance are described in § 1021.6. If the effects may be significant, public notice (§ 1021.11) is given and preparation of a draft EIS is begun. If not, a negative declaration is prepared.

(c) *Negative Declaration.* This is a written document which gives the reasons for concluding that effects of a proposed action or its alternatives on the environment will not be significant (§ 1021.13). Together with the environmental assessment report, it should convincingly demonstrate the soundness of the conclusion. The negative declaration and environmental assessment report accompany the proposed action throughout the CPSC decisionmaking process. Public notice is given of the availability of the negative declaration and environmental assessment report (§ 1021.11).

(d) *Draft EIS.* The contents of this document are described in § 1021.14. The draft EIS pertaining to a rulemaking proposal shall be before the Commission at the time it takes the proposed action under consideration and shall be available to the public when the notice of proposed rulemaking is published or soon thereafter. The draft EIS for all proposed major actions shall normally be available at least ninety (90) days before any final action is taken. The draft EIS shall accompany the proposed action through the CPSC decisionmaking process.

(e) *Final EIS.* The contents of this document are described in § 1021.14. A final EIS shall normally be before the Commission when it considers a final action and shall be available to the public at least thirty (30) days before final action is taken.

§ 1021.5 CPSC actions subject to environmental review.

(a) The following categories of CPSC action are ordinarily major actions and have the potential of producing significant effects on the environment. An environmental review is required for any action in these categories, unless the Executive Director of the CPSC has made written findings and a determination that an individual action will not be a major action and that its impact on the environment will be negligible or nonexistent. Either an EIS, or a negative declaration together with an environmental assessment report shall be prepared for any action which requires environmental review.

(1) Recommendations or favorable reports to Congress on proposed legislation, including specific appropriations, that will substantially enlarge the scope of regulatory authority of the CPSC or authorize construction of facilities.

(2) Promulgation of rules to provide design or performance standards for products, or major revision or revocation of such standards.

(3) CPSC actions requiring the destruction or disposal of large quantities of products or components of products.

(4) Promulgation of rules banning products from interstate commerce.

(5) Construction or major renovation of CPSC facilities.

(b) The following categories of CPSC action are normally non-major actions with little or no potential for affecting the environment, therefore, an environmental review is not normally required for any action in these categories. However, should any action within these categories become a major action anticipated to affect the environment, an environmental review shall be required.

(1) Promulgation of amendments, exemptions, and revisions to an existing product design or performance standard that do not alter the principal purpose or effect of the standard.

(2) Promulgation of product certification or labeling rules.

(3) Promulgation of rules requiring poison prevention packaging of products.

(4) CPSC actions to require individual manufacturers to give notice of and/or to correct, repair, replace, or refund the purchase price of banned or hazardous products.

(5) Recommendations or favorable reports to Congress on proposed legislation to amend, delete or add procedural provisions to existing CPSC statutory authority.

(6) Decisions on petitions for rulemaking.

§ 1021.6 Criteria for determining whether an EIS will be prepared.

(a) *Determination of significance of environmental effects.* The following general considerations shall be taken into account when reviewing a proposed major CPSC action to determine the significance of its anticipated effects on the environment and deciding whether an EIS is needed:

(1) Indirect effects on the environment shall be considered as well as direct effects. For example, in the case of a CPSC action which has the direct effect of removing a chemical from consumer products, foreseeable indirect effects, associated with the use of a substitute chemical in the products or associated with disposal of stocks of the original chemical, shall be considered.

(2) Consideration shall be given to the extent to which the anticipated effects on the environment are cumulative with effects of prior or future CPSC actions, and to predictable long range effects in addition to short term effects.

(3) Special attention shall be given to the effects on natural resource use (including fuels), on air and water quality, on noise levels, on solid waste disposal, and on the range of beneficial uses of the environment (e.g., recreation).

(4) Determinations of significance shall be made on the basis of quantitative as well as qualitative factors, whenever possible. For example, it may be possible to achieve a good estimate of such items as proportionate effect on use of a natural resource, or on water quality or of dollars of cost or savings in waste treatment.

(b) *Circumstances in which an EIS is required.* An EIS shall be prepared whenever:

(1) A proposed major action may have a significant beneficial and significant adverse impact on the environment, even though on balance, the beneficial effects will outweigh the adverse effects.

(2) The significance of anticipated effects on the environment of a proposed major action is a matter of great controversy among the general public.

(3) A proposed major action may have significant effects on the environment, and the impact of such effects will be confined to one locality.

Subpart B—Procedures

§ 1021.7 Responsible official.

(a) The Executive Director of the CPSC shall have the responsibility to ensure that the Commission's policies and procedures set forth in this part are carried out. He or she shall have the following specific powers and duties:

(1) To determine whether a major CPSC action requires preparation of an EIS.

(2) To make the findings and determination required by § 1021.5(a) whenever he/she decides that an environmental review is not necessary for a CPSC action of a type described in § 1021.5(a), (1)–(5).

(3) To ensure that environmental review documents are before CPSC decisionmakers at all stages of review of proposed major actions.

(4) To make provision for soliciting public comment on the anticipated effects of proposed major actions on the environment at any stage of environmental review, whenever he or she decides that such comment will be helpful. The Executive Director shall have the power to require that provision for soliciting such comments, written or oral, be included in any announcement of a public hearing on proposed rulemaking or on the merits of a petition for rulemaking.

(5) To determine whether a special public hearing is needed on a draft EIS, in accord with § 1021.9.

(6) To call upon all resources and expertise available to CPSC to ensure that environmental review is accomplished through an interdisciplinary effort.

(7) To delegate any of his or her powers and duties, other than the determinations required by paragraphs (a) (1) and (2) of this section, to any officer or employee of the CPSC.

§ 1021.8 Coordination of environmental review with CPSC regulatory procedures.

(a) The preparation and completion of assessments and statements required by this part shall be scheduled to assure that available environmental information is before CPSC decisionmakers at all stages of development of major actions along with technical and economic information otherwise required. Environmental assessments shall be initiated as early as possible in the development of an action.

(b) Draft EIS's or negative declarations, together with environmental assessment reports shall be made available to the public for comment at the time of publication in the FEDERAL REGISTER of CPSC proposals for regulatory action which require environmental review (§ 1021.5), or promptly thereafter. In such cases, draft EIS's shall be made available to the public at least ninety (90) days, and final EIS's at least thirty (30) days, before a Commission final decision on a rule.

(c) If the Commission finds it necessary to take an immediate regulatory action to safeguard the public health and safety and time is too short to allow completion of the procedures of this part prior to the action, the Executive Director or his delegee shall consult with the Council on Environmental Quality regarding alternative arrangements for meeting the requirements of its guidelines concerning minimum periods for agency review and advance availability of environmental impact statements.

(d) Whenever the Commission solicits offers by an outside person or organization to develop a proposed consumer product safety standard in accordance with section 7 of the Consumer Product Safety Act (15 U.S.C. 2056), the Executive Director shall recommend to the Commission whether the "offeror" should perform an environmental assessment during development of the proposed standard. In making this recommendation, the Executive Director shall take into account the resources of the "offeror," including expertise and money available to it. If the Commission decides that the "offeror" should perform an assessment, the agreement between the Commission and the offeror shall so provide.

§ 1021.9 Public hearings on draft EIS.

(a) A public hearing on a draft EIS will be held whenever such a hearing can be expected to aid in clarification of complex and controversial issues, or to facilitate presentation of information helpful to the CPSC. In deciding whether to hold such a public hearing, the extent to which the public has already been involved through earlier public hearings or meetings, or through comments or information contributed during development of the action, shall be taken into account.

(b) Notice of a public hearing to be held on a draft EIS shall be given in the FEDERAL REGISTER and in the CPSC Public Calendar (see 16 CFR 1012.3(a)) at least 15 days and where possible 30 days in advance of the hearing, and no sooner than 30 days after distribution of the draft EIS.

§ 1021.10 Legislative proposals.

Draft EIS's on legislative proposals which may significantly affect the environment shall be prepared as described in Office of Management and Budget Circular No. A–19. The draft EIS shall accompany the legislative proposal or report to Congress and shall be forwarded to the Council on Environmental Quality. Comments received and CPSC's responses shall be forwarded to the appropriate congressional committees. Because legislation undergoes continuous changes in Congress beyond the control of CPSC, no final EIS need be prepared by CPSC.

§ 1021.11 Public participation notice and comment.

(a) In addition to information and comment obtained from the public through hearings, meetings, or otherwise (see §§ 1021.7(a)(4) and 1021.9), information and comment shall be solicited from and provided to the public on anticipated environmental effects of major CPSC actions as follows:

(1) Promptly after a decision is made to prepare a draft EIS, a notice of intent to prepare the draft EIS shall be published in the CPSC Public Calendar, and, if deemed appropriate, in the FEDERAL REGISTER. The notice shall state the nature of the proposed action and the environmental issues identified. The notice shall solicit information and comment by other governmental agencies and the public.

(2) As soon as practicable after a negative declaration is completed, a copy of the negative declaration together with the environmental assessment report shall be forwarded to the Office of the Secretary of the Commission to be made available to the public. Notice of availability of the above documents for public inspection at Commission headquarters shall promptly be given in the CPSC Public Calendar and, if deemed appropriate in the FEDERAL REGISTER. The notice shall state that information and comments received from the public on the documents will be considered and will accompany the documents through the CPSC decisionmaking process, but that comments will not ordinarily be answered individually.

(3)(i) Upon completion of a draft EIS, a notice of its availability for comment shall be published in the CPSC Public Calendar. Five (5) copies of the draft EIS shall be forwarded to the Council on Environmental Quality which will publish a notice of its receipt in the FEDERAL REGISTER. The length of the comment period on the draft EIS shall be stated in the notice of availability and on the cover of the draft EIS. The comment period shall be a minimum of 45 days from the date the notice of receipt is published in the FEDERAL REGISTER by the Council on Environmental Quality. It should also be stated in the notice that comments received during the comment period will be addressed in the final EIS, whereas late comments will be considered to the extent practicable, and that all comments will be appended to the final EIS.

(ii) Copies of the draft EIS shall be sent to public and private organizations known by CPSC to have special expertise with respect to the environmental effects involved, those who are known to have an interest in the action, and those who request an opportunity to comment. Also, copies shall be circulated for comment to Federal, State and local agencies with jurisdiction by law and special expertise with respect to environmental effects involved. Appendices II, III, and IV of the Council on Environmental Quality Guidelines (40 CFR Part 1500) shall be consulted for details of this procedure.

(iii) Draft EIS's shall be available to the public in the Office of the Secretary, at Commission headquarters.

(4) Upon completion of a final EIS, a notice of its availability in the Office of the Secretary, shall be published in the CPSC Public Calendar. Five (5) copies of the final EIS shall be forwarded to the Council on Environmental Quality, and one (1) copy shall be sent to each entity or person who commented on the draft EIS.

(5) A list of EIS's under preparation, and of EIS's or negative declarations and environmental assessment reports completed shall be available to the public in the Office of the Secretary, at Commission headquarters. The list shall be continuously updated. A list of EIS's under preparation and negative declarations completed shall be forwarded to the Council on Environmental Quality on a quarterly basis. The Council will

periodically publish such lists in the FEDERAL REGISTER.

(6) In addition to publication in the CPSC Public Calendar and the FEDERAL REGISTER, notices called for by this section should also be publicized through press releases or local newspapers whenever appropriate.

Subpart C—Contents of Environmental Review Documents

§ 1021.12 Environmental assessment report.

(a) An environmental assessment report shall first briefly describe the proposed action being considered and realistic alternative actions. Next, it shall identify all effects (primary and secondary, beneficial and adverse) on the environment that can be anticipated to result from the proposed and alternative actions. After each anticipated effect is identified, it shall be described as fully as can be done with available data in order to show its magnitude and significance. This examination of effects will normally go on to touch upon the same general areas of concern as an EIS (§ 1021.14): however, the focus of the report shall be upon identification and description of effects.

(b) If, during environmental assessment, any methods or approaches are discovered which would avoid or minimize anticipated adverse effects on the natural environment, these methods or alternatives shall be described in the report.

§ 1021.13 Negative declaration.

(a) A negative declaration shall cite and be attached to the environmental assessment report upon which it is based. It shall refer to anticipated effects upon the environment identified in the environmental assessment report and give the reason(s) why those effects will not be significant. The final paragraph of a negative declaration shall give the reasons why the overall impact on the natural environment is not regarded as significant.

(b) The signature of the Executive Director shall appear at the end of the negative declaration.

§ 1021.14 Environmental impact statement.

(a) The objective of an EIS shall be to give CPSC decisionmakers and the public an in-depth analysis of anticipated environmental effects of a proposed major action and alternative actions, and to show clearly where tradeoffs exist between achieving the goals of the proposed action and causing adverse effects on the natural environment. An EIS shall set out information in a manner that is comprehensible to readers without scientific expertise and in a manner that will facilitate independent evaluation by the reader.

(b) It will be necessary to include in an EIS a description of effects which are not effects on the natural environment, but rather are, for example, purely economic or safety effects. For this reason, an EIS will often include issues and facts that are thoroughly analyzed in other comprehensive CPSC documents such as hazard analyzes, economic impact analyzes, or analyzes of impact on particular age groups among consumers. In such cases, the EIS shall not duplicate the other documents, but rather shall cite and summarize from them. A list of background documents and sources of data cited in the EIS shall appear at the end of every EIS.

(c) An EIS must address the issues described in this paragraph. In addition, CPSC shall use the Council on Environmental Quality Guidelines (40 CFR 1500.8) as basic guidance for the content of EIS's. The major portion of an EIS shall be devoted to paragraph (c) (1) through (3) of this section.

(1) *Background and description of the proposed action and alternative actions.* (i) The EIS shall describe the purpose of the proposed action and briefly set forth the history of the proposal and the schedule for implementing it. If other governmental agencies are involved in the proposed action or are pursuing similar actions, the relationship of their actions to the proposed CPSC action shall be described.

(ii) The EIS shall describe all realistic alternatives to the proposed action, including the alternatives of taking no action or postponing action. The effects on product safety anticipated to result from the proposed action and from alternative actions shall be compared briefly.

(2) *Anticipated effects on the environment.* The EIS shall identify and analyze anticipated effects of the proposed action and alternative actions on the environment. All such effects, whether direct or indirect, adverse or beneficial, shall be addressed.

(3) *Adverse effects.* The EIS shall contain a section which lists the anticipated adverse effects on the environment which cannot be avoided if the proposed actions or alternative action is carried out. In the same section, anticipated adverse effects which can be avoided shall be listed and accompanied by a description of the method(s) for avoiding them.

(4) *Relationship between short term uses of the natural environment and enhancement of long-term productivity.* The EIS shall describe the extent to which achieving the immediate goals of the proposed action will result in long-term loss in use of natural resources or long-term detriment to the quality of the natural environment.

(5) *Irreversible and irretrievable commitments of resources.* The EIS shall indicate whether the proposed action or alternative actions will irreversibly commit or destroy natural resources, reduce the quality of the natural environment, or limit other uses of the natural environment.

(6) *Comments by Federal, State and local agencies and by other interested persons.* (i) Each final EIS shall respond to all substantive comments and new information received during the comment period on the draft EIS. The final EIS shall discuss in detail any major issues newly raised by the comments and give reasons for the CPSC position whenever it disagrees with any major objections raised in the comments.

(ii) All substantive comments received shall be attached to the final EIS.

(7) *Summary sheet.* A summary sheet, prepared as described in 40 CFR Part 1500, Appendix I, shall accompany each draft, and final, EIS.

Interested persons are invited to submit, on or before July 5, 1977, written comments regarding this notice. Comments received after that date will be considered to the extent practicable. Comments and any accompanying data or material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Comments may be accompanied by a memorandum or brief in support thereof. Comments received by the Commission may be inspected in the Office of the Secretary, at 1111 18th Street N.W., Washington, D.C., during working hours, Monday through Friday.

Dated: May 11, 1977.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

Title 21—Food and Drugs

CHAPTER II—DRUG ENFORCEMENT ADMINISTRATION, DEPARTMENT OF JUSTICE

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

Placement of Loperamide in Schedule V

AGENCY: Drug Enforcement Administration.

ACTION: Final rule.

SUMMARY: This is a final rule issued by the Administrator of the Drug Enforcement Administration placing the drug loperamide into schedule V of the Controlled Substances Act (Title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801–966)).

The Notice published in the FEDERAL REGISTER proposing this rule (41 FR 31553, July 29, 1976) was initiated by the Administrator after he received a request dated January 23, 1976, from the Assistant Secretary for Health, Department of Health, Education, and Welfare, that loperamide be placed into schedule V of the Act for reasons set forth in the Assistant Secretary's letter and in the July 29, 1976 Notice, and after the Administrator's own study of the drug.

The effect of this order is to require that the manufacture, distribution, dispensing, importation and exportation of loperamide be subject to controls as provided by the Act, and by regulations of the Drug Enforcement Administration as codified in Title 21, Code of Federal Regulations, Part 1300 to End.

DATES: Effective date: June 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Howard McClain, Chief, Regulatory Control Division, Telephone (202) 382–5676

SUPPLEMENTARY INFORMATION: A Notice was published in the FEDERAL REGISTER on Thursday, July 29, 1976 (41 FR 31553) proposing that schedule V of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 812 (c)) be amended to include loperamide. All interested persons were given until August 31, 1976 to submit their comments or objections in writing regarding their proposal.

One comment was received in response to the proposal, from Janssen R & D, Inc. who stated they might in the future raise the issue of whether schedule V controls for loperamide are warranted after they review data which might then become available, but would not presently oppose control and in fact recognized the need for it regarding substances with a potential for abuse.

No further comments or objections were received, nor were there any requests for a hearing, and in view thereof, and based upon the investigations and review of the Drug Enforcement Administration and upon the scientific and medical evaluation and recommendation of the Assistant Secretary in behalf of the Secretary of Health, Education, and Welfare, received pursuant to sections 201(a) and 201(b) of the Act (21 U.S.C. 811(a) and 811(b)), the Administrator of the Drug Enforcement Administration finds that:

1. Based on information now available, loperamide has a low potential for abuse relative to the drugs or other substances currently listed in schedule IV;

2. Loperamide has a currently accepted medical use in treatment in the United States;

3. Abuse of loperamide may lead to limited physical dependence or psychological dependence relative to the drugs or other substances in schedule IV.

Therefore, under the authority vested in him by the Act and by regulations of the Department of Justice, the Administrator of the Drug Enforcement Administration hereby orders that § 1308.15(c) of Title 21 of the Code of Federal Regulations (CFR) be amended by adding a new paragraph (c) to read as follows:

§ 1308.15 Schedule V.

(a) Schedule V shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section.

. . . . . .

(c) Loperamide 8125

. . . . . .

Dated: May 13, 1977.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 722-77]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart O—Office of Management and Finance

SUPERVISORY RESPONSIBILITY FOR THE OFFICE OF MANAGEMENT AND FINANCE

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: Existing Department regulations provide that the Assistant Attorney General for Administration, who heads the Department's Office of Management and Finance, shall carry out assigned functions under the direction of the Associate Attorney General. Prior to the establishment of the position of Associate Attorney General, the Assistant Attorney General for Administration reported to the Deputy Attorney General. However, the functions of the Office of Management and Finance relate to areas of responsibility of both the Associate Attorney General and the Deputy Attorney General. To avoid overlapping of responsibility, this order places the Assistant Attorney General for Administration under the immediate supervision of the Attorney General.

EFFECTIVE DATE: May 10, 1977.

FOR FURTHER INFORMATION CONTACT:

John M. Harmon, Office of Legal Counsel, Department of Justice, Washington, D.C. 20530. (202–739–2041).

§§ 0.75, 0.76, and 0.77 [Amended]

By virtue of the authority vested in me by 28 U.S.C. 509, 510, and 5 U.S.C. 301, §§ 0.75, 0.76, and 0.77 of Subpart O of Part 0 of Chapter I of Title 28, Code of Federal Regulations, are each amended by substituting the phrase "Subject to the general supervision and direction of the Attorney General" for the phrase "Subject to the general supervision of the Attorney General, and under the direction of the Associate Attorney General".

Dated: May 10, 1977.

GRIFFIN B. BELL,
Attorney General.

[FR Doc.77-14203 Filed 5-17-77;8:45 am]

Title 31—Money and Finance: Treasury

CHAPTER V—OFFICE OF FOREIGN ASSETS CONTROL, DEPARTMENT OF THE TREASURY

PART 515—CUBAN ASSETS CONTROL REGULATIONS

Transactions Incidental to Authorized Travel to Cuba

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule.

SUMMARY: The existing general license (§ 515.560) in the Cuban Assets Control Regulations authorizes persons who visit Cuba to pay for their transportation to, from, and in Cuba, and expenses for meals, hotels, etc. while in that country. That license is being amended (1) to permit other persons (e.g., travel agencies) to assist American travelers in making arrangements for such travel; (2) to permit charters of aircraft and ships for travel to Cuba; and (3) to facilitate the use of checks, drafts, traveler's checks and credit cards in connection with travel to Cuba.

The amendment will facilitate Cuban travel by permitting the arrangement of group charter tours to Cuba. Scheduled commercial service between the United States and Cuba is not authorized for either domestic or foreign carriers. Travel agents who arrange individual or group travel to Cuba may, among other matters, make block reservations, sell passage aboard a foreign carrier providing regularly scheduled service to Cuba from points outside the United States, charter an aircraft or vessel, transfer funds to Cuban nationals on behalf of travelers, and receive commissions from Cuban enterprises for services rendered in arranging and assisting such travel.

United States firms are authorized to process and pay checks, drafts, traveler's checks and credit card instruments (vouchers, drafts or sales receipts) in connection with Cuban travel. Foreign credit card firms owned or controlled by U.S. persons are authorized to contract with a Cuban enterprise for the extension of credit through the use of credit cards. However, a domestic credit card issuer is not authorized to contract with a Cuban enterprise for the extension of credit to any traveler for any purpose.

EFFECTIVE DATE: May 12, 1977.

FOR FURTHER INFORMATION CONTACT:

George F. Hazard, Chief of Licensing, Office of Foreign Assets Control, Department of the Treasury, Washington, D.C. 20220 (202) 376–0428.

SUPPLEMENTARY INFORMATION: Since this amendment relaxes existing restrictions and involves a foreign affairs function, the provisions of the Administrative Procedures Act (5 U.S.C. 553) requiring notice of proposed rule making, an opportunity for public participation, and a delay in effective date are inapplicable.

The primary author of this amendment is Dennis M. O'Connell.

Section 515.560 of the Cuban Assets Control Regulations is amended to read as follows:

§ 515.560 Certain transactions incident to travel to and in Cuba.

(a) The following transactions are authorized:

(1) All transactions ordinarily incident to travel to and from Cuba.

(2) All transactions ordinarily incident to travel in Cuba, including payment of living expenses and the acquisition in Cuba of goods for personal consumption there.

(3) The purchase in Cuba, and importation as accompanied baggage, of merchandise with a foreign market value not to exceed $100 per person, for personal use only. Such merchandise may not be resold. The authorization in this subparagraph may only be used once in every six consecutive months.

(4) All transactions by any person incident to arranging or assisting travel by any other person or group of persons to, from, or in Cuba. This authorization includes arranging through transportation to Cuba; selling passage aboard a foreign carrier providing regularly scheduled service to Cuba from points outside the United States; chartering an aircraft or vessel; arranging hotel accommodations in Cuba, ground transportation, local tours and similar travel activities in Cuba; transfer of funds to Cuba or any national thereof; and receipt from Cuba or a national thereof of consideration for authorized services.

(5) All transactions on behalf of aircraft or vessels incidental to nonscheduled flights or voyages to, from, and in Cuba. This paragraph does not authorize the carriage of any merchandise to and from Cuba except accompanied baggage and merchandise authorized by paragraph (a)(3) of this section.

(6) All transactions incident to the processing and payment of checks, drafts, traveler's checks, and similar instruments negotiated in Cuba by any person under the authority of this section.

(7) Processing and payment by United States credit card issuers of credit card instruments (vouchers, drafts, or sales receipts) for authorized expenditures in Cuba forwarded by credit card companies in third countries to the domestic issuer for payment or reimbursement. Foreign credit card firms owned or controlled by U.S. persons are authorized to contract with a Cuban enterprise for the extension of credit through the use of credit cards. However, this paragraph does not authorize a domestic credit card issuer to contract with a Cuban enterprise for the extension of credit to any traveler for any purpose.

(b) Persons who travel to Cuba for the purpose of gathering news, making news or documentary films, engaging in professional research or for similar activities are authorized to acquire and import into the United States, as accompanied baggage or otherwise, such photographs, films, books, magazines, newspapers, and similar publications as are directly related to their professional activities, without limitation as to value. Such merchandise may only be acquired and imported for their own professional use or that of their employers at the time of the travel, and may not be sold to other persons.

(c) Persons who travel in Cuba after March 18, 1977, and who prior to that date were not designated nationals of Cuba, are licensed as unblocked nationals. This subparagraph does not authorize any transaction prohibited by any other section of this part.

(d) This section does not authorize any person subject to the jurisdiction of the United States to make any investment in Cuba, establish any branch or agency in Cuba, or transfer any property to Cuba except transfers by or on behalf of individual or group travelers, and air craft or vessels, as authorized in this section.

(50 U.S.C. App. 5(b); 32 U.S.C. 2370(a); Executive Order 9193, 3 CFR 1943 Cum. Supp.; Treasury Department Order No. 128, 32 FR 3472.)

STANLEY L. SOMMERFIELD,
Acting Director.

Approved: May 12, 1977.

BETTE B. ANDERSON,
Under Secretary.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 719-3]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Disapproval of Revision of Maryland State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule announces the Administrator's disapproval of a variance request submitted to EPA by the State of Maryland on behalf of the Kelly-Springfield Tire Company, Cumberland, Maryland. The variance would have allowed Kelly-Springfield to convert from residual oil to coal and burn the coal for a period of two years after delivery to the State of a copy of an executed purchase order for the installation of control equipment designed to control particulate (TSP) emissions. The Company is located in an area that is currently not meeting the national ambient air quality standards (NAAQS) for TSP.

EFECTIVE DATE: Immediately on May 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold Frankford, Air Programs Branch, Air and Hazardous Materials Division, Environmental Protection Agency, Region III, Curtis Building, Tenth Floor, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106.

SUPPLEMENTARY INFORMATION: On October 14, 1975, the State of Maryland submitted to the Regional Administrator, EPA Region III, a request for a variance from the air pollution control regulations governing Maryland Area I (Maryland portion of the Cumberland-Keyser Interstate Air Quality Control Region (AQCR)). The State asked that this variance request be reviewed and processed as a revision to the Maryland State Implementation Plan (SIP) for the attainment and maintenance of national ambient air quality standards.

The variance, issued by the State on September 24, 1975 would exempt the Kelly-Springfield Tire Company of Cumberland, Maryland from compliance with Maryland Regulations 10.03.36.02C(2) (Control and Prohibition of Visible Emissions) and 10.03.36.03B(3) (Control of Particulate Matter from Fuel Burning Equipment) for a period of two years from the delivery to the State of a copy of an executed purchase order for high-efficiency (99 percent) electrostatic precipitators (ESP). The exception request further permits Kelly-Springfield to burn coal in boilers No. 61 and No. 62 immediately after the boilers are converted to dual firing capability (coal or oil) and temporarily equipped with refurbished medium efficiency mechanical dust collectors. Prior to this request, the Kelly-Springfield Company was burning 1.0 percent sulfur residual oil.

The State of Maryland and the Kelly-Springfield Company justify the variance request with the following:

1. Kelly-Springfield's Cumberland plant represents a substantial economic factor in the Western Maryland area.

2. The competitive position of the Cumberland plant is in jeopardy because of the increase in the cost of fuel oil. The uncertainty of foreign fuel oil supply creates a continuous production threat to the Company.

3. Conversion from fuel oil to Western Maryland coal as a primary fuel will significantly reduce manufacturing costs and in turn stimulate the Western Maryland economy.

4. An analysis by the Company's consultant indicates that the impact of emissions into the ambient air from the coal fired boilers during the two year conversion period may not significantly affect ambient air particulate concentrations.

The State of Maryland submitted proof that a public hearing was held on July 23, 1975 in Cumberland, in accordance with the requirements of 40 CFR 51.4.

On December 30, 1976 (41 FR 56831), the Regional Administrator proposed the variance request submitted by the State of Maryland as a revision of the Maryland State Implementation Plan and provided for a 30-day public comment period, ending January 31, 1977. During the public comment period, no comments were received.

On November 13, 1975, EPA informed the State of Maryland and the Kelly-Springfield Company that if the variance request were approved, the annual particulate concentration levels would increase in an AQCR that is not presently attaining the annual national ambient air quality standard for particulates. Furthermore, if certain meteorological conditions occurred, ambient particulate concentration levels would increase to a point at which human health could be imminently and substantially endangered.

For these reasons, EPA demonstrated to Maryland and the Kelly-Springfield Tire Company alternative control programs that would preclude either the need for a variance or the need for the Kelly-Springfield Company to go out of compliance with the applicable regulations of the Maryland SIP. However, the Kelly-Springfield Company chose not to adopt or utilize the alternative control programs suggested by the Administrator, or to develop any other satisfactory alternative. Therefore, EPA informed the State of Maryland in March, 1976 that the variance request could not be approved, as the proposed revision would adversely impact the air quality in a presently non-attaining AQCR. Since then, no withdrawal action has been taken by the State.

In view of the fact that the variance request issued by the State of Maryland to the Kelly-Springfield Company would result in increased particulate concentration levels in an AQCR currently designated as a non-attainment area for particulates and the fact that the variance would permit a source that had been in compliance with the applicable Maryland regulations to go out of compliance, the Administrator concludes that approval of this variance request as a revision of the Maryland SIP would be inappropriate.

Therefore, the Administrator hereby disapproves the variance request submitted by the State of Maryland on behalf of the Kelly-Springfield Tire Company as a revision of the Maryland State Implementation Plan.

Copies of the variance request and the analysis on which it is based are available for public inspection during normal business hours at the following locations:

United States Environmental Protection Agency, Region III, Curtis Building, Tenth Floor, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106, Attn: Mr. Harold Frankford.

Maryland Bureau of Air Quality and Noise Control, 201 West Preston Street, Baltimore, Maryland 21201, Attn: Mr. George Ferreri.

Public Information Reference Unit, Room 2922—EPA Library, United States Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

(42 U.S.C. 1857c-5.)

Dated: May 6, 1977.

DOUGLAS M. COSTLE,
Administrator.

[FRL 721-2]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Approval of Revisions to Stanislaus County Air Pollution Control District's Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the Stanislaus County Air Pollution Control District's rules and regulations with the exception of regulations concerning new source review, emergency episode, and gasoline vapor recovery.

Pursuant to section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by EPA or the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: May 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, San Francisco, California 94111, (415-556-7288).

SUPPLEMENTAL INFORMATION: On February 8, 1977 (42 FR 7968), EPA proposed approval of revisions to the Stanislaus County Air Pollution Control District's rules and regulations submitted on July 25, 1973, July 19, 1974, April 10, 1975, and August 2, 1976. These revisions were submited by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received on the changes being acted on in this final rulemaking notice. A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sec. 110, Clean Air Act, as amended (42 U.S.C. 1857c-5).)

Dated: April 27, 1977.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of Part 52 of Chapter I, Title 40, of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c)(21)(vii), (24)(iv), (27)(i), and (32)(ii) are revised as follows:

§ 52.220 **Identification of plan.**

* * * * *

(c) * * *

(21) * * *

(vii) Stanislaus County APCD.

(A) Rules 101–112.

(B) Rules 301–305.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to the New York State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule and reopening of public comment on proposed rule.

SUMMARY: This notice announces that the Environmental Protection Agency (EPA) is taking two actions; both actions involve revision to the New York State Implementation Plan (SIP) through changes made to Title 6 of the State's Official Compilation of Codes, Rules and Regulations, Part 225 (6 NYCRR 225) entitled, "Fuel Composition and Use." One action, by reopening EPA's period for public comment, postpones EPA approval/disapproval action regarding proposed changes to New York State's sulfur-in-fuel-oil limitation for the Niagara Frontier. The other action approves a SIP revision concerning

changes made by the State to 6 NYCRR 225.

DATES: The approval action will become effective June 17, 1977. Additional comments on the proposed revision to the sulfur-in-fuel-oil limitation for the Niagara Frontier received on or before July 18, 1977 will be considered.

ADDRESSEES. All comments should be addressed to: Gerald M. Hansler, Regional Administrator, Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10007.

Copies of the unapproved part of the proposal are available for public inspection during normal business hours at:

U.S. Environmental Protection Agency, Region II Office, Air Programs Branch, Room 908, 26 Federal Plaza, New York, New York 10007.

New York State Department of Environmental Conservation, 50 Wolf Road, Albany, New York 12233.

New York State Department of Environmental Conservation, Region 9 Office, 584 Delaware Avenue, Buffalo, New York 14202.

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

William S. Baker, Chief, Air Programs Branch, U.S. Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10007, 212-264-2517.

SUPPLEMENTAL INFORMATION:

A. INTRODUCTION

A request to EPA to revise the SIP was made by the State on September 20, 1976. Announcement of receipt of the request and a detailed description of the proposed revision are contained in the EPA notice of proposed rulemaking published in the December 16, 1976 FEDERAL REGISTER (41 FR 54955). What follows is a discussion of the EPA decision to postpone approval/disapproval action for a part of the revision requested by the State and to approve the remaining part of the request.

B. POSTPONEMENT OF APPROVAL/DISAPPROVAL ACTION FOR PROPOSED CHANGES TO SULFUR-IN-FUEL-OIL LIMITATION FOR THE NIAGARA FRONTIER

1. SUMMARY OF PROPOSED REVISION

The proposed revision to § 225.1 of 6 NYCRR allows the temporary use in part of the Niagara Frontier Air Quality Control Region (Erie and Niagara Counties) of higher sulfur content fuel oil than currently required by the SIP. New York State proposes that the allowable sulfur-in-fuel-oil content be increased from 1.1 percent to 1.7 percent (on a 3-month average) until December 1, 1977, whereupon, the allowable sulfur-in-fuel-oil content will once again be 1.1 percent. However, for the South Buffalo-Lackawanna area of the Niagara Frontier, the allowable fuel oil sulfur content remains at 1.1 percent.

2. RATIONALE FOR POSTPONEMENT OF EPA'S DECISION ON WHETHER TO APPROVE OR DISAPPROVE

a. *Unhealthful air quality in the area and the need for a thorough control strategy demonstration*—(i) *Discussion.* EPA is postponing its decision on whether to approve or disapprove the proposed revision to relax the limitation on sulfur-in-fuel-oil content for the Niagara Frontier because the State control strategy demonstration is presently inadequate to determine the effect of this revision. The need for a thorough control strategy demonstration is highlighted by the unhealthful air quality which exists in this area. The EPA December 16, 1976 FEDERAL REGISTER notice contains air quality data showing that the primary national ambient air quality standard for the pollutant, sulfur dioxide, is exceeded in the Niagara Frontier. This health-related standard is contravened at two monitoring sites in the South Buffalo-Lackawanna area. In addition, the primary national ambient air quality standard for particulate mattr is also exceeded in the Niagara Frontier.

When establishing the national ambient air quality standards for sulfur dioxide and particulate matter, EPA considered the synergistic effects between these two pollutants. EPA remains concerned about possible synergistic effects and, as noted in a June 24, 1976 memorandum from the EPA Administrator, EPA policy requires a thorough control strategy demonstration prior to EPA approval of any plan revision to allow an increase in sulfur dioxide emissions. Such control strategy demonstrations must provide a high degree of certainty for attainment of sulfur dioxide standards, especially in areas with high levels of total suspended particulates. The Niagara Frontier is such an area. It is also EPA policy, as noted in the June 24, 1976 memorandum, to discourage increases in sulfur dioxide emissions in the heavily industrialized northeastern states until better data are collected on the adverse health effects of sulfates. However, no national standards are yet in effect for sulfates.

As discussed in the EPA December 16, 1976 FEDERAL REGISTER notice, the analysis submitted by the State on the air quality impact of its proposed plan revision is based on rollback techniques. Although rollback techniques are suitable in some situations, atmospheric diffussion modeling generally is required to prepare an acceptable control strategy demonstration for SIP revision. EPA believes that the nature of the revision proposed by the State would minimize the impact of the use of fuel oil with sulfur content greater than 1.1 percent, but at this time EPA is deferring approval/disapproval action until more definite information concerning the proposal can be obtained. In this regard, EPA will continue to work with the State to complete an accurate emission inventory for the Niagara Frontier. This work is being done under an EPA contract and will be followed by diffusion modeling of the polluting sources in the area. The work is scheduled for completion in mid-1977 and EPA has decided to await its completion prior to taking final action on the proposed revision to the sulfur-in-fuel-oil limitation for the Niagara Frontier.

(ii) *Public comments.* Seven of the thirteen written comments received from interested parties in response to the EPA December 16, 1976 notice were from individuals who expressed concern about the existing unhealthful air quality in the Niagara Frontier and generally opposed relaxation of the allowable sulfur-in-fuel-oil content. One commentator questioned the validity of the ambient air quality standards as to whether they are stringent enough to protect public health. The commentator noted the synergistic effect between sulfur dioxide and particulate matter and also suggested that sulfur concentrations are likely to increase as a result of relaxation of sulfur-in-fuel-oil limitations.

The validity of the ambient air quality standards established by EPA was recently reaffirmed by the National Academy of Sciences. To protect the public's health from the adverse effects caused by sulfur dioxide by itself or in combination with other pollutants, EPA requires a thorough control strategy demonstration showing that violations of the sulfur dioxide standard will not be caused or exacerbated by a proposed revision to a control plan. Any potential for an increase in sulfate concentrations will be minimized by requiring protection of the sulfur dioxide standards.

Comments were received from the Erie County Department of Environmental Quality (now the Department of Environment and Development) which supported the use of 1.7 percent sulfur content fuel oil in the Niagara Frontier and seriously questioned the need to reduce this limitation to 1.1 percent after December 1, 1977. The Department stated that nonconforming fuel oil currently is being used in the Niagara Frontier and, therefore, the SIP revision would not significantly change emissions. The County also believes that sulfur dioxide emissions outside the South Buffalo-Lackawanna area have no significant impact on South Buffalo-Lackawanna.

For the period after December 1, 1977, the State has informally notified EPA that it expects to request another revision to its SIP accompanied by a control strategy demonstration meeting the stringent EPA requirements. The sulfur-in-fuel-oil limitations proposed by the State would be based on the results of State and EPA efforts to improve the emission inventory and to perform diffusion modeling. Thus, the need to have a 1.1 percent sulfur-in-fuel-oil limitation for the entire Niagara Frontier after December 1, 1977 will be critically examined.

In addition to Erie County, the State, in its submittal, also informed EPA that nonconforming fuel oil is being used in the Niagara Frontier. The State further informed EPA that the proposed revision will increase sulfur dioxide emissions by 3,000 tons per year over the quantity emitted in 1975, a year when oil with a sulfur-in-fuel content greater than 1.1 percent was used. EPA believes that the extent to which the current use of nonconforming fuel oil is contributing to the existing contraventions of air quality standards or the extent any additional increase in sulfur dioxide emissions will contribute to the contravention of standards cannot be determined with certainty without a more thorough control strategy demonstration and improved emission inventory. The EPA requirement for a thorough control strategy demonstration is intended to document whether a proposed SIP revision will cause or exacerbate air quality problems.

Another commentator stated that current sulfur dioxide emissions are unusually low because of an economic recession and that the air quality impact of relaxing sulfur-in-fuel-oil limitations would be more severe than that estimated by the State. The improvement to the inventory will establish normal operating conditions of sources of sulfur dioxide and thus EPA believes the effect of any changes in sulfur-in-fuel-oil limitations will be accurately accounted for.

In another matter regarding emission estimates, the State clarified an item which appeared in the December 16, 1976 notice. The State indicated that its submittal for the proposed revision specified that the control of coke oven emissions from Bethlehem Steel Corporation, through compliance with 6 NYCRR 214, "By-Product Coke Oven Batteries," would occur after 1977 and not in 1976 and 1977 as incorrectly stated in the EPA notice.

b. *Fuel supply*—(i) *Discussion.* A constraining factor in the development of sulfur-in-fuel-oil limitations for any revision to the SIP is the limited supply of low sulfur fuel oil for the Niagara Frontier. The problem pertains to both short-term and long-term fuel supplies. In addition to providing more time to develop a thorough control strategy demonstration, EPA is postponing its decision on whether to approve or disapprove the proposed revision in order to determine whether adequate low sulfur fuel oil is available to meet the proposed and existing SIP requirements.

In the December 16, 1976 FEDERAL REGISTER notice, EPA noted the State's contention that severe problems exist in supplying oil with a sulfur-in-fuel content of 1.1 percent throughout the Niagara Frontier. EPA also was recently informed that major fuel suppliers for the area applied to the State for emergency variances to sell oil with a sulfur-in-fuel content greater than the limitations contained in the proposed plan revision. These variances were denied by the State. In order to fully investigate the fuel supply situation, EPA plans to contact the Federal Energy Administration and all major fuel oil suppliers for the Niagara Frontier to assess the availability of conforming fuel oil. This assessment will be made both for the period until December 1, 1977, the period for which the proposed plan revision applies, and for the period after December 1, 1977. The information will be used to review the adequacy of the SIP provisions to provide for attainment of standards and to establish available control strategy options. This work also relates to the EPA and State planning effort to provide for maintenance of standards. This effort evaluates the adequacy of the existing control strategy for the next 10 years.

(ii) *Public comments.* EPA received a comment from the League of Women Voters of Buffalo in which the League called for the installation of sulfur removal equipment to protect against the degradation of the air of western New York. The League also asked for an honest assesment as to whether the long term requirement of 1.1 percent sulfur-in-fuel-oil can ever be enforced.

Comments received from the major fuel suppliers to the Niagara Frontier (Mobil Oil Corporation, Ashland Oil, Inc. and the United Refining Co.) generally supported the proposed plan revision. These companies informed EPA that they cannot now supply conforming 1.1 percent sulfur content fuel oil to the Niagara Frontier and might not be able to do so after December 1, 1977. The suppliers cited the uncertainty of the sulfur content of fuel oil distributed by the common carrier pipelines which supply the Niagara Frontier. One of the suppliers also informed EPA that export of Canadian crude oil to the area was to be curtailed at the end of the first quarter of 1977 and that the Canadian crude oil currently available has a high sulfur content.

In comments received from the New York State Department of Environmental Conservation, the State clarified another item which appeared in the December 16, 1976 notice. The State indicated in its submittal that no natural gas curtailments were expected in the Niagara Frontier during 1976 and 1977. In its notice EPA indicated the contrary.

The comments made by interested parties make it incumbent that EPA examine the short-term and long-term fuel supply situation and fuel consumption needs for the Niagara Frontier. By postponing the decision to approve or disapprove the proposed SIP revision as it applies to the sulfur content of fuel oil for use in the Niagara Frontier, EPA will be better able to obtain the information needed to respond to the issues raised by the commenters.

3. INTERIM ENFORCEMENT POLICY

a. *Discussion.* During the period encompassing the preparation of an improved control strategy demonstration and the obtainment of more detailed fuel supply information, EPA will use discretion in the enforcement of the current SIP limitation of 1.1 percent sulfur content fuel oil.

b. *Public comment.* A commentator stated that having two sulfur-in-fuel-oil limitations in the Niagara Frontier, 1.1 percent and 1.7 percent (on a 3-month average), has the effect of precluding citizen enforcement of the SIP under Section 304, "Citizen Suits," of the Clean Air Act. EPA believes that through one of its other actions contained in this notice, approving revision to § 225.7, "Reports, sampling and analysis," the State will have greater authority to obtain the names of all fuel purchasers and to obtain fuel analyses and data on the quantities of fuel received and sold. Consequently, citizens will have greater access to fuel information to initiate a citizen suit, if appropriate. In addition, the results of the EPA enforcement effort to determine the sale or use of nonconforming fuel oil will also provide fuel information. Consequently, EPA believes that having two sulfur-in-fuel-oil limitations within the Niagara Frontier should not hinder citizen involvement or prevent EPA from approving the plan revision if all other EPA requirements are satisfied.

C. APPROVAL ACTION

1. SUMMARY OF APPROVED REVISION TO THE SIP

The revision to the New York SIP being approved by EPA accomplishes the following:

a. Upon demonstration by a source owner that the use of higher sulfur coal will not contribute to the contravention of ambient air quality standards, coal burning sources of greater than 100 million Btu per hour heat capacity may be approved for a special limitation under § 225.2. The previous heat capacity cutoff for requiring a source-generated demonstration was 250 million Btu per hour.

b. The formula contained in § 225.5(a), which determines sulfur dioxide emissions from the burning of fuel mixtures, is modified to include gaseous fuels. Process gases are also included in the formula by the deletion of § 225.5(a)(2).

c. Through revisions to § 225.7, fuel suppliers are required to furnish fuel sale records upon the request of the State.

d. The word "rated" is deleted from §§§ 225.1(a)(1), 225.2 and 225.6 wherever the phrase "rated total heat input" previously appeared.

2. RATIONALE FOR APPROVAL ACTION

EPA concurs with the conclusions reached in the technical support document provided by the State in its request to revise the SIP for the four items noted previously in Section C.1.

One commenter addressed the revision affecting special limitations for coal burning sources. He believes that the reason given for approval by the State is not appropriate. He stated that decreasing the cutoff point for applicability of § 225.2(c) for coal burning sources because "coal users have a greater air pollution impact than oil users of an equivalent heat input" is not valid because this disparity is already accounted

for by the different sulfur-in-fuel requirements for the two fuels.

In response, the State submittal notes that provisions for special limitations in 6 NYCRR 225 permit the use of oil with a sulfur content of 3.0 percent and coal with a sulfur content of 2.8 lbs per million Btu. Since 3.0 percent sulfur content fuel oil is equal to a sulfur content of 1.64 lbs per million Btu, a coal facility rated at 150 million Btu per hour heat input has a potential total sulfur emissions of 420 lbs per hour, which is slightly greater than the emissions of 410 lbs per hour from an oil facility rated at 250 million Btu per hour heat input. Moreover, the sulfur content within a shipment of coal can vary by plus or minus 30 percent. Therefore, to protect against the contravention of the 24-hour ambient air quality standard during the possible use of coal with a sulfur content up to 30 percent greater than allowable, the applicability of §§ 225.2(b) and 225.2 (c) for facilities using coal is being modified from 250 million Btu per hour to 100 million Btu per hour.

Another commenter asked that § 225.2(b) be revised to delete the words "for sulfur dioxide." This would mean that applicable ambient air quality standards for all pollutants would need to be attained before a special limitation increasing the allowable sulfur-in-fuel content can be granted by the State. As noted in Section B of this notice, protection of the sulfur dioxide standards will protect the public from the adverse effects of sulfur dioxide by itself or in the presence of other pollutants. The protection of sulfur dioxide standards must be demonstrated before EPA approves any special limitation.

The same commenter stated that the State special limitation requirements contained in §§ 225.2 and 225.3 are inconsistent with Section 110(f)(1) of the Clean Air Act. This section requires that requests for postponements of applicable SIP requirements be initiated prior to the source's scheduled compliance date.

EPA recognizes the commenter's concern for public notice before any relaxation of an emission standard is permitted. However, since special limitations adopted by the State must be approved by EPA through normal SIP revision procedures, adequate public notice and opportunity for comment is provided. Moreover, the adoption by the State of a special limitation and EPA approval of such a plan revision is not a postponement of an otherwise applicable requirement. Rather, it is the adoption of a new requirement.

D. APPROVAL AND REQUEST FOR ADDITIONAL PUBLIC COMMENTS

EPA finds the revision to 6 NYCRR 225 as it relates to the four items listed in Section B consistent with current EPA policies and goals set forth in the requirements of section 110(a)(2)(A)–(H) of the Clean Air Act and EPA regulations contained in 40 CFR Part 51 in that it is not expected to result in the contravention of any applicable ambient air quality standard.

EPA further finds that the proposed revision as it applies to sulfur-in-fuel-oil limitations for the Niagara Frontier should be subject to further deliberation. Therefore, EPA is reopening the period for public comment on whether the plan revision for the sulfur-in-fuel-oil limitations for the Niagara Frontier should be approved.

(Secs. 110 and 301, Clean Air Act, as amended, (42 U.S.C. 1857c–5, 1857g).)

Dated: May 11, 1977.

DOUGLAS M. COSTLE,
Administrator,
Environmental Protection Agency.

Part 52 of Chapter I, Title 40 Code of Federal Regulations is amended as follows:

Subpart HH—New York

1. In § 52.1670, paragraph (c) is amended by adding new subparagraph (32) as follows:

§ 52.1670 Identification of plans.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * * * *

(32) Revision to Part 225 submitted on Septembber 20, 1976 and November 5, 1976 by the New York State Department of Environmental Conservation which accomplishes the following:

(i) Upon demonstration by a source owner that the use of the higher sulfur coal will not contribute to the contravention of ambient air quality standards, coal burning sources of greater than 100 million Btu per hour heat capacity may be approved for a special limitation under § 225.2. The previous heat capacity cutoff for requiring a source-generated demonstration was 250 million Btu per hour.

(ii) The formula contained in § 225.5 (a), which determines sulfur dioxide emissions from the burning of fuel mixtures, is modified to include gaseous fuels. Process gases are also included in the formula by the deletion of § 225.5 (a)(2), which precluded such inclusion.

(iii) Fuel suppliers are required to furnish fuel sale records upon request of the State through revision to § 225.7.

(iv) The word "rated" is deleted from §§§ 225.1(a)(1), 225.2 and 225.6 wherever the phrase "rated total heat input" previously appeared.

[FRL 727–3]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Approval of Nebraska Plan Revision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document formally approves Nebraska's continuous monitoring regulation as part of the State Implementation Plan. Approval means that the Federal Government, as well as the State, may enforce this State regulation.

EFFECTIVE DATE: May 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Dewayne E. Durst, Chief, Air Support Branch, Air and Hazardous Materials Division, EPA, Region VII, 1735 Baltimore, Kansas City, Missouri 64108 (816–374–3791).

SUPPLEMENTARY INFORMATION: On November 2, 1976, the Governor of Nebraska officially submitted an amendment to Rule 17 of the Nebraska Air Pollution Control Rules and Regulations to be approved as a revision to the State Implementation Plan (SIP) for the attainment and maintenance of the National Ambient Air Quality Standards. The Revision was subjected to a public hearing in Omaha, Nebraska, on September 10, 1976, and was adopted as of September 22, 1976.

On February 11, 1977 (42 FR 8672), EPA announced receipt of the proposed revision and requested public comment on it. Copies of the revision and supporting documents were made available at several locations. The comment period has expired and no comments have been received.

The revised rule requires continuous opacity monitoring on all existing fossil fuel-fired steam generators of over 250 million Btu-per-hour-heat input. Compliance is required by March 30, 1978. The rule exempts units that burn only gas and oil if they comply with regulations without control equipment and have never been found in violation of visible emission limits. It also gives the director of the Department of Environmental Control the authority to require continuous monitoring by any other emission sources.

The proposed revision is Nebraska's response to the amendments to 40 CFR Part 51 and Appendix P of Part 51 which EPA published October 6, 1975 (40 FR 64620). Appendix P specifies the minimum emission monitoring requirements to be contained in SIPs. The State adopted only opacity monitoring for power plants since there are no other sources subject to Appendix P in Nebraska.

After careful review of this proposed revision, the Administrator has determined that it meets the requirements of Section 110(a)(2)(A)–(H) of the Clean Air Act and 40 CFR Part 51, "Requirements for Preparation, Adoption and Submittal of State Implementation Plans." The revision to Rule 17 is hereby approved and made part of the State of Nebraska implementation plan.

Also published at this time is the date of submission of compliance schedules which were approved March 25, 1977 (42 FR 16139). This addition to the list under "Identification of Plan" was inadvertently omitted from the March 25 action.

(42 U.S.C. 1857c–5.)

Dated: May 11, 1977.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Chapter I, Title 40, of the Code of Federal Regulations is amended as follows:

Subpart CC—Nebraska

In § 52.1420, paragraph (c) is revised by adding new subparagraphs (19) and (20) as follows:

§ 52.1420 Identification of plan.

* * * * *

(19) Compliance schedules were submitted by the Governor on October 27, 1976.

(20) Revised Rule 17, requiring continuous opacity monitoring by power plants, was submitted on November 2, 1976, by the Governor.

[FR Doc.77–14108 Filed 5–17–77;8:45 am]

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20877; RMs 2535, 2541, 2560 and 2634]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations in Flemingsburg, Lancaster, Lawrenceburg, Lebanon and Versailles, Ky., Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This is a Report and Order adopting one of four alternative proposals for FM service in several Kentucky communities because it offers the most potential for first FM service to the public and also provides first local FM service to communities where an interest has been expressed in operating an FM station. The Order retains the assignment at Falmouth, assigns first FM channels to Flemingsburg and Lebanon, deletes a vacant channel at Lancaster, and moves (with a frequency change) the assignment at Lawrenceburg to Versailles where it is presently used. The Versailles station has consented to modification of its license without reimbursement.

EFFECTIVE DATE: June 22, 1977.

ADDRESSEES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau. (202–632–7792).

SUPPLEMENTARY INFORMATION:

Adopted: May 9, 1977.

Released: May 16, 1977.

By the Chief, Broadcast Bureau: 1. The Commission now considers the comments and reply comments received in response to its Notice of Proposed Rule Making, 41 FR 29710 (published July 19, 1976; adopted July 2, 1976), which proposed four alternative assignment plans for the Kentucky communities named above, based on four interrelated petitions for rule making.

2. The petitioners and their proposals were as follows:

(a) Lebanon-Springfield Broadcasting Company, licensee of AM Station WLBN ("WLBN"), Lebanon, Kentucky, requested the reassignment of occupied Channel 265A from Lawrenceburg, Kentucky,[1] to Lebanon (1970 pop. 5,528), as a first FM assignment to that community. Vacant Channel 292A at Lancaster could then be moved to Versailles as a replacement channel. RM–2535.

(b) John M. Barrick ("Barrick") requested reassignment of unoccupied Channel 237A from Falmouth, Kentucky (1970 pop. 2,593) to Versailles, as a second FM assignment there, and assignment of Channel 292A at Falmouth as a replacement. RM–2541.

(c) Irvenna Broadcasting Company, Inc. ("Irvenna"), licensee of AM Station WIRV, Irvine, Kentucky, proposed the reassignment of unoccupied Channel 292A from Lancaster, Kentucky (1970 pop. 3,230), to Irvine (1970 pop. 2,918), as a first FM assignment. RM–2560.

(d) James Short ("Short") seeks Channel 292A as a first broadcast assignment to Flemingsburg, Kentucky (1970 pop. 2,483). RM–2634. Fleming Co. Broadcasting, Inc., applicant for an AM station at Flemingsburg, has also expressed an intent to apply for this channel if assigned.

3. Based on the conflicting petitions[2] the Commission asked for comments on four different combinations of assignments, as well as preclusion effects, and showings of first and second service. See Roanoke Rapids, N.C., 9 F.C.C. 2d 672 (1967); Anamosa, Ia., 46 F.C.C. 2d 720 (1974). The four assignment plans were as follows:

City	Population	Present	Plan— I	II	III	IV
Falmouth	2,593	237A	292A	237A		
Flemingsburg	2,483			292A	292A	292A
Irvine	2,918	292A				
Lancaster	3,230	292A				292A
Lawrenceburg	3,579	265A				
Lebanon	5,528			265A	265A	265A
Versailles	5,679		265A, 237A	292A	292A, 237A	237A

4. Some of the parties failed to respond to the Notice. Although Lancaster Broadcasters, Inc. ("LBI"), licensee of AM Station WIXI, Lancaster, informed the Commission prior to the Notice that it was preparing an application for a new station on Channel 292A at Lancaster and therefore opposed the deletion of that channel, LBI has filed neither an application nor formal comments in this proceeding. No other party has expressed an interest in an assignment at Lancaster. Petitioner Irvenna also did not comment on the proposals issued by the Commission, and no one has expressed the required intent to construct and operate a station at Irvine if the channel were assigned. Petitioner Barrick filed reply comments, but did no more than state his intent to apply for a second assignment at Versailles. He did not supply the showing of first or second service which was required by the Notice.

5. Other parties presented new considerations. On February 17, 1977, Norkey Enterprises, Incorporated, tendered its application to the Commission for authority to construct a new FM broadcast station on Channel 237A presently assigned to Falmouth. Mid-America Radio, Inc., licensee of FM Station WXTZ (Channel 277) at Indianapolis, Indiana, requested the substitution of Channel 237A for 276A proposed at Versailles, Indiana (which would require the deletion of Channel 237A at Falmouth). The removal of adjacent Channel 276A from Versailles, Indiana, would permit Mid-America to move its transmitter closer to the center of Indianapolis and still meet the Commission's separation requirements. Such a move, Mid-America states, would enable it to provide a city grade signal to the recently expanded city of Indianapolis. Charles Cutler has filed comments proposing that Channel 237A be assigned to Milton, Kentucky (1970 pop. 756), if it is deleted at Falmouth. The Commission had previously rejected this assignment because of short-spacing to Falmouth (letter of January 9, 1976), but Cutler resubmitted

[1] Channel 265A is licensed to Woodander Broadcasting Company ("Station WJMM") and operated at Versailles, Kentucky, under the Commission's 10-mile rule. Section 73.207(b).

[2] The conflict results from the Commission's minimum co-channel separation requirements, Section 73.207(a), which prevent the use of Channel 292A at all four of the communities involved in these proposals:

(a) Assignment at Versailles (proposed by WLBN) would prevent assignment of the same channel at Falmouth (Barrick) and Irvine (Irvenna).

(b) Assignment of the channel at Irvine (Irvenna's proposal) conflicts with assignment of that channel at Versailles (WLBN) and Flemingsburg (Short).

(c) Assignment at Flemingsburg (Short's proposal) conflicts with assignment at Irvine (Irvenna) and Falmouth (Barrick).

(d) Assignment at Falmouth (Barrick) would conflict with assignment at Flemingsburg (Short) and Versailles (WLBN).

it in light of the possible deletion of the Falmouth channel.

6. The following tabulation shows the major arguments advanced by the various parties [3] in favor of each of the plans and the impact each would have in terms of preclusion and the Commission's assignment criteria.[4] All of the plans are compatible with Mid-America's request to facilitate a transmitter move, and with Cutler's proposal to assign a channel to Milton, except Plan II which would not delete Channel 237A at Falmouth.

[3] See the following footnote:

Commenting Parties:	Supports plan No.
John M. Barrick, Versailles, Kentucky (petitioner, RM-2541)	3, 1
Charles N. Cutler, Milton, Kentucky	1, 3, 4
Fleming Co. Broadcasting, Inc., Flemingsburg, Kentucky	2, 3, 4
Lebanon-Springfield Broadcasting Company, WLBN, Lebanon, Kentucky (petitioner, RM-2535)	2, 3, 4
Mid-America Radio, Inc., WXTZ, Indianapolis, Indiana	1, 3, 4
James Short, Flemingsburg, Kentucky (petitioner, RM-2634)	2
Woodander Broadcasting Company, WJMM, Versailles, Kentucky	2

Mid-America, Short, and Lebanon-Springfield filed reply comments also; Barrick filed reply comments only.

[4] The Commission's FM assignment criteria are set forth and discussed in the Further Notice of Proposed Rule Making in Docket No. 14185, 27 FR 7797 (1962), and incorporated by reference in the Third Report, Memorandum Opinion and Order, 40 F.C.C. 747, 758 at para. 25 (1963). The Commission's preclusion policy is explained in Anamosa and Iowa City, Iowa, 40 F.C.C. 2d 250 (1974).

City, channel No. and population	Present local aural service	Service to underserved areas	Preclusion
Plan I			
Falmouth, channel 292A (2,593).	None, channel 237A assigned unused.	1st FM service to 1,503 population. 2d FM service to 7,147 population. No 1st or 2d aural service.	Minor cochannel.
Irvine, channel 292A (2,918).	1 AM daytime only.	No data	Significant cochannel preclusion including 1 community with no FM assignment and 6 with neither AM nor FM.
Versailles, channels 237A and 265A (5,679).	1 FM	do	265A, already in operation. 237A, minor cochannel preclusion.
Plan II			
Falmouth, Ky., channel 273A (2,593).	Channel 237A assigned unused.	1st FM service to 1,503 population. 2d FM service to 7,145 population. No 1st or 2d aural service.	None.
Flemingsburg, Ky., channel 292A (2,483).	None	1st FM service to 1,506 population. 2d FM service to 14,200 population. No 1st or 2d aural service.	Minor cochannel preclusion.
Lebanon, Ky., channel 265A (5,528).	1 AM daytime only.	1st FM service to 14,940 population. 2d FM service to 11,146 population. 2d nighttime aural service to 14,732 population.	Cochannel preclusion for Springfield, Ky.
Versailles, Ky., channel 292A (5,679).	1 FM	No data	Preclusion of 5 communities without FM service. 2 have AM stations, other 3 less than 2,000 population.
Plan III			
Flemingsburg, Ky., channel 292A (2,483).	None	1st FM service to 1,506 population. 2d FM service to 14,200 population. No 1st or 2d aural service.	Minor cochannel preclusion.
Lebanon, Ky., channel 265A (5,528).	1 AM daytime only.	1st FM service to 14,940 population. 2d FM service to 11,146 population. 2d nighttime aural service to 14,732 population.	Cochannel preclusion for Springfield, Ky.
Versailles, Ky., channels 237A and 292A (5,679).	1 FM	No data	237A, minor cochannel preclusion. 292A, preclusion of 5 communities without FM service. 2 have AM stations, other 3 less than 2,000 population.
Plan IV			
Flemingsburg, Ky., channel 292A (2,483).	None	1st FM service to 1,506 population. 2d FM service to 14,200 population. No 1st or 2d aural service.	Minor cochannel preclusion.
Lancaster, Ky., channel 292A (3,230).	1 AM daytime only.	No data	None.
Lebanon, Ky., channel 265A (5,528).	do	1st FM service to 14,940 population. 2d FM service to 11,146 population. 2d nighttime aural service to 14,732 population.	Cochannel preclusion for Springfield, Ky.
Versailles, Ky., channel 237A (5,679).	1 FM	No data	Minor cochannel preclusion.

7. We have carefully considered the record in this proceeding, and based upon the pleadings and the information summarized above, it is our conclusion that Plan II best serves the public interest. This plan is consistent with the Commission's assignment policies which place high priority on providing first aural service and first local FM service. Plan II offers the most first service, as well as first local FM assignments to Flemingsburg and Lebanon, where intentions have been expressed for prompt broadcast applications. Service is continued at Versailles and actual use of the channel there would be reflected in the Table by its deletion at Lawrenceburg.[5] Falmouth, where an application is now pending, would keep its assignment.

8. Plan II is superior to the other plans for the following reasons. Plan I would assign a channel to Irvine where no continuing interest was expressed. Plan III (and Plan I) would assign two channels to Versailles instead of a first channel and first service at another community of comparable size. Plan IV (and Plan III) would delete the assignment at Falmouth for which interest has now been expressed, and Plan IV would assign a channel at Lancaster where there appears to be no present interest in a new station. In our choice of Plan II we are aware of the fact that the Mid-America and Cutler plans cannot be adopted. Nevertheless, we find that the relative size and needs of the population of Falmouth justify this decision.

9. Plan II has the disadvantage of causing somewhat more preclusion than the other plans, primarily due to the Channel 292A assignment at Versailles. Our study indicates that five communities in Kentucky will be precluded from future assignments on Channel 292A. Those communities are Nicholsville (1970 pop. 5,829), Irvine (2,918), Carlisle (1,579), Midway (1,278) and Owingsville (1,381). Of these, Nicholsville and Irvine currently have AM broadcast stations. The petitioner at Irvine dropped out of this proceeding, and no one at the other communities has commented on or expressed interest in an FM assignment there. These communities have small populations compared to Versailles. The co-channel preclusion that Channel 265A at Lebanon will occasion at Springfield, Kentucky, is mitigated by the fact that Springfield is near Lebanon and will benefit from the additional FM service to the area. LBI states that it maintains auxiliary studios in Springfield for WLBN at Lebanon, and would propose to serve Springfield from a Lebanon FM station if so authorized. We therefore find that the first and second service that can be provided by the adoption of Plan II outweighs the disadvantage of the somewhat greater preclusion it would entail.

10. Accordingly, pursuant to authority contained in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules and Regulations, *It is ordered*, That effective June 22, 1977, the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, is amended [6] for the Kentucky communities listed hereafter, to read as follows:

City:	Channel No.
Flemingsburg, Ky.	292A
Lancaster, Ky.	----
Lawrenceburg, Ky.	----
Lebanon, Ky.	265A
Versailles, Ky.	292A

11. Since Woodander Broadcasting Company, Station WJMM, Versailles, has consented to modification of its license without reimbursement to operate on Channel 292A at Versailles, *it is further ordered*, That pursuant to Section 316(a) of the Communications Act of 1934, as amended, the outstanding license held by Woodander Broadcasting Company for Station WJMM at Versailles, Kentucky, IS MODIFIED effective June 22, 1977, to specify operation on Channel 292A in lieu of 265A. Station WJMM may continue to operate on Channel 265A subject to the following conditions:

(a) At least 30 days before commencing operation on Channel 292A, the licensee of Station WJMM shall submit to the Commission the technical information normally requested of an applicant;

(b) At least 10 days prior to commencing operation on Channel 292A, the licensee of Station WJMM shall submit the measurement data required of an applicant for an FM broadcast station license; and

(c) The licensee of Station WJMM shall not commence operation on Channel 292A without prior Commission authorization.

12. *It is directed*, That the Secretary of the Commission send a copy of this Report and Order by certified mail, return receipt requested, to Woodander Broadcasting Company, Station WJMM, Versailles, Kentucky.

13. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307.)

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.77-14069 Filed 5-17-77;8:45 am]

[5] Station WJMM at Versailles supports this plan and states that it is willing to shift to Channel 292A without reimbursement.

[6] The assignment of Channel 237A at Falmouth will remain unchanged.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL RESERVE SYSTEM

[12 CFR Part 202]

[Reg. B; Docket No. R-0100]

EQUAL CREDIT OPPORTUNITY

Credit Program; Interpretation

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed interpretation.

SUMMARY: In response to requests for guidance concerning the intended coverage of the provisions of Regulation B relating to special purpose credit programs offered by Federal and State agencies, the Board proposes to interpret the term "expressly authorized by law." Lenders have sought this clarification to determine whether the government loan programs in which they participate qualify for the partial exemption provided in Regulation B. The Board is seeking public comment to aid in the determination of whether the proposed interpretation properly implements the Equal Credit Opportunity Act.

DATE: Comments must be received on or before June 17 1977.

ADDRESSES: Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20009.

FOR FURTHER INFORMATION CONTACT:

Anne Geary, Acting Chief, Equal Credit Opportunity Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, (202-452-3946).

SUPPLEMENTARY INFORMATION: (1) To aid in the consideration of this proposed interpretation by the Board, interested persons are invited to submit relevant data, views, comments, or arguments. Any such information should be submitted in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received not later than June 17, 1977. All material submitted should include the docket number R-0100. Such information will be made available for inspection and copying upon request except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information (12 CFR 261.6(a)).

(2) Authority: 15 U.S.C. 1691(b).

In order to provide guidance concerning the intended coverage of § 202.8(a) [1] of Regulation B, the Board interprets a term used in that section as follows: A credit program is considered to be "expressly authorized by Federal or State law" if it is authorized by the terms of a Federal or State statute or by a regulation lawfully promulgated by the agency responsible for implementing the program.

In addition, the Board announces that it will not make determinations as to whether particular programs benefit an "economically disadvantaged class of persons." The Board believes that such a determination is more properly made by the agency charged with the administration of the loan program.

By order of the Board of Governors, effective May 9, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.77-14095 Filed 5-17-77;8:45 am]

[1] Standards for programs. Subject to the provisions of subsection (b), the Act and this Part are not violated if a creditor refuses to extend credit to an applicant solely because the applicant does not qualify under the special requirements that define eligibility for the following types of special purpose credit programs: (1) any credit assistance programs expressly authorized by Federal or State law for the benefit of an economically disadvantaged class of persons.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[14 CFR Part 1245]

PATENT WAIVER REGULATIONS

Proposed General Procedures

AGENCY: National Aeronautics and Space Administration.

ACTION: Proposed Regulation Revision.

SUMMARY: NASA proposes to revise its Patent Waiver Regulations as set forth below. This revision is needed in order to promote Government-wide uniformity in regulations for the allocation of rights to inventions between the Government and its contractors. This proposed revision, together with a related revision of the NASA Procurement Regulations (NASA PR 9-107 and 9-109; PRD 76-14) is intended to provide such uniformity, to the extent consistent with the requirements of section 305 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2457).

DATE: Comments or suggestions respecting the proposed revision should be submitted in writing not later than June 17, 1977.

ADDRESS: General Counsel, National Aeronautics and Space Administration, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT:

Robert F. Kempf, Assistant General Counsel for Patent Matters. Telephone (202) 755-3932 National Aeronautics and Space Administration, Washington, DC 20546.

SUPPLEMENTARY INFORMATION: The proposed revision to the NASA Patent Waiver Regulations is based in part on related regulations covering the allocation of rights in inventions resulting from federally sponsored research and development that were developed by the General Services Administration in cooperation with the Committee on Government Patent Policy, Federal Council for Science and Technology, in order to uniformly implement the revised Presidential Statement of Government Patent Policy (36 FR 16887, Aug. 26, 1971). These related regulations have been adopted by the Federal Procurement Regulations (41 CFR 1-9.107 & 9.109), and have been incorporated in the Armed Services Procurement Regulations (ASPR 9-107 & 109). NASA intends to include relevant portions of such related regulations, to the extent consistent with the requirements of section 305 of the Space Act, in the proposed revision to its Patent Waiver Regulations.

The proposed revision to the NASA Patent Waiver Regulations also includes a policy statement (§ 1245.103(c)) that, whenever NASA awards contracts for research, development or demonstration work on behalf of or in support of a program of the Energy Research and Development Administration (ERDA) on a reimbursable basis pursuant to agreement between ERDA and NASA, the waiver policy, regulations and procedures of ERDA will be applied.

Subpart 1 is revised in its entirety as follows:

Subpart 1—Patent Waiver Regulations

Sec.
1245.100 Scope.
1245.101 Applicability.
1245.102 Definitions and terms.
1245.103 Policy.
1245.104 Advance waivers.
1245.105 Waiver after reporting inventions.
1245.106 Waiver of foreign rights.
1245.107 Reservations.
1245.108 License to contractor.
1245.109 Revocation and voidability of waivers.
1245.110 Content of petitions.
1245.111 Submission of petitions.
1245.112 Notice of proposed Board action and reconsideration.
1245.113 Hearing procedure.
1245.114 Findings and recommendation of Board.
1245.115 Action by the Administrator.
1245.116 Filing of patent applications and reimbursement of costs.
1245.117 Publication and record of decisions.

AUTHORITY: 42 U.S.C. 2457.

§ 1245.100 Scope.

This Subpart 1 prescribes regulations for the waiver of rights of the United States to inventions made under NASA contract.

§ 1245.101 Applicability.

The provisions of this subpart apply to all inventions made or which may be made under conditions enabling the Administrator to determine that the rights therein reside in the United States pursuant to section 305(a) of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2457(a)).

§ 1245.102 Definitions and terms.

As used in this subpart:

(a) "Contract" means any actual or proposed contract, agreement, understanding, or other arrangement with the National Aeronautics and Space Administration (NASA) or another Government agency on NASA's behalf, including any assignment, substitution of parties or subcontract executed or entered into thereunder, and including NASA grants awarded under the authority of 42 U.S.C. 1891-1893.

(b) "Contractor" means the party who has undertaken to perform work under a contract or subcontract.

(c) "Invention" includes any art, method, process, machine, manufacture, design or composition of matter, or any new and useful improvement thereof, or any variety of plant, which is or may be patentable under the Patent Laws of the United States of America or any foreign country.

(d) "Made," when used in relation to any invention, means the conception or first actual reduction to practice of such invention.

(e) "To the point of practical application" means to manufacture in the case of a composition or product, to practice in the case of a process, or to operate in the case of a machine, and under such conditions as to establish that the invention is being worked and that its benefits are reasonably accessible to the public.

(f) "Board" means the NASA Inventions and Contributions Board established by the Administrator of NASA within the Administration under section 305(f) of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2457(f)).

(g) "Chairman" means Chairman of the NASA Inventions and Contributions Board.

(h) "Petitioner" means a contractor or prospective contractor who requests that the Administrator waive rights in an invention or class of inventions made or which may be made under a NASA contract. In the case of an identified invention, the petitioner may be the inventor(s).

(i) "Government agency" includes any executive department, independent commission, board, office, agency, administration, authority, Government corporation, or other Government establishment of the executive branch of the Government of the United States of America.

(j) "States and domestic municipal governments" means the States of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, the Trust Territory of the Pacific Islands, and any political subdivision and agencies thereof.

(k) "Administrator" means the Administrator of the National Aeronautics and Space Administration or his duly authorized representative.

§ 1245.103 Policy.

(a) In implementing the provisions of section 305(f) of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2457(f)) and in determining when the interests of the United States would be served by waiver of all or any part of the rights of the United States in inventions made in the performance of work under NASA contracts, the Administrator will be guided by the objectives set forth in the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2451-2477) and by the basic policy of the revised Presidential Memorandum and Statement of Government Patent Policy issued August 23, 1971 (36 FR 16887-16892). Among the most important goals thereof are to provide incentives to foster inventiveness and encourage reporting of inventions made under NASA contracts, to provide for the widest practicable dissemination of new technology resulting from NASA programs, and to promote early utilization, expeditious development and continued availability of this new technology for commercial purposes and the public benefit. In applying this regulation both the need for incentives to draw forth private initiatives and the need to promote healthy competition in industry must be weighed.

(b) Several different situations when waiver of all or any part of the rights of the United States may be requested are prescribed in §§ 1245.104-1245.106. Under § 1245.104, advance waiver of rights to any or all of the inventions which may be made under a contract may be requested prior to the execution of the contract, or within 30 days after execution of the contract. Waiver of rights to an identified invention made and reported under a contract may be requested under any of these provisions even though a request under a different provision was not made, or if made, was not granted. Waiver of foreign rights under § 1245.106 may be requested concurrently with domestic rights or independently thereof.

(c) With respect to inventions which may be or are made or conceived in the course of or under contracts for research, development or demonstration work awarded by NASA on behalf of the Energy Research and Development Administration (ERDA) or in support of an ERDA program, on a reimbursable basis pursuant to agreement between ERDA and NASA, the waiver policy, regulations and procedures of ERDA will be applied.

§ 1245.104 Advance waivers.

(a) The provisions of this § 1245.104 apply to petitions for waiver of domestic rights to any or all of the inventions which may be made under a contract. Such petitions may be submitted by the contractor prior to its execution of the contract or within 30 days thereafter.

(b)(1) The Board shall recommend to the Administrator that waiver of domestic rights to any or all of the inventions which may be made under the NASA contract involved be granted when the Board makes each of the findings of paragraphs (c) and (d) of this section and concludes that the interest of the United States would be served thereby. Such waiver shall apply to inventions reported during the term of the contract and which are designated at the time of reporting as being an invention on which the waiver recipient intends to file or has filed a U.S. patent application.

(2) When the Board is unable to make one or more of the findings to support a waiver under paragraph (c) of this section as to the contract but nevertheless finds that exceptional circumstances exist so that the public interest would best be served by a waiver of rights to any or all of the inventions which may be made under the contract, the Board shall recommend to the Administrator that waiver be granted (conditions of paragraph (d) of this section are not relevant to the Board's findings under this subparagraph). A finding of exception circumstances shall be accompanied by a discussion of the rationale therefor. Examples of exceptional circumstances would include: A contract where participation of the contractor may only be secured through the grant of waiver and such contractor is deemed essential to a NASA program objective; a contract having as a principal objective the application of aerospace rated technology to other uses in accordance with an established NASA technology application program and where the grant of waiver would materially advance this objective; or, a cooperative endeavor where the contract calls for a significant contribution of funds by the contractor to the work to be performed. In the case of an invention which is identified prior to execution of the contract, exceptional circumstances may also be found where waiver is a necessary incentive to call forth risk capital and expense to bring the invention to the point of practical or commercial application and where either (i) the contratcor has established substantial equities at its own expense in the development of the invention; or, (ii) the grant of advance waiver will significantly advance the availability of the invention to the general public.

(c) (1) It is not a principal purpose of the contract to create, develop or improve products, processes, or methods which are intended for commercial use (or which are otherwise intended to be made available for use) by the general public at home or abroad, or which will be required for such use by governmental regulations.

(2) It is not a principal purpose of the contract to explore into fields which directly concern the public health, public safety, or public welfare.

(3) The contract is not in a field of science or technology in which there has been little significant experience outside of work funded by the Government, or where the Government has been the principal developed of the field, and the acquisition of exclusive rights at the time of contracting would not likely confer on the petitioner a preferred or dominant position.

(4) The contract is ont for services of the petitioner for (i) the operation of a Government-owned research or production facility; or (ii) coordinating and directing the work of others.

(d) (1) The purpose of the contract is to build upon existing knowledge or technology, to develop information, products, processes, or methods for use by the Government.

(2) The work called for by the contract is in a field of technology in which the petitioner has acquired technical competence (demonstrated by factors such as know-how, experience, and patent position), and either (i) the work is directly related to an area in which the petitioner has an established nongovernmental commercial position; or (ii) the commercial position of the petitioner is not sufficiently established, but a special situation exists such that the public interest in the availability of inventions would best be served by a waiver of rights to the petitioner. Such special situations include, but are not limited to the following:

(A) A newly formed company having a definite program for establishing a nongovernmental commercial position in the field of the contract or in an area directly related thereto.

(B) An established company lacking an established nongovernmental commercial position in the field of the contract or a directly related field, but having established plans and programs for achieving such a position.

(C) An educational or nonprofit institution having a promulgated policy and an effective program for acquiring rights to inventions and for acting by itself or through others to bring the results of such inventions to commercial application.

(e) When a petition for waiver is submitted pursuant to paragraph (a) of this section, prior to contract execution, it will be processed expeditiously so that a decision on the petition may be reached prior to execution of the contract. However, if there is insufficient time or insufficient information is presented, or for other reasons which do not permit a recommendation to be made without unduly delaying execution of the contract, the Board will inform the contracting officer that no recommendation has been made and the reason therefor. The contracting officer will then notify the petitioner of the Board's action.

(f) After notification by the contracting officer under paragraph (e) of this section, the petitioner may, upon its execution of the contract, or within 30 days thereof, request the Board to reconsider the matter under paragraph (b) of this section either on the record or with any additional statements submitted in support of the original petition.

(g) A waiver granted pursuant to a petition submitted under this § 1245.104 shall apply only to those inventions reported during the term of the applicable contract and which are designated at the time of reporting as being an invention on which the petitioner intends to file or has filed a U.S. patent application. The waiver shall extend to the claimed invention of any division or continuation of the patent application filed on the reported invention provided the claims of the subsequent application do not substantially broaden the scope of the reported invention.

(h) A waiver granted pursuant to a petition submitted under this § 1245.104 shall extend to any contract changes, modifications, or supplemental agreements, so long as the purpose of the contract or the scope of work to be performed is not substantially changed.

§ 1245.105 Waiver after reporting inventions.

(a) (1) The provisions of this § 1245.105 apply to petitions for waiver of domestic rights to identified inventions which have been reported to NASA and to which a waiver of rights has not been granted pursuant to § 1245.104. A petition for a waiver under this section should be filed promptly after the reporting of the invention to NASA, and must be submitted prior to the filing by NASA of a U.S. patent application claiming the reported invention.

(2) A waiver granted pursuant to this section shall extend to the claimed invention of any division or continuation of the patent application filed on the reported invention provided the claims of the subsequent application do not substantially broaden the scope of the reported invention.

(b) The Board shall recommend to the Administrator that waiver of domestic rights to an identified invention be granted where the Board makes all of the findings below and concludes that the interest of the United States would be served thereby:

(1) The invention is not directly related to a governmental program for creating, developing, or improving products, processes, or methods for use by the general public at home or abroad.

(2) The invention is not likely to be required by governmental regulations for use by the general public at home or abroad.

(3) The invention does not directly concern the public health, public safety, or public welfare.

(4) The invention is not in a field of science or technology in which there has been little significant experience outside of work funded by the Government, or where the Government has been the principal developer of the field, and the acquisition of exclusive rights in the invention would not likely confer on the petitioner a preferred or dominant position.

Provided, That the Board also finds in view of the petitioner's plans and intentions to bring the invention to the point of practical application, and the activities of the Government, the incentives provided by waiver will increase the likelihood that the benefits of the invention would be readily available to the public at an early date.

(c) If the Board is unable to make one of the findings to support a waiver under paragraph (b) (1) through (4) of this section, the Board may nevertheless recommend that waiver of domestic rights be granted by the Administrator if the Board further finds that such waiver is a necessary incentive to call forth risk capital and expense to bring the invention to the point of practical application, or that the Government's contribution to the invention is small compared to that of the contractor.

§ 1245.106 Waiver of foreign rights.

(a) The Board will consider the waiver of domestic and foreign rights concurrently when so requested by the petitioner in accordance with § 1245.110 (d). Where the Board makes the findings necessary to support a waiver of domestic rights, the petitioner will normally be granted the right to secure patents in any country in which it elects to file provided that the grant of such right is consistent with the economic interests of the United States. The Board may also recommend the grant of only foreign rights, in accordance with the guidelines of paragraph (b) of this section, when the interests of the United States will best be served thereby.

(b) The Board will also consider a separate request for the waiver of the right to secure a patent in any country in which the petitioner elects to file as to an identified invention when so requested by the petitioner in accordance with § 1245.110(d). Waiver of such foreign rights will normally be granted in countries in which the Administrator does not desire to file an application for patent provided that the grant of such rights is consistent with the economic interests of the United States.

(c) When the Administrator determines that it is in the best interest of the Government and the petitioner to withhold the release or publication of information on an invention for which the petitioner has requested waiver and is to file foreign patent applications thereon, NASA may agree, upon written request by the petitioner, to use its best

efforts to withhold publication until a patent application is filed thereon, but in no event shall the Government or its employees be liable for any publication thereof.

§ 1245.107 Reservations.

(a) With respect to any particular invention, each waiver of domestic or foreign rights granted shall be subject to the reservation of an irrevocable, nonexclusive, nontransferable, royalty-free license for the practice of the invention throughout the world by or on behalf of the U.S. Government or any agency thereof, any foreign government pursuant to any existing or future treaty or agreement with the United States, or States and/or domestic municipal governments unless the Administrator determines, based upon a recommendation of the Board, that it would not be in the public interest to acquire the license for States and/or domestic municipal governments.

(b) With respect to any particular invention, each waiver of domestic rights granted shall be subject to the reservation by the Administrator of the right to require the granting of a nonexclusive or exclusive license for the practice of the invention to any responsible applicant on terms that are reasonable under the circumstances:

(1) Unless the waiver recipient, its licensees, or assigns have taken effective steps within 3 years after a U.S. patent issues on the invention to bring the invention to the point of practical application and thereafter continue to work the invention and make its benefits reasonably accessible to the public; or

(2) Unless within 3 years after a U.S. patent issues on the invention, the waiver recipient, its licensee, or its assigns have made the invention available for licensing royalty-free or on terms that are reasonable in the circumstances; or

(3) To the extent that the invention is required for public use by governmental regulations or as may be necessary to fulfill health, safety, or welfare needs, or for other public purposes stipulated in the contract.

(c) With respect to any particular invention, each waiver granted for domestic or foreign rights shall be subject to the reservation by the Administrator of the right to require refund of any amounts received as royalty charges on the waived invention in procurements for or on behalf of the Government and to provide for that refund in any instrument transferring rights to any party in the waived invention.

(d) With respect to any particular invention, each waiver granted for domestic or foreign rights shall be subject to any other reservations called for by the Administrator on the grant of the petition.

(e) The waiver recipient shall be given an opportunity to show cause before the Board why it should not be required to grant a license under paragraph (b) of this section or why it should retain the principal or exclusive rights as provided by waiver for a further period of time.

§ 1245.108 License to contractor.

Each contractor reporting an invention is granted a license for each filed patent application and any resulting patent in which the Government acquires title of the scope and on the terms and conditions specified in the NASA Procurement Regulations (41 CFR 18–9.107–5(d)).

§ 1245.109 Revocation and voidability of waivers.

(a) If the waiver recipient fails to file a domestic or foreign patent application on any waived invention within the prescribed time periods, or decides not to continue prosecution of any such patent application, or to pay any of the required maintenance fees, or for any reason decides not to retain title to any such patent application or any patent issued thereon, the waiver recipient shall notify the Chairman and shall, upon request, convey to NASA the entire right, title and interest in the invention, and to any corresponding patent application or patent. The conveyance shall be made by delivering to the Chairman duly executed instruments (prepared by the Government) and, if applicable, such other papers as are deemed necessary to vest in the Government the entire right, title, and interest in the invention and any corresponding patent application, and to enable the Government to prosecute the application. In addition, any waiver of rights (domestic or foreign) shall be voidable as set forth in paragraphs (b)–(d) of this section.

(b) With respect to any particular invention, each waiver of domestic rights shall be voidable at the option of the Administrator unless:

(1) Within 6 months from the date of reporting an invention under a contract, subject to a waiver granted pursuant to § 1245.104 or 6 months from the date of the granting by the Administrator of a waiver pursuant to § 1245.105, or such longer periods as may be approved by NASA for good cause shown, the waiver recipient causes an application for U.S. Letters Patent to be filed disclosing and claiming the invention and shall include as the first paragraph of the specification following the abstract, the statement:

> The invention described herein was made in the performance of work under NASA Contract No. ---------- and is subject to the provisions of section 305 of the National Aeronautics and Space Act of 1958 (72 Stat. 435; 42 U.S.C. 2457).

(2) Within 2 months after such filing or within 2 months after the date of the grant of waiver if such patent application previously has been filed, the waiver recipient delivers to the Chairman a copy of such application including the filing date and serial number.

(3) Within 6 months after such filing, or within 6 months after the grant of waiver if a patent application has been previously filed, the waiver recipient delivers to the Chairman a duly executed and approved instrument prepared by the Government, fully confirmatory of all the rights to which the Government is entitled, and provide the Administrator an irrevocable power to inspect and make copies of the patent application.

(4) The waiver recipient furnishes to the Chairman a copy of the patent within 2 months after the patent is issued on such application.

(5) The waiver recipient notifies the Chairman not less than 30 days before the expiration of the initial response period for any action required by the Patent and Trademark Office of any decision not to continue prosecution of the application and delivers to the Chairman executed instruments granting the Government a power of attorney to prosecute the application.

(6) The waiver recipient grants any license which the Administrator may require pursuant to § 1245.107.

(7) The waiver recipient files a utilization report with the Board, upon NASA's written request, not more often than annually. Such report shall set forth in detail the steps taken by the waiver recipient or its transferee regarding the progress, development, application, and commercial use being made and that is intended to be made of the waived invention.

(8) The waiver recipient notifies the Chairman in not less than 60 days prior to any transfer of principal rights in such invention to any party, and submits a statement of the transferee's development and commercialization plans to bring the invention to the point of practical application. Such statement should accompany the notification or it may be submitted in not less than 30 days prior to the transfer of rights. The statement must show to the Board's satisfaction that the property rights left in the transferee will increase the likelihood that the benefits of the invention would be made readily available to the public at an early date.

(9) The waiver recipient complies with any other terms and conditions called for by the Administrator with respect to the grant of the petition.

(c) With respect to any particular invention, each waiver granted shall be voidable at the option of the Administrator if a patent claiming such invention is held, in a final determination, to have been used in violation of the antitrust laws in any suit, action, or proceeding brought before a properly constituted authority authorized to hear such matters.

(d) With respect to any particular invention, waiver of foreign rights as to any foreign country shall be voidable at the option of the Administrator unless:

(1) A patent application is filed in the country within 8 months from the date a corresponding U.S. application is filed, or 6 months from the date a license is granted by the Commissioner of Patents and Trademarks to file foreign applications where such filing has been prohibited for security reasons, or such longer periods as may be expressly approved by the Administrator;

(2) The waiver recipient furnishes to the Chairman the identifying serial number and filing date of each foreign patent application filed promptly upon receipt thereof; and, upon request, a copy of an English version of the foreign application without additional compensation and a copy of the foreign patents;

(3) The waiver recipient executes and furnishes to the Chairman instruments fully confirmatory of the rights herein reserved by the Government; and

(4) The waiver recipient, in the event it elects not to continue prosecution of any foreign application filed on such invention or if it intends to abandon a foreign patent by the nonpayment of a maintenance tax, notifies the Chairman within sufficient time to allow assumption of prosecution by the Government, or payment of the maintenance tax, respectively, and delivers to the Chairman such duly executed instruments as are necessary to vest in the Administrator title thereto, including an instrument of assignment.

§ 1245.110 Content of petitions.

(a) General contents and forms. Forms which may be used in petitioning for waiver and for filing utilization reports are available from the NASA Inventions and Contributions Board, National Aeronautics and Space Administration, Washington, D.C. 20546. Each request for waiver of domestic or foreign rights under § 1245.104, § 1245.105, or § 1245.106 shall be by petition to the Administrator and shall include:

(1) An identification of the petitioner, its place of business and address, an if the petitioner is represented by counsel, the name, address, and telephone number of the counsel;

(2) An identification by number of the pertinent NASA contract or proposed contract;

(3) The nature and extent of the rights rights desired and a citation to the section under which the petition is submitted; and

(4) The signature of the petitioner or its authorized representative, and date of signature.

(b) Petitions for advance waiver § 1245.104. In addition to the information specified in paragraph (a) of this section, each petition for waiver under § 1245.104 shall include:

(1) A copy of the statement of work of the pertinent NASA contract or proposed contract;

(2) A full and detailed statement of facts sufficient to enable the Board to make the findings regarding the contract and the petitioner as specified in § 1245.104 and, if applicable, whether exceptional circumstances of § 1245.104(b) and/or special situations under § 1245.104(d)(2) are present; and

(3) The date of contractor's execution of the contract, if the petition is filed subsequent to contract execution.

(c) Petitions for waiver for identified inventions under § 1245.105. A separate petition shall be submitted for each identified invention except as provided by § 1245.105(a)(2). In addition to the information specified in paragraph (a) of this section, such petition shall include:

(1) The full names of all inventors;

(2) A statement whether a patent application has been filed on the invention, together with a copy of such application if filed; or, if not filed, a complete description of the invention;

(3) If a patent application has not been filed, any information which may indicate a potential statutory bar to the filing of a patent application under 35 U.S.C. 102 or a statement that no bar is known to petitioner to exist;

(4) A full and detailed statement of facts sufficient to enable the Board to make the findings regarding the invention as specified in § 1245.105 (b) or (c);

(5) Where principal rights in the waived invention are to be transferred to another party, a statement identifying such party and its relationship to the petitioner; and

(6) Where the petitioner(s) is the inventor(s), a statement in writing from the contractor that the contractor will not request waiver of rights and authorization of the contractor.

(d) Petitions for waiver of foreign rights under § 1245.106. A petition for waiver of foreign rights may accompany and be a part of a petition for waiver of domestic rights under either § 1245.104 or § 1245.105, or a petition for foreign rights may be submitted independently of any request for domestic rights under § 1245.106(b). In addition to the information specified in paragraph (a) of this section, petition for waiver of foreign rights shall include, where feasible, a denomination of the foreign countries in which petitioner elects to secure or intends to file patent applications, and its plans and intentions to practice and/or license the invention in such countries.

(e) Petitions for waiver under § 1245.103(c). Contents of the petition shall normally be as prescribed by the other Government agency, and petitioner may use any forms provided by such agency.

§ 1245.111 Submission of petitions.

Petitions for advance waiver of domestic rights under § 1245.104 or advance waiver of foreign rights under § 1245.106 presented prior to contract execution must be submitted to the contracting officer. Any such petitions submitted by organizations selected for negotiation of a contract will be processed and forwarded to the Board for consideration as specified in the NASA Procurement Regulations (41 CFR 18-9.109-6(e)). All other petitions shall be submitted directly to the Inventions and Contributions Board, National Aeronautics and Space Administration, Washington, D.C. 20546. Any waiver petitions submitted under § 1245.103(c) should be submitted directly to the contracting officer.

§ 1245.112 Notice of proposed Board action and reconsideration.

(a) Notice. Except as provided by § 1245.104(e) the Board will notify the petitioner, through the contracting officer for petitions for advance waiver prior to contract execution, and directly for all others:

(1) Whether it proposes to recommend to the Administrator that the petition be:

(i) Granted in the extent requested;

(ii) Granted in an extent different from that requested; or

(iii) Denied.

(2) Of the reasons for any recommended action adverse to or different from the waiver of rights requested by the petitioner.

(b) Request for reconsideration and statements required.

(1) If, pursuant to paragraph (a) of this section, the Board notifies the petitioner that the Board proposes to recommend action adverse to or different from the waiver requested, the petitioner may, within such period as the Board may set, but not less than 15 days from such notification, request reconsideration by the Board.

(2) If reconsideration has been requested within the prescribed time, the petitioner shall, within 30 days from the date of the request for reconsideration, or within such other time as the Board may set, file a statment setting forth the points, authorities, arguments, and any additional material on which it relies.

(3) Upon filing of the reconsideration statement by the petitioner, the petition will be assigned for reconsideration by the Board upon the contents of the petition, the record, and the reconsideration statement submitted by the petitioner.

(4) The Board, after its reconsideration, will notify the petitioner of its proposed recommendation to the Administrator. If the Board's proposed action is adverse to, or different from, the waiver requested, the petitioner may request an oral hearing within such time as the Board has set.

§ 1245.113 Hearing procedure.

(a) If the petitioner requests an oral hearing within the time set, pursuant to § 1245.112(b)(4), the Board shall set the time and place for such hearing and shall so notify the petitioner.

(b) Oral hearings held by the Board shall be open to the public and shall be held in accordance with the following procedures.

(1) Oral hearings shall be conducted in an informal manner, with the objective of providing the petitioner with a full opportunity to present facts and arguments in support of the petition. Evidence may be presented through means of such witnesses, exhibits, visual aids as are arranged for by the petitioner. Petitioners may be represented by any person including its attorney. While proceedings will be ex parte, members of the Board and its counsel may address questions to witnesses called by the petitioner, and the Board may, at its option, enlist the aid of technical advisors or expert witnesses. Any person present at the hearing may make a statement for the record.

(2) A transcript or equivalent record of the proceeding shall be arranged for by the Board. The petitioner shall submit for the record a copy of any exhibit or visual aid utilized during the hearing.

§ 1245.114 Findings and recommendations of the Board.

(a) *Findings of the Board.* The Board shall consider the petition, the NASA contract, if relevant, the goals cited in § 1245.103(a), the effect of the waiver on the objectives of the related NASA programs, and any other available facts and information presented to the Board by an interested party. The Board shall then determine and make, if applicable, each of the specific findings of fact required by § 1245.104, §1245.105, or § 1245.106 under which the petition was submitted. The Board shall document its findings.

(b) *Recommendation of the Board.* (1) Except as provided in § 1245.104(e), after making the findings of fact, the Board shall formulate its proposed recommendation to the Administrator as to the grant of waiver as requested, the grant of waiver upon terms other than as requested, or denial of waiver.

(2) If the Board proposes to recommend, initially or upon reconsideration or after oral hearing, that the petition be granted in the extent requested or, in other cases, where the petitioner does not request reconsideration or a hearing during the period set for such action, or informs the Board that such action will not be requested, or fails to file the required statements within the prescribed time, the Board shall transmit the petition, a summary record of hearing proceedings, if applicable, its findings of fact with respect thereto, and its recommendation to the Administrator.

§ 1245.115 Action by the Administrator.

(a) After receiving the transmittal from the Board, the Administrator shall determine, in accordance with § 1245.103, whether or not to grant any waiver of rights of the petitioner. A waiver pursuant to § 1245.104(b)(2) will be granted only when the Board so recommends.

(b) In the event of denial of the petitioner by the Administrator, a written notice of such denial will be promptly transmitted by the Board to the petitioner. The written notice will be accompanied with a statement of the grounds for denial.

(c) If the waiver is granted by the Administrator, the petitioner shall be sent an original and one copy of an instrument of waiver confirmatory of the conditions and reservations of the waiver grant for his execution. The petitioner shall return the executed copy to the Chairman within 30 days from the grant of waiver. Failure to return such copy within the prescribed time may result in revocation of the waiver of rights granted. Before such action is taken, notice shall be given to petitioner so that it may show cause before the Board why the waiver should not be revoked.

§ 1245.116 Filing of patent applications and reimbursement of costs.

(a) In order to protect the interests of the Government and the petitioner in inventions, a petitioner may file a United States patent application for such inventions prior to the Administrator's determination on a petition for waiver. If an application on an identified invention is filed during the pendency of the petition, or within 60 days prior to the receipt of a petition, NASA will reimburse the petitioner for any reasonable costs of such filing and patent prosecution that may have occurred, provided:

(1) Similar patent filing and prosecution costs are not normally reimbursed to the petitioner as direct or indirect costs chargeable to Government contracts;

(2) The petition is ultimately denied with respect to domestic rights, or with respect to foreign and domestic rights, if both are requested; and

(3) Prior to reimbursement, petitioner assigns the application to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration.

§ 1245.117 Publication and record of decisions.

The findings of fact and recommendations made to the Administrator by the Board with respect to each petition for waiver shall be recorded and made available to the Public. In addition, selected findings and recommendations of the Board shall be published annually.

A. M. LOVELACE,
Acting Administrator.

FEDERAL POWER COMMISSION

[18 CFR Part 2]

[Docket No. RM77-1]

JUST AND REASONABLE RATE OF RETURN ON EQUITY FOR NATURAL GAS PIPELINE COMPANIES AND PUBLIC UTILITIES

Extension of Time for Filing Reply Comments

AGENCY: Federal Power Commission.

ACTION: Extension of Time for Reply Comments.

SUMMARY: The Commission is extending the time for filing Reply Comments in the proposed rulemaking proceeding docketed as RM77-1.

DATES: Reply comments must be received on or before June 2, 1977.

ADDRESS: Comments should be sent to: Office of the Secretary, Federal Power Commission, 825 N. Capitol Street NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT:

Kenneth F. Plumb, Secretary (202) 275-4166.

SUPPLEMENTARY INFORMATION: On May 2, 1977, the Oglethorpe Electric Membership Corporation and North Carolina Electric Membership Corporation filed a motion requesting a further extension of time for filing Reply Comments in the rulemaking proceeding noticed October 15, 1976, and published October 22, 1976 (41 FR 46618), in Docket No. RM77-1. The date for filing Reply Comments was last extended to May 2, 1977, by Notice issued March 24, 1977, and published March 31, 1977 (42 FR 17142).

Upon consideration, notice is hereby given that the date for filing Reply Comments is further extended to and including June 2, 1977.

KENNETH F. PLUMB,
Secretary.

TRADEMARK FORMS

Extension of Comment Period

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Extension of period for receipt of written comments to the notice published May 3, 1977 (42 FR 22378), proposing revision of certain existing forms for trademark cases.

SUMMARY: This notice extends the closing date for the receipt of comments from June 1, 1977, to August 1, 1977, to provide interested persons with an adequate comment period following the reprinting of the FEDERAL REGISTER notice in the Official Gazette (Trademark section) of the Patent and Trademark Office. This reprinting could not be accomplished earlier than May 31, 1977.

DATES: New closing date for written comments: August 1, 1977.

ADDRESSES: Comments may be addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231. All comments received will be available for public inspection in Room 11E10, Crystal Plaza, Building 3, 2021 Jefferson Davis Highway, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT:

Miss Katharine Hancock, Patent and Trademark Office, (703) 557-5380, or by mail addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, Attn. Miss Katharine Hancock.

Dated: May 10, 1977.

C. MARSHALL DANN,
Commissioner of Patents and Trademarks.

Approved: May 12, 1977.

JORDAN J. BARUCH,
Assistant Secretary for Science and Technology.

RECORDATION AND CERTIFICATION OF COIN-OPERATED PHONORECORD PLAYERS

Extension of Comment Periods

AGENCY: Library of Congress, Copyright Office.

ACTION: Advance Notice of Proposed Rulemaking, Extension of Comment Periods.

SUMMARY: This notice extends the periods for initial and reply comments to the notice, published March 30, 1977 (42 FR 16838), requesting informtion to assist the Copyright Office in formulating a tentative regulation pertaining to the recordation and certification of coin-operated phonorecord players under Pub. L. 94-553 (90 Stat. 2541), the Act for General Revision of the Copyright Law. Requests for extension of time were orally submitted by representatives of the manufacturers and operators of coin-operated phonorecord players, on the grounds that additional time was necessary to collect, assemble and present data on an industry-wide basis. As this proceeding is an information gathering device and it is important to secure data from the manufacturers and operators, we have granted the request. The reply period has also been correspondingly extended.

DATES: Initial comments should be received on or before May 30, 1977. Reply comments on or before June 15, 1977.

ADDRESS: Interested persons should submit five copies of their written comments to: Office of the General Counsel, Copyright Office, Library of Congress, Washington, D.C. 20559.

FOR FURTHER INFORMATION, CONTACT:

Jon Baumgarten, General Counsel, Copyright Office, Library of Congress, Washington, D.C. 20559, 703-557-8731.

(17 U.S.C. 207, and under the following sections of Title 17 of the United States Code as amended by Pub. L. 94-553: §§ 116; 702; 708.)

DEPARTMENT OF AGRICULTURE

Forest Service

LAND MANAGEMENT PLAN, SAN GABRIEL UNIT—ANGELES NATIONAL FOREST

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Land Management Plan, San Gabriel Unit, Angeles National Forest, California, USDA-FS-R5-DES(Adm)-77-05.

The environmental statement concerns selection of a management plan for the 186,570 acres of National Forest lands known as the San Gabriel Unit of the Angeles National Forest, in Los Angeles and San Bernardino Counties, California. Sixty-two thousand acres within the Unit have been inventoried as "roadless," and 36,137 acres are included in the National Wilderness Preservation System as the San Gabriel Wilderness.

This draft environmental statement was transmitted to the Council on Environmental Quality (CEQ) on May 11, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave. SW., Washington, D.C. 20250.
Regional Forester, U.S. Forest Service, Rm. 529, 630 Sansome Street, San Francisco, California 94111.
Forest Supervisor's Office, Angeles National Forest, 150 S. Los Robles, Pasadena, California 91101.
Forest Service, District Ranger, Glendora, California.
Forest Service, District Ranger, Flintridge, California.
Forest Service, District Ranger, Parblossom, California.

Copies are also available for review at public libraries in Pasadena, Altadena, Claremont, La Verne, San Dimas, Duarte, Monrovia, Azuza, Glendora, Sierra Madre, Palmdale, and Lancaster, California. A limited number of single copies are available, upon request, from Forest Supervisor, Angeles National Forest, 150 S. Los Robles, Pasadena, CA 91101.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental effect for which comments have not been specifically requested.

Comments concerning the proposed action, and requests for additional information should be addressed to Forest Supervisor William T. Dresser, Angeles National Forest, 150 S. Los Robles, Pasadena, California 91101. Comments must be received within 60 days after transmittal to CEQ in order to be considered in the preparation of the final environmental statement.

DOUGLAS R. LEISZ,
Regional Forester.

USE OF HERBICIDES ON NATIONAL FORESTS OF ALASKA

Availability of the 1977 Final Addendum to the 1975 Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final addendum to the 1975 Final Environmental Statement on the use of herbicides on the National Forests of Alaska, USDA-FS-R10-FES(Adm)-75-03.

The action proposed by this statement concerns vegetation control with the use of herbicides on road, railroad and power line rights-of-way through the Chugach and Tongass National Forests in Alaska.

This final addendum was transmitted to CEQ on May 6, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agricultural Building, Room 3231, 12th St. and Independence Ave. SW., Washington, D.C. 20250.
USDA, Forest Service, Alaska Regional Office, Federal Building, Juneau, Alaska 99802.
Forest Supervisor, Chugach National Forest, Suite 230, 2221 E. Northern Lights Blvd., Anchorage, Alaska 99504.
Forest Supervisor, Tongass National Forest, Chatham Area, Federal Building, Sitka, Alaska 99835.
Forest Supervisor, Tongass National Forest, Ketchikan Area, Federal Building, Room 313, Ketchikan, Alaska 99901.
Forest Supervisor, Tongass National Forest, Stikine Area, Federal Building, Petersburg, Alaska 99833.

A limited number of copies are available upon request to the Regional Forester, U.S. Forest Service, P.O. Box 1628, Juneau, Alaska 99802.

Copies of this final addendum have been sent to various Federal, State and local agencies as outlined in the CEQ guidelines.

CARL W. SWANSON,
Environmental Coordinator, Alaska Region.

Office of the Secretary

PRIVACY ACT OF 1974

Deletion of Systems of Records

Notice is hereby given that the Department of Agriculture, in accordance with 5 U.S.C. 552a(e) (4) and (11), proposes to delete two systems of records that do not contain personal information about individuals. The deleted systems are USDA/ASCS-1, Acknowledgement of Responsibility for Docket Security and USDA/ASCS-32, Warehouse Business Agents. Both systems were initially established as a result of misinterpreting the Privacy Act requirements. System USDA/ASCS-1 contains only an individual's signature on a card whereby the individual acknowledges that he understands his responsibility for maintaining docket security. System USDA/ASCS-32 only contains information relating to corporations, businesses, and firms. The systems notices were previously republished on September 14, 1976 at 41 FR 39205 and 41 FR 39217 respectively. The delegations will be effective May 18, 1977.

Dated: May 12, 1977.

BOB BERGLAND,
Secretary.

CIVIL AERONAUTICS BOARD

[Docket 30660; Order 77-5-63]

AMERICAN AIRLINES, INC. AND EASTERN AIR LINES, INC.

Order Dismissing Complaint

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 13th day of May, 1977.

By tariff revisions[1] marked to become effective May 15, 1977, American Airlines, Inc. (American) and Eastern Air Lines, Inc. (Eastern) propose to increase normal fares in the U.S. mainland-Puerto Rico/Virgin Islands market by three percent for travel on and after June 1, 1977. Eastern first filed with an effective date of May 1, 1977 (which was subsequently postponed to May 15), bas-

[1] Revisions to American Airlines, Inc., Tariff C.A.B. No. 244, and Eastern Air Lines, Inc., Tariff C.A.B. No. 448.

ing its proposal on combined carrier results for the year ended June 30, 1976, as set forth in Order 76–12–96, adjusted for cost inflation to the proposed tariff effective date. In addition, it proposes to modify the return on investment (ROI) calculation to reflect an adjustment in passenger-fare yield and other revenues as discussed below. American has matched Eastern's filing. It has combined its results with those of Eastern for calendar year 1976; has applied the established ratemaking adjustments; and has computed that a three-percent increase in normal fares will result in an ROI for this ratemaking entity of 11.87 percent.

Eastern contends in its justification that several modifications should be made to the ratemaking adjustments employed in reviewing entity ROI. First, it states that, in developing a new fare structure in Order 76–12–96, full-fare passenger yield was overstated because it did not reflect the dilution caused by travel at joint fares, and by traffic moving through the entity to international points beyond San Juan. The carrier alleges that based upon an internal survey for the month of January 1977, the passenger yield used in Order 76–12–96 was overstated by slightly more than one percent. It contends that this adjustment translates into an additional 1.9-percent fare increase over and above a two-percent increase warranted by results, as currently adjusted.

The second point raised by Eastern relates to "other revenues," which are offset against total expenses to obtain passenger operating expense. The carrier states that 32.4 percent of these revenues are passenger-related,[2] so that, when assuming a traffic decline due to the effect of a fare increase, (i.e., application of the demand elasticity factor), it is reasonable to assume a reduction in these particular passenger-related "other revenues." Eastern has computed the change in "other revenues" to be $266,000 for the industry for the year ended June 30, 1976. The net effect is to reduce ROI three one-hundredths of one percent.

Finally, Eastern argues that the nonfuel cost inflation factor it has used is actually understated since it is based upon an "artificially" depressed level of expenses during the latter half of fiscal 1976, which was created by the wage freeze the carrier put in effect during 1976. While it does not attempt to make an adjustment for this factor, it nevertheless contends that the wage freeze should be recognized in determining the nonfuel inflation factor.

The Commonwealth of Puerto Rico (Commonwealth) has filed a complaint against Eastern's proposal alleging that the request is inadequate and improper since it is based on costs for the year ended June 30, 1976, which are now outdated. It also contends that there is no basis for recognizing IATA Caribbean traffic moving on low promotional-fare yields as full-fare traffic for ratemaking purposes, and that this traffic should be treated like other promotional-fare traffic and made subject to the discount-fare adjustment. With respect to the "other revenue" adjustment, the Commonwealth contends that Eastern has provided no evidence to support the conclusion that certain of these revenues will decrease if fares increase.

Upon consideration of the filings, the complaint, and all other relevant matters, the Board has determined that the complaint does not set forth sufficient facts to warrant investigation and the request therefor, and consequently the request for suspension will be denied and the complaint dismissed.

In keeping with the Board's decision in the *Mainland U.S.-Puerto Rico/Virgin Islands Fares* case that all markets should comprise a single ratemaking entity (except with respect to application of the load factor standards), the combined results of the carriers for calendar year 1976 have been adjusted to reflect established ratemaking standards to determine return on investment from operations in this entity with the requested three-percent increase. Included in our calculation are annualization of past fare increases and the application of a cost inflation factor to bring costs forward to the fare application date of June 1. A minor modification in the computation related to application of the −0.7 elasticity factor has also been made, as is discussed below. The final result reflects an adjusted ROI of 11.94 percent with the requested increase.[3] Accordingly, we will permit the proposed increase to become effective. (See Appendix A. Appendix A filed as part of the original document.)[4]

One of the most significant changes which has occurred in this operating entity since the Board's last review of ROI is the increase in fuel cost which American has experienced this year. American's average fuel cost per gallon for calendar year 1976 was 24.39 cents—well below Eastern and atypically low for the industry in general. Beginning in January, however, American's fuel costs has risen sharply, to the point that by March it was 33.41 cents per gallon compared with 35.83 cents for Eastern. In keeping with the established practice of projecting fuel cost forward to the fare-effectiveness date, the Board has estimated that fuel cost per gallon will increase one cent from March to June, based upon Eastern's average monthly increase over the period October 1976–March 1977. We have concluded that American's experience for the past six months should not be combined with that of Eastern for purposes of determining a trend because of the very significant increase American has experienced over this period.[5]

Eastern contends that two "adjustments" in the standard ROI computation should be made. The first relates to an alleged overstatement of passenger yield created by the failure to account for joint-fare traffic and traffic originating at or destined to foreign points when the present fare structure was established in January 1977, pursuant to the Board's decision in the formal proceeding. Had adequate data been available at that time it would have been appropriate to adjust for revenue dilution as Eastern alleges.[6]

Accordingly, the fare structure and level were predicated upon the carriers' combined cost of operations plus return on investment, without reference to actual revenue. However, an adjustment for dilution would have been appropriate to insure that actual (i.e., diluted) revenues would cover cost plus return on investment. The ROI analysis undertaken here, however, is not concerned with establishing a fare structure, but rather is concerned only with overall revenue need. Consequently, the traditional ROI analysis, which uses as its starting point actual cost and revenue, has been followed. As a result, revenue dilution caused by joint-fare travel and the domestic portion of international trips is reflected both in actual revenues and in the amount of additional revenue required to cover cost plus return on investment as of the tariff effective date. In summary, the analytical technique used for determining the fare structure this past January was different from that here used to determine revenue need. While a dilution adjustment would have been appropriate in the former instance, it is, in effect, built into the latter. Consequently, the dilution adjustment suggested by Eastern would constitute a double adjustment, and would overstate revenue need.

The second "adjustment" proposed by Eastern concerns that part of "other revenue" related to passenger travel, as described earlier. In the Board's opinion, this adjustment is reasonable and should be made. The rationale behind applying the −0.7 elasticity factor in the case of a fare increase is that a certain amount of traffic will be "lost" because of the increase. There are other categories of revenue which have historically been associated with the volume of traffic carried. It is only reasonable to assume that, if this volume decreases, these revenues would also decrease. In the present case the adjustment which we have made has an extremely small effect upon ROI—reducing it by three one-hundredths of one percent.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly section 204(a), 403, 404, and 1002 thereof,

It is ordered, That: 1. The complaint in Docket 30660 be and hereby is dismissed; and 2. A copy of this order be served upon American Airlines, Inc., Eastern Air Lines, Inc., and the Commonwealth of Puerto Rico.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77–14195 Filed 5–17–77;8:45 am]

[2] The categories of passenger-related "other" revenue are net liquor revenue, excess baggage revenue, and reservation-cancellation revenue.

[3] As indicated at the outset, Eastern proposes to increase only normal fares at this time. While such a decision has no impact on determining adjusted ROI since the discount-fare adjustment "normalizes" discount-fare revenues, we question the logic of not increasing discount fares at the same time normal fares are increased if, as alleged, current revenues are deficient.

[4] The details of the Board's analysis will be available for public inspection in the Public Reference room, Room 710, Monday, May 16, 1977.

[5] In this connection we note that American has used the latest fuel data it had available at the time of filing, which was for the month of February 1977.

[6] This was not an error of omission, but simply the fact that the carriers had supplied no data to indicate the extent of this dilution.

[Docket No. 30880; Order No. 77–5–62]

VARIOUS CARRIERS

Order of Investigation and Suspension

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 13th day of May, 1977.

By tariff revisions marked to become effective either May 15 or June 1, 1977, all trunkline and local service carriers propose a two-percent increase in the level of passenger fares within the 48 States and the District of Columbia.[1] In support of this proposal, the carriers assert that additional revenue is necessary to counter continuing inflationary pressures, particularly rapidly rising fuel costs.

The carriers have generally followed the methodology used by the Board in its analysis of the fare increase proposed in January 1977 (Order 77–1–93), and have based their analyses on data for the year ended September 30, 1976 brought forward to May 15, 1977. Continental and National contend that costs should be projected beyond the tariff effective date.[2] Additionally, American and Eastern argue that the utilization adjustment is unwarranted since there is nothing abnormal about current utilization levels. However, all contend that a two-percent general increase is justified under the Board's present ratemaking methodology.

The National Passenger Traffic Association, Inc. (NPTA) has filed a complaint against use of results for the year ended September 30, 1976 as the basis for the carrier's ROI analyses, and contends that there is no basis for permitting any fare increase in the absence of a careful and thorough review of results for calendar year 1976. NPTA further urges that, in view of the continuing failure of the trunklines to reduce controllable costs and their continuing pursuit of discount fare pricing policies, no further increase should be permitted at this time.

The answering carriers state that they have, in fact, used the latest data available at the time of filing.[3] Additionally, they argue that NPTA's contention that the carriers' have failed to control costs is unfounded, and that their discount policies are fully consistent with the *DPFI* methodology.

Upon consideration of the proposals, the complaints and answers thereto, and all relevant matters, the Board concludes that the proposal may be unjust, or unreasonable, or unjustly discriminatory, or unduly prejudicial, or otherwise unlawful, and should be investigated. The Board further concludes that the proposal should be suspended pending investigation.

Based upon the most current data now available, that for calendar year 1976, the computed ratemaking ROI as of May 15, 1977 (the earliest tariff effective date), is 11.3 percent after adjustment for utilization, standard seating, the 55-percent load-factor standard, removal of discount fares, and annualization of past fare increases and cost increases. Adjusting the ROI to reflect the proposed two-percent fare increase results in a ratemaking ROI of 13.2 percent.

The argument advanced by Continental and National that costs should be projected beyond the tariff effective date was thoroughly addressed by the Board in Order 77–1–93, January 14, 1977, at which time the Board concluded that this revision should not be reflected in the evaluation of revenue need. No new information or argument not previously considered by the Board has been presented here and we will not, therefore, readdress the issue. With regard to the allegation of American and Eastern that the utilization adjustment should be terminated, the Board is continuing its consideration of this matter and is not prepared at this time to change its approach. In any event, eliminating the utilization adjustment would not alter our disposition of this proposal.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof,

It is ordered, That: 1. An investigation be instituted to determine whether the fares and provisions described in Appendices B [4] and C [4] attached hereto, and rules, regulations and practices affecting such fares and provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and, if found to be unlawful, to determine and prescribe the lawful fares and provisions, and rules, regulations, or practices affecting such fares and provisions;

2. Pending hearing and decision by the Board, the fares and provisions described in Appendix B [4] hereto are suspended and their use deferred to and including August 12, 1977, and the fares and provisions described in Appendix B hereto are suspended and their use deferred to and including August 29, 1977, unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension except by order or special permission of the Board;

3. Except to the extent granted herein, the complaints in Dockets 30612 and 30720 are hereby dismissed;

4. The proceeding ordered herein be assigned for hearing before an administrative law judge of the Board at a time and place hereafter to be designated; and

5. Copies of this order will be filed with the aforesaid tariff and served upon all scheduled certificated carriers operating between points within the 48-contiguous States and the District of Columbia.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[1] Revisions to Airline Tariff Publishing Company, Agent, C.A.B. No. 259.

[2] See Order 77–1–93, January 14, 1977, for a thorough discussion by the Board of recognizing anticipatory cost in its ratemaking evaluations.

[3] American, Eastern, Trans World, and United submitted answers to NPTA's complaint.

[4] Appendices filed as part of original.

[Order 77–5–60, Docket 27573, Agreement C.A.B. 26469]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Cargo Rate Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 12th day of May, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA).

The agreement would establish proportional rates for the U.S. interior points Denver, Salt Lake City, and Wichita at 29 cents per kg. over Los Angeles for use with specified North/Central Pacific general cargo rates. The rates are not out of line with other North/Central Pacific proportionals approved by the Board, and will be approved herein.

The Board, acting pursuant to the Federal Aviation Act of 1958 and particularly sections 102, 204(a), and 412 thereof, does not find Resolution JT31/JT123 (Mail 101) 556a incorporated in Agreement C.A.B. 26469 as indicated, to be adverse to the public interest or in violation of the Act:

Agreement C.A.B.	*IATA Resolution*
26469	JT31/JT123 (Mail 101) 556a

Accordingly, *It is ordered* that:

Agreement C.A.B. 26469 be and hereby is approved.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

DEPARTMENT OF COMMERCE

Economic Development Administration

SUGAR INDUSTRY

Prospects for Adjustment Assistance for Firms

The Department of Commerce has conducted a study of the firms growing and processing sugar cane and sugar beets pursuant to Section 264 of the Trade Act of 1974. Such a study is required whenever the U.S. International Trade Commission makes an import relief investigation under Section 201 of the Act.

The Commission reported to the President on March 17, 1977, that the domestic sugar industry is being threatened with serious injury by increased imports and recommended that quota restraints be imposed on imports to relieve the threat. The Commission was evenly divided, 3 to 3, over whether the annual import quota applied to imports of sugar, syrup or molasses should be set at 4.275 million short tons or at 4.4 million short tons, raw value. According to Section 202 of the Trade Act, the President shall determine whether to provide import relief and what method and amount of import relief will be provided.

Sugar is produced from the juice of sugar cane and sugar beets. The juice milled from sugar cane is processed into raw sugar, a product consisting of large sucrose crystals coated with molasses, which is the principal "sugar" shipped in world trade. Sugar beets, however, are usually converted directly into refined sugar. Most sugar is for human consumption as a caloric sweetener and for food preservative purposes, but it also is used in livestock feeds and in producing alcohol.

In the United States, about one-third of the sugar consumed goes to household users and two-thirds is for industrial consumption in such products as beverages, bakery and cereal products, confectionery, fruits and vegetables, and dairy products. About 55 percent of the sugar consumed annually in the United States comes from domestic sources (using both sugar beets and sugar cane), and 45 percent comes from cane sugar imports from foreign countries.

The domestic sugar industry is composed of those firms growing, milling, processing, and refining sugar cane and sugar beets. Sugar beets account for 56 percent of the total U.S. production. In the 1976/77 crop year, the United States produced 6.9 million short tons (raw value) of sugar, equal to about 7 percent of the world's production. (The crop year begins at various times of the calendar year depending on the climate of the growing area.)

Sugar beets are currently produced as annual crops in the temperate zones of 18 states, but most of them are grown in 10 states: California, Minnesota, Idaho, Colorado, North Dakota, Washington, Nebraska, Michigan, Wyoming, and Montana. Sugar cane is grown in subtropical areas in Florida, Louisiana, Texas, Hawaii, and Puerto Rico.

In 1976, the leading suppliers of U.S. imports of raw cane sugar were the Dominican Republic, Australia, the Philippines, the West Indies, Peru, and Guatemala. Collectively, they accounted for 69 percent of the 4.66 million short tons of sugar imports. Imported sugar was equivalent to 74 percent of domestic production of cane sugar in 1976.

To be certified eligible to apply for trade adjustment assistance, a sugar grower, processor or refiner must petition the Department of Commerce and demonstrate that increased imports of articles "like or directly competitive with those produced by the firm" contributed importantly to declines in the firm's sales or production, or both, and to the separation, or threat of separation, of a significant number or proportion of the firm's workers. A trade-impacted producing firm may petition the Department for certification at any time regardless of a prospective Commission finding or its results. For firms in the sugar industry that are considering petitioning for certification, the first requirement of the qualifying criteria probably is met, since U.S. imports of sugar increased in 1976 over 1975.

As of the date of this report, no petitions have been filed by firms in the sugar industry seeking certification to apply for adjustment assistance. The likelihood of any firm in the industry being able to meet the qualifying criteria for certification would depend on a number of unknown factors which could vary considerably in individual cases.

The Department is unable to estimate the number of firms that are "likely to be certified as eligible for adjustment assistance." However, if any firms do submit petitions, they would most likely be from independent sugar cane and sugar beet growers. The growers would have to submit relevant data for their entire operations. In the case of sugar beet growers, the sugar beet harvest may only represent a small portion of their total farm output and total sales. Growers of sugar cane, on the other hand, generally grow only the one crop on their farms.

Sugar cane millers and sugar beet processors all are often associated with the growers. For certification purposes, all of the affiliated operations would have to be examined in order to determine if the firm meets the requisite criteria.

The sugar cane refiners, most of which are affiliates of large corporations, are least likely to qualify for certification. These refiners also import the bulk of the raw cane sugar from foreign countries. The sugar-refining segment is the largest component of the total sugar industry as far as sales and profits are concerned.

Under the program of adjustment assistance for firms authorized by the Trade Act and administered by the Economic Development Administration ("EDA") in the Department of Commerce, financial assistance to a certified firm may take the form of direct loans and loan guarantees, and technical assistance, to enable a firm to establish a competitive position in the same or a different industry. Financial assistance may be used for the acquisition, construction, installation, modernization, expansion or conversion of fixed assets, or for working capital necessary for a firm to implement its adjustment plan. Technical assistance may be used for management and operational assistance, feasibility studies and related research to aid in developing and implementing a firm's recovery plan.

The Trade Act also provides for certification of communities located in trade-impacted areas or in areas where a firm or subdivision has transferred to a foreign country.

Certified communities are eligible for public works, grants, loans, and loan guarantees—all of which can be directed towards assisting affected firms. Under the Public Works and Economic Development Act of 1965 ("PWEDA"), as amended, direct and indirect assistance to firms is available without Trade Act certification. Firms located in EDA-designated "redevelopment areas" and "economic development centers" can benefit indirectly from grants to the designated places and related entities for financing public works, and directly from business development loans and guarantees. Under PWEDA, neither loans nor guarantees can be used to assist firms in industries found to have long-term overcapacity. However, PWEDA does authorize technical assistance to firms regardless of location, and grants of loanable funds to communities with actual or threatened unemployment.

The Farmers Home Administration ("FmHA") of the Department of Agriculture has programs of both farm ownership loans and farm operating loans that could benefit sugar growers which operate family farms. Processors or refiners may be able to participate in a program of loan guarantees to businesses located in areas other than cities of over 50,000 population. As with EDA business loans, however, these guarantees are not available to firms in industries characterized by long-term overcapacity.

The Small Business Administration ("SBA") administers two programs of potential assistance to small firms: a business loan program of direct, participating, and guaranteed loans; a management assistance program for small businesses; and a loan program for local development companies. Eligibility is limited to independently owned and operated firms that are not dominant in their field and do not have over 500 average employment. The amount of the guaranteed loan, however, cannot exceed $500,000, and participating and direct loans have even lower limits.

Additional information about the adjustment assistance program and copies of the report Prospects for Adjustment Assistance for Firms in the Sugar Industry, are available from the Office of Public Affairs, Economic Development Administration, Room 7019, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-5113.

INDUSTRY PRODUCING TELEVISION RECEIVERS AND SUBASSEMBLIES THEREOF

Prospects for Adjustment Assistance for Firms

The Department of Commerce has conducted a study of the firms in the industry producing television receivers and subassemblies pursuant to Section 24 of the Trade Act of 1974. Such a study is required whenever the U.S. International Trade Commission makes an industry investigation under Section 201 of the Act.

In its report on March 22, 1977, the Commission determined (by a 6 to 0 vote) that increased imports of color television receivers are causing or threatening to cause serious injury to the domestic industry. Three of the Commissioners also determined that monochrome television receiver imports, and certain subassemblies of both color and monochrome television receivers, are causing serious injury to the domestic industry. Five of the Commissioners recommended higher tariffs on imported receivers as import relief for U.S. television manufacturers, and one recommended quantitative restrictions as the appropriate remedy. Three of the Commissioners recommending higher duties included both color and monochrome television receivers in their remedy recommendations, while the remaining Commissioners only included color sets. According to Section 202 of the Trade Act, the President shall determine whether to provide import relief and what method and amount of import relief will be provided.

The number of firms producing television receivers in the United States declined from 15 in 1971 to 12 in 1976, four of which are owned by foreign firms. All 12 firms produced color receivers in 1976, but only seven produced monochrome sets. The two largest domestic producers accounted for more than 50 percent of total output of color receivers within the U.S. during 1976, while three other firms accounted for less than two percent. In addition to their domestic production facilities, many of the large U.S. firms have established plants in foreign countries to manufacture various components and to assemble television receivers.

Total average employment in the television receiver industry increased during the first nine months of 1976, reversing a trend of falling employment which had characterized the industry since 1971. Estimated shipments of domestically-produced television receivers increased in 1976 by more than three percent to 7.7 million units, while imports amounted to almost 7.8 million units, an increase of 86 percent. Although a majority of the Commissioners concluded that firms producing components and subassemblies should be considered as a part of the television receiver industry, the Commission did not collect data from those firms.

To be certified eligible to apply for trade adjustment assistance, a firm must petition the Department of Commerce and demonstrate that increased imports of articles like or directly competitive with those produced by the firm contributed importantly to declines in sales or production, or both, and to the separation, or threat of separation, of a significant number or proportion of the firm's workers. A trade-impacted producing firm may petition the Department for certification at any time regardless of a prospective Commission finding or its results. For firms in the television receiver industry that are considering petitioning for certification, the first requirement of the qualifying criteria apparently has been met, since U.S. imports of receivers increased in 1976.

As of the date of this report, no firms in the industry producing television receivers have petitioned for certification of eligibility to apply for adjustment assistance. However, based upon the data obtained by the Commission during its investigation and made available to the Department, only two of the 12 domestic firms appear to meet the Trade Act criteria of absolute declines in either total sales or total production, and employment. Moreover, it appears unlikely that either firm could establish that imports contributed importantly to those declines.

The same criteria would be applicable for those firms manufacturing components or subassemblies for television receivers that are considering petitioning the Department for certification. However, such firms must establish that imports of items like or directly competitive with the components they are producing, not television receivers, have increased and have contributed importantly to their declines. Because there is no data available for producers of subassemblies, the Department is unable to determine the number of firms in this industry segment that are likely to be certified eligible.

Under the program of trade adjustment assistance for firms authorized by the Trade Act and administered by the Economic Development Administration ("EDA") in the Department of Commerce, a certified firm may apply for adjustment assistance to carry out its recovery plan. However, the fact that a firm is certified does not imply that such assistance will be furnished. That decision will depend upon whether the firm's adjustment proposal meets all of the statutory criteria essential for approval. Adjustment assistance may consist of financial assistance, technical assistance, or both. Financial assistance, in the form or direct loans or loan guarantees, may be used for the acquisition, construction, installation, modernization, expansion or conversion of fixed assets, or for working capital necessary for a firm to implement its adjustment plan. Technical assistance may be used for amanagement and operational assistance, feasibility studies and related research to aid in developing and implementing a firm's recovery plan.

The Trade Act also provides for certification of communities located in trade-impacted areas or in areas where a firm or subdivision has transferred to a foreign country. Certified communities are eligible for public works grants, loans, and loan guarantees—all of which can be directed towards assisting affected firms. Under the Public Works and Economic Development Act of 1965 ("PWEDA"), as amended, direct and indirect assistance to firms is available without Trade Act certification. Firms located in EDA-designated "redevelopment areas" and "economic development centers" can benefit indirectly from grants to the designated places and related entities for financing public works, and directly from business development loans and guarantees.

Under PWEDA, neither loans nor guarantees can be used to assist firms relocating from one area to another or to expand production in an industry found to have long-term overcapacity. However, even though an industry is characterized by long-term overcapacity, firms in that industry may obtain assistance under PWEDA for purposes of assuring the retention of existing capacity and employment. Moreover, PWEDA does authorize technical assistance to firms regardless of location and grants of loanable funds to communities with actual or threatened unemployment.

The Small Business Administration ("SBA") administers three programs of potential assistance to firms adversely affected by imports: a management assistance program for small business; a loan program for local development companies; and a business loan program of direct, participating, and guaranteed loans. Eligibility is limited to independently owned and operated firms that are not dominant in their field and do not have over 750 average employment. The amount of the guaranteed loan, however, cannot exceed $500,000, and participating and direct loans have even lower limits.

The Farmers Home Administration ("FmHA") of the Department of Agriculture has two programs that could benefit firms affected by imports. Some companies may be able to participate in a program of loan guarantees to businesses located in areas other than cities of over 50,000 population. As with EDA business loans, however, these guarantees are not available to firms in industries found to have long-term overcapacity. FmHA also can make grants and loans to public bodies, such as local development organizations and governments, in areas other than cities of over 10,000 population. These funds can be used for public works projects, such as utility extensions and access roads, that would benefit industry.

Additional information about the adjustment assistance program and

copies of the report Prospects for Adjustment Assistance for Firms in the Industry Producing Television Receivers and Subassemblies Thereof, are available from the Office of Public Affairs, Economic Development Administration, Room 7019, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202–377–5113.

Patent and Trademark Office

PUBLIC ADVISORY COMMITTEE FOR TRADEMARK AFFAIRS

Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee meeting.

The Public Advisory Committee for Trademark Affairs will meet from 10 a.m. until noon on June 8, 1977 in the Commissioner's Conference Room at the Patent and Trademark Office, 2021 Jefferson Davis Hwy., Crystal Plaza Building 3, Arlington, Virginia 22204 and from 2 p.m. until 5:30 p.m. at the National Lawyers Club, 1815 H St., NW., Washington, D.C. 20006, The Hughes Room. The Committee will also meet on June 9, 1977 at 9 a.m. at the National Lawyers Club in the Opinion and Decision Room.

The Committee was established in 1970 to advise the Patent and Trademark Office on steps which can be taken in order to increase the efficiency and effectiveness of the administration of the Trademark Act and to provide a continuing source of knowledge from the private sector to the government in the field.

The agenda for the meeting is:

(1) Introductory Remarks.
(2) Computerization Study.
(3) Report on Patent and Trademark Office Activities.
(4) Mutliple Class Applications.
(5) Inter Partes Rules of Practice.
(6) Petitions to the Commissioner.
(7) Assignments.
(8) Retention of Patent and Trademark Office Files.
(9) Pendency of Trademark Applications.
(10) Letters of Protest.

The meeting will be open to public observation; approximately 15 seats will be available for the public on a first come-first served basis. If time permits, oral comments by the public of 3 minutes on each topic within the above agenda items will be allowed. To insure proper consideration at the meeting, any comments or suggestions relating to the agenda items should be submitted in writing before June 3. Further comments and suggestions will be accepted after the meeting on any of the matters discussed.

Copies of the minutes will be available upon request 90 days after the meeting. Inquiries may be addressed to the Committee Control Officer, Patricia M. Davis, Office of Trademark Program Control, Room 11C17 Crystal Plaza Building 3, Telephone: 703–557–3881.

Dated: May 11, 1977.

C. MARSHALL DANN,
Commissioner of Patents and Trademarks.

Approved: May 11, 1977.

JORDAN J. BARUCH,
Assistant Secretary for Science and Technology.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON AND MAN-MADE TEXTILE PRODUCTS FROM THE PHILIPPINES

Increasing the Import Levels

MAY 16, 1977.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing the levels for certain cotton and man-made fiber textile products exported from the Philippines during the twelve-month period which began on October 1, 1976.

SUMMARY: Paragraphs 8 and 9(a)(i) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 15, 1975 between the Governments of the United States and the Republic of the Philippines provide for increases in specific category ceilings to allow for flexibility and the carryover of shortfalls in those categories from the previous agreement year. At the request of the Government of the Philippines, pursuant to either one, or both, of the foregoing provisions of the bilateral agreement, the import restraint levels for Categories 39, 45/46/47, 49, 50, 51, 224, 229, 235, and 237 are being increased for the agreement period which began on October 1, 1976 and extends through September 30, 1977.

EFFECTIVE DATE: May 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–5423).

SUPPLEMENTARY INFORMATION: On September 27, 1976, a letter from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs was published in the FEDERAL REGISTER (41 FR 42234), which established import restraint levels for certain specified categories of cotton and man-made fiber textile products, produced or manufactured in the Philippines and entered or withdrawn from warehouse for consumption in the United States during the twelve-month period which began on October 1, 1976. In the letter published below the Commissioner of Customs is directed to increase the twelve-month levels of restraint previously established for Categories 39, 45/46/47, 49, 50, 51, 224, 229, 235, and 237 to the amounts indicated.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury, Washington, D.C. 20229.

MAY 16, 1977.

DEAR MR. COMMISSIONER: On September 22, 1976, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning on October 1, 1976 and extending through September 30, 1977 of cotton and man-made fiber textile products in certain specified categories, produced or manufactured in the Philippines in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to paragraphs 8 and 9(a)(i) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 15, 1975, between the Governments of the United States and the Republic of the Philippines, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to amend, effective on May 19, 1977, the levels of restraint previously established for Categories 39, 45/46/47, 49, 50, 51, 224, 229, 235 and 237 to the following amounts:

Category:	*Amended 12-mo. level of restraint*[1]
39	476,896 doz. pairs
45/46/47	4,419,100 yd[2] equivalent.
49	50,504 doz.
50	126,260 doz.
51	122,481 doz.
Pt. 224[2]	114,490 lb.
Pt. 224[3]	114,490 lb.
229	252,520 doz.
235	37,878 doz.
237	227,268 numbers.

[1] The levels of restraint have not been adjusted to reflect any entries made after Sept. 30, 1976.

[2] (Only T.S.U.S.A. Nos. 380.0420 and 380.8143).

[3] (Only T.S.U.S.A. Nos. 380.0402 and 380.8103.

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 15, 1975 between the Governments of the United States and the Republic of the Philippines which provide, in part, that: (1) Within the group limits, specific levels of restraint may be exceeded by 7 percent in any agreement year; (2) specific levels of restraint may be increased for carryover and carryforward up to 11 percent of the receiving year's applicable limits; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

The actions taken with respect to the Government of the Republic of the Philippines and with respect to imports of cotton and man-made fiber textile products from the Philippines, have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

ENVIRONMENTAL PROTECTION AGENCY

[OPP 42023B; FRL 729–1]

MARYLAND

State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides; Approval Status

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.), and the implementing regulations of 40 CFR Part 171, require each State desiring to certify applicators to submit a plan for such purpose, subject to approval by the Environmental Protection Agency (EPA). On September 15, 1976, the Maryland State Plan was approved contingent upon promulgation of necessary regulations implementing the legislation. Notice of contingent approval was published in the FEDERAL REGISTER on October 15, 1976 (41 FR 45620). Subsequently, on November 10, 1976 regulations necessary to implement the Maryland legislation were promulgated. Having reviewed these regulations and finding that all requisite legal authorities required by FIFRA and 40 CFR Part 171 are now enacted and promulgated, the Regional Administrator, EPA, Region III, hereby gives notice that the Maryland State Plan is now a fully approved State Plan.

Dated: April 25, 1977.

ALVIN R. MORRIS,
Acting Regional Administrator, Region III.

[FR Doc.77–14097 Filed 5–17–77;8:45 am]

FEDERAL ENERGY ADMINISTRATION

MANDATORY OIL PRICING AND ALLOCATION REGULATIONS

Establishment of Task Force on Compliance and Enforcement; Opportunity to Submit Views

On May 13, 1977, the Administrator of the Federal Energy Administration created a Task Force on Compliance and Enforcement to make recommendations for measures to strengthen FEA's enforcement program. The Adminstrator, with the concurrence of the Chairman of the Securities and Exchange Commission, has appointed Mr. Stanley Sporkin of the Securities and Exchange Commission as Chairman of the Task Force. The Task Force will be in existence for a period of 60 days beginning May 13, 1977.

In addition to Mr. Sporkin, the following persons have been appointed as members of the Task Force:

William C. Arntz, Regional Administrator, Region IX, FEA.
Paul L. Bloom, Deputy General Counsel, FEA.
Ralph Ferrara, Executive Assistant to the Chairman, Securities and Exchange Commission.
Gordon W. Harvey, Assistant Deputy Assistant Administrator for Compliance, FEA.
Richard B. Herzog, Deputy Assistant Administrator for Compliance, FEA.
Shelley Kolbert, Special Assistant to the Administrator, FEA.
Avrom Landesman, Assistant General Counsel for Compliance, FEA.
Theodore H. Levine, Assistant Director, Division of Enforcement, Securities and Exchange Commission.
Robert Nordhaus, FEA.
William Taylor, Regional Counsel, Region III, FEA.
Larry White, Regional Director of Compliance, Region VI, FEA.
Robert A. Wolfe, Special Assistant to the Assistant Administrator for Regulatory Programs, FEA.

Jerry L. Pfeffer, Office of Program Integration, ERDA, will serve as Executive Director of the Task Force.

The Administrator has asked the Task Force to make recommendations concerning the following matters:

1. A strategy for the disposition of pending cases.

2. A conceptual design for a compliance and enforcement strategy for the future, addressing the audit coverage to be given to the various types of firms subject to FEA's pricing and allocation regulations.

3. Techniques and procedures for auditing; for example, the use of preliminary audits.

4. Audit, legal and other national and regional staffing needs.

5. Legal support for compliance functions.

6. Communications and allocation of authority between National and Regional offices, between the General Counsel and the Office of Regulatory Programs (at the National and Regional levels), and among different regions.

7. Additional legislation in support of compliance functions.

8. Procedures for investigation of suspected willful violations.

In order to receive the broadest possible range of views, the Task Force solicits comments from the public with respect to the particular subjects enumerated above. Such comments may be in the form of written statements, not to exceed 30 pages (including exhibits). Two copies of the statement should be submitted. Written views should be submitted no later than the close of business on Friday, June 10, 1977, and should be addressed to Mr. Jerry L. Pfeffer, Room 5302, 2000 M Street, NW., Washington, D.C. 20461. Envelopes should be marked "Comments to Task Force." Comments addressing matters not within the agenda specified above are not likely to be considered by the Task Force but will be considered by the FEA staff as part of its ongoing effort to monitor and improve its Compliance Program. The commentator should identify any information in the comment that he or she considers confidential and submit only one copy of that information.

In addition to considering written comments, the Task Force members will interview knowledgeable persons, both inside and outside of FEA, to receive their views orally on the subjects enumerated above. Members of the public who submit comments and who wish to be heard orally by a representative of the Task Force should so state in their written comments. The Task Force will attempt to honor as many requests for meetings as possible. Priority will be given to persons who are spokespersons for groups of other persons, whether formed for the purpose of presenting views to the Task Force, or previously in existence, such as public interest groups, trade associations and professional organizations.

Any questions regarding this notice should be addressed to Jerry L. Pfeffer, Task Force Executive Director, at 202/254–8700.

Issued in Washington, D.C., May 13, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc.77–14222 Filed 5–16–77;8:23 am]

STRATEGIC PETROLEUM RESERVE

Availability of a Supplement to the Final Environmental Impact Statement for the Bayou Choctaw Salt Dome Storage Site

Pursuant to section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C), the Federal Energy Administration (FEA) has prepared a supplement to the environmental impact statement (EIS) for the Bayou Choctaw salt dome site. The supplement describes the environmental impacts of a proposed change in pipeline siting associated with the Bayou Choctaw storage facility.

The Bayou Choctaw site has been selected as a key element of the Strategic Petroleum Reserve. The Reserve (mandated by Part B of Title I, Energy Policy and Conservation Act, 42 U.S.C. 6231 et seq.) will be created for the storage of crude oil and/or petroleum products for use in the event of a Presidential determination of a severe energy supply interruption or a requirement to meet the obligations of the United States under the International Energy Program.

FEA will allow a minimum of 30 days for interested parties to comment before taking any administrative action with regard to the proposed pipeline alteration. Moreover, FEA will endeavor to comply with any requests (received during the 30-day period) for extensions of

the review period up to a maximum of 15 days.

Single copies of the supplement to the Bayou Choctaw EIS (DES–76/77–4) may be obtained from the FEA, Office of Communications and Public Affairs, Room 3138, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461. Copies of the supplement will also be available for public review in the FEA Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, between 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Interested persons are invited to submit data, views or arguments with respect to the supplement to Executive Communications, Box MS, Room 3317, Federal Energy Administration, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on the documents submitted to FEA Executive Communications with the designation "Supplement to the Bayou Choctaw EIS (FES–76–5)." Fifteen copies should be submitted. All comments should be received by FEA by June 17, 1977, in order to receive full consideration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., May 13, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

[FR Doc.77–14223 Filed 5–16–77;8:23 am]

FEDERAL ENERGY ADMINISTRATION

ENVIRONMENTAL ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat 770), notice is hereby given that the Environmental Advisory Committee will meet Friday, June 3, 1977, at 9 a.m., Room 5041, FEA Headquarters, 12th and Pennsylvania Avenue, NW, Washington, D.C.

The Committee was established to provide advice and information to FEA concerning environmental aspects of FEA policies and programs.

The agenda for the meeting is as follows:

1. Old Business—Report on the Status of Environmental Advisory Committee Recommendations and Requests and FEA Commitments.
2. Report and Recommendations from Energy Conservation Subcommittee on Administration Proposals for Energy Conservation and Energy Pricing.
3. Report and Recommendations from Nuclear Policy Subcommittee on Administration Energy Proposals.
4. Report and Recomendations from OCS/Energy Facility Siting Subcommittee on Administration Energy Proposals.
5. Report and Recommendations from Coal Policy Subcommittee on Administration Proposals to Increase Coal Usage.
6. Report and Recommendations from Air Quality Standards Subcommittee on Administration Energy Proposals.

The following Environmental Advisory Committee Subcommittees will meet Thursday, June 2, 1977 from 2 p.m. until 4:30 p.m.:

Energy Conservation Subcommittee, Room 5041–A, FEA Headquarters to discuss the energy conservation and energy pricing measures proposed by the Administration.

Coal Policy Subcommittee and Air Quality Standards Subcommittee (joint meeting), Room 5041–B, FEA Headquarters to discuss the Administration's proposals for increased coal usage.

The meetings are open to the public. The Chairman of the Committee or Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee or a Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois Weeks, Director, Advisory Committee Management, 202–566–9996, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning these meetings may be obtained from the Advisory Committee Management Office.

Transcriots of the meetings will be available for public review and copying at the Freedom of Information Public Reading Room, Room 2107, FEA, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C. on May 16, 1977.

ERIC J. FYGI,
Acting General Counsel.

FEDERAL HOME LOAN BANK BOARD

[No. AC–36]

HOMESTEAD SAVINGS AND LOAN ASSOCIATION, SALINA, KANSAS

Notice of Approval of Conversion

(Notice of Final Action)

MAY 13, 1977.

Notice is hereby given that on May 11, 1977, the Federal Home Loan Bank Board, as the operating head of the Federal Savings and Loan Insurance Corporation by Resolution No. 77–300, approved the application of The Homestead Savings and Loan Association, Salina, Kansas, for permission to convert to the stock form of organization. Copies of the application are available for inspection at the Office of the Secretary of said Corporation, 320 First Street, NW., Washington, D.C. 20552 and at the Office of the Supervisory Agent of said Corporation at the Federal Home Loan Bank of Topeka, 120 East 6th Street, Topeka, Kansas 66601.

By the Federal Home Loan Bank Board.

RONALD A. SNIDER,
Assistant Secretary.

FEDERAL MARITIME COMMISSION

LYKES BROS. STEAMSHIP CO., INC. AND STATES STEAMSHIP CO.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before June 7, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

R. J. Finnan, Pricing Analyst, Lykes Bros. Steamship Co., Inc., 300 Poydras Street, New Orleans, Louisiana 70130.

Agreement No. 10142–3, between the above-named parties, modifies their basic agency agreement by deleting therefrom all the functions performed by States Steamship Company with respect to Lykes Bros. Steamship Co.'s joint rail-water container service in the States of California, Oregon and Washington.

By Order of the Federal Maritime Commission.

Dated: May 13, 1977.

JOSEPH C. POLKING,
Acting Secretary.

SOUTH AND EAST AFRICA/USA CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before June 7, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

William L. Hamm, Chairman, South and East Africa/U.S.A. Conference, 25 Broadway, New York, New York 10004.

Agreement No. 8054–15, entered into by the member lines of the South and East Africa/U.S.A. Conference, amends various articles of the conference agreement to provide for:

(1) An increase from 30 to 60 days in the notice period required for resignation from the conference;

(2) The selection of a Chairman by the parties and conforming changes throughout the agreement;

(3) The posting of a financial guarantee in the amount of $20,000 against conference obligations;

(4) A description of expenses to be borne and of how they are to be shared; and

(5) The formal authorization for the Chairman to file amendments with the Commission.

By Order of the Federal Maritime Commission.

Dated: May 13, 1977.

JOSEPH C. POLKING,
Acting Secretary.

UNITED STATES/SOUTH AND EAST AFRICA CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before June 7, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

William L. Hamm, Chairman, United States/South and East Africa Conference, 25 Broadway, New York, New York 10004.

Agreement No. 9502–10, entered into by the member lines of the United States/South and East Africa Conference, amends various articles of the conference agreement to provide for:

(1) A decrease from 100 to 60 days in the notice period required for resignation from the conference;

(2) The election of a Chairman other than from among the members and routine alterations to conform the agreement to that change;

(3) The formal authorization for the Chairman to file amendments with the Commission;

(4) A clarification of conference expenses to be shared; and

(5) The posting of a financial guarantee in the amount of $20,000 against conference obligations.

By order of the Federal Maritime Commission.

FEDERAL POWER COMMISSION

[Docket No. ER77–329]

BOSTON EDISON CO.

Filing

MAY 10, 1977.

Take notice that Boston Edison Company (Edison), on April 28, 1977, tendered for filing a letter agreement dated September 24, 1977 between Edison and Central Maine Power Company extending through October 31, 1978 of an assignment by Edison of its entitlement in electricity produced by The New Brunswick Electric Power Commission.

Edison indicates that copies of this filing were served upon Central Maine Power Company and Maine Electric Power Company, Inc., from which the New Brunswick power is purchased.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 20, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77–14178 Filed 5–17–77;8:45 am]

[Docket No. CP77–363]

COLUMBIA GAS TRANSMISSION CORP. AND NATIONAL FUEL GAS SUPPLY CORP.

Notice of Application

MAY 11, 1977.

Take notice that on April 28, 1977, Columbia Gas Transmission Corporation (Columbia Transmission), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, and National Fuel Gas Supply Corporation (National Fuel), 308 Seneca Street, Oil City, Pennsylvania 16301, (Applicants) filed in Docket No. CP77–363 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicants to transport on a best efforts basis up to 10,000 Mcf of natural gas per day for UGI Corporation, Gas Utility Division

(UGI), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants propose to transport the proposed volumes of gas pursuant to a letter agreement dated March 29, 1977, between Applicants and UGI for 10 years. Applicants indicate that UGI would purchase the gas proposed herein to be transported from Jack L. Henning pursuant to a gas purchase agreement dated March 29, 1977, among UGI, UGI Development Co. and Jack L. Henning, and that the subject gas is local production gas produced in Northwestern Pennsylvania which would be used by UGI partially to offset current and projected curtailments by its pipeline supplier. Applicants further indicate that UGI would pay Jack L. Henning for all gas delivered from wells spudded prior to January 1, 1978, during any given pricing year (April 1to March 30) a total of the following price components, as applicable:

(a) $1.44 per Mcf base price for each pricing year;

(b) $.04 per Mcf for each compression stage for each pricing year;

(c) $.17 per Mcf for extraordinary gathering facilities for each pricing year;

(d) starting in the pricing year April 1, 1978, through March 30, 1979, and every pricing year thereafter, an automatic increase per Mcf reflecting increased value (currently $.04 per Mcf);

(e) starting in the pricing year April 1, 1978, through March 30, 1979, and every pricing year thereafter, an increase, if warranted, to compensate for additional increased value of gas or for increases in operating cost, such amount to be agreed upon by the parties;

(f) a price shall be determined annually on or before April 1 of each year for all gas delivered from wells spudded after January 1, 1978, during pricing years (April 1–March 30) beginning on and after April 1, 1978.

It is stated that the subject gas is to be purchased by UGI at the tailgate of the sellers' plant located in Warrant 3188, Township, Forest County, Pennsylvania, and the local production gas would be delivered for transportation to National Fuel by UGI through existing intrastate facilities at the point of interconnection of UGI's existing 8-inch intrastate pipeline and National Fuel's existing 20-inch Line D in Warren County, Pennsylvania. National Fuel would receive the subject gas from UGI at the proposed point of interconnection in Warren County, Pennsylvania and would transport (by displacement or physical haul) and deliver such volumes to Columbia Transmission, for the account of UGI, at the existing Ellwood City Columbia Transmission-National Fuel delivery point in Beaver County, Pennsylvania, or other mutually agreeable delivery point(s). Applicants state that Columbia Transmission would receive the subject gas from National Fuel at the existing Ellwood City delivery point, or other mutually agreeable delivery point(s) and would transport and deliver volumes up to 10,000 Mcf of natural gas per day (less company-use and unaccounted-for gas, currently estimated at 3.1% of the volumes received) to UGI at existing points of delivery from Columbia Transmission to UGI in southeastern Pennsylvania, to the extent its operating conditions permit, through the utilization of existing facilities.

It is stated that National Fuel proposes to construct, or cause to be constructed, at UGI's expense, requisite metering facilities at the proposed point of interconnection of National Fuel's 20-inch Line D and UGI's 8-inch gathering line in Warren County, Pennsylvania, at an estimated cost of $13,577. Applicants state that initial deliveries of local production gas are estimated by UGI at approximately 1,000 Mcf of natural gas per day and that the purchase contracts contemplate a drilling program under which it is anticipated that up to 6,000 Mcf of natural gas per day would be available to UGI by 1978. UGI contemplates purchasing additional volumes up to 4,000 Mcf of natural gas per day as such volumes become available in the vicinity of its said intrastate facilities, it is said.

National Fuel proposes to charge UGI for such transportation service an amount equal to its average system-wide unit transmission cost, as in effect from time to time, this being 12.94 cents per Mcf, and Columbia Transmission proposes to charge UGI an amount equal to its average system-wide unit storage and transmission costs, exclusive of company-use and unaccounted-for gas, this being 22.21 cents per Mcf.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 1, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-14183 Filed 5-17-77;8:45 am]

[Docket No. ER77-333]

COMMONWEALTH EDISON CO.

Filing Letter Agreement

MAY 10, 1977.

Take notice that Commonwealth Edison Company (Edison), on April 29, 1977, tendered for filing a proposed letter agreement between Edison and Wisconsin Electric Power Company (Wisconsin Electric). Edison indicates that the proposed agreement provides for the delivery of 190 megawatts of Limited Term Power by Edison to Wisconsin Electric for ten months of a twelve-month period beginning June 1, 1977 under the terms of Service Schedule A of the Interconnection Agreement between the two parties (Commonwealth Edison Company Rate Schedule FPC No. 14). The monthly Capacity Charge is proposed to be $2.15 per kilowatt.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 20, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ID-1811]

ERNEST D. HUGGARD

Notice of Application

MAY 11, 1977.

Take notice that on May 2, 1977, Ernest D. Huggard of Atlantic City, New Jersey, filed an application with the Federal Power Commission, pursuant to Section 305(b) of the Federal Power Act, seeking authorization to hold the position of Vice-President of Deepwater Operating Company, a New Jersey corporation, in addition to the positions of Vice President-Control and Assistant Treasurer of Atlantic City Electric Company, a New Jersey corporation. Applicant has previously made no other application under Section 305(b) of the Act.

Atlantic City Electric Company is a New Jersey corporation principally engaged in the business of providing electric service to the public throughout the southern part of New Jersey.

Deepwater Operating Company is a New Jersey corporation and its stock is wholly owned by Atlantic City Electric Company. Deepwater Operating Company operates the Deepwater Generating Station at Deepwater, New Jersey, and the Greenwich Station near Gibbstown, New Jersey.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 27, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to the proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file and available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ID-1682]

FREDERICK LANGE

Notice of Application

MAY 11, 1977.

Take notice that on May 2, 1977, Frederick Lange of Atlantic City, New Jersey, filed an application with the Federal Power Commission, pursuant to Section 305(b) of the Federal Power Act, seeking authorization to hold the position of Senior Vice-President of Atlantic City Electric Company, a New Jersey corporation, in addition to the position of Vice-President of Deepwater Operating Company, a New Jersey corporation. The Applicant has previously made application under Section 305(b) of the Act to hold positions in Atlantic City Electric Company and Deepwater Operating Company.

Atlantic City Electric Company is a New Jersey corporation principally engaged in the business of providing electric service to the public throughout the southern part of New Jersey.

Deepwater Operating Company is a New Jersey corporation and its stock is wholly owned by Atlantic City Electric Company. Deepwater Operating Company operates the Deepwater Generating Station at Deepwater, New Jersey, and the Greenwich Station near Gibbstown, New Jersey.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 27, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to the proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file and available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-14185 Filed 5-17-77;8:45 am]

[Docket No. ER76-785]

MONONGAHELA POWER CO.

Filing of Settlement Agreement

MAY 10, 1977.

Take notice that on May 1, 1977, Monongahela Power Company (Monongahela) tendered for filing to the Presiding Administrative Law Judge two settlement agreements, one between itself and Harrison Rural Electrification Associates, Inc., City of New Martinsville, West Virginia, and City of Philippi, West Virginia (the Customers) and the other between itself and the Potomac Edison Company (Potomac Edison) together with a joint motion to certify the settlement agreements to the Commission for approval.

Monongahela states that under the terms of the proposed settlement agreements, the Company's annual revenues from the Customers and Potomac Edison would be increased by approximately $160,000 in addition to revenues produced by application of local surcharge taxes. The increase is to be effective as of September 15, 1976.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before May 27, 1977. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-14189 Filed 5-17-77;8:45 am]

[Docket No. ER77-354]

MISSOURI UTILITIES CO.

Tariff and Rate Schedule Changes

MAY 11, 1977.

Take notice that Missouri Utilities Company of Cape Girardeau, Missouri (MUCo), on May 2, 1977, tendered for filing proposed changes in its FPC Electric Service Tariff, Original Volume No. 1, and other special contract rates for wholesale electric service rendered to jurisdictional customers within its Southeast Missouri service area. MUCo states that the proposed changes would increase revenues from jurisdictional sales and service by $358,870 based on the 12 month period ending October 31, 1976 and that these changes in rates are proposed to become effective as of June 1, 1977, or at such other time as allowed by the "Rate Redetermination" provision of existing wholesale electric service agreements.

MUCo indicates that the proposed changes in rates are to compensate MUCo for increases in its costs of supplying wholesale electric service within its Southeast Missouri service area.

MUCo further indicates that copies of the filing were served upon MUCo's jurisdictional customers and the Missouri Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections, 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-14184 Filed 5-17-77;8:45 am]

[Docket No. RP77-52]

NORTHERN NATURAL GAS CO.

Petition for Extraordinary Relief

MAY 11, 1977.

Take notice that on April 5, 1977, Northern Natural Gas Company (Northern) filed, pursuant to Section 1.7(b) of the Commission's Rules of Practice and Procedure, a petition for extraordinary relief seeking Commission authorization to provide natural gas service to its existing utility customers in accordance with its presently effective Agricultural Crop drying Service Rate Schedule ACDS–1. Northern seeks authorization to make available, on a best efforts basis volumes of gas for the drying of seed, grain and other agricultural crops during a twelve month period commencing with the date of the order.

On September 28, 1973, the Commission issued an Order at Docket No. CP74–63 granting extraordinary relief permitting Northern to provide natural gas service to its existing utility customers pursuant to a new Agricultural Crop Dryer Service, Rate Schedule ACDS–1. The Commission order authorized Northern to provide natural gas service to its existing utility customers up to a maximum of 750,000 Mcf for a six month period. Similar approval has been granted to Northern at Docket No. RP75–12–1, Docket No. RP75–12–3, and Docket No. RP76–105–1.

Northern estimates that it will have available for sale under the ACDS–1 Rate Schedule a total of 750,000 Mcf for the period September 15, 1977 through March 15, 1978. Volumes under ACDS–1 will be made available by Northern on a best efforts basis pursuant to advance operating arrangements on a daily basis.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77–14190 Filed 5–17–77;8:45 am]

[Docket No. ER77–336]

OKLAHOMA GAS AND ELECTRIC CO.

Filing of Wholesale Electric Service Agreements

MAY 11, 1977.

Take notice that Oklahoma Gas and Electric Company (OG&E), on April 29, 1977, tendered for filing Electric Service Agreements for wholesale service for the Cities of Pond Creek, Purcell, Tonkawa and Waynoka, Oklahoma, Clarksville, Arkansas, the Town of Okeene, Oklahoma, Cimarron Electric Cooperative, Incorporated, and Red River Valley Rural Electric Association. OG&E indicates that the proposed Electric Service Agreements cancel and supersede existing contracts presently on file with the Commission. The proposed effective dates are June 1, 1977, for Tonkawa and Okeene, June 13, 1977, for Waynoka, July 1, 1977, for Purcell and Clarksville, July 11, 1977, for Red River Valley Rural Electric Association, and July 27, 1977, for Pond Creek and Cimarron Electric Cooperative, Incorporated.

OG&E states that copies of the proposed Electric Service Agreements have been mailed to Pond Creek, Purcell, Tonkawa, Waynoka, Okeene, Clarksville, Cimarron Electric Cooperative, Incorporated, Red River Valley Rural Electric Association, the Corporation Commission of the State of Oklahoma, and the Arkansas Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77–14182 Filed 5–17–77;8:45 am]

[Docket No. ER77–355]

SOUTHERN CALIFORNIA EDISON CO.

Tariff Change

MAY 10, 1977.

Take notice that Southern California Edison Company (Edison) on April 29, 1977 tendered for filing a change of rate for interruptible transmission services under the provisions of Edison's agreement with San Diego Gas & Electric Company as embodied in Rate Schedule FPC No. 86. Edison indicates that the new rate for these services is 1.45 mills per kilowatthour. Edison indicates that this is an increase of .02 mills per kilowatt. Edison further indicates that said filing is in accordance with terms of the agreement stating that whenever the California Public Utilities Commission (CPUC) finds a new overall rate of return on retail operations to be reasonable for Edison, the rate for interruptible transmission service shall be adjusted based on said new rate of return and that said new rate of return was authorized in CPUC Decision 86794.

Edison requests a waiver of the Commission's notice requirement to allow this rate to become effective as of January 13, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77–335]

PUBLIC SERVICE CO. OF OKLAHOMA

Notice of Cancellation

MAY 11, 1977.

Take notice that Public Service Compay of Oklahoma on April 29, 1977 tendered for filing a notice of Cancellation of the Letter Agreement dated June 1, 1977, Supplement to Rate Schedule FPC 181 between Public Service Company of Oklahoma (Oklahoma) and the Empire District Electric Company. Oklahoma indicates that this Cancellation is to be effective as of May 31, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER77–337]

TUSCON GAS & ELECTRIC CO.

Cancellation

MAY 10, 1977.

Take notice that Tuscon Gas & Electric Company (TG&E) on April 22, 1977 tendered for filing a notice of Cancellation of the November 25, 1976, TG&E Rate Schedule FPC No. 13. TG&E indicates that the aforementioned Rate Schedule is identified as the San Juan Generating Station Energy Sale Agreement among TG&E, El Paso Electric Company, and Public Service Company of New Mexico. TG&E further indicates that the Agreement was dated November 5, 1976, and the termination date as set forth in the Agreement is May 31, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER77–203]

WISCONSIN ELECTRIC POWER CO.

Filing of Change in Rate Schedule

MAY 10, 1977.

Take notice that on April 27, 1977, Wisconsin Electric Power Company (WEPCO) tendered for filing with the Federal Power Commission notification of a change in the Rate Schedule as provided for in the Power Supply Agreement between Wisconsin Electric and Wisconsin Michigan Power Company designated as WE Rate Schedule FPC No. 2.

WEPCO indicates that the Public Service Commission of Wisconsin has authorized an increase in the return on common equity from 12% to 13% for both companies and further indicates that if the proposed change is authorized for use in the Power Supply Agreement the pooling charges to be billed Wisconsin Michigan Power Company in 1977 will be reduced by an estimated $186,382.

WEPCO requests a waiver of the FPC timely filing requirement and that the change be made effective with the February, 1977 billing.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Paragraph 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77–14188 Filed 5–17–77;8:45 am]

[Docket Nos. CP77–100—CP77–103]

TENNECO ATLANTIC PIPELINE CO. AND TENNESSEE GAS PIPELINE CO.

Order Providing for Hearing, Prescribing Procedures and Granting Petitions to Intervene

MAY 5, 1977.

On December 20, 1976, Tenneco Atlantic Pipeline Company (TAPCO) and Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), filed applications pursuant to Sections 3 and 7 of the Natural Gas Act in Docket Nos. CP77–100, CP77–101, CP77–102 and CP 77–103, for authorization to implement a project designed to supply the east coast of the United States with Algerian liquified natural gas (LNG). Under their proposal LNG would be delivered by cryogenic tankers to the east coast of Canada near Saint John in the Province of New Brunswick where it would be vaporized and transported to the U.S.-Canadian border near Calais, Maine for further transportation through the states of Maine, New Hampshire, Massachusetts and New York by TAPCO. The gas would be used to serve existing customers of Tennessee. This project is more fully set forth in the applications in this proceeding.

By order issued February 12, 1977, in this proceeding, the Commission found that TAPCO's and Tennessee's applications were patently deficient in many material respects and ordered these deficiencies cured by April 1 and June 1 depending on the particular subject matter in question. Subsequent to the Commission's February 12 order, these applications were supplemented on February 18, 1977, by the filing of an environmental report, on March 22, 1977, by the filing of additional information and studies on the New Brunswick terminal facilities, and on April 1, 1977, by the filing of an engineering study of the New Brunswick terminal and additional gas supply information.[1] In our February 12, 1977 order we mentioned that the initial gateway for an expedited proceeding is the submittal of an application which is so complete that meaningful review can begin. We are hopeful that by June 1, 1977, the Applicant's efforts will fully open this door. In this order, procedural steps will be taken to open the remaining gateways so that a final Commission decision may be made on the disposition of this project by the close of this year, 1977.

The applications which we have heretofore consolidated required an examination, under Section 3 of the Natural Gas Act (Act), 15 U.S.C. 717b, to determine whether the importation would be in the public interest. The construction and operation of facilities and the sale for resale in interstate commerce of LNG as proposed in the applications require a determination that these activities are required by the public convenience and necessity under section 7 of the Act, 15 U.S.C. 717f. We believe that the significant questions presented by these applications require a formal public hearing at which time all issues bearing upon the public interest can be developed. Among the issues which we deem relevant for consideration are reliability of service of the foreign supply, the dependence of certain distributors on foreign LNG to meet residential and commercial markets, environmental impact of any proposed action, the proper method of pricing of the LNG supply, shipping costs, overall economic feasibility of the project, end-use allocation of the LNG supply, availability of alternate fuels for the markets to be served by the project, engineering feasibility of the project, and overall project safety.

In order to maintain a schedule which will allow a final decision by the end of 1977, we believe the following approximate milepost should be maintained as much as possible:

July 11—Circulation of Staff's Draft Environmental Impact Statement, and beginning of evidentiary hearing.
September 12—Circulation of Final Environmental Impact Statement.
November 2—Initial Decision.
November 21—Briefs on Exceptions.
November 30—Briefs Opposing Exceptions.

In our previous order, a number of interventions were granted. Since that period of time additional late petitions to intervene have been filed by:

The New York State Department of Environmental Conservation.
The Columbia County, Environmental Management Council.
Alabama-Tennessee Natural Gas Company.
Orange and Rockland Utilities, Inc.
The Society for the Protection of New Hampshire Forests.
The Peoples Gas Light and Coke Company.

Having reviewed these petitions, we believe these parties have an adequate interest in this proceeding to warrant intervention.

The Commission finds: (1) It is appropriate and in the public interest that a formal evidentiary hearing should be held in this consolidated proceeding.

(2) Good cause exists for accepting the aforesaid late petitions to intervene and participation by the aforementioned interveners may be in the public interest.

The Commission orders: (A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Natural Gas Act, and the Commission's rules of practice and procedure, a public hearing shall be held in a hearing room of the Federal Power Commission on or before July 11, 1977, respecting all matters and issues in this consolidated proceeding.

(B) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose pursuant to § 3.5(d) of the Commission's general rules, 18 CFR 3.5(d) shall preside at the hearing in this proceeding, with authority to establish and change all procedural dates and to rule on all motions with the exception of petitions, motions to consolidate and sever, and motions to dismiss, as provided for in the Commission's rules of practice and procedure.

(C) On or before June 6, 1977, applicants shall complete the filing of their direct case including testimony and exhibits on all aspects.

(D) A prehearing conference shall be convened on June 23, 1977, at 10:00 a.m. in a hearing room of the Federal Power Commission before the designated Administrative Law Judge to discuss procedural issues, clarification of issues and the orderly presentation of evidence.

(E) The aforesaid petitioners to intervene are permitted to intervene in this proceeding, subject to the rules and regulations of the Commission; *Provided, however*, That participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in the petitions to intervene; *And provided, further*, That the admission of such intervenors shall

[1] Responses to various environmental deficiency questions from the Commission Staff were tendered on April 7, 1977.

not be construed as recognition by the Commission that they might be aggrieved because of any order of the Commission entered in this proceeding.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14192 Filed 5-17-77;8:45 am]

[RP77-65 etc.]

ALABAMA-TENNESSEE NATURAL GAS CO. ET AL

Hearings to Evaluate the Impact of Natural Gas Shortages

MAY 11, 1977.

Trunkline Gas Co	RP77-91
United Gas Pipe Line Co	RP77-92
Texas Eastern Transmission Corp	RP77-93

On July 20, 1976, the Commission issued an Order in Alabama-Tennessee Natural Gas Company, et al., Docket Nos. RP76-116, et al., for the purpose of ascertaining the magnitude and potential impact of projected curtailment during the course of the 1976-1977 winter heating season. The latter order was triggered by the report released by the Commission on June 18, 1976, summarizing FPC Form 16 projected data for the period of time between April 1, 1976, and March 31, 1977. The latter report generally reflected that the supply situation for the aforementioned period of time would be more critical than it was for the comparable period of time for the previous year.

The purpose of the instant order is to once again embark on a series of proceedings similar in nature to those initiated through the aforementioned July 20, 1976, order. Increased natural gas curtailment coupled with record cold winter weather experienced by the entire nation east of the Rocky Mountains last winter led to emergency situations of major proportions on many jurisdictional pipeline systems. As a result of the possible grave nature of a situation that can be created by the combination of cold weather and increased curtailment, the Commission is of the view that it should accelerate the time table of its curtailment assessment proceedings this year in order that it may have more time to consider the situation generally and to provide an over view of possible curtailment impact for the forthcoming winter on an expedited basis.

Last year's proceedings (Alabama-Tennessee, supra) specifically related to the nineteen pipelines that had submitted Form No. 16 projected curtailments of 20-percent or greater for the 1976-1977 winter. The so-called "omnibus proceeding" this year will make provision that proceedings be conducted in a similar manner as last year relative to those nineteen pipelines and require that they provide the information set forth in this order. Is addition to the latter pipelines we shall also include in this year's omnibus proceedings certain additional pipeline companies that may experience difficulties in the maintenance of service during the course of next winter's heating season. Hence, all of the respondent pipelines to this order are subject to high levels of curtailment during the oncoming winter period.

Due to our uncertainty of the resultant impact that such high levels of curtailment will have upon the service areas of those pipelines this forthcoming winter, we shall require these pipelines to urge their customers, both direct and indirect, to inform us: (1) as to how the projected shortage will have an impact on their systems; (2) how they plan to deal with the shortages and (3) the flexibility the pipelines and their customers may have at their disposal to deal with the anticipated curtailments.

Of major significance in enabling us to make an assessment of the impact of this winter's projected curtailments is the extent to which industrial customers may possess an alternate fuel capability to off-set the loss of natural gas supplies.[1] The bulk of this information is required to be filed under FPC Form No. 69,[2] and its counterpart, Federal Energy Administration (FEA) Form No. G-101-P. The purpose of these Forms is to appraise appropriate Federal entities of the particular alternate fuels that can be used by the direct and indirect industrials that consume natural gas and the quantities of alternate fuels that are required to off-set projected curtailments. Unfortunately, the information provided by the latest submittals of the aforementioned forms probably will not be collated in time to enable an accurate assessment of the impact of curtailment on the industrial segment of the nation prior to completion of these proceedings.

In order to assure that this information is available on an expedited basis, the Commission will require that the captioned pipelines made parties to the above-styled proceedings distribute copies of this order to their distribution company customers and direct industrial customers. Concurrently therewith, the pipelines are to request that these customers provide to them a list of their customers that may be forced to shut down this winter because they lack either a supply of alternate fuel or alternate fuel equipment to off-set projected natural gas curtailments on a normal and 10-percent colder than normal winter period. The distribution customers that must be called upon to provide the information requested herein should file this data with their respective jurisdictional pipeline suppliers on or before May 31, 1977. The Commission will require that the pipelines file their reports, predicated upon this information and the other matters related thereto herein with the Commission by June 15, 1977. The reports submitted by the respondent pipelines are to both analyze and collate the data referred to and should be more than a mere accumulation of the mass data collected. If the filings by the pipelines are fashioned as requested, the task of assessing and providing an appropriate overview of the curtailment impact this winter by the Commission will be expedited. These pipelines should also, by June 15, 1977, provide and file with the Commission the other supporting data that is associated with FPC Form No. 16 described below. This information requested herein is undoubtedly available to the various distributors being serviced by these pipelines because of their reporting obligations under the aforementioned FEA forms. In the event that a distributor fails to provide the requested information, the Commission may be required to conclude that commercial and industrial customers served by such distributor will not have fuel deficiency problems that may force them to shut down during the impending winter months. The respondent pipelines to these proceedings shall provide the corresponding information requested from the distributors for their own direct industrial customers.

We shall further require that each of the individual pipelines present supporting testimoney relative to the FPC Form No. 16 report filed in April of 1977. This testimony should cover all aspects of its aforementioned filing and should specifically include discussion of:

(1) Gas supply projections and any anticipated variations in suply due to emergency purchases, methods utilized to make the supply forecasts, inclusion of producer work-overs in such forecasts, contingency arrangements for supply interruptions caused by such anticipated events as hurricanes, freeze-ups, etc.;

(2) The derivation of requirements used in the report reflecting any significant change to fully indicate the current situation. The requirements that are provided for in this report should be presented in the pipeline reports in a manner that would reflect the impact of curtailment for both a normal and a 10 percent colder than normal winter basis.[3] The data to be provided by the distribution companies to the pipeline should fuly take this into account.

(3) Computation of curtailments should be explained in detail and each pipeline should provide a study to show the level of requirements and curtailments by system-wide aggregate for each priority of service for each month of the 1977-1978 winter heating season (November 1977 through March 1978). (Should include both normal and a 10 percent colder than normal winter heating season basis.)

This order, in view of the additional analysis and collating of requisites provided for, places an additional task upon the respondent pipelines over and above what was required by the aforementioned July 20, 1976, order. The Commission will not require that the pipelines provide it was data covering one hundred percent of their sales. The Commission would view a report that had adequately covered between 80 to 90 percent of such sales volumes as constituting substantial compliance. It is further the belief of the Commission that it might substantially slow down the collecting process of the pipelines if it were to require that they provide an equivalent percent of data relative to the sales they make to so-called "small customers". In this regard the Commission is of the view that a sampling of approximately ten percent of small customers would suffice as a basis for making an estimate of the situation of this type of customer. In order to provide for uniformity in the definition of a 'small' customer or distributor for the purposes of this order we shall consider those customers with maximum daily contract entitlements of 5,000 Mcf per day or less as falling into this category.

The data that we are calling for herein is intended to provide a reasonably accurate overview of the anticipated impacts next winter and such submissions should not be a substitute for the FPC-FEA detailed data collection in Form Nos. 69 and G-101-P. In the event that hearings are convened with respect to particular pipelines, it is the purpose of this Commission to assure that the reports and other data presented at the hearing that we have required in this order are properly incorporated into the formal hearing record. This will facilitate the task of the Commission Staff who in turn will be charged with the task of making and tendering its own report predicated upon the data obtained subsequent to the conclusion of the last hearing that may be conducted in these proceedings. It appears obvious that no useful purpose will be served by requiring that strict evidenciary and procedural rules be followed that might tend to either delay the proceedings or preclude the introduction of the data called for herein by the Commission into the hearing record. It would also not serve the purposes of the Commission to permit any hearing that may be conducted in conjunction with these proceedings to linger needlessly.

In our order issued on May 7, 1976, concerning alternate fuel demand of direct end use customers of interstate pipelines due to curtailments, Docket No. R-472, regarding public access to FEA data relating to the publication of the Commission Staff's report relating to the curtailment impact, we expressed our view that the over-riding public need for this information was far greater than any individual or private right involved. In view of the fact that our publication of data this year may not be as comprehensive as it was last year and the experience of the numerous emergency situations that confronted the nation last winter, the Commission is of the belief that a similar publication is justified this year. It is clear that an impelling public need exists to render an assessment of the situation and make it available to government and public alike so that effective and timely action can be taken to lessen the harmful impacts that may be highlighted therein.

The Commision recognizes that the possibility of convening of hearings within a short time period is an undertaking which will cause our Staff and other parties scheduling difficulties. We shall therefore provide that any hearings that are to be conducted with respect to the respondent pipelines are to be held between June 27, 1977, and July 22, 1977, and we shall direct that any hearings required to be held with respect to these proceedings be scheduled by the Chief Administrative Law Judge between the above-noted dates. In order to provide that scheduling flexibility be assured with a minimization of effort we shall provide that the Secretary may by notice reschedule any proceeding set for hearing in the event that any difficulties with data or pipeline reports submitted can be elminated between the submission date and hearing date.

Since the focus of these hearings is directed toward the accumulation of data which is wholly factual by nature, we shall forego the filing of briefs normally contemplated by the Commission. Instead we shall call upon our Staff and the other parties to file with the Commission by August 12, 1977, summary memoranda in which the data presented in these proceedings is analyzed and in which any party may be free to tender any comments that he feels warranted in light of the facts and data developed in such hearing.

In light of the fact that there may exist certain common elements of interest between the above-styled proceedings and the curtailment proceedings that are currently in various stages of determination relative to the aforementioned pipelines, we shall automatically permit any party permitted to intervene in such proceedings the right to intervene and to have all the rights of a party in the corresponding pipeline proceedings instituted herein.[4] Appropriate provision will be made for other persons interested or desiring to intervene in the above-styled proceedings.

The FEA is requested by the Commission to participate and to provide for the record in these proceedings state and regional information relative to alternate fuel availability for the forthcoming winter-heating season. State energy agencies and state public service commissions are also requested to participate and to provide information relating to (1) the end-use profie of natural gas for ultimate consumption which lies within the regulatory authority vested in them, (2) the lack of alternate fuel capabilities of end-users in areas subject to their jurisdiction, and (3) local conservation measures that are either directed or coordinated by them to off-set the impact of the natural gas shortage. All others, including interested federal and state agencies are also invited to participate in these proceedings.

---

[1] Alternate fuel capability as used herein relates to customers having facilities installed capable of burning an alternate fuel.

[2] See Order No. 531 issued in Docket No. R-472 on June 25, 1975, adding Section 260.165 to part 260, Statements and Reports, ----- FPC -----.

[3] The 10 percent colder than normal basis should be computed on the assumption of an increase in average monthly degree day difficulties of 10 percent in excess of historical normal as computed by the Department of Commerce.

[4] The curtailment proceedings relating to the twenty-nine pipelines named in the caption of this order are as follows:
Alabama-Tennessee Natural Gas Company, Docket No. RP74-42.
Arkansas-Louisiana Gas Company, Docket No. RP71-122.
Cities Service Gas Company, Docket No. RP75-62.
Columbia Gas Transmission Corporation, Docket No. RP72-89.
East Tennessee Natural Gas Company, Docket No. RP75-28.
Eastern Shore Natural Gas Company, Docket Nos. RP71-121, and RP72-21.
El Paso Natural Gas Company, Docket No. RP72-6.
Northwest Pipeline Corporation, Docket No. RP74-49.
Panhandle Eastern Pipeline Company, Docket No. RP71-119.
Tennessee Natural Gas Lines, Inc., Docket No. RP74-54.
Texas Eastern Transmission Corporation, Docket Nos. RP71-130, and RP72-58.
Texas Gas Transmission Corporation, Docket No. RP72-64.
Transcontinental Gas Pipe Line Corporation, Docket No. RP72-99.
Transwestern Pipeline Company, Docket No. RP73-101.
Trunkline Gas Company, Docket No. RP71-100, and United Gas Pipe Line Company, Docket Nos. RP71-29, and RP71-120.
Algonquin Gas Transmission Co., Docket Nos. RP71-131, et al.
Equitable Gas Co., (None assigned).
Colorado Interstate Gas Co., Docket No. RP 72-122.
Consolidated Gas Supply Corp., Docket No. RP77-29.
Florida Gas Transmission Co., Docket No. RP71-128.
Michigan Wisconsin Pipe Line Co., Docket No. RP76-50.
Midwestern Gas Transmission Co., Docket No. RP74-29, RP74-69.
Mississippi River Commission Corp., Docket No. RP73-6.
National Fuel Gas Supply Corp., Docket No. RP74-100.
Natural Gas Pipeline Co. of America, Docket No. RP70-42.
Northern Natural Gas Co., Docket No. RP74-102, and RP76-52.
Southern Natural Gas Co., Docket No. RP72-74, and RP74-6.
Tennessee Gas Pipeline Co., Docket No. RP 74-24.

The Commission finds: (1) It is in the public interest and consistent with the purposes of the Natural Gas Act to schedule hearings in certain of the proceedings hereinabove named, for the purpose of determining the impact of projected curtailments of natural gas deliveries over the 1977–78 winter heating season.

(2) It is in the public interest to allow all persons permitted to intervene in the corresponding pipeline curtailment proceedings set forth in the text of this order permission to intervene in the corresponding proceeding instituted by this order.

The Commission orders: (A) Pursuant to the authority conferred upon the Commission under the Natural Gas Act, particularly Sections 4, 5, 7, 14, and 15 hearings shall be scheduled to be held as provided in ordering paragraph (B) hereof in the above-styled procedings in order to determine the impact of projected curtailment for the 1977–1978 winter heating season.

(B) The hearing provided for in ordering paragraph (A) shall be convened at such times and places as provided for in a Notice to be issued by the Secretary after receipt of a recommendation made by the General Counsel and Chief of the Bureau of Natural Gas after consultation on this matter with the Chief Administrative Law Judge. The Commission contemplates that in a number of instances, formal hearings may not be necessary and the Secretary shall be so advised by the General Counsel after consultation with BNG, and in such event, no hearing will be convened by the Secretary. In formulating the hearing schedule to be undertaken by the General Counsel and the Chief of the Bureau of Natural Gas, manpower resources and work schedule demands of the Office of Administrative Law Judges will be given full consideration.

(C) An administrative Law Judge to be designated by the Chief Administrative Law Judge shall preside over the hearings that will be scheduled in the above-styled proceedings noted above in Ordering Paragraphs (A) and (B) and shall prescribe relevant procedural matters not herein provided and assure the development of an adequate record with the incorporation therein of the information sought and requested by the Commission in the text of this order.

(D) Each of the respondent pipelines designated in this order shall provide on a best efforts basis, the information called for in the body of this order no later than June 15, 1977. All parties to the instant proceedings are hereby requested and all customers of the respective pipeline companies are hereby urged to provide their pipeline suppliers with the necessary information by May 31, 1977, to enable the pipelines to comply with this order. Copies of the aforementioned data shall be served, upon the appropriate state regulatory bodies, and the Washington office of the Federal Energy Administration.

(E) An analysis in memorandum form of the information obtained in these proceedings shall be presented to the Commission by the Commission Staff and other interested parties desiring to submit such memorandum or comments to the Commission by August 12, 1977.

(F) All parties previously granted intervention in the curtailment proceedings set forth in the text of this order are permitted to intervene in and participate in the corresponding pipeline proceeding that has been instituted by this order subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such interveners shall be limited to matters affecting rights and interests specifically set forth in their petitions to intervene in the aforementioned curtailment proceedings: *And provided, further,* That the admission of such intervenors shall not be construed by the Commission that subject interveners might be aggrieved because of any order or orders issued by the Commission in these proceedings.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77–347]

WISCONSIN POWER AND LIGHT CO.

Tariff Change

MAY 10, 1977.

Take notice that Wisconsin Power and Light Company (WP&L), on May 2, 1977 tendered for filing proposed changes in its W–2 and W–3 Electric Service Tariffs, Wholesale For Resale. WP&L indicates that the proposed changes would increase revenues from W–2 Customers by $1,680,445 and from W–3 Customers by $3,745,011 based on the 12-month period ending June 30, 1978.

WP&L states that the proposed rate increase is necessary to meet rising financial and operating costs. The proposed effective date of the rates contained in the filing is July 1, 1977.

WP&L further states that copies of the filing were served upon the public utility's jurisdictional customers, and the Public Service Commission of Wisconsin.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

FEDERAL RESERVE SYSTEM

FIRST OF GRANDFIELD CORP.

Formation of Bank Holding Company

First of Grandfield Corporation, Grandfield, Oklahoma, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 100 per cent of the voting shares of First State Bank, Grandfield, Oklahoma. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than June 3, 1977.

Board of Governors of the Federal Reserve System, May 12, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77–14131 Filed 5–17–77;8:45 am]

MAHASKA INVESTMENT CO.

Order Denying Formation of Bank Holding Company

Mahaska Investment Company, Oskaloosa, Iowa, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 51.47 percent of the voting shares of Farmers Savings Bank, Fremont, Iowa ("Bank"). Applicant has also applied, pursuant to the Board's Regulation Y, for permission to continue to engage directly in the activity of leasing real property or acting as agent, broker or advisor in leasing such real property, and to engage indirectly, through its wholly owned subsidiary, MIC Leasing Co., Oskaloosa, Iowa ("MIC"), in the activity of leasing personal property or acting as agent, broker or advisor in leasing such personal property. Such activities have been determined by the Board to be closely related to banking (12 CFR 225.4(a)(6)(a) and (b)).

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with sections 3 and 4 of the Act (42 FR 3876). The time for filing comments and views has expired and the applications and all comments received have been considered in light of the factors set forth in section 3(c) of the Act, and the considerations specified in section 4(c)(8) of the Act.

Applicant, a corporation organized under the laws of Iowa, is currently engaged, either directly or indirectly, in the leasing of real and personal property and brokering of credit life, accident and health insurance and mortgage guaranty insurance for mobile homes.[1] Upon acquisition of Bank ($12.4 million in deposits), Applicant would control the 276th largest commercial bank in Iowa, with approximately 0.1 percent of the total deposits in commercial banks in the State.[2]

Bank is the third largest of the five commercial banks in the Mahaska County banking market and control approximately 13.5 percent of the total commercial bank deposits in the relevant banking market.[3] In analyzing the competitive effects of this proposal, it is also necessary to consider Applicant's affiliate relationship with Mahaska State Bank, Oskaloosa, Iowa ("Mahaska Bank") the largest commercial banking organization in the market. Mahaska Bank holds total deposits of $44.1 million, representing 47.7 percent of the deposits in the market, and is more than twice the size of the next largest competitor in the market. In view of the nature and scope of Applicant's affiliation with Mahaska Bank, the Board is of the view that competitive effects of this proposal are such that denial of the application is warranted.

Applicant was originally incorporated in February 1973 as a wholly-owned subsidiary of Mahaska Bank for the purpose of leasing a site for a new drive-in facility to that bank. Subsequently, during November 1973, as a result of a directive by the Iowa Superintendent of Banking, Mahaska Bank was required to divest of Applicant and it caused Applicant's shares to be spun-off to the then shareholders of Mahaska Bank. Since that time, there has been a close identity of shareholders, as well as a commonality of management, involving Mahaska Bank and Applicant. At the present time, four of Applicant's six directors serve as directors of Mahaska Bank and 126 of Applicant's 133 shareholders collectively own 100 percent of the shares of Mahaska Bank.

While this proposal does not itself involve Mahaska Bank, the Board does not believe that it would be appropriate to ignore the identity of interests between Applicant and Mahaska Bank in assessing the competitive effects of a proposal that seeks to bring bank into the affiliated group through the formation of a bank holding company. Applicant's president, who also serves in the same capacity with Mahaska Bank, acquired in an individual capacity approximately 52 percent of the shares of Bank in 1976 by means of a loan from an unaffiliated bank. As part of this proposal, Applicant would assume the outstanding indebtedness (as well as accrued interest) in return for the shares now held by its president. Thereafter, as a corporation, Applicant would proceed to retire the acquisition debt from dividends from Bank and earnings from its nonbanking activities.

Section 3(c) of the Bank Holding Company Act requires the Board to consider whether any proposed acquisition by a bank holding company (1) would further the monopolization or attempted monopolization of a banking market, or (2) may substantially lessen competition or tend to create a monopoly in any posed acquisition involves the use of a banking market. Where, as here, a proholding company by a group of individuals to acquire control of a bank that is a competitor of another bank under the control of essentially the same individuals, the Board believes it must apply these standards.[4]

In the Board's view, the subject proposal presents a compelling case where the holding company form is being used to further an anticompetitive arrangement. Under this proposal, two banks that up to last year were independent banks competing as the first and third largest banks in the Mahaska County market would be brought under common control through the use of a holding company structure. In view of the sizes of the organizations involved and their collective position in the Mahaska market (together the two banks hold 61.2 percent of the market's deposits), the Board is of the opinion that approval of this proposal would have significant adverse competitive effects. While denial of this proposal may not immediately result in a complete termination of the present situation (Applicant's president would continue to own Bank), it would preserve the distinct possibility that Bank could again become an independent organization in the future. Approval, on the other hand, would almost certainly foreclose that possibility since, as a result of the flexibility afforded by the holding company structure, Applicant would appear capable of servicing its acquisition debt and, in addition, a mutuality of interest between Mahaska Bank and Bank would likely be established.

On the basis of the foregoing and the facts of record, the Board concludes that approval of this application would have significant adverse competitive effects. Accordingly, under the standards set forth in the Bank Holding Company Act, the proposal may not be approved unless the adverse competitive factors are clearly outweighed by other public interest considerations reflected in the record.

The financial and managerial resources and future prospects of Applicant, which are dependent upon Bank, MIC, and Applicant's leasing activities, are considered satisfactory and generally consistent with approval of the subject application. Therefore, considerations relating to banking factors are consistent with approval of the application. Applicant plans changes and improvements in the form of both physical expansion of Bank's facilities and new and additional banking services. The Board finds that considerations relating to the convenience and needs of the community lend some weight toward approval but, in the Board's view, do not outweigh the significant adverse findings with respect to competitive considerations. Accordingly, it is the Board's judgment that approval of this application would not be in the public interest and that the application should be denied.

On the basis of all facts of the record, and in light of the factors set forth in section 3(c) of the Act, it is the Board's judgment that consummation of the proposal to form a bank holding company would not be in the public interest and that the application should be, and is hereby, denied for the reasons summarized herein.[5]

By order of the Board of Governors,[6] effective May 11, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77–14132 Filed 5–17–77;8:45 am]

NATIONAL DETROIT CORP.

Order Denying Acquisition of Bank

National Detroit Corporation, Detroit, Michigan, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 80 percent or more of the voting shares of The Brighton State Bank, Brighton, Michigan ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those of two shareholders of Bank opposing the proposal, in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the largest bank holding company in Michigan, controls five banks with aggregate deposits of approximately $5.0 billion, representing 16.3 percent of the total commercial bank deposits in the State.[1] Acquisition of Bank ($54.9 million in deposits) would not significantly increase the concentration of banking resources in Michigan; however, consistent with approval of the application would not be inconsistent with approval of the application.

---

[1] Applicant has indicated that it intends to terminate all of its insurance activities if these applications are approved.

[2] Unless otherwise indicated, all banking data are as of June 30, 1976.

[3] The relevant geographic market for purposes of analyzing the competitive effects of the proposed transaction is approximated by Mahaska County, Iowa.

[4] Even in the absence of any use of the holding company form, the standards of sections 1 and 2 of the Sherman Act may apply to the acquisition by a group of individuals of control of a bank that is a competitor of another bank controlled by essentially the same group.

[5] Denial of Applicant's § 3(a)(1) application renders moot Board action on the accompanying § 4(c)(8) application.

[6] Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Jackson.

[1] All banking data are as of June 30, 1976. Applicant received approval to acquire the National Bank of Port Huron, Port Huron, Michigan, a proposed new bank, on September 27, 1976; however, the bank has not yet opened for business. (See 62 Federal Reserve Bulletin 861, 1976.)

ever, it would have adverse effects upon concentration in the relevant market.

Bank, the 25th largest of 46 banking organizations in the relevant market,[2] has total deposits of approximately $54.9 million, $48.9 million of which are in offices within the Detroit market, representing 0.3 percent of the total commercial bank deposits in the relevant market. Applicant has a significant presence in the Detroit banking market as it operates three banks with 107 banking offices in the market controlling $4.96 billion in deposits, which represent 30 percent of total commercial bank deposits in the market. The four largest banking organizations in the Detroit market hold in the aggregate 70.2 percent of total commercial bank deposits in the market. Acquisition of Bank would result in a further increase in market concentration and continue the trend toward concentration that the market has exhibited in the last year.

In addition to having adverse effects upon the concentration of banking resources in the Detroit market, it appears that consummation of this proposal would eliminate existing competition within the Detroit market between Bank and Applicant. The Board notes that this proposal involves the acquisition of the largest independent bank in the Livingston County portion of the Detroit market by the largest bank holding company in the market and the State. Although Michigan law would prohibit Applicant from branching into most of the Livingston County portion of the Detroit market, Applicant is in a strong financial position and clearly has the resources to expand into Livingston County; in particular, Applicant has previously expressed an interest in that portion of the market and is clearly capable of de novo entry through the establishment of a new bank there.[3] In light of the above, the Board concludes that consummation of the proposal would eliminate significant existing competition within the Detroit market.

The financial and managerial resources and prospects of Bank are regarded as satisfactory. The financial and managerial resources and future prospects of Applicant and its subsidiaries are also regarded as satisfactory. Applicant would exchange shares of its common stock for the outstanding stock of Bank and would purchase convertible debentures of Bank for cash. The Board finds that considerations relating to financial and managerial resources and future prospects of Applicant, its subsidiaries and Bank are consistent with approval; however, such considerations do not lend significant weight for approval of the application.

Applicant states that it would improve Bank's services somewhat by increasing Bank's loan portfolio to include more consumer and commercial loans, upgrading some of Bank's physical facilities and increasing Bank's hours of operation. However, it apepars that the major banking needs in the community are currently being met. Accordingly, the Board finds that little weight can be accorded such services and that considerations relating to the convenience and needs of the community to be served lend no significant weight toward approval of the application. In summary, therefore the considerations relating to banking factors and the considerations relating to the convenience and needs of the community to be served do not outweigh the substantially adverse competitive effects that would result from Applicant's acquisition of Bank.

On the basis of the facts of record, and in light of the factors set forth in section 3(c) of the Act, it is the Board's judgment that approval of the proposal would not be in the public interest. Accordingly, the application is denied for the reasons summarized herein.

By order of the Board of Governors,[4] effective May 12, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

APPENDIX A

CITIES AND TOWNSHIPS ADDED TO THE DETROIT BANKING MARKET

County—city or township

Lapeer—Almont, Dryden, Hadley, and Metamora.
Monroe—Ash and Berlin.
Washtenaw—Salem.
St. Clair—Algonac City, Berlin, Casco, China, Clay, Columbus, Cottrellville, East China, Ira, Marine City, Memphis City, New Baltimore City, Riley, St. Clair City, and St. Clair Twp.
Livingston—Brighton City, Brighton Twp., Genoa, Green Oak, Hartland, Howell City, Howell Twp., Iosco, Marion, Oceola, and Tyrone.

[FR Doc.77-14133 Filed 5-17-77;8:45 am]

[2] In the previous cases involving the Detroit area, the Board has generally been confronted with bank holding company applications to acquire banks located near the center of the Detroit banking market and has defined that market somewhat loosely as being approximated by Macomb, Oakland, and Wayne Counties. This proposal involves the acquisition of a bank on the fringe of the Detroit market and consequently the Board has examined more closely the available census data so as to define more precisely the Detroit banking market for purposes of analyzing the competitive effects of this proposal. On the basis of a detailed study of commuting patterns and population trends, it appears that a significant proportion of the population of the five counties surrounding Macomb, Oakland, and Wayne Counties, work in Macomb, Oakland, and Wayne Counties, and therefore, the definition of the Detroit market should be expanded somewhat to include 33 cities and townships from the counties of St. Clair, Lapeer, Livingston, Washtenaw, and Monroe. (See Appendix A.)

[3] Applicant contends that the relatively low ratios of population and deposits per banking office in Livingston County make de novo entry there unattractive. However, between 1960 and 1970 the population of Livingston County grew by 54.2 percent, a rate four times the State average. Between 1970 and 1975, available data indicate that the county's population grew by 32 percent of the 1970 base. Accordingly, the Board is unable to agree with Applicant's contention that the county is unattractive to de novo entry.

[4] Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Jackson.

PEOTONE BANCORP, INC.

Formation of Bank Holding Company

Peotone Bancorp, Inc., Peotone, Illinois, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 percent or more of the voting shares of Peotone Bank and Trust Company, Peotone, Illinois. The factors that are considered in action on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than June 7, 1977.

Board of Governors of the Federal Reserve System, May 12, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

STATE PLANNING COMMISSIONS PROGRAM—INTRASTATE PLANNING

Allocation Formula and Program Guidelines

AGENCY: Office of Education, HEW.

ACTION: Final Notice of Allocation Formula and Program Guidelines for fiscal year 1977.

SUMMARY: A notice of allocation formula and program guidelines is issued to implement the State Planning Commissions Program—Intrastate Planning under Section 1203(a) of the Higher Education Act of 1965, as amended, for fiscal year 1977. This program is operated as a formula grant program, and it is necessary to publish both the formula used to allocate the available funds and the program guidelines each year. The program is designed to provide assistance to State Postsecondary Education Commissions to conduct statewide comprehensive planning activities for postsecondary education.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), this notice has been transmitted to the Congress concurrently with the publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmissions, subject to the provisions therein concerning Congressional action and adjournment.

ADDRESSES: State Planning Commissions Program, Bureau of Postsecondary Education, Room 4052, Regional Office Building 3, 7th and D Streets, SW., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT:

Charles I. Griffith, Telephone: (202) 245-2671.

SUPPLEMENTARY INFORMATION:

A. Publication as Final Notice of Rulemaking.

The Commissioner of Education for good cause finds that resort to proposed rulemaking procedures with respect to this notice is unnecessary within the meaning of 5 U.S.C. 553(b). Publication of a proposed allocation formula and program guidelines for fiscal year 1977 in this case is unnecessary because they are identical to the allocation formula and program guidelines utilized in fiscal year 1976 which were subject to public comment.

B. Response to Comments Previously Received.

The Commissioner published a Notice of Intent to Issue Regulations implementing the provisions of the Education Amendments of 1976 in the FEDERAL REGISTER of November 29, 1976 (41 FR 52410, 52418). Comments were invited concerning the feasibility of either expanding the existing program guidelines for intrastate planning for postsecondary education or developing new guidelines. Five public conferences were held at various locations between December 13-17, 1976, at which time the Office of Education received comments on this and other provisions of the Education Amendments. Further written comments were also received through December 30, 1976. The following is a summary of the comments received and the Office of Education's response.

Comment.—Seven comments were received, and each recommended that no change be made in the existing program guidelines since the program is operating successfully with maximum flexibility afforded to the State Commissions under the existing guidelines.

Response.—The allocation formula and program guidelines for fiscal year 1976 will be continued for fiscal year 1977.

NOTE: The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order No. 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Number 13.550; State Planning Commissions Program—Intrastate Planning.)

Dated: April 21, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: May 11, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

POSTSECONDARY EDUCATION; STATE PLANNING COMMISSIONS PROGRAM—INTRASTATE PLANNING

ALLOCATION FORMULA AND PROGRAM GUIDELINES

1. *Allocation formula.* Such funds as may become available for grant awards during fiscal year 1977 for intrastate planning under the State Plannnig Commissions Program will be allocated in the following manner among those State Postsecondary Education Commissions which have filed the required information concerning establishment with the Office of Education and which have applied for funds:

(a) A base amount of $30,000 will be distributed to each State Commission.

(b) The balance of the available funds will be distributed on the basis of the ratio of the population of a postsecondary age, namely 17 and above (as indicated in the latest data available from the U.S. Bureau of the Census), in a given State to the total population of a postsecondary age in all States with such Commissions.

2. *Program guidelines.* Grants made under these provisions must be used by a State Commission to conduct comprehensive inventories of, and studies with respect to, all public and private postsecondary educational resources in the State, including planning necessary for such resources to be better coordinated, improved, expanded, or altered so that all persons within the State who desire, and who can benefit from, postsecondary education may have an opportunity to do so. Such comprehensive studies and inventories should be developed in coordination with all segments of postsecondary education in the State and should be of such a nature as will assist the State Commission in planning for:

(a) Maximizing the development of human resources within the State through encouragement of student entrance to postsecondary education and the provision of the students of needed, guidance, counseling and financial assistance;

(b) Providing comprehensive postsecondary education programs and services;

(c) Achieving efficient operation and orderly growth;

(d) Providing the fullest possible financial support together with efficient use of resources;

(e) Attracting and retaining qualified faculty and professional personnel; and

(f) Providing adequate and appropriate facilities and instructional equipment and securing efficiency in their use.

20 U.S.C. 1142b(a)

Health Resources Administration

ADVISORY COMMITTEE

Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following National Advisory bodies scheduled to meet during the month of June 1977:

Name: Health Services Research Study Section.
Date and time: June 1-3, 1977 9 a.m.
Place: Room A, Shoreham Americana Hotel, 2500 Calvert Street NW., Washington, D.C. 20008.
Open June 1, 9 a.m.-10 a.m.
Closed for remainder of meeting.
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research.
Agenda: The open session on June 1, 1977, will be devoted to a business meeting covering administrative matters and reports. During the closed session, the study section will be reviewing research grant applications relating to the delivery, organization, and financing of health services. These applications contain personal information on project staff as well as research protocol design, raw research data, technical information, and interim research reports, all considered proprietary in nature and therefore the meeting will be closed to the public. The closing is in accordance with provisions set forth in section 552b(c)(6) Title 5, U.S. Code and the Determination by the Deputy Administrator, Health Resources Administration, pursuant to Public Law 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Mr. Hoke S. Glover, National Center for Health Services Research, Room 15-29, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone (301) 443-2920.

Name: Health Care Technology Study Section.
Date and time: June 6-8, 1977, 9 a.m.
Place: Embassy Row Hotel, 2015 Massachusetts Avenue NW., Washington, D.C. 20036.
Open June 6, 9 a.m.-10 a.m.
Closed for remainder of the day.
Closed June 7, all day.
Open June 8, 9:00 a.m. until adjournment.
Purpose: The committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research.
Agenda: The open session on June 6, 1977, will be devoted to a business meeting covering administrative matters. The meeting on June 8, 1977, will also be open, consisting of a seminar on assessment of proposals to evaluate health care information systems. During the closed sessions, a review of health services research grant applications relating to the delivery, organization, and financing of health services will be conducted. These applications contain personal information on project staff as well as research protocol design, raw research data, technical information, and interim research reports, all considered proprietary in nature and therefore the meeting will be closed to the public, in accodance with provisions set forth in section 552b(c)(6), Title 5, U.S. Code and the Determination by the Deputy Administrator, Health Resources Administration, pursuant to Public Law 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Dr. Alan E. Mayers, National Center for Health Services Research, Room 15-29, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-2950.

Name: Health Services Developmental Grants Study Section.
Date and time: June 9-10, 1977, 8:30 a.m.
Place: Circle Room, Dupont Plaza, Connecticut and Massachusetts Avenue NW., Washington, D.C. 20036.
Open June 9, 8:30 a.m.-10 a.m.
Closed for remainder of meeting.
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research.
Agenda: The open session of meeting on June 9, 1977, will be devoted to administrative matters and reports. During the closed session, the Study Section will be reviewing research grant applications relating to the delivery, organization, and

financing of health services. These applications contain information on project staff as well as research protocol, design, raw research data, technical information, and interim research reports, all considered proprietary in nature and therefore the meeting will be closed to the public. The closing is in accordance with provision set forth in section 552b(c)(6), Title 5, U.S. Code and the Determination by the Deputy Administrator, Health Resources Administration, pursuant to Public Law 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Mr. David McFall, National Center for Health Services Research, Room 15-29, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-2930.

After May 16 the contact person for the above Study Sections will be located at: Federal Center Building No. 2, Room 7-50A, 3700 East West Highway, Hyattsville, Maryland 20782, and have the following telephone numbers;

Mr. Hoke S. Glover—(301) 436-2918.
Mr. Alan E. Mayers—(301) 436-6196.
Mr. David McFall—(301) 436-6916.

Agenda items are subject to change as priorities dictate.

Dated: May 11, 1977.

JAMES A. WALSH,
Associate Administrator for Operations and Management.

[FR Doc.77-14093 Filed 5-17-77;8:45 am]

National Institutes of Health

REPORT ON CARCINOGENESIS BIOASSAY OF NITRILOTRIACETIC ACID

Availability

Nitrilotriacetic acid has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: Bioassays for the carcinogenicity of nitrilotriacetic acid, trisodium salt, monohydrate ($Na_3NTA \cdot H_2O$) were conducted at Stanford Research Institute (SRI), using Fischer 344 rats, and at Litton Bionetics, Inc. (LBI), using both Fischer 344 rats, and B6C3F1 mice. Similar bioassays, using rats and mice, were conducted at LBI on the free acid nitrilotriacetic acid (NTA). Each chemical was mixed in respective diets and administered adlibitum. The $Na_3TA \cdot H_2O$ was tested in rats at SRI at 200, 2,000, and 20,000 ppm for a 24-month period. It was also tested in rats at LBI at 7,500 and 15,000 ppm and in mice 2,500 and 5,000 ppm using 18-month feeding periods for both species. The NTA was tested in rats and mice at LBI at 7,500 and 15,000 ppm for the 18-month period. The numbers of animals used in tests at SRI were 24 of each sex for each dose group and for the controls; at LBI, 50 of each sex for each dose group and 20 of each sex for the controls. Since equimolar quantities of $Na_3NTA \cdot H_2O$ and NTA were not used, given concentrations of $Na_3NTA \cdot H_2O$ represented 30% less NTA than did equal concentrations of the free acid.

Average weights attained by high-dose groups of rats and mice were consistenly lower than those of control groups. Less difference was observed with the low-dose groups. Survival, however, was not decreased by the compounds administered, except in rats given 20,000 ppm $Na_3NTA \cdot H_2O$.

Lesions of the urinary tract were found in most treated groups of both rats and mice. They were characterized especially in the high-dose groups, by primary tumors of epithelial origin. These tumors were particularly signficant since they were not found in the urinary tract of the control mice and only rarely occur spontaneously in the strains of animals on test. Lesions of the urinary tract were also characterized by hydronephrosis and/or nephritis in high-dose rats and by nephritis in both high- and low-dose mice.

Statistical evidence of the carcinogenicity of $Na_3NAT \cdot H_2O$ and NTA was provided by incidences of tumors at different sites in the urinary tract. For example, among animals given 20,000 ppm $Na_3NTA \cdot H_2O$ at SRI, tumors of the kidney occurred in male (treated, 9/24; untreated, 0/24; P=0.001) and female (treated, 4/24; untreated, 0/24; P=0.054) rats; tumors of the ureter, in male (treated, 8/24; untreated, 0/24; P=0.002) and female (treated, 6/24; untreated, 0/24; P=0.011) rats; and tumors of the bladder, in female rats (treated, 5/24; untreated, 0/22; P=0.031). Similarly, among animals given 15,000 ppm NTA at LBI, tumors of the bladder occurred in female rats (treated, 12/48; untreated, 0/18; P=0.014) and tumors of the kidney occurred in male mice (treated, 24/44; untreated, 0/20 P <0.001). Additional tests at LBI, using 15,000 and 7,500 ppm $Na_3NTA \cdot H_2O$ and 7,500 ppm NTA in male and female rats, 15,000 and 7,500 ppm $Na_3NTA \cdot H_2O$ and 7,500 ppm NTA in male mice, also induced tumors of the urinary tract, but in numbers too low to be statistically significant. Metastatic tumors, appearing to have arisen from primary tumors of the urinary tract, were found in 5/24 male and 5/24 female rats given 20,000 ppm $Na_3NTA \cdot H_2O$ at SRI and in one male rat given 15,000 ppm NTA at LBI; none were found in rats given lower doses or in mice.

Thus, NTA and $Na_3NTA \cdot H_2O$ were shown to be carcinogenic to the urinary tracts of both rats and mice at the higher doses tested. Lower doses, as delineated in this report, did not induce significant numbers of such lesions.

COMBINED MODALITY COMMITTEE

Cancellation of Meeting

Notice is hereby given of the cancellation of the meeting of the Combined Modality Committee, National Cancer Institute, National Institutes of Health, May 31-June 1, 1977, which was published in the FEDERAL REGISTER on May 6, 1977 (42 FR 23175).

Dated: May 11, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

[FR Doc.77-14121 Filed 5-17-77;8:45 am]

STUDY SECTIONS

Amended Notice of Meetings

Notice is hereby given of a change in the meeting date, time or place of the following National Institutes of Health Study Sections which were published in the FEDERAL REGISTER on May 6, 1977 (42 FR 23176-77).

The Medicinal Chemistry A Study Section was to have met in La Jolla Village Inn, La Jolla, CA, but will meet at the Town and Country Hotel, San Diego, CA, June 16-19, 1977 at 9 a.m., the same dates and time for which it was originally scheduled. The meeting will be open to the public for approximately one hour at the beginning of the first session of the first day of the meeting.

The Microbial Chemistry Study Section was to have met in Building 31, Room 8, C-Wing, Bethesda, MD, but will meet at the Holiday Inn, Bethesda, MD, June 16-18, 1977 at 8:30 a.m., the same dates and time for which it was originally scheduled. The meeting will be open to the public for approximately one hour at the beginning of the first session of the first day of the meeting.

The Neurology A Study Section was to have met June 1-4, 1977, but will meet June 1-3, 1977 at 9 a.m. at Building 31, Room 4, A-Wing, Bethesda, MD, the same location for which it was originally scheduled. The meeting will be open to the public for approximately one hour at the beginning of the first session of the first day of the meeting.

The Physiological Chemistry Study Section will meet as scheduled June 9-11, 1977 at 9 a.m. at the Embassy Row Hotel, Washington, DC. However, they will hold an additional session on June 8, 1977, at 7 p.m. until adjournment at the Embassy Row Hotel, Washington, DC. The open portion of this meeting will be held on June 9, 1977, at 9 a.m. for approximately one hour.

Dated: May 12, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

[FR Doc.77-14124 Filed 5-17-77;8:45 am]

NEW FINDINGS ON THE COMPLEXITY OF NUCLEIC ACIDS IN VIRAL GENOMES

Notice of Workshop

Notice is hereby given of a Workshop on New Findings on the Complexity of Nucleic Acids in Viral Genomes sponsored by the Experimental Virology Study Section, University of Wisconsin, Madison, Wisconsin, June 16, 1977, from 8:30 a.m. to adjournment.

Further information may be obtained from Dr. Eugene Zebovitz, Executive Secretary, Experimental Virology Study Section, Westwood Building, Room 206, telephone 301/496-7474.

This workshop will be open to the public. Attendance by the public will be limited to space available.

Dated: May 11, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

SICKLE CELL DISEASE ADVISORY COMMITTEE

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Sickle Cell Disease Advisory Committee, National Heart, Lung, and Blood Institute, June 23 and 24, 1977. The meeting will be held in Conference Room 10, C-Wing, Building 31, National Institutes of Health, Bethesda, Maryland 20014. The entire meeting will be open to the public from 8:30 a.m. to 5 p.m. on both days, to discuss recommendations on the implementation and evaluation of the Sickle Cell Disease Program. Attendance by the public will be limited to space available.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, NHLBI, NIH, Building 31, Room 5A03, (301) 496-4236, will provide summaries of the meeting and rosters of Committee members.

Mr. Howard F. Manly, Executive Secretary, Sickle Cell Disease Advisory Committee, NHLBI, NIH, Building 31, Room 4A29, (301) 496-6931, will furnish substantive program information.

Dated: May 11, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

Office of the Secretary

SOCIAL SECURITY ADMINISTRATION

Statement of Organization, Functions and Delegations of Authority

Part S (fomerly Part 4) of the Statement of Organization, Functions and Delegations of Authority for the Department of Health, Education, and Welfare contains the Statement of Organization, Functions and Delegations of Authority for the Social Security Administration (SSA). Sections SG.00, SG.10 and SG.20 (formerly sections 4-06-00 through 4-06-20, published at 40 FR 36612-13 on August 21, 1975) describe the Mission, Organization and Functions for SSA's Bureau of Hearings and Appeals (BHA). Notice is hereby given that all references to Hearing Examiners—Supplemental Security Income in sections SG.00, SG.10 and SG.20 are eliminated. In addition, section SG.20I of the BHA material is hereby amended to reflect the abolishment of BHA's Regional Development Centers and certain minor editorial changes. The revised material reads as follows:

Sec. SG.20 *Bureau of Hearings and Appeals*—(Functions).

I. *The Office of the Regional Chief Administrative Law Judge (SG FI/SG FX).*—A. Represents the Bureau Director at the regional level with respect to all matters pertaining to the hearings process.

B. Plans, organizes, and administers a regional program for scheduling and conducting independent and impartial hearings on appealed determinations involving claims for retirement, survivors and disability insurance benefits under title II of the Social Security Act as amended (the Act); health insurance benefits under title XVIII of the Act; and supplemental security income benefits under title XVI of the Act, as well as disability and survivors benefits under the "Black Lung" Act.

C. Provides substantive guidance, administrative direction and leadership to Administrative Law Judges and their staffs.

D. Coordinates operations and administrative activities with the HEW Regional Office; other SSA components; State agencies; and other parties, as required.

E. Exercise general administrative supervision over Administrative Law Judges and their supporting staffs within the region.

Dated: May 3, 1977.

JOHN D. YOUNG,
Assistant Secretary for Management and Budget.

Public Health Service

OFFICE OF THE ASSISTANT SECRETARY FOR HEALTH, OFFICE OF ADMINISTRATIVE MANAGEMENT, ADMINISTRATIVE SERVICES CENTER

Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HA, of the Statement of Organization, Functions and Delegations of Authority for the Department of Health, Education, and Welfare, entitled Office of Assistant Secretary for Health (38 FR 18571-74, 7/12/73, as amended by 40 FR 55889, 12/2/75) is amended to reflect the establishment of the Division of Public Health Service Claims within the Administrative Services Center, Office of Administrative Management.

Section HA-B, Organization and Functions, is changed as follows: Under the Office of Administrative Management (HAU), Administrative Services Center (HAU1), insert the following statement after the statement for the Division of Materiel Management (HAU13):

Division of Public Health Service Claims (HAU14). The Division Director is responsible for and coordinates a total PHS claims program within authorities delegated by the Department for claims filed against the Government under the Federal Tort Claims Act, Military Personnel and Civilian Employees' Claims Act, and the Small Claims Act; debt claims by the Government under the Federal Claims Collection Act; and claim filing procedures and initial processing of claims under new health programs such as the Swine Flue Immunization Program. This Division: (1) investigates and evaluates claims; (2) recommends disposition of claims to the Department Claims Officer or undertakes disposition within delegated authority; (3) procures and provides official records, documents and materials as may be required by the Office of General Counsel and the Department of Justice in defense of suits against the Government; (4) obtains medical evaluations; and assists, where necessary, in arranging for the appearance of witnesses with respect to malpractice claims and litigation; (5) provides professional advice and technical direction to PHS personnel on claim functions; (6) cooperates with Office of General Counsel, Departments of Justice and State, and other public and private organizations concerned with administrative claims and tort litigation; (7) organizes and provides training for medical and paramedical personnel in the legal aspects of hospital records and medical professional liability; and (8) develops, recommends and implements claims procedures.

Dated: May 3, 1977.

JOHN D. YOUNG,
Assistant Secretary for Management and Budget.

QUALIFIED HEALTH MAINTENANCE ORGANIZATION

Determination

Notice is hereby given, pursuant to 42 CFR 110.605, that in the month of April 1977 the following entity has been determined to be a qualified health maintenance organization under section 1310(d) of the Public Health Service Act (42 U.S.C. 300e-9(d)):

QUALIFIED HEALTH MAINTENANCE ORGANIZATION

NAME, ORGANIZATIONAL TYPE, ADDRESS, SERVICE AREA, AND DATE OF QUALIFICATION

(Transitionally Qualified Health Maintenance Organization: 42 CFR 110.603(b))

1. Intergroup Prepaid Health Services, Inc. (Individual Practice Association type, see section 1310(b)(2)(A) of the Public Health

Service Act), CNA Plaza, Chicago, Illinois 60685. Service area: Illinois—Counties of Champaign, Cook, DuPage, Grundy, Kane, Kendall, Lake, McHenry, Peoria, Tazewell, Will, and Woodward. Indiana—Counties of Lake and Porter. Date of qualification: April 18, 1977.

Files containing detailed information regarding qualified health maintenance organizations will be available for public inspection between the hours of 8:30 a.m. and 5 p.m., Monday through Friday, at the Office of Quality Standards, Office of the Assistant Secretary for Health, Department of Health, Education, and Welfare, Room 14A-27, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Questions about the review process or requests for information about qualified health maintenance organizations should be sent to the same office.

Dated: May 9, 1977.

WILLIAM B. MUNIER,
Director,
Office of Quality Standards.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[M 34079]

MONTANA

Amendment to Application

MAY 11, 1977.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended, 30 U.S.C. 185 (1970 Supplement V), Kansas-Nebraska Natural Gas Company, Inc., has applied for an amendment to their application for a right-of-way for a natural gas gathering system across the following Federal lands:

PRINCIPAL MERIDIAN, MONTANA

T. 33 N., R. 32 E.,
Sec. 26, S½SW¼; and
Sec. 35, SE¼SE¼.

This amendment consists of a tie-in site 100 feet by 100 feet and 1,286.23 feet of pipeline in Sec. 26, and 1,569.47 feet of pipeline in Sec. 35. This entire system will be used to gather natural gas from wells in Phillips County, Montana, and convey it to an existing transmission line.

The purpose of this notice is to inform the public that the Bureau will proceed with consideration of whether the application and the amendment should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, Drawer 1160, Lewistown, Montana 59457.

ROLAND F. LEE,
Chief, Branch of Lands and Minerals Operations.

[NM 30517 and 30518]

NEW MEXICO

Applications

MAY 11, 1977.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Transwestern Pipeline Company has applied for one 6-inch and one 4-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 16 S., R. 25 E.,
Sec. 21, W½SE¼ and SE¼SE¼;
Sec. 27, SW¼NW¼ and SW¼.
T. 18 S., R. 26 E.,
Sec. 12, E½NE¼ and NE¼SE¼.
T 18 S., R. 29 E.,
Sec. 7, lots 3 and 4;
Sec. 18, NE¼SW¼.

These pipelines will convey natural gas across 2.576 miles of national resource lands in Eddy County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Mangement, P.O. Box 1397, Roswell, New Mexico 88201.

NEW MEXICO

Application

MAY 11, 1977.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Natural Gas Pipeline Company of America has applied for one 4-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 20 S., R. 28 E.,
Sec. 29, E½SW¼ and NW¼SE¼.

This pipeline will convey natural gas across 0.461 of a mile of national resource land in Eddy County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested person desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, New Mexico 88201.

[OR 5508]

OREGON

Order Providing for Opening of Public Lands

1. In an exchange of lands made under the provisions of section 8 of the Act of June 28, 1934, 48 Stat. 1269, 1272, as amended and supplemented, 43 U.S.C. 315g (1964), the following lands have been reconveyed to the United States:

WILLAMETTE MERIDIAN

T. 24 S., R. 14 E.,
Sec. 33, NW¼NW¼;
Sec. 34, NE¼NW¼;
Sec. 36, NE¼SW¼, S½SW¼, and SE¼.
T. 24 S., R. 15 E.,
Sec. 36, NW¼NE¼, S½NE¼, NW¼, NW¼SW¼, SE¼SW¼, and SE¼.
T. 25 S., R. 15 E.,
Sec. 16.
T. 24 S., R. 16 E.,
Sec. 36, N½NE¼, SE¼NE¼, NW¼, and S½.
T. 20 S., R. 16 E.,
Sec. 36, N½NE¼, and SE¼NE¼.
T. 27 S., R. 19 E.,
Sec. 25, SE¼.
T. 29 S., R. 22 E.,
Sec. 16.
T. 34 S., R. 22 E.,
Sec. 36.
T. 35 S., R. 23E.,
Sec. 36, lots 1, 2, 3, and 4, N½, and N½S½.
T. 39 S., R. 23 E.,
Sec. 16, except 4.33 acres in highway right-of-way conveyed to the State of Oregon by deed recorded June 21, 1950, at Page 315, Book 108, Record of Deeds, Lake County, Oregon.
T. 39 S., R. 24 E.,
Sec. 16, lots 2, 3, and 6.
T. 30 S., R. 25 E.,
Sec. 16.
T. 29 S., R. 26 E.,
Sec. 16;
Sec. 36.

The areas described aggregate, after making the aforesaid exception, 6,998.92 acres in Lake and Harney Counties.

2. The subject lands consist of widely scattered parcels generally located in northern and eastern Lake County and in western Harney County. Elevation ranges from 4,000 to 6,500 feet above sea level, and the topography varies from generally flat to steep and rocky. Vegetation consists primarily of sagebrush and native grasses with juniper and ponderosa pine on a few parcels. In the past, the lands have been used for livestock grazing purposes, and some parcels have wildlife habitat and outdoor recreational values. The lands will be managed, together with adjoining national resource lands, for multiple use.

3. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the lands described in paragraph 1 hereof are hereby open to operation of the public land laws, including the mining laws (Ch. 2, Title 30 U.S.C.) and the mineral leasing laws. All valid applications received at or prior to 10 a.m., June 16, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

VIRGIL O. SEISER,
Acting Chief, Branch of Lands and Minerals Operations.

[FR Doc.77-14168 Filed 5-17-77;8:45 am]

[Cheyenne 041555—Amend.]

WYOMING

Application

MAY 10, 1977.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Northern Utilities, Inc., of Casper, Wyoming filed an application for an amendment to existing right-of-way Cheyenne 041555 to construct a sixteen inch natural gas pipeline for the purpose of transporting natural gas across the following described national resource lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 34 N., R. 89 W.,
Sec. 31, Lot. 3.
T. 33 N., R. 90 W.,
Sec. 4, Lot 1.
T. 34 N., R. 90 W.,
Sec. 33, SE¼SE¼;
Sec. 34, SW¼SW¼;
Sec. 35, S½S½.

Northern Utilities, Inc., seeks to amend its existing right-of-way No. C-041555 the primary purpose being to construct, operate, and maintain approximately 17,000 feet of 16" natural gas pipeline commencing in the NW¼ of section 4, T. 33 N., R. 90 W., and extending to the east a distance of 17,000 feet to terminate in the SW¼ of sec. 31, T. 34 N., R. 89 W., all in Fremont County, Wyoming. This pipeline will be qualified by pressure testing and tied-in to existing pipelines.

There are presently three natural gas pipelines located in the right-of-way (C-41555). One pipeline is a bare ten inch pipeline, the second is a bare fourteen inch pipeline, and the third is a coated sixteen inch pipeline. It is not economically or practically feasible to up-grade the existing bare pipeline and, therefore, it is necessary to replace them with a single sixteen inch pipeline.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyoming 82301.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Indicate by one)
☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
This is a request for a permit [redacted] to allow scientific study of the eastern timber wolf (Canus lupus lycaon) involving procedures listed in the attachment (some of which was previously carried out under permit no. PRT-8-50-C).

3. APPLICANT, (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested)
Patuxent Wildlife Research Center
U. S. Fish and Wildlife Service
Laurel, Maryland 20811

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING

	HEIGHT	WEIGHT
☐ MR. ☐ MRS. ☐ MISS ☐ MS.		
DATE OF BIRTH	COLOR HAIR	COLOR EYES
PHONE NUMBER WHERE EMPLOYED	SOCIAL SECURITY NUMBER	
OCCUPATION		

ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION
Wildlife research to enhance the status of endangered and threatened species by scientific research.

NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.
Lucille F. Stickel, Director, 301-776-4880

IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED
N/A

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED
Primarily the Carlos Avery Wildlife Management Area game farm facilities, (Minnesota Department of Natural Resources), Forest Lake, Minnesota, but possibly also the U.S. Veterans Administration Hospital, Minneapolis; the St. Paul Zoo in St. Paul, Duluth Zoo, in Duluth, or the Minnesota State Zoo in Apple Valley, Minnesota.

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☒ YES ☐ NO
(If yes, list license or permit numbers)
PRT 8-85-C, PRT 8-169-C, PRT 2-913-BA, PRT 8-86-B-C, PRT 8-50-C, PRT 2-197

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☒ YES ☐ NO
(If yes, list jurisdictions and type of documents)
Permit issued by the State of Minnesota. No. 2588.

9. CERTIFIED CHECK OR MONEY ORDER (If applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF
$

10. DESIRED EFFECTIVE DATE
May 1, 1977

11. DURATION NEEDED
December 31, 1979

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 13.12(a)) MUST BE ATTACHED, IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED.

Memorandum

PRT 2-695 C07

TO : Chief, Permit Branch
Federal Wildlife Permit Office

DATE: April 19, 1977

FROM : Director, Patuxent Wildlife Research Center

SUBJECT: Additional information needed for wolf research permit

The following additional information is provided in response to your request of April 12, 1977, concerning the processing of FWS/WPO PRT 2-695-C07.

Item 1. Shipping containers

The wolf will be transported in either of two ways: (1) anesthetized and muzzled in aircraft or vehicles, or (2) for longer distances in canine transport cages (9 gauge welded wire, approximately 44" x 27" x 22") with floor. Food will not be supplied during transportation for the safety of the animals, and water will be supplied as necessary to caged animals.

Item 2. Importation from Canada

Importation from Canada will be through a port of entry unless later requirements dictate otherwise, in which case an exemption will be sought at that time.

Item 3. Permits from Canada

Your instructions have been provided Dr. David Mech and he will make use of them in requesting necessary permits from Canada.

Thank you for guidance in indicating the types of information needed for the issuance of a permit to conduct research on endangered wolves.

Lucille F. Stickel

Lucille F. Stickel

APPLICATION FOR AN ENDANGERED SPECIES PERMIT FOR SCIENTIFIC PURPOSES

The following information is as requested, item for item, under Section 17.22 of 50 CFR 17 (p. 14):

(1) Eastern timber wolf (*Canis lupus lycaon*). Gray wolf (*Canis lupus*). Application is for (A) the live-trapping, anesthetizing, ear-tagging, radio-collaring, blood sampling, urine-sampling, biopsying, hair-sampling, fecal-sampling, saliva-sampling, dye-marking (for identification), radio-tracking and observing (from the ground and air), photographing, and otherwise non-fatally investigating alages and both sexes of as many wolves in the wild as is necessary to fulfill the obligations of official USFWS studies; and temporary processing, holding, transporting, (inter and intrastate) and releasing these animals back into the wild, in their original range; and (B) holding captive and observing, anesthetizing, blood sampling, dyeing, ear-tagging, tattooing, urine-sampling, biopsying, hair-sampling, saliva-sampling, fecal-sampling, photographing, and otherwise studying as many pre-act wolves and their offspring as is necessary to fulfill the obligations of official USFWS studies; and (C) holding captive and observing, transporting, anesthetizing blood-sampling, dyeing, ear-tagging, tattooing, urine-sampling, biopsying, hair-sampling, saliva-sampling, fecal-sampling, photographing, and otherwise studying up to 30 post-act, captive-raised wolves of all ages and both sexes; and (D) live-trapping in the wild, anesthetizing, transporting, holding captive, and studying as above, up to 30 wild wolves and their offspring, of all ages and both sexes; and (E) exporting, importing, and releasing into the native range of the subspecies up to 50 live-trapped wild wolves of all ages and both sexes to and from Canada and the U.S., for experimental studies or reintroduction attempts; and (F) the collecting, transporting, and holding of scientific specimens from any wolf carcass.

(2) All animals mentioned above are still in the wild except: 2 wild-caught and held under Permit PRT-8-50-C and Amendment No. 1 and various pre-act captive-raised individuals and their offspring.

(3) All wolves studied in captivity would be captive-raised except when circumstances require wild-caught wolves only.

(4) The two wild-caught wolves mentioned above were live-trapped in Minnesota, USA.

(5) Primarily the Carlos Avery Wildlife Management Area game farm facilities (Minnesota Department of Natural Resources), Forest Lake, Minnesota; but also possibly the U.S. Veterans Administration Hospital, Minneapolis, Minnesota, the St. Paul Zoo, St. Paul, Minnesota, Duluth Zoo, Duluth, Minnesota, or the Minnesota State Zoo, Apple Valley, Minnesota.

(6) (i) See attached diagrams; (ii) will be cared for by professional biologists, graduate students, and/or game farm or zoo personnel, all of whom have technical expertise in the care, raising, handling, feeding and other requirements of the species; (iii) will cooperate in a captive breeding program and contribute data to a studbook; (iv) see diagram; watering, feeding, and care will be provided as in (6-ii) above; and (v) 4 animals lost during last 5 years as follows:

1. one wolf killed its kennel-mate
2. one wolf lost to oral anesthetic.

3. two wolves were shot after escape.

Use of oral anesthetic has been discontinued, kennels have been reinforced.

(7) See work units—Endangered Wildlife Research Program, Patuxent

(8) Same as 7; any leftover wolves will be donated to other studies, to zoos, or will be humanely disposed of and specimens collected for scientific purposes.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-695-C07; please refer to this number when submitting comments. All relevant comments received on or before June 17, 1977, will be considered.

Dated: May 13, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

ENDANGERED SPECIES PERMIT

Notice of Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant:
University of Florida
Department of Zoology
611 Bartram Hall
Gainesville, Florida 32611.

OMB NO. 42-R1673

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE
FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Indicate only one)
☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
To determine habitat occupancy and boundaries of sea turtles along the fringe reef system; individuals will be tagged. These techniques require captive and short-time restraint.

3. APPLICANT: (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested)
Thomas Carr (904) 392-1250
511 Bartram Hall
Department of Zoology
University of Florida
Gainesville, Florida 32611

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:

	HEIGHT	WEIGHT
☒ MR. ☐ MRS. ☐ MISS ☐ MS.	6'2"	175 lbs.
DATE OF BIRTH	COLOR HAIR	COLOR EYES
March 15, 1948	blonde	blue
PHONE NUMBER WHERE EMPLOYED	SOCIAL SECURITY NUMBER	
(904) 392-1250	267-82-7437	
OCCUPATION		
Environmental consultant		

ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT
N/A

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION
N/A

NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC. (904) 392-1250
Dr. Archie Carr, Principal Investigator

IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED
N/A

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED
Culebra Island, Puerto Rico

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☐ YES ☒ NO
(If yes, list jurisdictions and type of documents)

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☐ YES ☐ NO
(If yes, list jurisdictions and type of documents)

9. CERTIFIED CHECK OR MONEY ORDER (If applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF
$ N/A

10. DESIRED EFFECTIVE DATE
June 1976

11. DURATION NEEDED
July 1977

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 13.12(a)) MUST BE ATTACHED, IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED.
Section 17.22 Permits for scientific purposes or for the enhancement of propagation or survival.

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

(6/74)

Section 17.22 Permits for scientific purposes or for the enhancement of propagation or survival.

(1) Those species to be covered by Permit are as follows: Green turtle (*Chelonia mydas*), Hawksbill turtle (*Eretmochelys imbricata*) Loggerhead turtle (*Caretta caretta*), Leatherback turtle (*Dermochelys coriacea*), Ridley turtle (*Lepidochelys kempii*). *Sex and age groups to be captured:*

Both sexes will be taken.

All age groups encountered will be tagged and code-marked. The prevalent age groups are the yearling to three-year-old occupants of the reef-system habitats.

(2) All specimens being studied are still in the wild.

(3) To be taken underwater, to be netted, and to be tagged while nesting on the beach.

(4) N/A.

(5) Not to be removed from Culebra area.

(6) N/A.

(7) See attached Memorandum.

(8) (i) To capture, measure and tag all species of marine turtles found in Culebra Island area.

(ii) Individuals will be captured by hand, using diving gear, by nets or when found on beaches nesting.

(iii) All activities covered by permit are for the purpose of completing contract for the U.S. Dept. of the Interior, Fish and Wildlife Service entitled Ecology, Seasonality and Populations Levels of Marine Turtles and Terrestrial Reptiles at Culebra Island.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2–725–07; please refer to this number when submitting comments. All relevant comments received on or before June 17, 1977, will be considered.

Dated: May 13, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☒ YES ☐ NO
(*If yes, list jurisdictions and type of document(s)*)
Export permit from USSR (Moscow Zoo has required permit)

9. CERTIFIED CHECK OR MONEY ORDER (*if applicable*) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF $

10. DESIRED EFFECTIVE DATE: July 20, 1977

11. DURATION NEEDED: until terminated

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (*See 50 CFR 13.12(a)*) MUST BE ATTACHED. IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED. See attached information CFR 17.22 this permit request is for both Endangered Species and Conv. Must cover the return of the carcass in case the crane dies.

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (*In ink*) Mildred L. Zantow. Administrator | DATE April 18, 1977

3-200 16/74 GPO 885-042

CFR 17.22 Submitted under "Rules and Regulations" Title 50, Federal Register, Endangered and Threatened Wildlife and Plants.

1. To import 1 Japanese Crane (female) (*Grus japonensis*) for propagation purposes.

2. Crane is now in captivity having been removed from the wild. This crane is the possession of the Moscow Zoological Park, Moscow, Russia.

3. The only supply of these cranes is from the wild or from collectors who have breeding stock in their possession.

4. The exact location of removal from the wild is not known at the International Crane Foundation.

5. The crane covered by this permit is in the possession of the Moscow Zoological Park. The subject crane will be on loan to the International Crane Foundation for breeding purposes and progeny will be divided and returned to Russia.

6. (i) ICF has well-built, modern facilities for keeping and raising cranes. There is a well-appointed incubator and brooder room designed especially for hatching and rearing very young cranes, as well as a specially designed building for raising older crane chicks. A nine acre field is available for immature and non-breeding cranes. There is finally a series of large, specious pens for individual pairs of cranes (see photographs already on file at USDI). Each pen has a 15' x 15' shelter where the birds are protected from wind, harsh weather and intrusion from wild predators. Pens are covered with net to prevent birds from flying into the pens or the captive bird from trying to escape.

(ii) The staff at ICF has had many years experience breeding and raising cranes. ICF was founded in 1973 and since that time more than 45 cranes have been hatched and reared at its facilities. Before that time, ICF's director of propagation, George Archibald, spent more than nine years working with cranes, including hatching and raising young birds.

(iii) The International Crane Foundation maintains at present several contracts with zoos in this country and abroad for trade and cooperative breeding programs for cranes. ICF is always willng to participate in breeding programs and files data on its cranes with the studbook of Dr. Asakura at the Tama Zoological Park in Tokoyo, Japan.

(iv) This crane will be transported in a crate with plenty of room and air for comfort. This type of crate has been used unversally for transportng cranes. This crane will be flown from Moscow, Russia directly to New York and will not need provisions for food and water enroute. The Globe Customs Broker in New York will transport the crane immediately to the quarantine facility in Clifton, NJ where food and water will be provided.

(v) Japanese Cranes (*Grus japonensis*) have been kept at ICF and we have had 4 fatalities as follows:

No. 1. Female, adult. Killed by male Japanese Crane during acclimatization period.

No. 2. Male, adult. Died of liver carcinoma.

No. 3. Male, adult. Died of shock following an operation to repair an injured wing.

No. 4. Chick, unsexed. Died of hemorrhage at age of 3 weeks.

Fatality No. 1 might possibly have been avoided had the female been separated for a longer time from the male before the birds were introduced to each other. However, they were separated for one month previous to the death of the female and showed no obvious aggression when placed in adjoining pens. Male Japanese crane No. 2 died shortly after of a liver carcinoma. It is possible that his agressiveness was the result of chronic illness.

The International Crane Foundation has bred and raised 5 Japanese chicks.

Progeny from the subject Japanese Crane will be divided per loan agreement and those belonging to USSR will be shipped to them, and ICF portion will be used for restocking back to the natural habitats.

Dr. George Archibald is a PhD from Cornell University, New York. He has studied and researched cranes in many countries of the world. At the present time he has 14 of the 15 species of cranes in his care at the International Crane Foundation. Dr. Archibald is considered an authority on crane care and propagation.

Permission is requested to export the carcass of this crane in the event it should die while on loan to the International Crane Foundation. The Moscow Zoological Park requests the remains be returned to them.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2–761–C07; please refer to this number when submitting comments. All relevant comments received on or before June 17, 1977, will be considered.

Item 12

Attachment to Permit Application for Gila Trout

by

John N. Rinne

As listed under 17.22 in Title 50, Part 17, Subpart C, "Rules and Regulations", Federal Register, 40(188): 44424, Friday, September 26, 1975.

Item.—1. Gila trout; *Salmo gilae* Miller.

Activity	Number	Age	Sex
Take and return to stream alive in habitat evaluation.	(1)	All	Both.
Sacrifice for food habit, chromosome, and taxonomic studies.	200	All	Do.
Take alive for temperature tolerance.	50	All	Do.

[1] Estimated hundreds.

2. i. All Gila trout applied for in this application are yet in the wild.

3. Experience with capture and handling of several hundred Gila trout occurred during one week in summer 1976. This involved electrofishing, holding alive while measuring and weighing, and then returning fish alive to the stream. No mortality occurred.

The applicant has had extensive experience with collection and handling of fishes in the Southwestern U.S. and in East Africa (see reprints enclosed). Capture, handling, tagging, and release activities were conducted with about 10,000 individual fishes over a two-year period in Lake Victoria. In the past few months he has set up holding facilities (see enclosed photos of Forest Hydrology greenhouse) for rainbow trout, and other native, southwestern fishes.

4. Not applicable.

5. a. Address: Forest Hydrology Laboratory, Arizona State University, Tempe, Arizona 85281.

b. The forest Hydrology Laboratory greenhouse will, in part, house live specimens for temperature tolerance studies. In addition, Laboratories in the Life Sciences Center (ASU) will be used (see photographs enclosed for facilities). Sacrificed specimens will be deposited in the fish museum of the Department of Zoology at Arizona State University and/or a major recognized musuem in the U.S.

6. i. The new life sciences building on the ASU campus is equipped with many aquaria, forced air, controlled temperature and photoperiod units, and backup generator facilities. The Forest Hydrology greenhouse is less elaborately equipped at present but will be designed to hold trout for short periods of time (see photos enclosed).

ii. See item 3 above. In addition, Dr.(s) W. L. Minckley and S. D. Gerking of the Zoology Department at Arizona State University who have had extensive experience in handling and experimentation with live fishes will be consulted for transportation, handling, holding activities, and experimentation with Gila trout.

iii. Not applicable.

iv. Holding tanks and aquaria are constructed of fiberglass and glass (see photographs enclosed). Transportation of fishes from the field to the lab will be in styrofoam or thermos coolers with aeration provided by DO tabs or pumps. Fishes will be held in tanks and raceways and cared for and monitored by the applicant and technicians under his advice and that of the professors listed above.

v. None involved.

7. Personnel involved with handling, collecting, and holding of Gila trout will be the applicant and individuals under his immediate supervision. These will include station technicians, professors in the field of genetics and cytology in the ASU Department of Zoology and as indicated above, Dr.(s) Minckley and Gerking who will serve as consultants.

Copies of the study plan prospectus, study plan, and pertinent correspondence are attached. The study will begin upon granting of a permit and last until 1980.

8. Justification statement: The above research activities by the applicant at the Tempe Station of the Rocky Mountain Forest and Range Experiment Station is justified on the basis of Section 7 of the Endangered Species Act of 1973. This species of fish inhabits only National Forests, Wilderness, and Primitive areas. The Rocky Mountain Station as a research branch of the U.S. Forest Service has the responsibility to provide information which will aid in protection, maintenance, and enhancement of this natural resource.

i. These are included within the study plan (enclosed)

ii. These are included within the study plan (enclosed)

iii. These are included within the study plan (enclosed)

iv. All specimens of Gila trout sacrificed will ultimately be deposited in the Arizona State University or another major U.S. fish museum. Fish alive following temperature tolerance studies will be returned to the wild. Museums (preserved material) and localities (live fish) selected will follow directives of the Recovery Team for this species and the State Game and Fish Departments.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-649-07; please refer to this number when submitting comments. All relevant comments received on or before June 17, 1977 will be considered.

Dated: May 13, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

(6/74)

PARK COMMISSION,
Milwaukee County, Wis.,
January 25, 1977.

DIRECTOR,
Department of the Interior,
U.S. Fish and Wildlife Service,
Washington, D.C. 20240.

DEAR SIR: Pursuant to the Code of Federal Regulations, Title 50, we hereby respectfully apply for a permit to transfer and keep endangered wildlife for the Milwaukee County Zoo.

In accordance, and to comply with all regulations affected, we include the following documentations:

1. Original of Form 3-200, Federal Fish and Wildlife License/Permit Application, duly completed and signed by the Zoo Director.

2. Official name and address: The Milwaukee County Zoo, 10001 West Bluemound Road, Milwaukee, Wisconsin 53226.

3. Name of Zoo Director: George Speidel.

4. Name and scientific name of animals: 50 CFR Sec. 17.23 A-1. Two (2) male Cotton-top Marmoset (Saguinus oedipus), Born 12/21/74 and 12/27/75 at Rochester, NY. See attachment No. 1.

5. Copy of contract (letter) in which the Milwaukee County Zoo agrees to purchase 2.0 Cotton-top Marmoset from Kenneth J. Fess, Marmoset Breeding Farm, Rochester, NY. 50 CFR 17 Sec. 17.25 A-2. See attachment No. 2.

6. Purpose of the permit: To transport, exhibit and propogate the Cotton-top Marmoset at the Milwaukee County Zoo. 50 CFR 17 Sec 17.25 A-3.

7. The Cotton-top Marmosets were born on 12/21/74 and 12/27/75 at Rochester, NY. 50 CFR 17 Sec 17.23 A-5. See attachment No. 1.

8. Description and drawing where wildlife is to be held. 50 CFR 17 Sec 17.23 A-7 No. 1. See attachment No. 3.

9. The technical expertise: The Milwaukee County Zoo presently has: two (2) female Cotton-top Marmosets (Saguinus oedipus). There has been five (5) births of this species at the Milwaukee County Zoo in the past. 50 CFR 17 Sec 17.23 A-7 No. 2.

10. The Milwaukee County Zoo is willing to participate in breeding loans to other approved zoos as evidenced by the enclosed list of breeding loan animals. 50 CFR 17 Sec 17.23 A-3. See attachment No. 4.

11. Animals to be shipped via air carrier direct to Chicago via United Airlines, Flight #899, leaving Rochester at 10:15 a.m. and arriving at Chicago-O'Hare at 10:54 a.m. Animals will be picked up at O'Hare Field by Milwaukee County Zoo staff. 50 CFR 17 Sec 17.23 A-4. See attachment No. 2.

12. A report will be sent to the Director within ten days of receiving the animals covered in the permit. The Milwaukee County Zoo further agrees to report immediately any deaths or escapes, and also agrees to make the remains available to interested institutions for scientific use. 50 CFR 17 Sec 17.23 B-1 and B-2.

13. The desired effective date of permit is 30 days from application date.

14. I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13, of the Code of Federal Regulations and the other applicable parts in Subchapter B of Chapter I of Title 50, and I further certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement hereon may subject me to the criminal penalties of 18 U.S.C. 1001.

Dated this 25th Day of January, 1977

GEORGE SPEIDEL,
Zoo Director,
Milwaukee County Zoo.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-618-07; please refer to this number when submitting comments. All relevant comments received on or before June 17, 1977, will be considered.

Dated: May 13, 1977.
